- Zoning regulations, p. 292

REVIEW OF THE YEAR

THE SIXTY-SIXTH REPORT

Owing to the fact that the fiscal and business year of the Chamber of Commerce of the State of New York terminates with the regular meeting in the month of April, the Annual Report does not come from the press until the middle of each calendar year. The present Report is the sixty-sixth. This volume makes sixty-six which have been published since 1858, when the present form of a periodical presentation of the Chamber's yearly work and of the course of events in commerce and finance, was first adopted. The New York Chamber was first organized in 1768, but in the early days the practice of publishing annual reports was not common with organizations anywhere. For the benefit of those who are not familiar with this publication, it might be well to state that these sixty-six volumes present a continuous story of the commerce and trade of New York in a convenient and consecutive form. Furthermore, the period since 1858 is not covered this way in any other publication or series of publications. All the important statistics of commerce and trade at New York have been recorded each year. At the same time, owing to the fact that these Annual Reports contain the complete minutes of the Chamber, most of the important features of commercial history, pertaining both to local and national affairs, are touched upon. The general scheme of the first Annual Report issued has been carried through all its successors. Copies of this publication will be found in many of the leading public and college libraries through the United States.

THE YEAR IN BUSINESS

Part Second of the Annual Report is devoted to commerce and finance and is published also in a separate paper-covered volume. It contains special trade reports giving an annual review of the sugar, coffee, cocoa, tea, cotton, coal, tobacco, butter, cheese, eggs, petroleum, dry goods and iron trades. Each of these reviews is prepared by an expert in the trade upon which he writes. The student, business

man, and economist can find therein the important happenings of the business year in most of the country's prominent trades.

It has been the custom to make a few statements here descriptive of the economic and financial calendar year which has passed. In the review of 1922 the following was printed:

THE YEAR 1922

One of the year-end financial writers describes the year 1922 as one of revival, and 1921 as one of depression, while deflation marked the year 1920. Although the autumn of 1921 registered a beginning in industrial recovery, it was not until 1922 that it was generally recognized that conditions were unmistakably greatly improved.

In the newspaper headings reviewing the year may be found the following descriptive statements: "Rebirth of Prosperity Characterized 1922"; "Farm Products Moved by Rail in 1922 a Record"; "Active Year on New York Stock Exchange with Turn-over of \$262,472,100 Shares Compared with Record of \$320,046,100 in 1919"; "Rents in New York City Still at Peak Levels"; "Railroad Equipment Orders for 1922 Heaviest in Years"; "Steel Industry Has Busy But Not Highly Prosperous Year., Output Greater Than in 1921 by 75%"; "Activity in Building Trade Reaches Peak"; "Meat Packing Again on Profitable Basis"; "Efforts to Curtail Output of Rubber Plantations Aids Market for Time Being"; "First Half of 1922 a Period of Rough Weather for Manufacturers and Jobbers of Silk, But Last Half of Year Brings Relief"; "Raw Silk Imports Break All Records; Conditions Which Were Unpromising at the Beginning of the Year Followed by Rapid Recovery"; "Retailers Prosperous According to the Experience of Large Mercantile Organization"; "Grain Trade of 1922 One of Uncertainty"; "Nation's Business Leaders See Further Progress in 1923"; "Rail Executives Declare Transportation Restored to Normal"; "Wholesale Commodity Prices Reach Their Post-War Low in January, 1922, But Pointed Irregularly Upwards for Balance of Year, With Raw Material Leading Advance"; "Both Stocks and Bonds Higher During First Half of Year With Reaction Later"; "Labor Disputes Wax Keen During 1922, Three Great Strikes Mar Year's Progress"; "Foreign Trade Veers to Pre-War Status, Abnormal Trade Balances of 1916-1920 Disappear"; "Foreign Exchanges Show Much Irregularity During Past Year, Sterling Rises Persistently on Better Trade and the Financial Position as the Mark Collapses and Drags Down the French Franc"; "Severity of Depression Grows in Ocean-Shipping Business, World's Tonnage Increases and Huge Surplus Depresses Rates and Ship Values"; "Strikes of Railroad Shopmen and Coal Miners Were Adverse Influences Hampered Railroad Managements"; "Oil Coal Miners Were Adverse Influences Hampering Railroad Managements"; "Oil Shares Boom of 1922 Began Over the Counter, Buyers in Unlisted Security Market Also Had Benefit of First Stages of Advance in Public Utility Stocks"; "Big Buying Wave Lifts Oil Stock."

THE YEAR 1923

The prosperity of 1922 which prevailed in most lines of activity continued through the first few months of 1923. Toward the end of May, however, the opinion became fairly prevalent that a trade reaction had started in. This trade reaction was later characterized by the financial writers as a mild recession. The chief factors which kept business so good are considered to have been the boom in building, the large demand for automobiles and heavy purchases of materials by the railroads and other public utilities.

Commodity prices during the year became comparatively

stable. There was a slight rise up until April, 1923, after which prices eased off and later continued on a fairly even level. Foreign exchange was looked upon as having had a very poor year. Owing to the Ruhr occupation and foreign trade inactivity, exchanges ruled at lower rates.

The farming situation brightened during 1923. It is considered that the condition that developed in 1920 remained acute until 1923 was well under way. The reason for the optimism which developed later was that farm crops were estimated to have a market value of nearly a billion dollars more than in 1922.

The general public, shippers and railroad officials show in various ways the fact that plans for railroad consolidations were more and more meeting with their approval. Many important announcements were made during the year in connection with such plans. In June, 1923, the security and commodity markets became virtually demoralized. Although production continued on the large scale established in previous months, consumers and buyers of materials held off placing new orders. This had a very depressing effect on prices. The decline continued in July. August was a somewhat better month, but in September liquidation was renewed. During October stock prices reached the lowest levels for the year. The agricultural markets, however, ruled considerably higher. During November and December prices were better, especially on the Stock Exchange.

Taking it all in all, it may be said that 1923 was the best business year which the country had experienced in the last ten years. During these years there have been business booms, but they were not based on healthy conditions.

**STATISTICAL
TABLES**

As in former years, the statistical tables published in Part Second appear with very few changes. A few new tables have been added and some old ones slightly enlarged, owing to the increased public interest in the particular subject covered.

**MEETINGS
OF THE
CHAMBER
1923-1924**

During the period from May, 1923, to April, 1924, inclusive, which constitutes the business year of the Chamber of Commerce of the State of New York, the Committees of the Chamber and active executives were occupied as usual with the many problems which confronted the Nation and the community of the

City of New York. According to custom, a brief statement is herewith made of the proceedings of the various meetings held during this period. The regular monthly meetings of the Chamber are held at noon on the first Thursday of the month. The special meetings are held according to the requirements of the emergency at hand. During the summer months of July, August and September, no regular meetings are held.

May 3rd.—At the meeting in May the Annual Meeting of the Chamber and election of officers is held. The 1923 meeting was the one hundred and fifty-fifth annual gathering since the foundation of the Chamber. Mr. IRVING T. BUSH was re-elected President for another year. A report by the Executive Committee was adopted as follows:

Resolved, That the President be and he is hereby authorized to appoint a Special Committee of Five on Agriculture and its Problems, which Committee may make recommendations and report to the Chamber from time to time on this subject.

President BUSH in commenting upon this resolution said:

The farming community is the great bulwark of conservatism in this country. We, as business men living our lives here, do not know enough about their problems. We have recently had a luncheon at the Chamber with representative leaders of the farm movement from all parts of the State, and I assure you, gentlemen, that I never sat in a meeting where there was a finer, more conservative and intelligent body of men than these gentlemen who represented the State farm organizations.

We are endeavoring to take steps to bring ourselves into closer touch with these organizations and, through the officers, with the members of the organizations, on the theory that if they know more of our problems and we know more of their problems, it will be better for both of us.

The Executive Committee presented a report upon Prohibition Enforcement. This report made the following statement, which brought forth much debate and resulted in it being laid on the table:

This Chamber has on many occasions deplored acts of lawlessness on the part of certain elements of our population; it has advocated remedial legislation, and, now in the face of a spirit of lawlessness which apparently permeates the body politic in general, the Executive Committee recommends that so long as prohibition laws are to remain upon the statute books, the members of this body should exert their influence both collectively and personally, in behalf of a rigid enforcement of these laws; and, furthermore, the Executive Committee is of the opinion that whatever the legal responsibility of a person who purchases liquor brought into or manufactured in this country in defiance of the Constitution and the laws, may be, a point which it does not pretend to determine, there can be no doubt that it is reprehensible for any community to afford a market which tempts persons of weak character into a life

of crime by reason of the extraordinary gains which may be reaped. For these reasons, the Executive Committee presents the following resolution for your consideration: Be it

Resolved, That the Chamber of Commerce of the State of New York, endorses the report of the Executive Committee, and recommends to the authorities of the Nation and of the State, that if the present statutory provisions are insufficient they take steps to lay before Congress and the Legislature the measures necessary to bring to an end a national scandal; and, be it further

Resolved, That the President and the Executive Committee are hereby authorized and directed to follow this question with diligent attention and take such measures as may be deemed advisable to co-operate with the duly constituted authorities.

The Committee on Internal Trade and Improvements secured unanimous support for two reports dealing with Coal. The resolution on Pennsylvania's Anthracite Coal Tax read:

Resolved, That the Chamber of Commerce of the State of New York urges Governor SMITH to take such action as he may deem appropriate to express his disapproval, and to secure a repeal, of the tax now being levied in the state of Pennsylvania upon the production of anthracite coal.

The premises of this report went into details upon the falacy of this tax, and the practical reasons for the Committee's other report upon Ordering and Storing of Fuel to Facilitate Railway Transportation, were given to support the following resolution:

Resolved, That the Chamber of Commerce of the State of New York urges Governor SMITH to arrange to have all state institutions order and store, under proper safeguards, their necessary coal supply for the coming year, at as early a date as possible, that he take such steps as may seem to him advisable to get the various municipalities to act in like manner, and that he direct the Public Service Commission to suggest similar action, upon all public utilities.

The Annual Report of the Committee on Arbitration was presented.

The Committee on Public Service in the Metropolitan District received unanimous approval of its report on Strict Observance of Smoke Nuisance Regulations, closing with the following:

Resolved, That the Chamber of Commerce of the State of New York urges its members to co-operate wherever possible with the Department of Health in its efforts to abate the smoke nuisance in the City of New York; and, be it further

Resolved, That the Chamber commends the action of the Health Commissioner, Dr. FRANK J. MONAGHAN, in his prompt action to enforce to its fullest extent the sanitary code against smoke and to return to the former strict administration of the law, immediately upon the passing of the coal crisis.

June 7th.—A report by the Executive Committee was adopted ratifying an Arbitration Agreement with the Netherlands Chamber of Commerce. The Harbor and Shipping Committee's report upon Government operation of steamships was adopted without a dissenting vote. The report touched upon previous actions of the Chamber upon Government ownership and operation and ended with this resolution:

Resolved, That the Chamber of Commerce of the State of New York is opposed to Government operation of steamships, and recommends to the United States Shipping Board and the Federal authorities that in the solution of the problems before it, no plans shall be adopted which shall result in Government operation.

A report by the Committee on Public Service upon Transit Legislation and Co-operation to Build Subways was adopted.

The Prohibition question, which was up at the May meeting, was again introduced and a substitute resolution by the Executive Committee offered. After a long debate, the substitute resolution was laid on the table. Another substitute was offered by WILLIAM L. SAUNDERS as follows:

MR. SAUNDERS.—*Whereas*, The interpretation and enforcement of the Eighteenth Amendment through the Volstead Act has been proven to be impracticable because such interpretation is not in accordance with the strict intention of the Eighteenth Amendment being enacted, as this Act was, as a war measure, with provision that are strange, extreme and unfair; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised so as to conform more nearly with public sentiment and on lines that are more reasonable, just and practicable.

As Mr. SAUNDERS' report was considered new business, and a vote did not sustain a proposal to proceed at once with its consideration, it was referred to the appropriate committee for report thereon at the next meeting.

October 4th.—A special meeting was held at 11.45, immediately preceding the regular meeting of the Chamber, to elect a Pilot Commissioner.

At the regular meeting beginning at 12 o'clock the Executive Committee brought in a new report on the enforcement of Prohibition Laws. After some debate the following was adopted:

The Committee does not consider it incumbent on the Chamber of Commerce to give an opinion as to the wisdom or the lack of it, evidenced by the adoption of the 18th Amendment to the Constitution of the United States and the enactment of the so-called Volstead Act.

This Chamber has, however, always stood for obedience to law and support of the government in its efforts to enforce law, and recommends now that so long as the prohibition law remains upon the statute books, the members of this body should exert their influence to secure the enforcement of the law. It is apparent that there is widespread opposition to, and disobedience of, the prohibition law, and that unquestionably a large number of honest and fair-minded people believe that the law should be so amended as to secure more general agreement with its provisions on the part of the citizens and a more satisfactory enforcement of the law; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York endorses these views of the Executive Committee; that it believes in the enforcement of law and in respect for law, and that in the case of the law prohibiting the sale of intoxicating beverages the law should be respected and observed so long as it remains on the statute books; and

Whereas, The interpretation and enforcement of the 18th Amendment through the Volstead Act are not, in the belief of unquestionably a large number of honest and fair-minded people, in accordance with the strict intention of the 18th Amendment, and therefore great opposition to its enforcement has been created; be it

Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised and modified so as to conform more nearly with public sentiment and on lines that are more reasonable, just and practicable.

The consolidation of the Central Railroad of New Jersey with the New York Central was favored. A resolution presented by the Committee on Internal Trade and Improvement read:

Resolved, That the Committee on Internal Trade and improvements of the Chamber of Commerce of the State of New York, be authorized to appear at hearings before the Interstate Commerce Commission, and otherwise act when occasion arises, to advocate the consolidation of the Central Railroad of New Jersey with the New York Central lines, with the understanding that the rights of any line now using the Central Railroad of New Jersey to reach the terminals of that line shall be preserved and the terminals operated in a co-operative spirit with the plans of the Port Authority.

The Special Committee on Agriculture and Its Problems presented a preamble and resolution, which were unanimously adopted, endorsing an Eastern Apple Exposition and Fruit Show to be held in New York, November 3rd to 10th.

COUNT ALBERT APPONYI, Speaker of the Hungarian House of Representatives, was the guest of the Chamber and made an address following the proceedings.

November 1st.—The Executive Committee reaffirmed its report opposing a general bonus for all soldiers and sailors who served in the war, but recommending that everything be done

possible for the injured and disabled veterans. A state bonus as well as a Federal bonus was opposed. The following resolution passed:

Resolved, That the Chamber of Commerce of the State of New York reaffirms its previous action and, while it has recommended that the Federal Government should provide adequately for the disabled men and the dependents of those who died in the service, it expresses itself as opposed to the adoption of the proposed amendment to the Constitution of the State of New York providing for a State Bonus for ex-service men.

A bond issue for state institutions was favored. The resolution endorsed what was known as Proposition No. 1 to be voted on on Election Day, involving an issue of \$50,000,000 for the construction of buildings for institutions for the care, support, instruction and training of the wards of the state.

The Committee on the Harbor and Shipping moved to hold over its report opposing the bridge across the Hudson River between the Island of Manhattan and the Jersey shore. The same Committee presented a report which was adopted recommending the extension of coastwise laws to the Philippine Islands. The resolution in connection therewith reads as follows:

Resolved, That the Chamber of Commerce of the State of New York hereby respectfully calls to the attention of the President of the United States the provisions of the Merchant Marine Act, above quoted, and respectfully urges upon him the desirability of drawing the mandate of the act to the attention of the Shipping Board, with a view to having the designated services established, and, upon establishment, as provided for in said act, to fix a date for putting the coastwise laws into effect between the United States and the Philippine Islands.

The Committee on Taxation expressed its opposition to any amendment to the constitutional debt limit of cities which would enable the borrowing power or taxing ability of the City of New York to be increased.

The Committee on Public Service in the Metropolitan District, after some debate, secured the adoption of a report against the proposal to build a subway in Central Park. After outlining the situation in detail, the report closed with the two following resolutions:

Resolved, That the Chamber of Commerce of the State of New York is opposed to the proposed plan to build a subway by the open-cut method through Central Park, and to any destruction of the park area or any disturbance of its present condition and character; and, be it further

Resolved, That the Chamber would favor the construction of the proposed Washington Heights extension of the B. M. T. subway under Central Park by means of a tunnel parallel and adjacent to Central Park

West, provided it is so far below the surface that it would not in any way interfere with vegetation or the park's appurtenances during construction or afterward.

November 15th.—The One Hundred and Fifty-fifth Anniversary Banquet of the Chamber of Commerce was held at the Waldorf-Astoria on Thursday evening. There were six hundred and seventy members and guests present, and it was indeed a distinguished and representative gathering of public officials and leading men of affairs. The addresses, which appear in this volume, contribute a collection of able discussions of important topics of public interest.

December 6th.—The Committee on Taxation presented a report which was unanimously adopted endorsing the proposed reduction of the income taxes recommended by the Secretary of the Treasury in his letter to Congressman GREEN of November 10th, 1923.

The Committee on Public Service in the Metropolitan District secured the adoption of the following resolutions which were preceded by an argument in their behalf:

Resolved, That the Chamber of Commerce of the State of New York urges upon the Board of Estimate and Apportionment the passage of a resolution to order the relocation of the Sixth Avenue Elevated pillars to the sidewalks adjoining the curb between Thirtieth and Forty-second Streets, and also the changes of the stairways leading to the elevated and underground railroads, in accordance with the general plan for improving the conditions in this district as herein set forth; and, be it

Resolved, That the Chamber recommends that the Sixth Avenue elevated structure from Fifty-third to Fifty-ninth Streets, now operated as a spur to the main line, be entirely removed, and that the "L" pillars between Forty-second and Fifty-third Streets also be relocated as is proposed between Thirtieth and Forty-second Streets, if sufficient funds are available.

The announcement of winners in the Apple Essay Contest was announced at this meeting, after which an address was made by Senator PAUL DUPUY of France, who is publisher and owner of *Petit Parisien* and other papers.

January 3rd.—The Committee on the Harbor and Shipping presented its report on the Hudson River bridge at 57th Street which had been deferred at the two preceding meetings in order to give opportunity for further study and consideration of the arguments of those in favor of its construction. After consider-

able debate and a rising vote, the report passed 60 in favor and 48 against. The resolution following the argument read as follows:

Resolved, That the Chamber of Commerce of the State of New York hereby endorses the recommendation of the Port Authority relative to bridges over the Hudson River as set forth above, and is opposed to the construction of the proposed bridge at 57th Street across the Hudson River.

Following the proceedings, an address was made by Dr. OSCAR JASZI, Professor of Sociology upon "Economic Confederation in Central Europe to Avoid Future Wars."

January 24th.—A special meeting was held on this day to hear an address by the Hon. DAVID A. REED, United States Senator from Pennsylvania, on the prospects for tax reduction. Senator REED delivered a very interesting address.

February 7th.—A report of the Executive Committee was unanimously adopted upon Relief for Disabled Army Officers in the Late World War. The resolutions closing up the report read as follows:

Resolved, That the Chamber of Commerce of the State of New York urges upon the Veterans' Bureau of the United States that full and adequate compensation should be paid to disabled emergency army officers, and if existing appropriations do not provide that sufficient compensation be paid, the Chamber urges upon Congress that adequate appropriations be made to that end; and, be it further

Resolved, That the Chamber of Commerce of the State of New York is opposed to the passage by Congress of legislation entitling disabled emergency officers of the World War to the same privileges and emoluments as are provided for its disabled officers of the regular army, and hereby authorizes its officers and Executive Committee to present its views and to represent the Chamber in the furtherance of these views.

The Committee on Foreign Commerce and the Revenue Laws advocated the passage of a bill in Congress to reduce passport charges; and also other bills to create uniformity of law throughout the United States in respect to sales and contracts to sell in interstate and foreign commerce.

The Committee on Harbor and Shipping secured the passage of a report recommending a single executive for the United States Shipping Board. Another report was unanimously accepted favoring the purchase of Cape Cod Canal by the Government. The resolution adopted read as follows:

Resolved, That the Chamber of Commerce of the State of New York advocates the purchase by the United States Government of the Cape Cod Canal, and that proper provision be made for its improvement and maintenance as a public waterway for the general welfare of the Nation.

A report by the Public Service Commission recommending a permanent board to study traffic matters was unanimously accepted. The resolution submitted read:

Resolved, That the Chamber of Commerce of the State of New York recommends immediate action by the city authorities and others involved to provide for the creation of a permanent board to make a complete survey of our surface traffic conditions and prepare a comprehensive plan which shall offer a solution for present congestion and at the same time lay down a policy for the future which will insure adequate facilities for the rapidly increasing number of pedestrians and vehicles in our streets.

The same committee, after pointing out the inadequacy of the police force in point of numbers, secured the unanimous adoption of the following resolution:

Resolved, That the Chamber of Commerce of the State of New York hereby reaffirms its resolution of May 4th, 1922, to the effect that the police force of this city is numerically inadequate, and ought to be materially enlarged at the earliest possible moment, and hereby empowers the Committee on Public Service in the Metropolitan District to appear at hearings and otherwise advocate an adequate increase in the number of police.

The Special Committee on Organization and By-Laws of the Chamber made its first report at this meeting. A Minute on the death of ex-President WOODROW WILSON was adopted; and credentials in commerce were awarded to the successful candidates.

Ex-Governor GOODRICH of Indiana, following the proceedings, addressed the members upon the St. Lawrence Waterway Project.

March 6th.—The report and resolutions of the Executive Committee approving in general the purposes of the Lower Taxes-Less Legislation League and authorizing the appointment of four members to co-operate, were unanimously adopted. The Committee on Foreign Commerce and the Revenue Laws had its report in favor of legislation removing the handicap on American interests desiring to do business in China under Federal incorporation, unanimously approved. The same Committee also successfully submitted a report urging upon Congress the enactment into law of a bill to establish in the Bureau of Foreign and Domestic Commerce a foreign commerce service.

The Committee on Internal Trade and Improvements recommended the completion of the waterway improvements projected for the Mississippi, Missouri and Ohio Rivers. The same Committee also secured unanimous approval of a report and resolution recommending increased wages to postal clerks and letter carriers.

The Committee on Organization and By-Laws of the Chamber submitted its second report upon the proposed revised By-Laws.

Sir WILLIAM PRIESTLY, Vice-President of the Bradford Chamber of Commerce of England, was a guest, and following the proceedings, presented to Mr. CHARLES L. BERNHEIMER, Chairman of the Committee on Arbitration, a gift as a token of the appreciation of the members of the Bradford Chamber for the great assistance Mr. BERNHEIMER and his Committee had given in settling disputes following the commercial crisis in 1920. Another guest, Mr. ALPHEUS GEER, spoke a few minutes upon the work of the Marshall Stillman Movement.

April 3rd.—The Executive Committee was supported in its recommendation urging legislation to remedy the defects in administration of justice in New York City as disclosed by the report of the Municipal Court Commission.

A joint report was presented by the Committee on Foreign Commerce and the Revenue Laws and the Committee on Harbor and Shipping recommending that Section 28 of the Merchant Marine Act of 1920 shall not be put into effect as urged by the Shipping Board; and that Congress consider the advisability of repealing Section 28 of the Merchant Marine Act. After some debate, it was voted to refer the report back to the Committees for further consideration.

The Harbor and Shipping Committee secured unanimous approval of a report opposing legislation which shall have the effect of excluding privately operated shipyards or manufacturers of naval or army materials, etc., from entering into competitive bidding and from securing thereby contracts and Government business as in the past.

The Committee on Public Service in the Metropolitan District, after setting forth the facts in the case, secured unanimous approval of the following resolution opposing an invasion of Central Park:

Resolved, That the Chamber of Commerce of the State of New York is opposed to bills S. 1284 and A. 1258 introduced in the Legislature authorizing an art center in Central Park, and is opposed to any similar measure authorizing an art center or any other project which shall be inconsistent with the idea upon which the park was founded, or which shall detract from its present condition and natural character.

The same Committee in conjunction with the Committee on Finance and Currency opposed any amendment of the State Constitution which would exempt transit construction bonds from the exempt limit provisions of the present regulations.

The Committee on Organization and By-Laws of the Chamber presented its third report. These various reports were made in accordance with the method provided for any change or revision of by-laws. The matter now having been before the Chamber a sufficient time, the proposed revision was put to a vote. After some discussion, all the revised by-laws as recommended by the Special Committee were unanimously adopted.

The Chamber has a membership limited by its by-laws to 2,000, and the roll call during the last year was not far from this number. It is natural, therefore, that during twelve months many deaths would happen. During the year ending May 1st, fifty-three of its members passed away. This number compares with fifty-eight members lost by death during the preceding year. This mortality, however, is less than three per cent. of its entire membership, which shows that a large number of New York's successful business men reach years of ripe old age, in spite of the intense and nerve-exhausting competition in this community.

The list below is presented in the usual form, giving the year of admission to membership and date of death.

DEATHS FROM MAY 1, 1923, TO APRIL 30, 1924

JOINED		DIED	
1918	RICHARD C. CORNER.....	May	11, 1923

**ACKNOWLEDG-
MENT OF
ASSISTANCE**

In the preparation of this Annual Report much assistance has been given by Federal, State, and Municipal Officials, as well as by experts in various trades and industries. For their prompt and painstaking assistance, special acknowledgment should be made to the following:

Among the Federal Officials: Honorable Andrew W. MEL-
LON, Secretary of the Treasury; Honorable D. R. CRISSINGER,
Comptroller of the Currency; WILLIS J. FOWLER, Deputy Com-
ptroller; Honorable SAMUEL L. ROGERS, Director, Bureau of the
Census; JULIUS KLEIN, Chief of Bureau of Foreign and Domes-
tic Commerce; JOHN HORN, of the Division of Statistics; Hon-
orable W. W. HUSBAND, Commissioner General of Immigration;
Honorable HERBERT CLARK, Secretary of Commerce; Honorable
DAVID H. BLAIR, Commissioner of Internal Revenue; Honorable
ISAAC H. SMITH, Superintendent, United States Assay Office,
New York; Honorable EDWARD M. MORGAN, Post Master, New
York City; H. C. STUART, Special Deputy Collector, United
States Customs Service at New York; RAYMOND T. BAKER,
Director of the Mint.

Among State Officials: Honorable JOHN J. LYONS, Secretary
of State; Honorable GEORGE V. McLAUGHLIN, Superintendent,
State Banking Department; Honorable CHARLES L. CADLE, State
Superintendent of Public Works; Honorable JAMES A. WEN-
DELL, Comptroller of the State; F. J. KENYON, First Deputy
Superintendent, Banking Department; ALBERT W. DODGE, Secre-
tary, State Board of Port Wardens; JAMES B. WALKER, Secre-
tary, Transit Commission.

Among Municipal Officials: Honorable CHARLES L. CRAIG,
Comptroller; Honorable NICHOLAS J. HAYES, Commissioner,
Department of Water Supply, Gas and Electricity; WILLIAM H.
GUILFOY, M.D., Registrar of Records, Department of Health;
Honorable THOMAS J. DRENNAN, Commissioner, Fire Depart-
ment; Honorable RICHARD E. ENRIGHT, Commissioner, and J. C.
HACKETT, Secretary, Police Department; WILLIS HOLLY, Secre-
tary, City of New York Park Board; Honorable GROVER A.
WHALEN, Commissioner, Department of Plant and Structures;
EUGENE A. NIFENECKER, Director of Reference, Research and
Statistics, Board of Education; JOHN E. BOWE, Acting Commis-
sioner of Public Works, Borough of Richmond; M. F. LOUGH-

MAN, Commissioner, Department of Public Works, Manhattan; BENJAMIN F. EINBILGLER, Secretary, Board of Water Supply; Honorable JOHN H. DELANEY, Commissioner, and J. M. PHELAN, Department of Docks.

Contributions of data needed were also made by the following:

CORNELIUS ELDERT, President of the Atlantic Mutual Insurance Company; the WILLIAM B. DANA COMPANY (for review of the cotton crop); Messrs. J. & W. SELIGMAN & CO., H. F. FOLGER, Jr.; F. W. SAWARD; A. C. STOCKING; CARL A. WERNER; the URNER-BARRY COMPANY; W. W. MACON, of the *Iron Age*; WILLIAM J. CURTISS; WILLIAM J. GILPIN, Manager, New York Clearing House; J. S. WILEY, General Auditor, New York Telephone Co.; Messrs. R. G. DUN & COMPANY, and ERADSTREET'S; *The Commercial and Financial Chronicle*; *The Journal of Commerce and Commercial Bulletin*; *The Statistical Trade Service*; *The New York Evening Post*; *The Oil, Paint and Drug Reporter*; *The New York Times*; Federal Reserve Board; *Daily Bond Buyer*; *American Contractor*; *Labor Review*; New York State Industrial Commission; *New York Tribune*; *American Metal Market*; National Industrial Conference Board; *Drug and Chemical Markets*; Building Trades Employees Association; American Iron and Steel Institute; National Automobile Chamber of Commerce; Federal Trade Commission; Anthracite Bureau of Information; American Railway Association.

The Secretary desires to record his appreciation of the efficient assistance afforded by the staff.

PROCEEDINGS OF THE CHAMBER OF COMMERCE

FROM MAY, 1923, TO MAY, 1924

155th Annual Meeting, Thursday, May 3, 1923

The 155th Annual Meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, May 3, 1923, at 12 o'clock noon.

Present

OTTO H. KAHN, *Vice-President*

CHARLES T. GWYNNE, *Secretary*

and two hundred and thirty-three other members of the Chamber.

Mr. KAHN, Vice-President, presided.

Minutes

The minutes of the regular monthly meeting of April 5th were read and approved.

NOMINATIONS FOR MEMBERSHIP

CLARENCE H. KELSEY, Acting Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
BORIS A. BAKHMETEFF	CARL F. AHLSTROM	FREDERICK A. GOETZE
STUART BENSON	ROBERT A. BOULD	IRVING T. BUSH
MATTHEW C. BRUSH	IRVING T. BUSH	CHARLES A. STONE
CHARLES M. CONNFELT	IRVING T. BUSH	LAWRENCE B. ELLIMAN
C. GERARD DODGE	GILBERT G. BROWNE	FRANCIS M. WELD
ARCHIE W. DUNHAM	ROLLIN C. BORTLE	ALLEN G. HOYT
EDMUND D. FISHER	IRVING T. BUSH	R. GOULD SIMONDS
HARRY S. GRIFFIN	CLARION B. WINSLOW	J. FRANK NUTTING
THOMAS F. HANDY	SEELYE BENEDICT	CECIL F. SHALLCROSS
GEORGE W. HOPKINS	GROSVENOR FARWELL	WILLIAM B. SCARBOROUGH
NATHAN S. JONAS	WILLIAM L. DETMOLD	ABRAHAM G. MILLS
EUGENE KAHN	ROBERT A. BOULD	EARL E. BEYER

MR. KELSEY.—I move that the regular order of business be suspended in order to receive the report of the Nominating Committee, and that the two ballots then be taken at the same time, for election of new members and election of officers, chairmen and members of standing committees.

The motion was unanimously adopted.

REPORT OF NOMINATING COMMITTEE

FRANK K. STURGIS.—Mr. Chairman, on behalf of the Nominating Committee, I have the honor to present its report.

It is gratifying to note that the available members of the Committee were unanimous in their selections. It is also most agreeable to find that the retiring President, Mr. BUSH, is willing to supplement his brilliant services of the past year, by serving the Chamber for a second term of office.

Inasmuch as printed copies of the Committee's report have been duly sent to all members of the Chamber, it is not necessary at this time to read the report, and I have now the honor to recommend that the report of the Committee be accepted and that the Chamber proceed to ballot.

Nominations for Officers, Chairmen and Members of Committees

(To serve for one year except where otherwise stated)

For President—IRVING T. BUSH

For Vice-Presidents

To serve until May, 1927

J. PIERPONT MORGAN

CORNELIUS N. BLISS, JR.

JESSE ISIDOR STRAUS

For Treasurer—WILLIAM H. PORTER

For Secretary—CHARLES T. GWYNNE

For Chairman of Executive Committee

FREDERICK H. ECKER

For Member of Executive Committee at Large

To serve until May, 1926

ALEXANDER C. HUMPHREYS

For Chairman of Committee on Finance and Currency

THOMAS W. LAMONT

For Members of Committee on Finance and Currency

To serve until May, 1926

PAUL M. WARBURG

JAMES BROWN

For Chairman of Committee on Foreign Commerce and the Revenue Laws
WILLIAM E. PECK

For Members of Committee on Foreign Commerce and the Revenue Laws
To serve until May, 1926

EUSTIS L. HOPKINS PERCY H. JENNINGS

For Chairman of Committee on Internal Trade and Improvements
DELOS W. COOKE

For Members of Committee on Internal Trade and Improvements
To serve until May, 1926

R. A. C. SMITH BENJAMIN L. WINCHELL

For Chairman of Committee on the Harbor and Shipping
DAVID T. WARDEN

For Members of Committee on the Harbor and Shipping
To serve until May, 1926

GEORGE W. BACON HERBERT B. WALKER

For Chairman of Committee on Insurance
THOMAS A. BUCKNER

For Members of Committee on Insurance
To serve until May, 1926

WALTER D. DESPARD CLARK WILLIAMS

For Chairman of Committee on Taxation
CLARENCE H. KELSEY

For Members of Committee on Taxation
To serve until May, 1926

WILLIAM D. BALDWIN ALBERT A. TILNEY

For Chairman of Committee on Arbitration
CHARLES L. BERNHEIMER

For Members of Committee on Arbitration
To serve until May, 1926

FRANK E. HAGEMEYER LIONEL SUTRO

For Chairman of Committee on Commercial Education
FREDERICK J. LISMAN

For Members of Committee on Commercial Education
To serve until May, 1926

JOHN H. FINLEY ERNEST K. SATTERLEE
To serve until May, 1925, in place of JULIO F. SORZANO, resigned
DONALD SCOTT

For Chairman of Committee on Public Service in the Metropolitan District
WILLIAM MCCARROLL

For Members of the Committee on Public Service in the Metropolitan District

ELON H. HOOKER To serve until May, 1926 J. FREDERICK TALCOTT

For Members of Board of Trustees having charge of the Real Estate of the Chamber of Commerce

FRANK K. STURGIS To serve until May, 1926 CLARENCE H. KELSEY

For Commissioner for Licensing Sailors' Hotels or Boarding Houses
EBEN E. OLCOTT

Respectfully submitted,

FRANK K. STURGIS, *Chairman*
WILLIAM SLOANE COFFIN
WALTER E. FREW
JOHN McHUGH
GERRISH H. MILLIKEN
WILLIAM FELLOWES MORGAN

*Of the
Nominating
Committee*

NEW YORK, April 20, 1923.

MESSRS. GEORGE E. MOLLESON, CHARLES H. STOUT, ALFRED WENDT and JOSEPH F. EASTMOND were appointed tellers and they proceeded to take up the ballots for candidates for membership and for nominees for officers, chairmen and members of standing committees.

MR. BUSH RE-ELECTED PRESIDENT, OTHER CANDIDATES ELECTED

THE VICE-PRESIDENT PRESIDING.—Gentlemen, it is my pleasure to announce that the tellers report that the ballots cast were unanimous for the election of the candidates for membership in the Chamber, and for the officers, chairmen and members of standing committees. The Chair, therefore, declares that the candidates for membership and the officers, chairmen and members of committees named by the Nominating Committee have all been elected.

I will now request Mr. ALFRED E. MARLING to announce the result to Mr. BUSH and conduct him to the Chair.

(President BUSH was then escorted to the rostrum amid the applause of the Chamber, the members all rising.)

THE VICE-PRESIDENT PRESIDING.—Mr. BUSH, it is my pleasure and privilege to advise you that you have been unanimously re-elected President of the Chamber. In turning the meeting over to you I will confine myself to saying that I am certain I voice the feeling of the entire Chamber when I express to you its gratitude for the dignity and ability with which you have conducted your office during the past year, and also its gratitude and recognition of your fine devotion to the public welfare and the weal of the Chamber. (Applause)

REMARKS OF PRESIDENT BUSH ON RE-ELECTION

GENTLEMEN OF THE CHAMBER.—I am delighted to meet you, and I hope that you will take not at its face value, but at its true worth, the very kind words that Mr. KAHN has just said.

It is said that the Scotch are orators, because oratory is a gift. I have a little Scotch in me, partly inherited. But I am not an orator, and you have had to bear with me too often and patiently in speeches from this rostrum during the past year. So I shall not attempt to make a speech. I shall merely tell you, as simply and as sincerely as I possibly can, how highly I esteem the very great honor which you have conferred upon me in electing me for the second time President of this Chamber. It is an honor which I prize and am deeply conscious of, and I pledge you the best that is in me in the fulfillment of the duties of the office of President during the next year.

I hope that you will not think I am ungracious at a time when I should devote all of the few words I have to say to thanking you, if I remind you again that the President and officers of this Chamber can do very little without the support and co-operation of the membership at large. I think I have said before that bodies like this are really the labor unions of business men, and are almost their only means of expression in the legislative halls at Albany and Washington of the thoughts and wishes of the business community.

A gentleman who holds a very distinguished position in this city called me up a few weeks ago after a meeting held at this Chamber, and stated that he differed with the action of the Chamber, and told me that he thought some of the reports of the Chamber were deteriorating in quality. I told him, "Suppose for the sake of argument I agree with you. Whose fault is it?" He said, "Whose?" I said, "It is your fault and the fault of men like you in the City, who think that when they meet here once a year and elect officers to carry on the work, they have discharged their full duty."

We often ask men who are pressed with business affairs and with great responsibilities to serve as chairmen or members of our standing committees, and the answer comes too often, that they have not the time. This Chamber, gentlemen, can only fulfill the usefulness, which it should fulfill in the active business life of this City and State, and express your opinion for you in Albany and Washington and in the public press, if you are

willing to sacrifice and give of yourself something to carry on the work here and to help and to support the action of its officers and President.

I have been a pretty faithful President for the last twelve months, for I have not missed a single meeting. But I will apologize now and state that I am going to miss the next one. I am sailing on Saturday for a journey in foreign lands. I am going into some of those byways of Europe that some of us do not very often reach, and down into the Balkans. If the Russians are kind, I may get into Russia. I shall bring home some first hand knowledge of the economic conditions of those countries, which may be of some value in our councils here next year.

That is all I have to say, gentlemen, except to thank you most sincerely and humbly for the confidence you have again reposed in me, and to assure you, that with your help and your co-operation, we shall endeavor to carry on successfully the work of this Chamber during the next twelve months. We will now take up the regular order of business. (Applause)

SPECIAL COMMITTEE ON AGRICULTURE AND ITS PROBLEMS

Mr. KELSEY, for the Executive Committee, offered the following resolution and moved its adoption:

Resolved, That the President be and he is hereby authorized to appoint a Special Committee of five on Agriculture and its Problems, which Committee may make recommendations and report to the Chamber from time to time on this subject.

The motion was duly seconded.

THE PRESIDENT.—Gentlemen, before any one speaks on this motion, I wish to say a few words myself, because it has been suggested that I should. We all recognize that the farming unit is a great fundamental industry in this country. Over fifty per cent. of our people are farmers. LLOYD GEORGE in a recent article published in one of our daily papers stated that his information was that sixty per cent. of the Americans live on farms. In England, he pointed out in discussing some of their economic and social problems, out of the total population of the British Isles, which is between 38,000,000 and 40,000,000, there were 21,000,000 who, if all the private property were taken away from the people of England, would have nothing taken away from them.

The farming community is the great bulwark of conservatism in this country. We, as business men living our lives here, do not know enough about their problems. We have recently had a luncheon at the Chamber with representative leaders of the farm movement from all parts of the State, and I assure you, gentlemen, that I never sat in a meeting where there was a finer, more conservative and intelligent body of men than these gentlemen who represented the State farm organizations.

We are endeavoring to take steps to bring ourselves into closer touch with these organizations and, through the officers, with the members of the organizations, on the theory that if they know more of our problems and we know more of their problems, it will be better for both of us. It was suggested that I make this brief announcement, and I have been very glad to do so.

The motion to adopt the resolution has been seconded. Is there any discussion? (No response)

The resolution was unanimously approved.

ENFORCEMENT OF THE PROHIBITION LAWS

Mr. KELSEY.—Mr. President, on behalf of the Executive Committee, I would like to present a report on the Enforcement of the Prohibition Laws, and to state for the Committee that it felt that the Chamber of Commerce has always stood for obedience to law and for good citizenship; that whatever differences of opinion there might be as to the wisdom of Prohibition Laws, there could be none as to the demoralizing effect upon private conduct and public morals from the open disregard of the laws. It believed that the authorities of the Government, the Judges and the Jurors, the high authorities and the other lesser ones, needed for the performance of their duty the support of a strong public sentiment such as can be voiced by bodies like this.

The Executive Committee, therefore, considered that it was the duty of the Chamber publicly to take its stand in favor of the enforcement of the law so long as it remains on the statute books; that the right or assumed right to disregard one law because we do not like it means that we can disregard any other law or all the laws. The effect upon society of the example of otherwise law-abiding citizens flouting the Prohibition Laws is seen in much demoralization among both the old and the young, and the Committee felt that no one could look forward with complacency to the future of our country unless there was a revival of respect on the part of all of our citizens for obedience to law, even an unpopular law like the Eighteenth Amendment.

Therefore, on behalf of the Executive Committee, I move the adoption of the following report and resolutions:

Report*To the Chamber of Commerce:*

Through the adoption of the Eighteenth Amendment to the Constitution of the United States, the enactment of the so-called Volstead Act, and the passage by the Legislatures of many States of the Union of laws prohibiting the sale of intoxicating beverages, prohibition is nominal but not a fact throughout the greater part of our country today. The Executive Committee of the Chamber of Commerce does not feel it incumbent to give an opinion as to the wisdom, or the lack of it, as evidenced by the amendment to the Constitution, but since it is notorious that the constitutional provision is flouted and that the prohibition laws are flagrantly violated, it is felt that the attention of law-abiding citizens should be directed to certain features of this situation.

This Chamber has on many occasions deplored acts of lawlessness on the part of certain elements of our population; it has advocated remedial legislation, and, now in the face of a spirit of lawlessness which apparently permeates the body politic in general, the Executive Committee recommends that so long as prohibition laws are to remain upon the statute books, the members of this body should exert their influence both collectively and personally, in behalf of a rigid enforcement of these laws; and furthermore, the Executive Committee is of the opinion that whatever the legal responsibility of a person who purchases liquor brought into or manufactured in this country in defiance of the Constitution and the laws, may be, a point which it does not pretend to determine, there can be no doubt that it is reprehensible for any community to afford a market which tempts persons of weak character into a life of crime by reason of the extraordinary gains which may be reaped. For these reasons, the Executive Committee presents the following resolution for your consideration: Be it

Resolved, That the Chamber of Commerce of the State of New York, endorses the report of the Executive Committee, and recommends to the authorities of the Nation and of the State, that if the present statutory provisions are insufficient they take steps to lay before Congress and the Legislature the measures necessary to bring to an end a national scandal; and, be it further

Resolved, That the President and the Executive Committee are hereby authorized and directed to follow this question with diligent attention and take such measures as may be deemed advisable to co-operate with the duly constituted authorities.

The motion to adopt the report was seconded.

THE PRESIDENT.—Is there any discussion?

Debate Respecting Enforcement of the Prohibition Laws

WILLIAM H. DOUGLAS.—Mr. President, I rise to say that I hope this resolution will not prevail. I do not consider that the resolution rings true. It further appears that we may give a wrong impression to the public by passing a motion of this character. It also appears to me that the resolution is insincere and lacks courage. Incidentally, it seems to reflect on the Chamber itself, and the members of the Chamber.

We do not need, and are not required to tell the Nation or the State that the Chamber of Commerce of this State is in favor of every law which goes on the statute books and its enforcement. But, as the French say, those that excuse themselves often accuse themselves. It does seem that by adopting this resolution we clearly endeavor to give the impression to the public that we have not supported the law.

Then, again, any outsider who reads this resolution, no matter what may have been the intention of the Executive Committee, will, I fear, unquestionably believe that it is merely a sort of backdoor subterfuge to get on the band wagon of prohibition, and that we have not the courage to climb on the front seat and drive the horses, if that is our intention and desire.

I do not know whether we are a wet Chamber or a dry Chamber, but I think, if we are going to pass a resolution in connection with prohibition or its enforcement, that we should have the courage of our convictions, and let the Nation know whether we are dry or whether we are wet. (Applause) I say this because we well know that that question today is a scandal internationally and among ourselves as a nation. (Applause) A man does not hesitate to violate the law because his conscience is not involved. A man who does not pay his taxes or who shirks part of his taxes, unquestionably is called to order by his conscience, because he knows he is doing something which is against the Union, and against his fellow citizens, putting an extra burden upon them. But the man who takes a drink has no such feeling, and his conscience does not arouse him to the fact that he may be breaking the law, because he does not consider he is hurting the Nation, or his fellow citizens, and perhaps in some cases he may not even hurt himself. (Applause) Laws are easy to enforce if they appeal to the people, but otherwise difficult.

We recently have had a decision of the Supreme Court, and our papers today are saying that the opinion is grotesque. It will go all over the world in that way, and we will be condemned everywhere. The opinion states that you are only true American citizens on land. We have always thought that a ship at sea flying the American flag was the same as the dry land, and if a child was born, he or she was an American citizen. But what is the result of this decision? You can go to sea and, under the

American flag, step into the smoking room and get jolly well filled with liquor if it pleases you, and you are not breaking the law. But if you leave this room and take a drink, you are violating the law and subject to arrest.

I cannot see the logic of it. I do not see how we are going to enforce the Supreme Court's judgment. Foreign vessels will not come to our ports if we do, and some of their laws are clearly of such character that they could not send their ships here if we enforce this law strictly.

I do not wish to go into any arguments on the law, because I hope if we have courage we will have that argument later, but I do think that this resolution is injurious to the Chamber. It accomplishes absolutely nothing; it is lacking in courage; it appears insincere and utterly useless, and therefore I hope the Chamber will vote it down. If the Executive Committee wishes to approach us let them come after we have had a referendum on the question, and tell us what to do, and then I will be glad, according to the verdict, either to speak for the wets or the drys. (Applause)

JOSEPH F. EASTMOND.—Mr. President, on the walls of this Chamber hang the portraits of merchants who in their time opposed commercial restrictions which they believed to be unfair. Our predecessors recognized that commercial regulations opposed to the moral sense of an appreciable percentage of respectable citizens could not be enforced, however great the penalties and however great the efforts. Passing this resolution would place the Chamber in the position of endorsing the impossible, a position of pious pretense and hypocrisy. Voting it down might lead to the accusation of not supporting law.

This is a matter upon which it appears unnecessary for the Chamber to make a record that would be open to misinterpretation. I therefore move that it be referred back to the Committee.

WILLIAM D. MURPHY.—Mr. President, briefly, a word in general commendation of the spirit of opposition to this motion, so ably voiced by Mr. DOUGLAS. I would rise, following that line of thought one step further, to ask what necessity there is under the circumstances for such a resolution as this? Since when has it been necessary for this Chamber to instruct the Executive Committee in the proper discharge of its duty, and how does the Executive Committee receive any additional authority by this authorization for it to go ahead and do its duty, which I am of the opinion nobody could prevent or dissuade it from doing. I think it would be very much better for the general interests and record of the Chamber, that this resolution should either fail of passage, or, if I may support the suggestion made by the gentleman preceding me, that it be referred back to the Committee. (Applause)

ARTHUR S. LELAND.—Mr. President, I certainly hope this resolution will not pass. This same question came up before the Republican Club a few months ago and was carried by seventeen votes. I happen to be a member of that club, and suggested that it should be referred to all of the members of that club. The Executive Committee said that they did not feel that they had sufficient funds to conduct a referendum. I said that I would be willing to pay all of the expenses. And do you know that they refused to send it out at my expense, for return replies on this very question?

If this question is to be decided, let it not be decided by a handful of the members of the Chamber, but let it be referred to all the members for them to decide individually by sending back written replies.

It was carried by seventeen votes in the Republican Club, representing two thousand votes, which was a disgrace to the Republican Club and should never have gone on the record. As a result the report went all over the United States that the National Republican Club of the City of New York was in favor of the repeal of the Eighteenth Amendment or the Volstead Act.

It seems to me, if this is to be acted upon, it should be sent to every member for his written reply, or otherwise I move that the matter be laid upon the table.

WILLIAM E. CLEARY.—Mr. President, is it not in order to lay it on the table?

THE PRESIDENT.—A motion to lay on the table is always in order.

Mr. CLEARY.—If the motion to adopt these resolutions is voted upon, it will probably be defeated and you all know that the effect would be that this Chamber would be looked upon as in favor of violating the law.

HOWARD C. SMITH.—Mr. President, as a member of the Executive Committee I was much wrought up as to the effect of these resolutions. I think Mr. DOUGLAS has somewhat misinterpreted what the Executive Committee had in mind. I am perfectly frank to admit that individually I do not believe in the Volstead Law as it stands, and I do believe that a large number of the Executive Committee do not favor the Volstead Law. But it is the law of the land, and they do believe that the law of the land should be enforced. The resolutions which are offered do not say that we absolutely favor the law. They suggest that either the law should be enforced or steps should be

taken so that the law may be enforced. That leaves the question open and gives an opportunity to make amendments which are enforceable, and I believe that the Executive Committee has taken the right step in not trying to commit the Chamber as either wet or dry, but committing the Chamber to law enforcement.

If there is an implied accusation against ourselves, there are many of us who stand open to it. We might as well accept it and say we will stand for the law even as it is, and hope it will be amended. And that, I believe, is the position which this Chamber should take. (Applause)

Prohibition Enforcement Report Laid on Table

The motion to lay the report on Enforcement of the Prohibition Laws on the table was then adopted.

PENNSYLVANIA'S ANTHRACITE COAL TAX

DELOS W. COOKE.—Your Committee on Internal Trade and Improvements calls to your attention the tax upon anthracite coal by the State of Pennsylvania. This is a matter which concerns every citizen of this State, and your Committee thought it proper, following the strong position taken by Governor Cox of Massachusetts, to recommend to our Governor that action be taken with respect to this question.

We therefore submit the following report and resolution:

To the Chamber of Commerce:

The state of Pennsylvania has placed a tax upon every ton of anthracite coal mined and prepared for market within its boundaries. This tax is of great importance to the citizens of the state of New York, for it is estimated that about sixteen and one-half million tons of anthracite is consumed annually within this state.

Efforts to secure a repeal of Pennsylvania's coal tax legislation are being made not only by those outside the state, but also by the mining industry within the state. The Greater Wilkes-Barre Chamber of Commerce in particular, which represents over one thousand business men of the largest producing center of the anthracite region, is most strongly opposed to taxation of this character. Their opposition is based on two reasons: first, it threatens the destruction of Pennsylvania's basic industry; second, it spells economic disaster for the country as a whole.

A strong protest against the coal tax has been made by Governor Cox of Massachusetts to Governor PINCHOT of Pennsylvania in the following words:

"I am informed that while the lower branch of the Pennsylvania Legislature has approved a bill repealing the Pennsylvania law which levies a direct tax of one and one-half per cent. of the value of each ton of anthracite coal mined and prepared for market, you nevertheless have announced your firm opposition to such repeal. One of our State Departments informs me that under the present rate of consumption at your present tax, New England and New York would be assessed three million four hundred and fifty thousand dollars (\$3,450,000) for the government expenses of the State of Pennsylvania, and that Massachusetts' share of this tax upon the anthracite which its citizens consume would amount to about eight hundred and twenty-five thousand dollars (\$825,000) per year.

"In addition to this particular tax upon anthracite coal, it is to be remembered that Pennsylvania collects property, corporation, excise and other taxes as well as royalties from those in the coal industry. I am further informed that county officials in Pennsylvania are also beginning to appreciate that levying a tax on anthracite is an easy method of obtaining revenue. * * * * *

"I earnestly hope that Pennsylvania may lead the way in establishing better relations between the States by repealing the direct tonnage tax upon coal. While Pennsylvania might lose in revenue, I am sure her people would derive far greater satisfaction in the realization that they had led the way to right settlement of a question which may otherwise precipitate a national calamity."

In view of these considerations, your Committee on Internal Trade and Improvements offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York urges Governor SMITH to take such action as he may deem appropriate to express his disapproval, and to secure a repeal, of the tax now being levied in the state of Pennsylvania upon the production of anthracite coal.

Respectfully submitted,

DELOS W. COOKE, *Chairman*
 JESSE ISIDOR STRAUS
 MERCER P. MOSELEY
 JEREMIAH W. JENKS

 Improvements*

NEW YORK, *April 17, 1923.*

The report and resolution were unanimously approved.

ORDERING AND STORING OF FUEL TO FACILITATE RAILWAY TRANSPORTATION

Mr. COOKE.—The Committee further reports on the question of the fuel supply for the coming winter. Those of us who have had some experience with this very important question feel that now is the time to urge upon all concerned the advisability of laying in their winter's supply. Therefore your Committee offers this report:

To the Chamber of Commerce:

The question of fuel supply and the requirements for transportation which its movement places upon the railroads requires prompt action by the people of the State.

The existing agreement between the anthracite operators and the miners terminates at the end of August. At that time a diarrangement in the production of hard coal may be expected. It is therefore prudent for all who can do so, to lay in their supply of household fuel for next Winter at as early a date as possible. The storage capacity of the coal producing companies is limited and the more coal that can be stored by consumers on their premises the better. The early purchase of this coal will also facilitate production at the mines.

The accumulation of large reserves of bituminous coal by its users is also advisable. Adequate stock piles should be built up wherever possible.

The early purchase of fuel and the creation of adequate reserves by consumers will not only tend to stabilize production, but will greatly enhance the ability of the railroads to transport it, by spreading the work out over a longer period of time.

The Committee on Internal Trade and Improvements therefore present the following resolutions:

Resolved, That the Chamber of Commerce of the State of New York urges Governor SMITH to arrange to have all state institutions order and store, under proper safeguards, their necessary coal supply for the coming year, at as early a date as possible, that he take such steps as may seem to him advisable to get the various municipalities to act in like manner, and that he direct the Public Service Commission to suggest similar action, upon all public utilities; and, be it further

Resolved, That copies of this report be sent to all the Chambers of Commerce in the State that they may bring the matter to the attention of the industries and the people of their several communities.

Respectfully submitted,

DELOS W. COOKE, *Chairman*
MERCER P. MOSELEY
RUSSELL R. WHITMAN
ELIHU C. CHURCH

*Of the
Committee on
Internal Trade
and
Improvements*

NEW YORK, April 27, 1923.

ALBERT R. LEDOUX.—Mr. President, my excuse for speaking on this report is, first, that I am a mining engineer, and, second, as an avocation, I am Vice-President of a fire insurance company. I hope the Committee will accept a very slight amendment which I will propose; that is, that on the second line of the resolution, on page 5, after the words "all State institutions" there should be put in "under proper safeguards."

My reason, sir, is this: there is no difficulty about storing anthracite coal in any way, in any size or height. There have been very serious fires as the result of attempting to store bituminous coals without proper safeguards. That question is now being studied most carefully by a committee of engineers and has had the attention of the Coal Commission at Washington. One reason that there has been from time to time a shortage of bituminous coal has been that the mining companies or the large consumers have found it dangerous to store soft coal. For instance, it has been found in Ohio that if the bituminous coal is piled in heaps higher than three feet, there is liable to be spontaneous combustion. Therefore, at the receiving points they have either had to have a very large area in order that they might store coal only three feet high, or abstain from storing it at all. In some of the ports on the Lakes some of the large establishments have actually stored coal under water in order that they might have a coal supply. They have excavated places on the lake front and had the coal dumped into them, and then have dredged it out when they needed it.

I think, sir, if this is to go to all the institutions of our State and to users of coal, there would be no harm in putting in the words "under proper safeguards" in the resolution, which would at least call the attention of those who saw the resolution to the fact that some safeguards are necessary in storing soft coal.

Mr. COOKE.—I think, Mr. President, the Committee would not have the slightest objection to that amendment.

The report as amended was then adopted unanimously.

ANNUAL REPORT OF THE COMMITTEE ON ARBITRATION

CHARLES L. BERNHEIMER, Chairman of the Committee on Arbitration, presented the following report, which was unanimously adopted:

To the Chamber of Commerce:

Your Committee has the honor of presenting its twelfth annual report. It records as an outstanding feature the demand in which bar and laity join for more and better arbitration facilities and dependable modern arbitration laws.

Your Committee's efforts this year have converged on what

we have termed *educational* and *validation* work—*educational*, in that it has made known to other institutions the value of established and properly functioning arbitration machinery within their own confines, so that business disputes and differences may be quickly and efficaciously disposed of; and, *validation*, in that it strives to have valid, irrevocable and enforceable arbitration laws enacted covering intrastate, interstate and foreign commerce.

Notwithstanding a great amount of detail work as the result of these efforts, we have handled a very large number of cases during the past calendar year. Fortunately, it was possible to dispose of the vast majority by means of mediation and conciliation, but a very few and isolated controversies requiring formal arbitration. Accordingly, your Committee is following out its oft-repeated program of averting both formal arbitration and litigation.

The field covered by these numerous cases has been quite as diversified as it has been in the past. They have come to us from all parts of our country and as far as China, Canada, Scotland, Ecuador, Italy, India, Syria, Holland, Egypt, Greece, France, Germany, Colombia, England, San Salvador, Japan, Dominican Republic, Czecho-Slovakia, Tripoli, Ireland, Austria, Mexico, Nicaragua, Cuba and Hawaii. They have involved, among other commodities and matters: Peas, Umbrellas, Dehydrated Potatoes, Poppy Seeds, Cocoa Beans, Lamps, Tobacco, Glass Insulators, Flour, Insect Powder, Underwear, Linen Padding, Steel Tanks, Printing Machines, Goose Feathers, Light Brackets, Lumber, Embroidered Linens, Coats, Scissors, Automobile Parts and Tires, Indigo Paste, Stationary Engines, Belgian Hares, Stationery, Steam Indicators, Tapestries, Dried Sinews, Dolls, Manuscripts, Asbestos, Pineapples, Camphor, Furs, Burlap, Sugar Bags, Knee-pants, Textiles—Silk, Cotton and Wool, Japanese Bamboo Skewers, Eye-glasses, Rice, Yarns, Pearl Buttons, Perfumes, Hair-nets, Oil, Curry Powder, Radio Apparatus, Steel Rails, Frozen Steers, Sugar-beet Seeds, Cutlery, Exchange, Stock Transactions, Trucking Charges, Employment Contract, Architects' Fees, Re-insurance Policies, Leases, Advertisements, Interpretation of Terms of Contracts, Banking and Insurance.

The Bradford and Manchester (England) Chambers of Commerce have continued to refer dispute cases to your Committee. Our close relationship with these two important institutions is attested by the following resolution adopted by the latter Chamber on July 24, 1922:

"PROPOSED by the President, Mr. W. CLARE LEES, O.B.E., and unanimously voted—THAT—the Board of Directors of the Manchester Chamber of Commerce, resolve that the best thanks and warm appreciation of the Chamber be voted to the New York Chamber, and particularly to . . . Mr. CHARLES L. BERNHEIMER, Chairman of the Committee on Arbitration, for invaluable assistance and cooperation in the endeavours to settle the disputes in an amicable manner.

"The Board congratulates Mr. BERNHEIMER upon the marked

success he has achieved, and express cordial good wishes for the continued progress of the important work he is doing in his Country, which is on parallel lines to the constant aims and endeavours of this Chamber.

“(Signed) E. RAYMOND STREAT,
“Secretary.”

In our report of May 4, 1922 we submitted, and the Chamber has since approved, the drafts of Uniform State and Federal Arbitration Laws, and of a proposed model Commercial Arbitration Treaty. These were prepared by the American Bar Association in co-operation with your Committee. Your Committee has previously advised the Chamber of the approval of that Association at its Convention in San Francisco in August, 1922, of the drafts of the Federal Law and the Treaty. Immediately thereafter, the Chairman of your Committee asked, and was granted, an interview by the Secretary of State, the Honorable CHARLES E. HUGHES, for the purpose of placing before him the form of Arbitration Treaty. Secretary HUGHES stated to your Chairman that he was in sympathy with the principle, that he would give the matter his personal attention and that your Chairman might continue to keep in touch with him. He permitted the Chairman of your Committee to make public reference to this effect. Your Committee did not further stress this matter in 1922, for it deemed it inadvisable until some indication was given by the United States Senate as to its attitude toward the Federal Arbitration Law.

The Federal Arbitration Law was introduced in both Houses of Congress in the latter part of December, 1922—in the Senate by the Honorable THOMAS STERLING of South Dakota and in the House by the Honorable OGDEN L. MILLS of New York, and in each instance was promptly referred to the Committee on the Judiciary. Your Committee collaborated with the American Bar Association, the National Association of Credit Men and many other organizations in every part of our country in pressing the passage of the bill. In the list appended will be found the Associations now co-operating. This list will no doubt be greatly increased before long.

Western Fruit Jobbers Association of America, Chicago, Ill.	American Chamber of Commerce of Philippine Is., Manila, P. I.
San Francisco Chamber of Commerce, San Francisco, Cal.	Atlantic Fruit Company, New York City, N. Y.
Babson Institute, Wellesley Hills, Mass.	Yakima Fruit Growers Association, Yakima, Wash.

ciation, Inc.,
Albany, N. Y.
- San Antonio Chamber of Com-
merce,
San Antonio, Texas.

In the Senate, the Federal Arbitration Act was referred by the Judiciary Committee to a Sub-Committee composed of Senators THOMAS STERLING of South Dakota, THOMAS J. WALSH of Montana and RICHARD P. ERNST of Kentucky, for study and investigation. Unfortunately, however, during the last month of the session just closed, the legislative jam was so great that the bill could not be reported out. Senator KNUTE NELSON of Minnesota, the Chairman of the Judiciary Committee, was greatly impressed with the purpose and objects of the bill, as was also Senator THOMAS STERLING, its introducer in the Senate. Much valuable experience and information was obtained in con-

ferences with Senators, Congressmen, lawyers and men representing labor unions. As a consequence numerous amendments will have to be made but, in the opinion of your Committee, not endangering the main features of the bill. Thus the considerable amount of time devoted to the handling and following up of the Federal Arbitration Act during the Sixty-seventh Congress was well spent. It will greatly help towards the final success which we hope for at the coming session.

The amended bill will be submitted in due time to the Chamber for its approval.

In the State of New Jersey a commercial arbitration law patterned after our New York Law and the model proposed by the Committee on Commerce, Trade and Commercial Law of the American Bar Association, was introduced in the Legislature soon after its opening. It was passed by the Senate late in the evening of March 15th, by the Assembly on March 17th and signed by Governor GEORGE H. SILZER on March 22nd. This marks a stirring accomplishment for the cause of commercial arbitration in New Jersey, for its Senate had in two previous sessions refused to pass a bill of this kind. In these efforts, your Committee and the Chamber's Counsel have co-operated most actively at all stages of the procedure with the New Jersey State Chamber of Commerce, the Newark Chamber of Commerce, the New Jersey Bar Association and that long-standing and staunch friend of commercial arbitration, the National Association of Credit Men.

Further, an arbitration law modeled on the proposed Uniform Act is now before the Legislature of the State of California, where heretofore, opposition to a less perfected law succeeded in defeating the bill. We are not advised of the precise status of the matter in that State. Numerous meetings were had by your Chairman with Chambers of Commerce and representatives of Trade Organizations last July in California.

Little by little, we hope to win one State Legislature after the other, but as it may take the greater part of a lifetime to line up a substantial number, our chief efforts remain centered upon the Federal Arbitration Act. It should be understood that the Uniform State Arbitration Law, to take care of intrastate commerce, the Federal Arbitration Law, to take care of interstate commerce, and Commercial Arbitration Treaties, to take care of foreign trading, are interlocking. An harmonious whole will only have been accomplished when all have become realities. It is your Committee's belief that the stake is worth striving for, no matter how long it may take.

At the second general meeting of the International Chamber of Commerce which was held in Rome, Italy, during the week beginning March 18th, it declared itself as follows in regard to commercial arbitration:

"Full respect for the validity of arbitration clauses in international commercial contracts is an indispensable condition for the extension of the practice of international commercial arbitration. One or more

international conventions should be negotiated to pledge participating countries to give effect to arbitration clauses and to cause its courts to stay an action at law begun by a party to such a clause if the court is satisfied the other party is willing to carry out the arbitration. Through treaties countries should provide that an award in a case of commercial arbitration made in one country will be enforceable in the other."

Thus this very important institution has taken a stand identical to that held by our Chamber these many years.

To illustrate the value of a valid, irrevocable and enforceable arbitration clause in a contract and its effect upon the business mind, your Committee believes it useful and desirable to quote from a reference which appeared in a recent issue of the *Manchester Guardian*. The statement is attributed to Mr. E. RAYMOND STREAT, Secretary of the Manchester (England) Chamber of Commerce, and reads as follows: "The small number of arbitrations relatively to the vast number of arbitration clauses points to the fact that the existence of the clauses in general use is a great deterrent to avoidable disputation." This is also our own experience.

Your Committee deems it relevant to make reference to its activities in co-operation with the "Committee on the Law's Delay." The Bench and Bar of this locality, in view of the distressing congestion of the court calendars, organized in the hope that they might devise ways and means for removing an intolerable situation. Numerous meetings have been held, in all of which your Committee has been asked to participate. The most important was one taking place in the County Court House of this City, Mr. Justice WAGNER presiding, at which the Chairman of your Committee had opportunity to outline the arbitration facilities and the work of the Chamber in this field of endeavor and to make recommendations. A printed record of his remarks will be found in the *New York Law Journal* of February 3, 1923. This Committee continues to function. It is confidently expected that satisfactory results will follow.

An impetus worth noting will be given to arbitration, as one of the remedies for the law's delay, during this month when there will be inaugurated what is to be known as "Arbitration Educational Week." The Chairman of your Committee has been honored in being asked to head this movement and to accept the Chairmanship thereof. "Arbitration Educational Week" is an organized movement of individuals and of organizations having arbitration facilities to enlighten the public on the economic and ethical value of commercial arbitration. It will endeavor to make clear the means by which costly, irritating, time and friendship-destroying litigation can be replaced by orderly, prompt and satisfying arbitration through men technically experienced in the line of business involved in the controversy, enjoying the respect and confidence of their fellowmen.

Your Committee has been called upon to enter into a three-cornered pact with the *Nederlandsch Amerikaansche Kamer Van*

Koophandel in Amsterdam and the Netherlands Chamber of Commerce in New York, Inc., with the object of extending knowledge of the value of commercial arbitration, of bringing it into more general use between nationals of the respective countries and of assisting each other in disposing, with the least possible expense, waste of time and friction, of the matters which may arise in the Holland-American trade.

The Chairman of your Committee was also asked to address the Pan-American Union on the subject of commercial arbitration at its conference in Hawaii during August, 1922. When he found that it would be impossible to personally attend this conference, he submitted a lengthy paper on the subject.

The American Branch of the International Law Association held its second annual meeting in New York on January 27th, 1923, for the purpose of discussing commercial arbitration in its international aspect and also with a view of approaching the League of Nations to have it consider taking this subject under advisement.

The Chairman of your Committee attended this gathering upon invitation and took advantage of the opportunity to present the New York Chamber's viewpoint.

Among the many evidences of liberal spirit displayed by the foreign Bench and Bar toward commercial arbitration, your Committee believes worthy of note the decision rendered in France by the Tribunal of the Seine early in 1922 and quoted in the footnote, by which decision the courts of France have held that an award of English arbitrators is enforceable in the Republic of France.

Another cheering and encouraging message comes from France. The law in that country as in ours makes no provision for the arbitration of disputes between its government and those doing business with it. Yet during the last two years the French Republic, by administrative order or consent, permitted one of its Trade Commissioners to submit to arbitration no less than seventeen cases between it and British Merchants and two between it and French Merchants. This reversal of policy on the part of the French Government follows in the wake of a formal arbitration case between that government and the ——— Produce Company of New York which was conducted under the auspices of our Chamber. It was entered into by its Trade Commissioner inadvertently and, as now appears, without due authority. The French Trade Commissioner pays this graceful tribute to the New York Chamber in a statement contained in a letter addressed to the Chairman of your Committee under date of January 15, 1923:

"First of all I must tell you that the award which was rendered under your control in the ——— Produce case was the first one in which the French Government was a party. I was told that on my return to Paris in July, 1921, and the matter was lengthily discussed, of course I have not been blamed, far from it, as since

then I persuaded the Government to go in arbitration 17 times in England and in November, they called me to Paris to settle the arbitration on the spot. That comes from the fact that according to Article 83 the Code de Procédure Civile says: 'Art. 83. Should be submitted to the State Attorney, the following cases: 1. The ones concerning public order, the State, the State property, the towns, . . .' In other words according to a legal expression, the State cannot arbitrate. I hope that will be changed, but my Ministry very wisely and certainly encouraged by the first case arbitrated in New York, set the law aside, authorized me to arbitrate in London, and called me to Paris for two very important arbitrations, which gave me an opportunity to examine what the French laws are with regard to arbitration."

His letter then goes on to say:

"It has been a very great pleasure for me to learn that the arbitration habit is much more spread than one will think and *has always been*.

"The only black spot was that exception made for affairs concerning the State, but that has been overruled for the first time in New York, during the last year in London and in November 1922, in Paris. I think it is a very good start, and I am quite certain that the ————— case settled by you, has been and still is the mainspring of that revolutionary movement in Government traditions. 'Labor omnia vincit Improbus.'"

Your Committee is greatly indebted, for support and encouragement, to the Secretary of Commerce, the Honorable HERBERT HOOVER who designated his personal assistant, Mr. JAMES B. STAFFORD, to aid in our endeavors. In specific matters we have had also the useful help of Dr. JULIUS KLEIN, Director, and Mr. A. J. WOLFE, Chief of the Division of Commercial Laws, Bureau of Foreign and Domestic Commerce. As an indication of Mr. HOOVER'S interest, we quote a letter he wrote to Senator THOMAS STERLING when the Federal Arbitration Law was before the Senate Committee last January:

"I have been, as you know, very strongly impressed with the urgent need of a Federal Commercial Arbitration Act. The American Bar Association has now joined hands with the business men of this country to the same effect and unanimously approved, at its Convention in San Francisco last August, a draft of a law prepared by its Committee on Commerce, Trade and Commercial Law and approved of by a large number of associations of business men. It was introduced in the Senate by you as Senate Bill 4214 and in the House of Representatives by Congressman MILLS as House Bill 13522.

"The clogging of our courts is such that the delays amount to a virtual denial of justice. I append an excerpt of the American Bar Association report which would seem to support that statement. I believe the emergency exists for prompt action and I sincerely hope that this Congress may be able to relieve the serious situation.

"If objection appears to the inclusion of Workers' Contracts in the law's scheme, it might be well amended by stating 'but nothing herein contained shall apply to contracts of employment of seamen, railroad employees, or any other class of workers engaged in interstate or foreign commerce.'

"If the Bill proves to have some defects (and we know most

legislative measures do), it might well, by reason of the emergency, be passed and amended later in the light of further experience.

"The New York State Arbitration Act, on which the Federal Law is based, has been in force since April, 1920, and but for it the court congestion there (26,000 civil cases in the two boroughs of Manhattan and the Bronx alone) would be still worse."

Your Committee once more wishes to record the great pleasure and satisfaction it has derived from the close and extremely helpful co-operation which has existed between it and the American Bar Association and with individual members of the Bar and to express its sense of obligation to them in warmest terms; it also takes this opportunity to again thank the Chamber for its interest and co-operation in its work and hopes that the coming year may bear fruit even more copiously and conspicuously than did the past.

Respectfully submitted,

CHARLES L. BERNHEIMER, <i>Chairman</i>	}	<i>Committee on Arbitration</i>

NEW YORK, *April 24, 1923.*

Footnote

"HASHIMOTO C/ GALLUSSER ET CIE ET LE CREDIT LYONNAIS"

"By charter-party signed at London June 24th, 1916, the defendants, Gallusser et Cie, chartered the ship 'Shigizan-Maru' from the plaintiff for the purpose of transporting Chinese coolies to France.

"The charter-party having contained provisions for the settlement of disputes arising thereunder by Arbitration in England, and the plaintiff claiming damages for breach of contract against the defendants, the case was submitted to Arbitrators in England, who made an award in favour of the plaintiff.

"The plaintiff then brought action in France to obtain the exequatur of this award for the purpose of enforcing it there.

"It was argued on behalf of the defendants that as no special treaty existed between France and England with regard to the executory effect to be given to English judgments, and as in the absence of such Treaty the French Court had a right to inquire into the merits of the case and if it saw fit to revise the terms of the judgment before granting its exequatur, so in the case of an Arbitrator's award, the Court might review the whole matter and revise the terms of the award which the defendants accordingly pleaded it should do.

"The Court however held that an award of Foreign Arbitrators differs essentially from the judgment of a Foreign Court of Law.

"A judgment of a Court of Law being an act of the public authority is limited as to its effect to the territory within which that Court exercises its jurisdiction.

"An Arbitrator's award, on the contrary, is the result of the mutual

agreement of the parties to submit the decision of the points at issue between them to a person or persons of their own choice, and its effect is therefore not limited to any particular territory.

"This being so the Court held that to enter into the merits of the case or to revise the award of the Arbitrators would be to ignore the legal effects of the contract entered into between the parties.

"It further indicated that the only conditions to which the validity of an award by Foreign Arbitrators was subjected in France were:

(a) That the parties to the contract had the capacity required by the *lex loci contractus* to effect a compromise of their rights.

(b) That the award was made in accordance with the Law of the country where the Arbitration was held.

(c) That the award was not contrary to French public order. (Art. 83, C. pr. civ.)"

STRICT OBSERVANCE OF SMOKE NUISANCE REGULATIONS

WILLIAM MCCARROLL, Chairman of the Committee on Public Service in the Metropolitan District, offered the following report and resolutions, which were approved unanimously:

To the Chamber of Commerce:

Owing to the situation in the coal industry, the provisions of the Sanitary Code against the use of soft coal were not rigidly enforced during the winter months. With the coming of warmer weather the Health Commissioner of the city has issued a warning against the use of soft coal or other fuel which causes dense smoke, contrary to Section 211 of the Sanitary Code.

Your Committee on Public Service in the Metropolitan District has kept in close touch with the smoke problem arising from the scarcity of anthracite coal. It feels that the Health Department has acted wisely in this matter.

Your Committee wishes to urge the members of this Chamber to assist the Health Department whenever possible in its efforts to make this city again one of the cleanest in the world.

Smoke injures and destroys building materials, retards growth of vegetation, cuts off sunlight and daylight, prolongs and intensifies fogs, is injurious to comfort and health and is costly to everyone concerned. The beauty of our buildings and streets is greatly impaired and business prosperity is adversely affected. Among those strongly opposed to smoke are merchants who know it will injure their trade.

In the announcement by the Health Commissioner which appeared in the newspapers on April 15th, the following pertinent statement was made:

"With other cities New York was compelled to permit the use of soft coal during the last Winter. It is my desire as Health Commissioner to suppress this smoke nuisance. The presence of dense smoke in a big city has a deleterious effect upon the health of the inhabitants. Mixed with air it lowers the life-giving properties of

the atmosphere and tends to cut out sunlight which has an important psychological effect. It has been noted in industry that under normal conditions there is a greater efficiency among workers on sunshiny days than on days that are cloudy.

"Dense smoke is a danger and an annoyance because of its effect on the eyes and nose of our people. Further, dense smoke soils buildings inside and out, destroys draperies and furnishings, soils wash and makes for a dirty and untidy city, which must not be permitted."

Your Committee accordingly offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York urges its members to co-operate wherever possible with the Department of Health in its efforts to abate the smoke nuisance in the City of New York; and, be it further

Resolved, That the Chamber commends the action of the Health Commissioner, Dr. FRANK J. MONAGHAN, in his prompt action to enforce to its fullest extent the sanitary code against smoke and to return to the former strict administration of the law, immediately upon the passing of the coal crisis.

Respectfully submitted,

NEW YORK, *April 25, 1923.*

REPORT OF AUDITING COMMITTEE

CLARENCE W. ECKARDT reported that the Committee appointed to audit the accounts of the Treasurer had examined the accounts for the past year and found them correct.

The report was ordered received and placed on file.

ANNOUNCEMENTS

Arbitration Week May 14th to 20th
Mass Meeting in Hall of Chamber May 15th

THE PRESIDENT.—I am glad to call your attention to the Arbitration Week which is to be held in this city in the week from May 14th to 20th. This week is to be devoted to the consideration of arbitration matters and the settlement of commercial disputes by means of arbitration, rather than by recourse to the courts of law. It is not to be under the auspices of any one society. As you all know, the Chamber has taken an active lead in arbitration matters for many years, even for generations

past. A mass meeting of business men is to be held on Tuesday, May 15th, in this Great Hall, at four o'clock. It is urged that as many members of the Chamber as can possibly attend that meeting should do so. It is suggested that members who expect to attend notify the Secretary, although I am sure that that will not be necessary, and anybody who finds at the last minute that he can attend should not hesitate to do so. It is intended to arouse interest and educate the public as to the advantages of commercial arbitration. I hope that as many of you as may find the opportunity will attend that meeting here in this Hall.

Members Urged to Study Economic Conditions Abroad

THE PRESIDENT.—There will probably be many members of the Chamber who will follow the custom of its President, or who will be followed by the President, in a pilgrimage abroad this year. Instead of spending their time entirely in enjoying the flesh pots of London, Paris and other great capitals of Europe, it would be a help to this country and to this Chamber if they would make a careful study of economic conditions, as they find them, and inform themselves by any possible means within their opportunities, and, when they come back, if they will send a report by addressing a letter to the Secretary of the Chamber, such reports will be filed and compiled. The Executive Committee will be very appreciative of the views of the members of the Chamber upon conditions as they may find them in foreign countries. This is a particularly opportune time for us to undertake that kind of study, and such information as may be gathered will no doubt be of service.

Daily Luncheons at the Chamber

THE PRESIDENT.—I am also glad to say something about the daily luncheons. It has been my duty several times to call your attention to those luncheons, and to ask your support. I am glad to say that the attendance has been growing steadily. When we first started under the present management of Schrafft's the average daily attendance ran somewhere around forty. Men had been accustomed to lunch in other places, and there was some difficulty getting them started in the direction of the Chamber, but when they began to realize that the food served here was of a very simple and delicious character, and served in a quiet and delightful room, the attendance began to mount, until one day last week we had an attendance of 120 in the main

dining room and 25 or 30 in the private dining rooms. For the entire month of April there has been a total in number of meals served, including the buffet luncheons at the Chamber's meetings and receptions, of 3,265, of which there have been in the neighborhood of 2,000 actually served in the luncheon room upstairs, and nearly 250 luncheons served in the private dining rooms.

That all shows an appreciation of the luncheon service which is being given. You will recall that the luncheon room is not open on Saturdays and Sundays, and in April there were thirty days, so if you subtract the Saturdays and Sundays, we only had about twenty working days in which these luncheons were served.

I feel I should be lacking in my duty if I did not say on your behalf a word of thanks to the member of this Chamber who is at the head of the organization looking after these luncheons. He started in, not with any thought that there would be profit in it for him. He felt that our luncheon room should be run in a way to accord with the ideas of the members. He had to start under rather unfavorable conditions, without much of a plant at his command. I am sure we are all thankful to Mr. SHATTUCK, who is head of the Schrafft organization. I feel personally indebted to him, and I am sure the members do also, for the way he has built up the daily attendance to an average of over 100. It has reached a position where we have under consideration the expenditure of several thousand dollars in enlarging the facilities of the kitchen, and in improving the luncheon room, so that we may take care of, what we believe, will be a very much larger attendance next year. (Applause)

I believe that the benefits to be derived from the luncheon room, giving an opportunity for the members to meet, also for them to bring here in this very dignified building and its surroundings, guests from out of town, where they can see this Great Hall as they pass in or out, are well worthy of our preservation.

I am glad to report that it is doing so well, and, while I do not feel I am compelled to ask for your support, because you are already giving it, I certainly, in behalf of the very self-sacrificing management that Mr. SHATTUCK has given us, ask for your continued support.

The Chamber then adjourned.

Regular Meeting, Thursday, June 7, 1923

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, June 7, 1923, at 12 o'clock, noon.

Present

FRANK A. VANDERLIP WELDING RING JESSE ISIDOR STRAUS	}	<i>Vice-Presidents</i>
---	---	------------------------

CHARLES T. GWYNNE, *Secretary*

and one hundred and ninety-five other members of the Chamber.

Mr. VANDERLIP, Vice-President, presided.

Minutes

The minutes of the 155th Annual Meeting of May 3rd were read and approved.

NOMINATIONS FOR MEMBERSHIP

CLARENCE H. KELSEY, Acting Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Non-Resident Member

<i>Candidate</i>	<i>Nominated by</i>	<i>Seconded by</i>
ALBERT L. BROCKWAY	DAVID T. WARDEN	CHARLES T. GWYNNE

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
LUCIUS H. BIGLOW	ALFRED E. MARLING	HARRIS H. UHLER
CHARLES O. CORNELL	F. N. B. CLOSE	SEWARD PROSSER
MAURICE B. DEAN	ALFRED C. BEDFORD	WILLIS H. BOOTH
WILLIAM W. DRINKER	ELIHU C. CHURCH	DELOS W. COOKE
JERVIS R. HARBECK	JOSEPH P. DAY	FRANCIS GUERRICH
JAMES H. MCGRAW, JR.	JAMES H. MCGRAW	REUBEN E. KIPP
WILLIAM C. POPPER	LEE KOHNS	CARL F. AHLSTROM
WALTER G. ROBINS	F. N. B. CLOSE	WILLIAM H. PORTER
HAROLD H. SHORT	H. D. MARSHALL	EARL E. BEYER
PHILIP D. SMITH	EUGENE G. FOSTER	LIONEL SUTRO
EDWARD L. SUFFERN	F. W. LAFRENTZ	ROBERT A. SUFFERN
JOSEPH R. WARNER	F. N. B. CLOSE	SEWARD PROSSER
CHARLES F. WEBER	J. W. NEWLEAN	WELLINGTON E. BULL

Messrs. GEORGE E. MOLLESON and JAMES W. ADAMS were appointed tellers and the vote taken resulted in the election of the above named candidates for membership in the Chamber.

BANQUET COMMITTEE

Mr. KELSEY, on behalf of the Executive Committee, offered the following resolution, which was adopted unanimously:

Resolved, That the President be, and he is hereby authorized to appoint a Special Committee of Five, with power to make arrangements for the 155th Annual Banquet of the Chamber, to be held November 15, 1923.

SPECIAL MEETING TO ELECT COMMISSIONERS OF PILOTS

Mr. KELSEY, also for the Executive Committee, presented the following resolution, which was unanimously adopted:

Resolved, That a special meeting of the Chamber be held on Thursday, October 4, 1923, at 11:45 A. M., to elect two Commissioners of Pilots to serve for two years from that date in place of MARCUS H. TRACY and JOSEPH B. MORRELL.

ARBITRATION AGREEMENT WITH NETHERLANDS CHAMBER

Mr. KELSEY, on behalf of the Executive Committee, also presented the following preamble and resolution, which were approved unanimously:

To the Chamber of Commerce:

Whereas, The Netherlands Chamber of Commerce in New York, Inc., and the Nederlandsch Amerikaansche Kamer van Koophandel in Amsterdam have invited the Committee on Arbitration of the Chamber of Commerce of the State of New York to join in establishing machinery for investigating, settling and adjusting, without litigation, difficulties arising in trade between Dutch and American individuals, firms and corporations; and

Whereas, A set of rules has been prepared to that end, marked Appendix A; now, therefore, be it

Resolved, That said rules and agreement be approved by the Chamber of Commerce of the State of New York and its Committee on Arbitration be, and it is hereby authorized to execute the same on behalf of the Chamber.

Appendix A

Machinery having now been completed by the International Chamber of Commerce in Paris for the disposition of commer-

cial controversies by means of commercial arbitration, it seems desirable, with a view to avoiding duplication of effort, that this machinery be utilized whenever possible. But if it does not meet with the views of the parties to the dispute, either in its entirety or in part, the Committee on Arbitration of the Chamber of Commerce of the State of New York stands ready to do the following:

To work in co-operation with the Netherlands Chamber of Commerce in New York, Inc., in co-operation with the Nederlandsch Amerikaansche Kamer van Koophandel in Amsterdam, or with any other Chamber of Commerce or business men's organization in Holland, for the purpose of disposing of controversies by means of arbitration, mediation and conciliation. With that in mind, our Committee submits the following principles for consideration:

The Committee on Arbitration of the Chamber of Commerce of the State of New York	} hereinafter referred to as the New York Chamber
--	---

The Netherlands Chamber of Commerce in New York, Inc.	} hereinafter referred to as the Netherlands Chamber
---	--

and the

Nederlandsch Amerikaansche Kamer van Koophandel in Amsterdam	} hereinafter referred to as the Kamer
--	--

in order to promote commerce between the respective countries and to establish a method for investigation, settlement and adjustment without litigation of difficulties arising in the Holland-American trade between individuals, firms and corporations, adopt the following rules:

1st. If the disputants have not specified the place of arbitration in a contract containing an arbitration clause referring any dispute which may arise thereunder to be settled according to the arbitration rules of the above-mentioned Chambers and Kamer, and if they themselves fail to agree, then the two Chambers and the Kamer, through their respective Committees on Arbitration, are requested to designate unanimously the location wherein the arbitration proceedings shall take place on the basis of the principle that the case is to be settled by arbitration in the country or state where a claim, if allowed, is to be satisfied.

In the event of a disagreement between the Committees, then the location, whether in New York or (at The Hague) in Hol-

land, shall be designated by the Chairman of the Committee on Arbitration of one of the respective Chambers as follows:

During the year 19—, such designation shall be made by the Chairman of the Committee on Arbitration of the New York Chamber. During the year 19—, such designation shall be made by the Chairman of the Committee on Arbitration of the Kamer and alternately by rotation in the years thereafter.

2nd. If arbitration is to take place in Holland, it is to be governed by the provisions of the Dutch law under supervision of the Committee on Arbitration and subject to the rules of the Kamer or any other Chamber of Commerce or trade body in Holland having adequate facilities for the disposition of commercial controversies by arbitration; provided their arbitration rules are made to conform as nearly as possible to those of the Kamer, the New York Chamber and the Netherlands Chamber.

3rd. If arbitration is to take place in the State of New York, such arbitration shall be governed by the law of the State of New York and shall be by either one or three arbitrators under the rules and regulations of the Chamber of Commerce of the State of New York.

4th. The Chambers and the Kamer will, through their respective Committees on Arbitration, use their moral pressure and good offices towards bringing about through mediation and conciliation, a speedy settlement by negotiation, in preference to formal arbitration, in all such cases as are subject to these rules.

5th. Both the Kamer and the Netherlands Chamber shall be used to the fullest extent as clearing houses with a view to facilitating the disposition of commercial disputes as speedily as possible. The Kamer and the Netherlands Chamber stand ready to assist in the broadest sense in the negotiations for settlement by mediation and conciliation.

6th. This agreement is to remain in force indefinitely, but any of the contracting parties may withdraw by giving six months' notice in writing. Any controversy under negotiation or pending under these rules, however, shall be completed before such withdrawal becomes effective.

7th. These rules may be changed from time to time by the unanimous approval of all the Chambers, the Kamer and other trade bodies subscribing to it; but such changes shall not affect controversies under negotiation or pending.

GOVERNMENT OPERATION OF STEAMSHIPS OPPOSED

DAVID T. WARDEN, Chairman of the Committee on the Harbor and Shipping, presented the following report:

To the Chamber of Commerce:

Your Committee on the Harbor and Shipping has given serious consideration to the possibility of the Government going into the business of directly operating steamships. The large investment in vessels which the Government now has is the result of the exigencies of the war, so that the problems with which the Federal authorities are confronted are not of their own seeking. It is generally admitted that a solution of the difficulties will be hard to work out, but your Committee believes, that, of any solution, the worst which could be devised is one which would lead the Government into the business of operating steamships for its own account.

This Chamber has gone on record in a number of cases against Government ownership and operation of various kinds. On November 3rd, 1921, a report was adopted against state insurance which was reaffirmed on February 1st, 1923, in which the following statement was made:

"The members of this Chamber know the blighting influences of Government ownership. In both State and Federal affairs it has been completely demonstrated that the Government cannot carry on business more economically or more efficiently than its citizens. Deficits, owing to un-businesslike bookkeeping, are not always revealed, but are, in any event, met by taxation of the general public. Thus, the real losses from Government enterprises are not fully appreciated.

"The political maxim should not be forgotten, to the effect that Government control grows by what it feeds on. Being given powers it at once reaches out after more, under the belief that its effectiveness can always be increased through a grant of more power. Ultimately, an elaborate bureaucracy is built up which is economically and financially unsound and contrary to American ideals."

On April 5th, 1923, in a report upon water power development in the State of New York, the following resolution, among others, was adopted:

"*Resolved*, That the Chamber reaffirms its opposition to the Government engaging in competitive business and condemns any proposal which shall lead to New York State or other governmental body undertaking to design, construct or operate hydroelectric plants."

On May 1st, 1919, this Chamber upheld a report of the Executive Committee against further operation by the Government of telegraph, telephone and cable systems because:

"The experience of business men generally with the service rendered by public utilities recently taken over by the Government has strengthened a conviction previously deep-seated and wide-spread that Government ownership of such utilities should be limited to the field occupied prior to the war; and the experiences of nine months have created an equally profound conviction that Government operation of such utilities should be discontinued at the earliest possible date."

This Chamber also has gone on record on several occasions against municipal operation of transit lines.

In view of the strong sentiment expressed by this Chamber, your Committee on the Harbor and Shipping feels that it will be strongly supported in a resolution calling upon the Government to avoid, in handling the shipping problems before it, any measures which shall plunge it into the operation of steamships for its own account.

The hazards of this business are great, and especially demand the careful attention and business sagacity incident to private initiative. The Government's handicap would be greater in the shipping trade than in a number of other enterprises in which it has at times engaged so unfortunately, for in the shipping trade there is no opportunity for a monopoly or control of the industry. The Government would be in competition with large private interests not alone in the United States, but in foreign countries. At the same time, Government operation would discourage our private operators, and thus would defeat the very purpose and aims of Congress to build up an important American Mercantile Marine.

In addition to business and economic considerations which make impractical direct operation of steamships by the Government, are matters of international diplomacy. There is good authority for the view that if our Government as a shipowner undertakes the operation of vessels by Government employees in competition with private foreign interests, such action might result sooner or later in placing a serious strain upon our diplomatic relations with those foreign countries having important maritime commerce.

Therefore, be it

Resolved, That the Chamber of Commerce of the State of New York is opposed to Government operation of steamships, and

recommends to the United States Shipping Board and the Federal authorities that in the solution of the problems before it, no plans shall be adopted which shall result in Government operation; and, be it further

Resolved, That copies of this report be sent to the President, members of the Shipping Board and of Congress.

Respectfully submitted,

DAVID T. WARDEN, *Chairman*
CLIFFORD D. MALLORY
LOWELL L. RICHARDS
WILLIAM E. HALM

} *Committee
on the
Harbor and
Shipping*

NEW YORK, May 28, 1923.

Mr. WARDEN.—The report which is in the pamphlet before you contains the names of only six members of the Committee. One member, Mr. BARBER, was absent from the city when this report was drawn up. He has since returned and has signified his concurrence, so that the report is now approved by the whole Committee.

I also wish to state, Mr. Chairman, that, on account of the urgency of this matter, the Committee requested the Secretary of the Chamber to forward copies of this report to the Federal authorities mentioned in the resolutions, explaining that it was only the voice of the Committee and that, when the Chamber itself had passed upon it, further advices would be sent to them recording the action taken.

I move the adoption of the resolutions.

The report and resolutions were then unanimously adopted.

TRANSIT LEGISLATION AND CO-OPERATION TO BUILD SUBWAYS

WILLIAM MCCARROLL.—Mr. Chairman, the report from your Committee on Public Service in the Metropolitan District is mainly a resume of the activities of the Committee, pursuant to the actions of the Chamber which have been taken on a number of occasions, and a statement of the present status of transit affairs. It does not call for any resolutions on the part of the Chamber, and I do not think it is necessary for me to read it, as it is of some length and printed copies of it are before you.

The name of Mr. JEWELL, one of the members of the Committee, was not appended to the report, as he was absent from the meeting when adopted. I notice him here and he signifies that he approves. I am glad to add his name, making it the unanimous report of the Committee.

I move that the report be received and the action of the Committee approved.

Report

To the Chamber of Commerce:

As previously reported to the Chamber by your Committee on Public Service, and as doubtless is well known to the members, numerous bills affecting the transit situation and the public utilities generally were presented to the Legislature at its recent session. These bills had a common object—namely, to abolish the present transit law and to abrogate the regulatory oversight by the State of public utilities in cities. The most comprehensive of the proposed measures were those known as the Walker-Donohue bills, introduced in the Senate and Assembly, respectively, by Senator WALKER and Assemblyman DONOHUE. Briefly summarized, the outstanding features of the transit bills were provisions for the transfer of the powers of the Transit Commission to a department or bureau of the city under the Mayor and Board of Estimate and Apportionment, its officials to be appointed by the Mayor, also empowering the city to undertake control and operation of transit facilities. As to other public utilities, the various bills followed similar outline. We do not deem it necessary now to enter any discussion of them in detail, assuming the familiarity with them of the members. Suffice it to say that the underlying principles embraced in them are those which met the unanimous disapproval and opposition of the Chamber on several occasions as being fraught with disaster to the welfare of the city and the public at large. Your Committee was therefore authorized and directed by resolution adopted at the meeting on February 1st, to appear at the public hearings and present the views and attitude of the Chamber regarding them, and to take such further action as might be desirable to make effective its opposition to such legislation. Accordingly your Committee by its Chairman and some of its members attended the three hearings given by the Committees of the Legislature at the Capitol. The first was held in the Assembly Chamber on March 1st before the joint committees of both houses, on the Walker-Donohue Transit Bill. It was largely attended, the Mayor, the Comptroller and other city officials being present, and many representatives of commercial and civic organizations. With few exceptions, the latter were also in opposition to the bills under discussion. Another hearing was

given on March 21st, more particularly upon the general utilities bills proposing to empower cities to own, control or operate public utilities in their own jurisdiction under the euphonious "slogan" of "Home Rule for Cities." Widespread and strong opposition was expressed against the measures.

The further and last hearing was given on March 28th by the Senate Committee on Public Service. This was on the Walker-Donohue Bill on public utilities of the city, and was attended by a considerable number of representatives of companies affected, as well as of commercial and other organizations.

Following these hearings, the bills were reported from the respective committees to both Houses of the Legislature. During the course of the legislative steps, the regrettable fact was manifest which might well be termed tragical, considering the vital interests at stake—namely, that this which is so essentially a business question was being inextricably involved and dealt with as one of party politics. To the credit of those who represented the commercial and civic organizations and the public, it should be said that there was no evidence of any such influence on their part. The situation, however, became so acute and so full of menace that your Committee deemed it advisable to bring it to the attention of the individual members of the Chamber and addressed a letter of explanation to them, requesting them to express their views on the subject to members of the Legislature personally and directly. Your Committee would here extend thanks to the many members who responded and by so doing supplemented its efforts to defeat the proposed legislation. The remark may here be permitted that such individual representations are not regarded with indifference by legislators to any such degree as is often presumed, but on the contrary are even desired and valued as properly helpful in consideration of their subjects. However that may be, it was the cause of profound gratification that the measures were defeated and the Legislature adjourned. Thus the Transit and Public Service Commissions laws remain intact, and in effect as they stand.

As was pointed out in the resolution adopted by the Chamber on February 1st, 1923, the Transit Commission law contemplates the co-operation in carrying out its program for transit facilities by both the State and City authorities. This was never more incumbent than it is now. Progress in providing the vitally needed expansion of transit can only be secured by the loyal and energetic fulfillment of its duties by each body in harmony for the city's interest and that alone.

It is with a degree of satisfaction that your Committee feels justified in reporting that there appear grounds for anticipating at least a larger measure of this co-operation than has heretofore existed. A promising augury may be found in the issue of the hearing given on last Friday the 1st inst. by the Board of Estimate and Apportionment on the proposals of the Transit Com-

sion when also the Mayor's suggested routes for rapid transit lines were adopted.

Under date of May 15th the Transit Commission had transmitted to the Board of Estimate and Apportionment these proposals for new subway construction, and asking the formal approval of them by that Board. A copy of same for full details of information is filed with this report of your Committee. It provides a program for construction of lines to be carried out during the ensuing five years and involving an expenditure of \$225,000,000. Each of these lines would be in connection with parts of the present subways which are recapturable by the city and would give substantial expansion of service at the present fare of five cents. They are:

1. The extension to Flushing.
2. The extension of the subway across 42nd St., Manhattan.
3. A subway to Staten Island.
4. The extension of present Fourth Avenue Subway in Brooklyn to the end at 95th Street.
5. The extension of Broadway-Seventh Avenue Subway from 59th Street to Washington Heights.
6. The crosstown line in Brooklyn from Long Island City to Fulton Street, Brooklyn.
7. A new subway and East River tunnel from City Hall Station of Broadway-Fourth Avenue line to connect the Fulton Street elevated line in Brooklyn.
8. Completion of the Nassau Street line for the loop to Brooklyn.
9. A capacious new trunk line from downtown Manhattan to Washington Heights—preferably through Eighth and Amsterdam Avenues.

The extension to Flushing stated above as No. 1 is now under construction.

The plans for the other routes are in large part in readiness, so that work might be begun on them or on some in a short time.

The preparation of them, requiring a considerable time, has been carried on by the Commission without interruption.

At the hearing by the Board of Estimate and Apportionment on the 1st inst. it developed that the Commission and the Mayor were in substantial agreement as to the desirability of at least a number of the routes—particularly as to the trunk line for Manhattan and the crosstown line for Brooklyn as of first importance.

In urging the necessity for beginning actual work the Chairman of the Transit Commission repeated formally the request that in order to reach a working agreement, arrangement should

be made for conference of the two bodies either by the Board as a Committee of the Whole, or by appointment of a sub-committee by it to meet similarly with the Transit Commission conferees.

The hearing was attended by a considerable number of representatives of organizations of the several Boroughs of the City, and of the public. The Chairman of your Committee was present on its behalf and the interest of the meeting was keen. The demand that action must be delayed no longer was evident and outspoken. Cards bearing the inscription "Start building subways now" were displayed in the hands of nearly all present, indicating that the point of determination has been reached by the people and must be met. Following more or less controversial discussion between the Chairman of the Transit Commission and the Mayor, at the close of the hearing, the Mayor appointed as the Conference Committee of the Board MURRAY HULBERT, President of the Board of Aldermen; JOHN H. DELANEY, Dock Commissioner, and ARTHUR S. TUTTLE, Chief Engineer of the Board of Estimate.

For both the honor and well-being of the city, it is to be earnestly hoped that all preconceptions and theories which have heretofore promoted only antagonism may be disregarded for the great necessities of the city, and that we may see as a result of the new procedure by reasonable conference, the "start to build subways now."

In concluding this report, necessarily somewhat incomplete, but submitted at this time because of the adjournment of the Chamber for the summer, we would refer to the progress which has been accomplished towards the financial reorganization of the Interborough and Brooklyn Rapid Transit Companies. This is a necessary preliminary in the readjustment or unification program outlined in the Transit Commission Law, and as reported by your Committee under date of November 3rd, 1921. In the case of the Interborough Company, it may be said to be at least formally complete, the three directors representing the public by appointment of the Transit Commission having taken their places on the Board.

In the case of the Brooklyn Rapid Transit Companies, the scheme of its reorganization has just been approved by order of the Transit Commission adopted on Monday last, the 4th inst., and doubtless in the immediate or near future it also will be similarly re-established, with the discharge of the Receivership.

In closing, your Committee expresses its conviction that in these readjustments of the complex affairs and difficulties of these two companies, in their maintenance of service indispensable to the people during a long period of embarrassment, and their re-establishment on sound financial bases (though only after great losses by investors), as revitalized operators of great public utilities, there is an unanswerable demonstration of the efficacy

and necessity of State regulation, without which your Committee is of the opinion that the end so imperative for the welfare of the City could scarcely be achieved.

The bills which were designed to solve the transit problem of the City of New York and which are now on the statute books, were supported by the Chamber. Since the passage of these measures, in 1921, the work of your Committee has been devoted to supporting the purpose of the laws. The report herewith submitted outlines the situation up to the present time, and the facts set forth indicate that it is possible for a solution of our transit problems to be attained under existing laws.

Respectfully submitted,

WILLIAM MCCARROLL, <i>Chairman</i>	}	<i>Committee on Public Service in the Metropolitan District</i>

The motion, that the foregoing report be received and the action of the Committee approved, was adopted unanimously.

REPORT OF DELEGATE TO NATIONAL FOREIGN TRADE CONVENTION

WELDING RING, delegate to the National Foreign Trade Convention, presented the following report:

To the Chamber of Commerce:

As a delegate, appointed by your President, I attended the Tenth National Foreign Trade Convention, held in New Orleans, La., May 2nd, 3rd and 4th.

While the convention was not as large as some previous ones, yet there was very great interest taken in all the proceedings, and the addresses were of exceptionally great interest, particularly those relating to foreign trade, transportation and American shipping. Great interest was manifested in all of the meetings and the attendance was large and constant. Those present all appeared to think that it was one of the best conventions that the Council has ever held. There was a very wide representation embracing quite a large number from the Pacific, many from the South, and also a large number from the Middle States and the East. Taken as a whole, I believe the convention was well worth the time and energy devoted to it.

As a representative of the Chamber, I received recognition from a large number of people, and they seemed to believe that our Chamber is the leading one of the country.

Expressing my appreciation of the honor of representing the Chamber, I am,

Respectfully yours,

WELDING RING.

NEW YORK, May 7, 1923.

The report was ordered received and placed on file.

ENFORCEMENT OF PROHIBITION LAWS

THE VICE-PRESIDENT PRESIDING.—The Chamber at its last meeting, you will remember, tabled a report from the Executive Committee in regard to the enforcement of the Prohibition Law. The Executive Committee has been giving very careful consideration to this subject and is prepared to offer substitute resolutions, if the Chamber will take from the table the report that was laid on the table at the May meeting.

It seems to the Chair that this is really an important matter. The Chamber of Commerce of the State of New York cannot, I think, go upon record as not believing in the enforcement of law. The resolutions that were presented last month did not meet with favor by a majority of those present and perhaps were not worded as well as they might have been. The Committee, however, now advises that it has substitute resolutions, which, it is hoped, will meet with unanimous favor.

Mr. KELSEY.—Mr. Chairman, before making the motion to take the report from the table, I should like to add to what you have said that the Executive Committee was surprised at the impression that its former resolutions seemed to make upon the Chamber of Commerce. If the vote is to take the report and resolutions from the table, it is the purpose of the Executive Committee at once to offer the substitute resolutions which have been printed and are in your hands, in the belief that they will meet with more favor.

I therefore move that the report and resolution which were tabled at the last meeting, be taken from the table.

The motion was seconded.

Report on Enforcement of Prohibition Laws Taken From the Table

The report, which appears below, was then taken from the table by a vote of 47 in favor and 38 against, a number of those present not voting.

To the Chamber of Commerce:

Through the adoption of the Eighteenth Amendment to the Constitution of the United States, the enactment of the so-called Volstead Act, and the passage by the Legislatures of many States of the Union of laws prohibiting the sale of intoxicating beverages, prohibition is nominal but not a fact throughout the greater part of our country today. The Executive Committee of the Chamber of Commerce does not feel it incumbent to give an opinion as to the wisdom, or the lack of it, as evidenced by the amendment to the Constitution, but since it is notorious that the constitutional provision is flouted and that the prohibition laws are flagrantly violated, it is felt that the attention of law-abiding citizens should be directed to certain features of this situation.

This Chamber has on many occasions deplored acts of lawlessness on the part of certain elements of our population; it has advocated remedial legislation, and, now in the face of a spirit of lawlessness which apparently permeates the body politic in general, the Executive Committee recommends that so long as prohibition laws are to remain upon the statute books, the members of this body should exert their influence both collectively and personally, in behalf of a rigid enforcement of these laws; and furthermore, the Executive Committee is of the opinion that whatever the legal responsibility of a person who purchases liquor brought into or manufactured in this country in defiance of the Constitution and the laws, may be, a point which it does not pretend to determine, there can be no doubt that it is reprehensible for any community to afford a market which tempts persons of weak character into a life of crime by reason of the extraordinary gains which may be reaped. For these reasons, the Executive Committee presents the following resolution for your consideration: Be it

Resolved, That the Chamber of Commerce of the State of New York, endorses the report of the Executive Committee, and recommends to the authorities of the Nation and of the State, that if the present statutory provisions are insufficient they take steps to lay before Congress and the Legislature the measures necessary to bring to an end a national scandal; and, be it further

Resolved, That the President and the Executive Committee are hereby authorized and directed to follow this question with diligent attention and take such measures as may be deemed advisable to co-operate with the duly constituted authorities.

**Substitute Resolutions on Enforcement of Prohibition Laws Offered
by Executive Committee**

Mr. KELSEY.—Mr. Chairman, in offering the substitute resolutions, on behalf of the Executive Committee, I should like to say that it was not the purpose of the Executive Committee, in preparing the report which was submitted at the last meeting or the resolutions accompanying it, to try to range the Chamber of Commerce of the State of New York on one side or the other of the question of Prohibition; but it seemed to the Committee that there could be no question but that the Chamber of Commerce would take its position, as it always has, on the side of the enforcement of law.

From the reception of those resolutions, it seemed to the Committee, that the majority thought that the amendments which were suggested as possible or proper to be made in the resolutions of the Committee, meant only amendments which put more teeth in the law and made it more drastic. This evidently started a debate on the merits of the Prohibition Law. We did not think it the time or the place, perhaps, for such a debate, nor that anything that we could say would settle that question, but we did think that the Chamber of Commerce should take its position back of the law as it stands until it is changed, if it is desirable to change it, or if it could be changed to be more acceptable. These resolutions which we propose to offer as a substitute contemplate obedience to the law as it is; further, the approval of amendments which may be found necessary or can be agreed upon to make the law more satisfactory, and each one of you can have in mind the amendments which he thinks would make it more satisfactory. But, until those amendments are agreed upon and enacted, can there be any question but that the Chamber of Commerce of the State of New York should call upon all citizens to obey the law as it stands? Even the Governor of New York, in signing the Mullan-Gage repeal, calls upon the citizens of New York to obey the law as it stands. Can the Chamber of Commerce do any less?

I offer, therefore, as substitutes for the resolutions in the report which has been taken from the table, the following:

Resolved, That the Chamber of Commerce of the State of New York endorses the report of the Executive Committee; that it believes in the enforcement of law and in respect for law; that in the case of the law prohibiting the sale of intoxicating beverages, the law should be respected and observed; that flouting a law because one does not believe in it, breeds disrespect for all law and encourages citizens in the belief that observance of the law by them as citizens is dependent upon their individual approval or disapproval of the law; and

Resolved, That if amendments to existing legislation on the subject are necessary to insure its enforcement or to modify it so that it shall have a more united public opinion in support of it, such amendments should be enacted and thus a great national scandal brought to an end; and, be it further

Resolved, That until such amendatory legislation is enacted by Congress, this Chamber use its power and influence in support of obedience to existing law and respect therefor; and

Resolved, That the President and Executive Committee are hereby authorized and directed to take such measures as may be deemed advisable to co-operate with the duly constituted authorities.

Mr. KELSEY.—I move the adoption of these resolutions.

The motion was seconded.

Mr. MCCARROLL.—Mr. Chairman, I am among those who believe that this Chamber was placed in an unfortunate position at the last meeting when we, in a manner, sidetracked the question that was then presented, and, now, is again before us.

It has been stated that this is a subject that perhaps the Chamber of Commerce ought not to take any action upon, it not being a commercial question. As the report of the Executive Committee indicates, this Chamber has at times properly taken action on very many things that were not commercial, but some were even more important than only commercial, because they affected the welfare of the community and of the nation.

It seems to me that this is among those questions, for today there is perhaps the greatest danger to our country—a great and growing danger, and particularly with reference to this very law—from the disregard of law, not only disregard but flagrant violation, as the President of the United States calls it.

Can this Chamber be indifferent or fail to take a position when the community's interest is so affected? It is not a question for option. Some questions, when they are raised, must be answered, like the famous one put to a man who was a witness, "When did he stop beating his wife," or another, whether a man is loyal or disloyal. In this subject before us today there is involved, in its analysis, the loyalty of the people of the United States, as to whether they shall be obedient or disobedient to law, or be guided by their individual judgment of its provisions and whether or not they shall obey or disobey at will. I saw in this morning's paper the statement of the alarming conditions that now prevail here, but I hardly need to read it to you because they are well known to every one.

As I have said, they are flagrant. The spirit of lawlessness, the disregard of law generally, and now especially in this matter, is one of the chief dangers to the welfare of the country; and I say it is not only proper, but I believe also it is the duty of this Chamber to speak out at such a time. It has been said that every one knows the Chamber of Commerce is a law-abiding body. One of the speakers at the last meeting made that remark and said that there is no necessity to make any statement on a subject like this. That is true, perhaps, generally, but it is not true, Mr. Chairman, that this Chamber and other bodies like it are regarded as law-abiding in this matter. The "man on the street" does not believe it, and this is one of the great causes of his discontent and of class dissension. The "man on the street" does believe that members of bodies like this Chamber of Commerce and others of the kind have stocks of beverages while he is not able to obtain any, and that there is in the law and its enforcement discrimination against him by reason of his position. Many think that this body and others are indifferent to whether their members abide by the law or not.

So I say, it is the duty of this Chamber of Commerce, as well as other similar organizations, to stand by this law. They have a duty to uphold it while it stands, so far as their influence can do so, not only personally, but as bodies, in behalf of this one principle of obedience to law by all. That is the plain question here before us today, and I do not believe this Chamber can take any but one position on it, and I therefore favor the resolutions. (Applause)

Captain JOHN B. TREVOR.—Mr. Chairman and Gentlemen, there seems to have been some misunderstanding, judging from an analysis of the debate at the last session, and I would like to compare a few passages from a letter of the President of the United States to Dr. WAIT, published in the New York Times of May 17, 1923, the statement of Governor SMITH, and the report of our Committee.

The report says, in the first paragraph:

"The prohibition laws are flagrantly violated and it is felt that the attention of law-abiding citizens should be directed to certain features of this situation."

Now, if you will turn to the statement of Governor SMITH, he says:

"If we place squarely upon the Federal authorities the primary duty and obligation to put an end to the enormous smuggling of liquor from foreign countries into this State, it will be where it rightfully belongs, and we will have taken a long step forward to the re-establishment of respect for and enforcement of law."

The principle embodied in both of those statements is precisely the same. And again, the report says:

"So long as Prohibition laws are to remain upon the statute books,

the members of this body should exert their influence both collectively and personally, in behalf of a rigid enforcement of these laws."

The president of the United States, in a recent letter published in the press, says:

"It is the law of the land, and of every State within the Union. So long as it remains the National policy there can be only one course for the National government to pursue. That is, to use every means to make effective the law passed in compliance with this constitutional mandate."

Now, I would like to quote from the remarks made by a member of this Chamber in the course of the debate at the last meeting:

"Men do not hesitate to violate the law because their conscience is not involved. A man who does not pay his taxes or who shirks part of his taxes, unquestionably is called to order by his conscience, because he knows he is doing something which is against the Union and against his fellow citizens, putting an extra burden upon them. But the man who takes a drink has no such feeling and his conscience does not arouse him to the fact that he is breaking the law, because he does not hurt the Nation, nor does he hurt his fellow citizens, and perhaps in some cases he may not hurt himself."

Let me compare this statement with one from another source:

"Does not the number of socialist heretics, recognizing neither authority nor law and held together by the consciousness of common duty, mutual attachment and respect, grow daily?"

This last statement is quoted from the *Volna*, one of the rottenest sheets published in New York, and it is impossible to distinguish the sentiment of those remarks and those made on the floor of this Chamber.

Now, gentlemen, it is impossible to say that the man who defies the laws and the Constitution of the United States does not hurt his fellow citizens and government, and for that reason I hope that the substitute resolutions of the Executive Committee will meet with your approval and be adopted. (Applause)

WILLIAM H. DOUGLAS.—Mr. Chairman, at the last meeting of the Chamber this question was very thoroughly discussed and all phases of it were put before the members of the Chamber and practically by a unanimous vote we decided it was unwise for the Chamber to have the resolution which was then presented passed.

No argument has been presented today which was not presented then. Every member of this Chamber has the highest regard and respect for the Executive Committee and for the gentleman who spoke so eloquently just now in reference to his desire to have our Chamber take an active part in the enforcement of the Prohibition Law.

But I claim now, as I claimed then, the Executive Committee has the wrong view of the subject, and the Chamber has the right one. This is the first time that there has been put before us a report of this character, and I have attended the meetings for perhaps a quarter of a century. This is also the first time I know of that this Chamber has been requested to take part in the enforcement of the laws of the United States.

Why, suddenly, are we called upon to be criticised, and to state that we should do something which nobody has claimed we were not doing, except the Executive Committee? (Applause)

I see no right or justification in the Executive Committee's claiming anything of that kind. They cannot claim it so far as I am concerned, because I am willing to do all I can to uphold the law, and I believe every other conscientious member of this Chamber is doing the same.

Therefore it is the viewpoint of the Chamber as against the Executive Committee that should be considered today, and not the ethical question. They have absolutely no precedent on which to stand. Never before, I believe, has a resolution of this kind been placed before us, and I do not consider we should create such a precedent.

I only entered into the argument because I was conscientiously opposed to it, and that is my reason for speaking today.

It should not be necessary to go to the Chamber every time a law is placed on the statute books and say we are in favor of it, and propose to enforce it. Of course we are. Why should this Chamber, against its practice, become a factor with the United States Government in the enforcement of our laws?

Neither by our constitution nor for any other good reason which has been put forward are we justified in doing that, and therefore I feel it would be cowardly not to make these few remarks. I hope the gentlemen who were here last month, when the appeal was made to them, will consider the wisdom and judgment of the issue, and not be guided by the eloquent appeals which have been made by the members of the Executive Committee.

While we may regret to differ with the Committee, we still should stand by our guns, and if we were right in our action thirty days ago, we are right today, and we shall vote down the resolution. (Applause)

Resolution Favoring Revision of Volstead Act Offered by

W. L. Saunders

W. L. SAUNDERS.—Mr. Chairman, as I see this matter, we are not dealing with or criticizing the Eighteenth Amendment to the Constitution. The thing that concerns us, and about which much difference of opinion exists, is the Volstead Act. The Eighteenth Amendment prohibits intemperance and leaves to Congress and the States the enforcement and really the interpretation of the word intemperance. Congress, acting under War influences, has, through the Volstead Act, declared that everything containing more than one-half of 1% of alcohol is intoxicating and intemperate, a position which many of us do not believe to be in accordance with the truth or the facts.

The report of the Executive Committee, and the resolution

which is now before the Chamber are meaningless, indefinite and irrelevant. As I understand it, we are expected to announce a moral edict, which might just as well be that the Ten Commandments should be obeyed, that all laws should be enforced, simply because they are on the statute books. It does not seem to me that the province of this Chamber is to give moral instruction to its members. I doubt that any law which has not the moral support of the people should really be construed as a law at all, for I believe that the moral question is superior to the legal one. The trite saying that all laws should be obeyed and enforced does not appeal to me. There was once a law in the New England States compelling everyone under penalty of a fine or imprisonment to go to church on Sunday. This was broken so repeatedly by the moral sentiment of the people that it became inoperative and was repealed. We are breaking laws every Sunday by permitting shops, movies, vaudville entertainments and suchlike to perform. We are breaking the laws of Connecticut when we pass through the State without changing our watches from daylight saving to standard time. To my mind, the question is not so much as to the breaking of a law as it is whether or not in breaking a law we are doing personal injury to anybody or to the public in general.

As one who favors the Eighteenth Amendment but who opposes the Volstead Act, I beg to offer the following preamble and resolution, in substitution for the resolutions before the Chamber:

Whereas, The interpretation and enforcement of the Eighteenth Amendment through the Volstead Act has been proven to be impracticable because such interpretation is not in accordance with the strict intention of the Eighteenth Amendment, being enacted, as this Act was, as a war measure, with provisions that are strained, extreme and unfair; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised so as to conform more nearly with public sentiment and on lines that are more reasonable, just and practicable. (Applause)

The motion was seconded.

THE VICE-PRESIDENT PRESIDING.—You have heard the motion. Are there any remarks. Are you ready for the question? This is on the substitute resolution offered by Mr. SAUNDERS. All in favor will say aye. Those opposed, no. The ayes have it. (Applause)

Resolution Favoring Revision of Volstead Act Reconsidered

MR. MCCARROLL.—Mr. Chairman, this substitute resolution, adopted as a substitute, is on a different subject from the resolution of the Executive Committee, and should properly be a new resolution. I do not mean to say that I would not be in perfect accord with the resolution offered by Mr. SAUNDERS, but it is a new subject and not germane. The revision of the Volstead Act is entirely different from the subject which is contemplated in the resolution of the Executive Committee, and I should like to have the Chair rule on the matter as to whether the vote taken disposes of the Executive Committee's resolution, or whether that is not still to come before us.

MR. SAUNDERS.—Mr. Chairman, the reason I did not offer this as an amendment was because it treated the matter in a different manner. That is the privilege of a substitute resolution, and it was moved as a substitute and as such carried and as such it takes the place, it seems to me, of the original resolution. There is no objection, of course, on the part of anybody to move the original resolution, but the Chamber has acted, as I see it, on a substitute for what was here before it.

MR. MCCARROLL.—Mr. SAUNDERS' resolution is a substitute for a substitute.

ELON H. HOOKER.—Mr. Chairman, I agree entirely with Mr. MCCARROLL. It seems to me that this is a new proposition that ought to come before the Chamber in a new way.

THE VICE-PRESIDENT PRESIDING.—Having permitted the vote, it makes an awkward situation, but the Chair must rule that the substitute to a substitute is not in order. We have voted upon something that is not in order, and you will have to approach the matter in some other way, Mr. SAUNDERS.

MR. SAUNDERS.—May I ask what the original substitute is?

THE VICE-PRESIDENT PRESIDING.—The original substitute was presented by Mr. KELSEY in place of the resolutions presented at the last meeting.

MR. SAUNDERS.—I do not like to disagree with you, but is a resolution by the Executive Committee after a further hearing considered as a substitute? It is an amended report, it seems to me, of the Executive Committee.

THE VICE-PRESIDENT PRESIDING.—It was presented as a substitute. It was prepared by the Executive Committee in that way, and it was certainly presented to this meeting as a substitute.

JESSE ISIDOR STRAUS.—I move a reconsideration of the vote on Mr. SAUNDERS' resolution.

The motion was seconded.

THE VICE-PRESIDENT PRESIDING.—You have heard the motion. All those in favor of it will so signify by saying aye; those opposed, no; the ayes have it.

Substitute Resolutions of Executive Committee on Enforcement of Prohibition Further Considered

Mr. KELSEY.—May I suggest that it would seem to me the proper course for the Chamber to act now upon the substitute resolutions from the Executive Committee. This other resolution, purporting to represent the stand of the Chamber on the Volstead Act, is one of the very things that the resolutions from the Executive Committee contemplate as proper in taking steps to modify the law so that it shall have a more united public support. But in the meantime the Chamber should use its influence in support of obedience to the existing law. I move the adoption of the substitute resolutions of the Executive Committee.

The motion was seconded.

Mr. SAUNDERS.—I move that the resolutions of the Executive Committee be laid on the table.

The motion was seconded.

Major ALFRED WENDT.—I hope that the Chairman will not allow discussions as to the advisability or inadvisability of the Volstead Act. The Chair at the last meeting kindly allowed such discussions which I think were not in order. It seems to me, that we should, as Mr. KELSEY and Mr. MCCARROLL request, support the resolutions of the Executive Committee, which simply put us on record as to whether we are in favor of supporting an existing law, and not as to whether we are in favor of the law itself.

The action of the Executive Committee in placing this matter before the Chamber has, in a way, put us in the embarrassing position of voting to uphold a law which many of us disapprove. However, we cannot avoid the issue. We have to vote one way

or another. Part of the difficulty may lie in the fact that there may be a few members of this Chamber who, while in favor in general of a restricted liquor law, are nevertheless at times violating this law by replenishing their private stocks. These men, while undoubtedly averse to voting not to uphold a law of our land, do not want to go on record as in favor of upholding it, because then they cannot consistently assist in violating the law.

But, gentlemen, our Executive Committee has put us in the position of declaring ourselves for or against upholding a law of the United States. I think, gentlemen, that we should not let our personal feelings influence us in going on record as to upholding the law as it now stands. The question of its wisdom can be taken up later. I hope that the resolutions of the Executive Committee will be accepted.

(Cries of question.)

THE VICE-PRESIDENT PRESIDING.—The motion is to table the substitute resolutions.

Mr. MCCARROLL.—Mr. Chairman, we cannot entertain a motion to lay a subject again on the table, at the same meeting at which it has been taken from the table.

THE VICE-PRESIDENT PRESIDING.—Will you advise me about that, Mr. Secretary?

THE SECRETARY.—I understand that a motion to lay again on the table is in order after a reasonable debate. The Chair should decide whether or not sufficient debate has been had.

Captain TREVOR.—I rise to a question on a point of order.

THE VICE-PRESIDENT PRESIDING.—State it.

Captain TREVOR.—Mr. SAUNDERS has addressed the Chamber on this question at least twice, and, under the rules, a member is only entitled to speak once on the same question. Under these circumstances I ask the privilege of calling Mr. SAUNDERS' attention to a certain fact in connection with this resolution, and I ask you if I shall be permitted to do so.

THE VICE-PRESIDENT PRESIDING.—You may speak.

Captain TREVOR.—I merely want to call Mr. SAUNDERS' attention to the fact that the second resolution was printed, and also the attention of the other members who appear to sympathize

with him, which says: "That if amendments to existing legislation on the subject are necessary to insure its enforcement or to modify it so that it shall have a more united public opinion in support of it, such amendments should be enacted and thus a great national scandal brought to an end," and so on.

Now, I think it is generally admitted that the scandal exists, therefore, would it not be perfectly proper, as Mr. KELSEY suggested, to adopt these resolutions and then, as new business, take up the question presented by Mr. SAUNDERS.

WILLIAM H. PARSONS.—Mr. Chairman, may I say that I hope these resolutions will not be tabled. It seems to me that this question is a fair question, as to whether we shall vote to uphold the law, as bad as the law may be. It is a question as to whether we shall sidestep or meet the issue fairly and properly. Is this Chamber of Commerce of the State of New York to declare itself in favor of upholding the law or not? I hope we can meet that issue and approve the resolutions brought before us by the Executive Committee. It seems to me that the question of a modification of the Volstead Act is quite another matter. I think all of us would favor such a resolution, but in the meantime we should approve the resolution before us.

CHARLES E. POTTS.—Mr. Chairman, there is one point that may have been forgotten, to which Mr. SAUNDERS called attention. The resolution is practically an endorsement of the observance of law, an endorsement of basic morality—akin to a resolution to approve the Ten Commandments.

It has also been alleged, in the debate, that a vote by the individual members here would indicate personal habits. This is an unjustifiable inference. The personnel of the Chamber justifies the belief that we are all supporters of the laws. I do not think that this Chamber should go on record as upholding a particular law or statute. It should be taken for granted that its members do so.

Substitute Resolutions of Executive Committee on Prohibition Enforcement Laid on the Table

THE VICE-PRESIDENT PRESIDING.—The motion before the Chamber is to table the substitute resolutions offered by the Executive Committee. Are you ready for the question?

A vote was then taken which resulted in laying on the table the substitute resolutions from the Executive Committee on enforcement of the Prohibition Laws.

Resolution Favoring Revision of Volstead Act Referred to Committee

Mr. SAUNDERS.—Mr. Chairman, I should like to offer now the resolution which I offered a few minutes ago.

THE VICE-PRESIDENT PRESIDING.—Will you read the resolution?

Mr. SAUNDERS.—*Whereas*, The interpretation and enforcement of the Eighteenth Amendment through the Volstead Act has been proven to be impracticable because such interpretation is not in accordance with the strict intention of the Eighteenth Amendment, being enacted, as this Act was, as a war measure, with provisions that are strained, extreme and unfair; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised so as to conform more nearly with public sentiment and on lines that are more reasonable, just and practicable.

THE VICE-PRESIDENT PRESIDING.—You have heard the motion, and it is seconded. Are you prepared to vote on it?

HOWARD C. SMITH.—As new business, it should not be considered by the Chamber without unanimous consent.

THE VICE-PRESIDENT PRESIDING.—I think that is not quite the rule. If any member present objects and one-fourth of the members present support the objection, then the resolution must be referred to a committee for report at the next meeting.

Mr. HOOKER.—I object, Mr. Chairman.

THE VICE-PRESIDENT PRESIDING.—Objection has been made to consideration today of the resolution offered by Mr. SAUNDERS.

A vote was then taken and the objection was sustained by 38 in favor and 82 opposed. The Chair thereupon declared that the resolution would be referred to the appropriate committee for report thereon at the next meeting.

DAILY LUNCHEONS DURING THE SUMMER

THE VICE-PRESIDENT PRESIDING.—I have been requested to suggest to the members the desirability of patronizing the daily luncheons, not only today, but every day. It has been arranged to continue the luncheon service throughout the summer months and it is hoped that you will give it your continued support.

The Chamber then adjourned.

Special Meeting To Elect Pilot Commissioners

A Special Meeting to elect Pilot Commissioners was held in the Hall of the Chamber of Commerce, Thursday, October 4, 1923, at 11:45 A. M.

Present

IRVING T. BUSH, *President*
WELDING RING, *Vice-President*
CHARLES T. GWYNNE, *Secretary*

and a quorum of members.

The President announced that the meeting had been called under authority of the following resolution, adopted by the Chamber on June 7th last:

"Resolved, That a special meeting of the Chamber be held on Thursday, October 4, 1923, at 11:45 A. M., to elect two Commissioners of Pilots to serve for two years from that date in place of MARCUS H. TRACY and JOSEPH B. MORRELL."

Marcus H. Tracy and Joseph B. Morrell Re-elected Pilot Commissioners

WILLIAM MCCARROLL, on behalf of the Executive Committee, reported that MARCUS H. TRACY and JOSEPH B. MORRELL had been renominated by the Committee.

THE PRESIDENT.—I will appoint Mr. GEORGE E. MOLLESON and Mr. MAX EISMAN as tellers.

(The ballots were thereupon collected.)

THE PRESIDENT.—Gentlemen, the tellers report that all the ballots cast were in favor of the candidates named, and I therefore declare that MARCUS H. TRACY and JOSEPH B. MORRELL have been duly elected Commissioners of Pilots to serve for two years, in accordance with Chapter 467, Section 2, of the Laws of the State of New York, passed June 28, 1853.

There being no further business to come before this special meeting, I declare it adjourned.

Regular Meeting, Thursday, October 4, 1923

A Regular Monthly Meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, October 4, 1923, at 12 o'clock noon.

Present

IRVING T. BUSH, *President*

WELDING RING, } *Vice-Presidents*
ELBERT H. GARY, }

CHARLES T. GWYNNE, *Secretary*

and three hundred and twenty-nine other members of the Chamber.

Guests

COUNT ALBERT APPONYI, Speaker of the Hungarian House of Representatives, was the guest of the Chamber and occupied a seat at the right of the President. Dr. CHARLES WINTER, Hungarian Consul General at New York; Mr. EMIL KISS, President, American-Hungarian Chamber of Commerce; Dr. IMRE DE JOSIKA-HERCZEG and Mr. SAMUEL UNTERMYER were also present as guests.

Minutes

The minutes of the regular meeting of June 7th were read and approved.

NOMINATIONS FOR MEMBERSHIP

FREDERICK H. ECKER, Chairman of the Executive Committee, reported the following named candidates for membership in the Chamber and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
F. SEYMOUR BARR	RAYMOND V. V. MILLER	C. GERARD DODGE
WALTER P. CHRYSLER	DELOS W. COOKE	MERCER P. MOSELEY
ARTHUR WHEELER FRANCIS	HOWARD C. SMITH	CLARENCE H. KELSEY
ROBERT B. FREEMAN	WM. F. H. KOELSCH	WILLIAM H. KNOX
EMILIO A. GODOY	C. GERARD DODGE	RAYMOND V. V. MILLER
LYTTLETON B. P. GOULD	DEAN MATHEY	GROSVENOR FARWELL
WILLIAM M. GREVE	IRVING T. BUSH	FRANK BAILEY
WARREN J. HOYSRADT	GROSVENOR FARWELL	SENECA D. ELDRIDGE
CHARLES E. MATHER	JOHN B. NIVEN	FREDERICK H. HURDMAN
BEN F. TROXELL	ERNEST E. QUANTRELL	ROLLIN C. BORTLE
TOBIAS WOLFSON	EMIL FRENKEL	LUDWIG VOGELSTEIN

The President appointed Messrs. GEORGE E. MOLLESON and MAX EISMAN to act as tellers and the vote taken resulted in the election of the above named candidates.

DELEGATES TO ATLANTIC DEEPER WATERWAYS CONVENTION

Mr. ECKER, for the Executive Committee, presented the following resolution, which was approved unanimously:

Resolved, That the President be, and he is hereby authorized to appoint delegates to represent the Chamber at the Sixteenth Annual Convention of the Atlantic Deeper Waterways Association, to be held in Norfolk, Virginia, November 13th to 16th next.

THE PRESIDENT.—The Chair will announce the appointment of the delegates at a later date.

ENFORCEMENT OF PROHIBITION LAWS

Mr. ECKER.—Mr. President, in presenting the report from the Executive Committee on Enforcement of Prohibition Laws I desire to add, for the information of the Chamber, that this subject has been exhaustively considered by the Executive Committee, it has reviewed the discussions at previous meetings, and has had in conference some of those who participated in the discussions, and this report now presented is a co-ordination of the views that have been expressed, and it is the opinion of the Executive Committee that it represents fairly the views of all the parties that have taken part in the discussions:

Report

To the Chamber of Commerce:

As a substitute for the report of the Executive Committee and the resolutions accompanying it which were tabled at the June meeting of the Chamber, and also for the resolution offered at that meeting by Mr. SAUNDERS and referred to the Committee, your Committee, after conference with Mr. SAUNDERS and with his approval and support, would report the following:

The Committee does not consider it incumbent on the Chamber of Commerce to give an opinion as to the wisdom or the lack of it, evidenced by the adoption of the 18th Amendment to the Constitution of the United States and the enactment of the so-called Volstead Act. This Chamber has, however, always stood for obedience to law and support of the government in its efforts to enforce law, and recommends now that so long as the prohibition law remains upon the statute books, the members of this

body should exert their influence to secure the enforcement of the law. It is apparent that there is widespread opposition to, and disobedience of, the prohibition law, and that unquestionably a large number of honest and fair-minded people believe that the law should be so amended as to secure more general agreement with its provisions on the part of the citizens and a more satisfactory enforcement of the law; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York endorses these views of the Executive Committee; that it believes in the enforcement of law and in respect for law, and that in the case of the law prohibiting the sale of intoxicating beverages the law should be respected and observed so long as it remains on the statute books; and

Whereas, The interpretation and enforcement of the 18th Amendment through the Volstead Act are not, in the belief of unquestionably a large number of honest and fair-minded people, in accordance with the strict intention of the 18th Amendment, and therefore great opposition to its enforcement has been created; be it

Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised so as to conform more nearly with public sentiment and on lines that are more reasonable, just and practicable; and

Resolved, That the President and Executive Committee are hereby authorized to take such action as they may deem desirable to carry out these resolutions.

Mr. ECKER.—I move the adoption of the report and resolutions.

The motion was seconded.

ARTHUR S. LELAND.—Mr. President, I move you, sir, that the paragraph reading: "Whereas, The interpretation and enforcement of the 18th Amendment, etc.," and the last two resolutions of this report be stricken out. In doing so, I want to say that within a month I have met one of the assistants of the Attorney General, of Washington, who said, "When I was Judge in Peoria, before prohibition was in effect, we had to have a jail that would accommodate 600 drunks, but since prohibition has come into effect we have had no use for that jail for that purpose and it has been sold, and just before I left town I made some inquiries in regard to Chicago, and I was

told that in one of the jails where it was customary before prohibition for them to commit 600 drunks, there were now but 60," and my informant said, "I am on intimate terms with the commissioner, I live near him, and he tells me of the wonderful results that have been obtained through this prohibition law." I also met this summer a railroad officer, and I said, "Where are you located?" He said, "Between Northampton and Amherst." He said, "It has been our custom on every Saturday night to send six trolley cars over to Smith College, in Northampton, to take the boys from a dance that they have with the girls of Smith College." He said, "Before prohibition went into effect, nearly every one of those boys was drunk or full, but now I only send one trolley car, and there is not a boy drunk or full."

We know that the Governors are to meet on Friday, October 19th, in a place called West Baden, and you know what West Baden and French Lick are—virtually the same place. We know what that means, when Mayor HYLAN and Governor SMITH and their confreres all meet at the same spot, and they intend to descend upon Washington on Saturday, October 20.

It seems to me that it is most important that we should not give the Committee power to recommend amending the Volstead Act, for every member of the Committee knows that you cannot regulate alcoholic content. Munich beer contains 18 per cent. of alcohol, Bass ale contains 22 per cent. of alcohol, the porter that is sold in England contains 15 per cent. of alcohol, Australian claret contains 35 per cent. of alcohol; you cannot regulate the alcoholic content, and every member of the Executive Committee knows that.

Now, when this meeting of Governors convenes no doubt a great endeavor will be made to show that we should in some way modify the Volstead Act. It is the operation of the Volstead Act that has produced these wonderful results, and I sincerely hope that those portions of the resolution which I have indicated may be stricken out. (Applause).

THE PRESIDENT.—I am sorry, sir, but I shall have to rule that it is too complete a change in the purpose of this report. It is the custom in this Chamber to permit changes which do not alter the general character or purport of a resolution introduced, but the change which you suggest practically has the effect of striking out everything in the report. If the report, as it now stands, be voted upon by the members of the Chamber, they will have full opportunity of expressing their opinions as to whether the report, as it has been presented, should be adopted or not.

MR. LELAND.—I rise to a point of order, sir. The first resolution tells just what the Executive Committee desires, where it says:

“Resolved, That the Chamber of Commerce of the State of New York endorses these views of the Executive Committee; that it believes in the enforcement of law and in respect for law, and that in the case of the law prohibiting the sale of intoxicating beverages, the law should be respected and observed so long as it remains on the statute books.”

In all of that many of us concur, and I would be glad to see that passed.

THE PRESIDENT.—I will rule that—

Mr. LELAND (interposing).—I rise to a point of order, sir.

THE PRESIDENT.—You have a perfect right to appeal to the Chamber to overrule the ruling of the Chair. The ruling of the Chair is that the changes you suggest would entirely alter the purpose of the report, and therefore the Chair declines to entertain your motion.

Mr. LELAND.—If my point of order is not recognized, and a vote is to be taken, I move you, sir, that we lay the whole matter on the table.

THE PRESIDENT.—You may appeal to the Chamber to overrule the ruling of the Chair. Do you make that appeal?

Mr. LELAND.—I do.

A rising vote was then taken and the ruling of the Chair was sustained by a considerable majority.

Mr. LELAND.—I move that the whole matter be laid upon the table.

THE PRESIDENT.—I am sorry to disagree with you again, but this matter has been laid upon the table at a previous meeting. It is within the power of the Chair to refuse to entertain a motion to lay again upon the table until a reasonable opportunity for debate has been given. This matter has been before the Chamber twice and opportunity for its consideration should be given at this meeting. I will not recognize a motion to lay on the table until such an opportunity has been given.

WILLIAM H. WILLIAMS.—Mr. President, in answer to several of the citations of our friend, I want to say that my barber this

morning told me that he had been drinking whiskey on the quiet because his beer had been taken from him. I believe that we could cite as many things, or more things, against the Volstead Law as this gentleman has cited for it. I believe that the resolution does not go far enough. If we believe and are firmly convinced that the Volstead Act is an injurious act—and I believe a great deal of the unrest and the so-called Bolshevism in the United States is nothing more than discontent created by the Volstead Act—and if we believe that the Volstead Act should be ameliorated, we should change this resolution slightly. Where we say "Resolved, That the Chamber of Commerce of the State of New York recommends to Congress that the Volstead Act should be revised," we should add "and modified," so that it will be clear, and I move that amendment. I believe that is something the Chamber cannot evade. Why should we say here, in the first part, that "The interpretation and enforcement of the Eighteenth Amendment through the Volstead Act are not, in the belief of unquestionably a large number of honest and fair-minded people, in accordance with the strict intention of the Eighteenth Amendment," when, as matter of fact, we believe that it should be modified? Why not so state in the resolution?

The motion was then adopted to amend the third line of next to the last resolution in the report by adding "and modified" after "revised."

ELBERT H. GARY.—Mr. President, while I feel that I am perhaps a little rusty with regard to parliamentary law, I am going to make a suggestion, if in order, that perhaps will cover the differences which now exist with respect to what we ought to do concerning these one or two paragraphs of the report. I am wondering whether it would be in order to move that the report be considered section by section—that is, the paragraphs separately. If that is in order, I will make that motion, because, in that case, the Chamber could vote on each paragraph by itself.

THE PRESIDENT.—Judge GARY, I will rule that you may make such a motion.

JUDGE GARY.—Then I make that motion.

The motion was seconded.

The motion to consider the report section by section was lost by a vote of 69 in favor and 100 against.

THE PRESIDENT.—Is there any further debate in respect to the report?

(Cries of question!)

Report on Enforcement of Prohibition Laws Adopted

THE PRESIDENT.—Gentlemen, the question is on the adoption of the report on Enforcement of Prohibition Laws, with one slight change, by the introduction of the words “and modified.”

The vote taken resulted in the adoption of the report and the announcement was greeted with applause.

THE PRESIDENT.—In view of the fact that I have been compelled to rule upon a point of order, I trust the membership will not feel that I have any bias on any of these questions, but have a very deep conviction that, as this is an association of business men, the best thing the Chairman can do, while confining himself as nearly as he can to the rules of parliamentary law, is to get at what is really in the minds of all the members present. (Applause).

RAILROAD CONSOLIDATION

DELOS W. COOKE.—Mr. President, in presenting the report of the Committee on Internal Trade and Improvements, I wish to state that your Committee regrets that the report was not finished in time to mail so that all the members might have had an opportunity of reading it in advance. For the information of the Chamber I will read it:

Report

To the Chamber of Commerce:

Your Committee on Internal Trade and Improvements has had meetings during the summer to consider several very important phases of the railroad situation which affect the Port of New York. Among other things it has taken up the matter of railroad consolidation, a subject which is now before the Interstate Commerce Commission, in accordance with the Transportation Act of 1920.

It is evident to every observer of the growth of the freight and passenger traffic to and through New York, that greatly improved terminal facilities are not only absolutely essential, but that the present main arteries of rail transportation which make New York greater will in due course be inadequate to provide for the business offering.

When that occurs the growth of New York stops, unless relief shall in the meantime be given through the gradual diversion of traffic from a congested to a less congested line. A less progressive policy than now exists on the part of the great railway systems already serving the city and port with the best passenger train service in the world is not to be considered, and your Committee feels that it is fortunate that there is an available route by which relief may be granted to the principal carrier serv-

ing New York as its first interest, if the New York Central should be permitted to acquire the Central Railroad of New Jersey.

The essential physical part of this route now exists, and it cannot be doubted that under one management which has shown itself both progressive and efficient, a new trunk line to and from the west through Williamsport and Clearfield would be developed in such a way as to safeguard the growth of New York City and Port for years to come. Shippers from the west are encouraged to divert their export shipments from New York upon the ground that our port is congested and that our main trunk lines are congested. The Port Authority has been created for, and is making progress toward, the improvement of port conditions, and the strategic importance of acquiring another main line to the west can scarcely be questioned.

The Interstate Commerce Commission has recently authorized the principal line to the Gulf competing with New York for export trade, to build an entirely new relief line through the State of Illinois, because the existing double track line will not accommodate the business.

Comparatively little construction will be immediately required to provide New York with a low-grade relief line which under an able and progressive management should afford an invaluable measure of protection to the growth of the commerce of this city and port.

Your Committee therefore asks for the following authority:

Resolved, That the Committee on Internal Trade and Improvements of the Chamber of Commerce of the State of New York, be authorized to appear at hearings before the Interstate Commerce Commission, and otherwise act when occasion arises, to advocate the consolidation of the Central Railroad of New Jersey with the New York Central lines, with the understanding that the rights of any line now using the Central Railroad of New Jersey to reach the terminals of that line shall be preserved and the terminals operated in a co-operative spirit with the plans of the Port Authority; and, be it further

Resolved, That the Committee have authority, should it be deemed advisable, to engage counsel in the proceedings before the Interstate Commerce Commission.

Respectfully submitted,

DELOS W. COOKE, *Chairman*
MILTON W. HARRISON
RUSSELL R. WHITMAN
ELIHU C. CHURCH
R. A. C. SMITH

} *Of the
Committee on
Internal Trade
and
Improvements*

NEW YORK, *October 3, 1923.*

Mr. COOKE.—I move the adoption of the report.

The motion was seconded.

Mr. MARLING.—Mr. President, do I understand that the Port Authority through our friend, Mr. OUTERBRIDGE, a member of our Executive Committee, has opposed the consolidation of these two railroads?

THE PRESIDENT.—Mr. COOKE will have to answer that.

Mr. COOKE.—Mr. OUTERBRIDGE tells me they have intervened in an earlier proceeding before the Interstate Commerce Commission, in opposition to this consolidation, since which time, however, there has been a conference among the railroads and another hearing before the Interstate Commerce Commission, where the railroads have voluntarily offered to co-operate with the Port Authority in their terminal plans on the other side, and which, it seems to me, might very materially alter the position of the Port Authority. But, however that may be, your Committee feels that that would be no controlling reason for opposing the development of a new trunk line for the protection of New York business.

DE WITT VAN BUSKIRK.—Mr. President, may I speak on behalf of the Port Authority? They are still considering this matter very seriously, and I know that Mr. OUTERBRIDGE intended to speak on this matter today. I think if the Chamber would defer action upon that report until the next meeting, it is what the Port Authority desires. It would prefer that action be not taken today because of other considerations involved in the question.

THE PRESIDENT.—I raised that question, Mr. VAN BUSKIRK, myself when I was told that this report could not be printed in time to be mailed to the members, and I was told in reply that unless some action was taken at this meeting or at a special meeting to be held next week it would be of no use. I think if it goes over to the next regular meeting it would be ineffective.

Mr. VAN BUSKIRK.—I think it is important to lay it over until the next special meeting, because I know Mr. OUTERBRIDGE is very desirous of deferring action on this question.

Mr. COOKE.—Mr. President, I will say I have been endeavoring at all times, and my Committee has, to work in the closest

harmony with the Port Authority on matters of this kind. Only yesterday I took the precaution to speak to Mr. OUTERBRIDGE with regard to this report. He knows just exactly what we are going to say, and he told me in so many words that he had no intention whatever of coming to the meeting or of opposing the report. I presume Mr. VAN BUSKIRK has some later information on the subject, but if he has talked to Mr. OUTERBRIDGE prior to yesterday I can state most emphatically that that is not what Mr. OUTERBRIDGE said to me.

THE PRESIDENT.—Is there any further debate? There is no motion before the house but the original report.

(Cries of question!)

A vote was then taken and the report on Railroad Consolidation was adopted.

EASTERN APPLE EXPOSITION AND FRUIT SHOW

PHILIP D. SMITH, on behalf of the Special Committee on Agriculture and Its Problems, presented the following preamble and resolution, which were unanimously adopted:

To the Chamber of Commerce:

Whereas, At its meeting on May 3, 1923, the Chamber of Commerce of the State of New York authorized the appointment of a Special Committee on Agriculture and Its Problems, said Committee to make recommendations and report to the Chamber from time to time; and

Whereas, The Committee is convinced that a closer contact should be had between the business men and the agriculturists of the State to the end that transactions between the two may be furthered and efforts made to have the agricultural products of the State increased; and

Whereas, There is being planned an Eastern Apple Exposition and Fruit Show to be held in New York, November 3rd to 10th, which Exposition is approved by and will be participated in by the City and State, together with the leading agricultural organizations of the State of New York and official representatives of the Eastern States, the purpose being to call the attention of the public to Eastern-grown fruit and fruit products; to increase consumption of Eastern-grown products and to educate the public to use more fruit and fruit products, especially apples; and

Whereas, Our Committee, believing that this Exposition is an

important step in acquainting the public with the products of its own State, recommends the adoption of the following resolution:

Resolved, That the Chamber of Commerce of the State of New York heartily approves of the plan for an Eastern Apple Exposition and Fruit Show and authorizes the Chamber's Special Committee on Agriculture and Its Problems to co-operate with the agricultural and other organizations of the State interested in the Exposition.

Respectfully submitted,

IRVING T. BUSH, *Chairman*
EDWARD R. CARHART
WILLIAM T. DONNELLY,
R. GOULD SIMONDS
PHILIP D. SMITH

Problems*

NEW YORK, *September 21, 1923.*

PRESERVATION OF STATE LANDS AND FORESTS

H. HOBART PORTER.—Mr. President, the Chamber of Commerce has from time to time, for over forty years, reaffirmed its belief in the importance of the preservation of the State lands and forests, and in 1907, when a modification of the State Constitution was proposed, the Chamber adopted the following preamble and resolution:

"Whereas, A concurrent resolution is pending in the Legislature of the State, 'Proposing an amendment to Section Seven of Article Seven of the Constitution relating to the construction of dams and the storage of waters in the forest preserve for public purposes,' the passage of which will materially interfere with the usefulness of the State Forestry Commission, which Commission was established through the influence of this Chamber in 1883; and

"Whereas, One of the objects of said resolution is to permit the damming of the streams in the Adirondack region under the plea of storage of water for public purposes while it is really sought to construct dams and reservoirs for private gain; and

"Whereas, The object of said resolution is practically to nullify Section Seven, Article Seven, of the Constitution of the State, which directs 'that the forest preserve shall be forever kept as wild forest lands and shall not be leased, sold or exchanged, or taken by any corporation public or

private, nor shall the timber thereon be sold, removed or destroyed'; which last prohibition was purposely added to cover the destruction of trees by flooding; now, therefore, be it

"Resolved, That the Chamber of Commerce of the State of New York hereby emphatically protests against the passage of said resolution as inimical to the public welfare of the State."

In order to reaffirm this policy of the Chamber, I offer the following resolution:

Resolved, That the Chamber of Commerce of the State of New York reaffirms its previous action and expresses itself as opposed to the adoption of the so-called Ferris amendment to the Constitution of the State of New York.

The resolution was adopted unanimously.

ANNOUNCEMENTS

Prizes Awarded for Essays on Thrift

THE PRESIDENT.—I should like to make a very brief statement about a very interesting ceremony which was held in this Hall on October 2nd, at which prizes were awarded by the Chamber for the best essays of pupils of the public and parochial schools of the City upon the subject of "The Practice of Thrift, a Test of Character and an Essential Factor in the Development of the Nation." These prizes were awarded from the Education Fund left to the Chamber by the late A. BARTON HEPBURN. The contest was conducted under the supervision of the Board of Education, and I am sure you will be interested to know that in this great city there were approximately 150,000 essays received from school children on this subject. When I welcomed those children and their parents here in this Hall last Tuesday every seat was taken, and many were standing. It was one of the most inspiring audiences I have ever looked upon—those bright faces of the school children who came here to receive their certificates and prizes. I am sure you all would have been deeply interested had you been present.

Port Authority and the Railroads

THE PRESIDENT.—I should also like to say just a word about

the gratifying information which I have received since my return from abroad, to the effect that after many discussions and many delays the first steps are apparently to be taken by the Port Authority.

The Port Authority, I believe, was not in entire agreement with the executives of the railroads. Our own Committee on Internal Trade and Improvements, of which Mr. COOKE is Chairman, through a conference held with the executives, was helpful in bringing about an agreement between the executives of the railroads and the Port Authority, and substantial progress was subsequently made at the recent Interstate Commerce Commission hearing. The railroads have agreed to expend \$500,000 at once upon the hooking up of what is called Belt Line No. 13, composed of a series of tracks running along the New Jersey waterfront, which was operated during the war under one administration and was of material service at that time. It is owned by several of the carriers, but they have agreed to spend \$500,000 in making certain changes which would be desirable, and then it is proposed to operate it under some head, to be determined later, as one central operating unit, for the purpose of improving the facilities of this port.

I am also advised that the railroad executives have indicated their willingness to take up at once consideration of the construction of the outer belt line known as Belt Line No. 1, which is designed to run somewhere from the West Shore Railroad at the north, in a circular way, back of the congested sections in New Jersey, to some point at or near Bayonne.

This agreement with the railroads is a definite step forward, and reflects credit not only upon the members of the Port Authority, but upon the member's of Mr. COOKE's committee, and in your behalf I desire to extend my congratulations to them.

Japanese Relief Fund

THE PRESIDENT.—I should also like to say that when the great Japanese disaster was first flashed to us from Japan the Executive Committee immediately authorized the sending out of an appeal for funds, and this Chamber collected \$66,220, which has been turned over to the American Red Cross for Japanese relief. We sent cables of sympathy, on behalf of this Chamber, to the Chambers of Commerce in Japan and have received ap-

preciative replies from them, and also a communication from the Japanese Embassy, thanking the Chamber for its prompt and efficient action.

Radio Broadcasting of Count Apponyi's Address

THE PRESIDENT.—That is the end of our regular business. We are going to be honored in a moment by an address from Count APPONYI, the former Prime Minister of Hungary.

Before I have the pleasure of introducing Count APPONYI, I have been requested to wait just a moment for the gentlemen connected with the radio broadcasting to adjust their machine so that the words of the speaker may be carried beyond the confines of this room.

REMARKS OF PRESIDENT BUSH, INTRODUCING COUNT APPONYI

Gentlemen, during my recent trip through the countries of Europe, I visited many places and met many men who appealed to my mind and to my imagination. Hungary and its great representative leader, who is known as "The Grand Old Man of Hungary," although he deserves that title only because he has passed a little beyond the Biblical age of three score and ten, but youth springs eternal in his heart—a heart of youth—and Hungary and this leader of Hungary appeal more to my heart than to my mind; for Hungary has stood there at the gateway to the East as the guardian and protector of our Western civilization. Time and again the Turkish invasion has surged toward the central parts of Europe only to be thrown back by the Hungarian people, with a devoted love for their country and a devotion to their standards of civilization and art, a people who have been ready at all times to sacrifice everything for the preservation of their country and their civilization.

Then, another crisis came: the great war of 1914; and when that ended, and peace—if we may call it peace—was declared, the territory of Hungary, it seems to me, was brutally mutilated. I think it was Mr. LLOYD GEORGE—in fact, I am sure it was he—who, in speaking of those who had to do with the carrying out of the various treaties of Europe, remarked that they looked like Bayards but acted like Shylocks. Whether that be true or not, at least it is one of the things that makes me very glad I am a citizen of the United States, when I realize that this

country had no part at least in the execution of the treaties of Versailles and of the Trianon.

COUNT APPONYI had expected to speak to you upon the general subject of the difficulties of Europe, but I told him that our meetings here at midday were limited to a shorter period than he would have at his disposal upon other occasions when he is to speak to audiences in the evening. I have assured him that you will be interested, in spite of the fact that he stated it might cause him some embarrassment, to have him speak only of the problems of his own country. I have assured him that you will be glad to hear from him, the leading representative of Hungary in the world today, the story of what Hungary needs in these days of difficult reconstruction.

I take great pleasure, gentlemen, in introducing to you Count ALBERT APPONYI, who is the most distinguished figure in Hungarian life today, who was formerly Prime Minister of that nation, and who, in addition, has a peculiar relationship to us because he is honorary president of the Hungarian Chamber of Commerce of Budapest. (Loud applause)

ADDRESS OF COUNT ALBERT APPONYI, SPEAKER OF THE HUNGARIAN HOUSE OF REPRESENTATIVES

Gentlemen, I consider it a high honor to be invited to speak to this powerful body upon matters concerning my own country. I am particularly indebted to the President of this Chamber for the statement that I should confine myself to its affairs. But I cannot help showing them to you in the light of an important part of the whole of the European problem. You will allow me to dispense with any sort of introduction, because the time allotted to me is so short that I shall devote every second of it to the matter itself.

You are all aware of the most dangerous and the most distressing conditions of Europe at the present time. The papers every day bring you new aspects of the dangers which beset the oldest seat of the most perfect type of culture and civilization the world has ever known. The danger, the evil, is certainly located in the central countries, in the central powers. Whatever you may think of the part they have played in the war, whatever you may think of their responsibilities for the war, I think you must now consider, from a practical standpoint, what their collapse would mean to humanity at large.

It needs not many words to explain, after the disturbing influence of the Russian collapse of the equilibrium of the world, especially its economic equilibrium, the withdrawal, as it were, of 180,000,000 of people, viewed as producers and consumers

from the organization of world economics, what an additional collapse of 80,000,000 would mean to the world. And this danger is imminent. There is the danger of the social upheavals which may follow and concerning which there is no knowing where the consequences might stop.

This I might say in connection with my subject proper—that if Germany in her present state of distress and danger is the central problem of the European crisis, so Hungary is its border problem. I put the map of Hungary before you, a map of eastern central Europe, a mere topographical map, upon which no political boundaries are drawn. Yet you see before you the features of Hungary with the physical boundaries which nature created. It means that this territory of ancient and historic Hungary, this territory which our forefathers occupied toward the end of the Ninth Century and which they filled with a political organization of the western type for ten whole centuries, is a God-made community. It is a political community which has the best geographical frontier which any country in Europe around it has. On the north, on the east, on the southeast, the powerful mountain chain and toward the west the rivers which border her. So that history, which made her stand within those limits for ten centuries, may be challenged as a source of right, as a juridical principle, but cannot be challenged as a witness, because what is unnatural, what is artificial, cannot be kept in existence and cannot stand the trials we had to stand through our eventful history. Only organic, only natural constructions, resting on the natural lines of political organization, can remain in existence so long.

In order to explain to you as clearly as possible the present economic conditions of Hungary, I must just give you in a few words the outline of the pre-war situation. They were shaped out by the nature of her territory—a territory that, besides being a remarkably firm geographical unit, presents all features of economic interdependence of its parts. Agricultural, wheat-growing plains in the lowlands are joined by border lands which are mountainous, which are rich in wood, which are rich in minerals of all sorts, which feed the industries with iron ore, which furnish naturally a great amount of water power, and which find a natural market in the agricultural districts of the lowlands. Then you have a perfect unit of water courses. The great thoroughfare, the Danube, which flows through all Central Europe, flows in Hungary, from west to east, then from north to south, then again on the east, and south towards the Black Sea, which is the central point of convergence for our waterways. The whole water system, the whole river system of Hungary converges to the Danube. All the valleys on the north and on the east are converging toward this center. So Hungary was foreordained to be an almost self-supporting country. It is generally said that Austria-Hungary was such a natural, self-supporting, economic unit.

I am not going to discuss, on political lines, the question of the Austro-Hungarian monarchy. Much may be said in favor of it from a political as well as from an economical standpoint. But Hungary does not need anything to make her an efficient, self-supporting, economic unit. Hungary within her own limits has all the elements to become rich, flourishing, and independent—almost independent in all matters, coal excepted. Owing to circumstances which I need not detail, she was, towards the middle of the last century, in a situation which fitted her for economic development. From the year 1867, the date of the restoration to activity of the Hungarian constitution, there began an evolution of half a century which gave her a growth and development of almost American proportions. In that epoch the Hungarian railroad system, which had been undeveloped and which was chiefly managed by foreigners, began to expand. When the epoch closed in the year of the war the Hungarian railroad system had developed to 20,000 miles in length of track, and it was wholly managed, and wholly engineered by Hungarian managers and Hungarian engineers, pupils of Hungarian technical schools, and on the whole length of the system there was not one yard of rail, not one locomotive, and not one car which was not of Hungarian fabrication.

Now look at the city of Buda, the ancient capital on the Danube, which flows between the two towns of Pest and Buda, now combined into the one new capital of Hungary known as Budapest. There you have before you the oldest suspension bridge which, in the forepart of the Nineteenth Century, had been planned and built by English engineers; you have another bridge which was built twenty years later by French engineers; then you have several bridges of more modern origin—one of them among the boldest works of engineering that I know of, with one arch over the whole Danube, exclusively planned and executed by Hungarian engineers out of Hungarian materials.

I give you all these details only as characteristic of the enormous economic progress which has been achieved in Hungary during the fifty years in which she has been in free possession of all her resources.

And now came the crisis, the great war and all its consequences. I am not prepared to discuss the political questions concerning the war. There may be a feeling among you that, after all, if Hungary suffered all the consequences of the war and of the peace treaties, she had only what she deserved, being part of those central powers whom you hold responsible for the origin of the war. I shall not challenge this conviction which is deep-seated in your hearts. But starting from it as a fact, I can only say that certainly the share of Hungary in that responsibility is the smallest one, for two reasons: responsibility is measured by the amount of free resolve of the possibility of disposing of one's self, which the man under trial has and by the use he makes

of his free will. Hungary at the time the war broke out was not a perfectly independent country. She had her independence in public law, but not in international respects. In international respects she had to go with Austria and she had only her share of influence in the common councils of the Austro-Hungarian monarchy. It is now a fact established by documents that this Hungarian influence was a minor one in the counsels of the monarchy, but nevertheless, it was used to prevent the World War and to preserve peace. Hungary was out-voted, and outnumbered, and she has to take the consequences, but I may well say that her share of the responsibility is certainly the smallest one, and yet in those peace treaties, which were partly intended to be a just retribution for the guilt of having provoked war, no country was as cruelly treated as Hungary.

Hungary lost, as you know, two-thirds of her territory and two-thirds of her population. New boundary lines were drawn across her body which isolated the center from the lowlands and the western part of Hungary. What that means to her in a national and in a political sense, what it means to her feelings and to her traditions I shall dwell upon in other lectures which I am to deliver before other audiences. I am now to speak only of the economic consequences of the treaty of being deprived of the woodlands, of being deprived of the mineral regions, for we have lost most of our raw materials and that means a great deal to us. In pre-war times the balance of trade was generally even, sometimes in favor of Hungary. Wood was perhaps the most important article of exportation. Now we have to import it for building and for mining purposes. Just to show you what an amount of superficiality there is in the peace treaties, I quote the article in the Trianon treaty which makes it incumbent upon Hungary to furnish to Austria, although she has none for herself, a certain amount of wood for a certain price. Those who invented that article probably knew something of the old statistics of Hungary, and, having found that Hungary always had a surplus of wood to export, worked upon those lines, disregarding the new situation which their own treaty had created for Hungary. So we have lost almost all our woodland.

We have lost the most important product under the soil. Our industries grew in a wonderful way in pre-war times, so that the industrial population was one-quarter the total. Of our industries, the most important ones came from the soil—our iron industries. The steel and iron industries, fed on the iron ore of the Carpathian Mountains. This now belongs to Czechoslovakia. Our steel and iron works are separated from their raw materials and cannot get them, through no fault of ours, since our economic relations with the neighboring states are so strained that importation of the most necessary raw materials is a matter of supreme difficulty. Some of our great iron and steel industries are maintained in a certain state of efficiency by

the really heroic efforts of their managers and proprietors. But our real responsibility is toward the working men. There are 50,000 to 60,000 working men who are employed in these industries, and we do not care to see them among the unemployed. As long as we can hold them, as long as the old stocks suffice, as long as we can, by any sacrifice, import from foreign regions the material necessary, those industries will be upheld. But how long can that last?

We have been deprived of all our textile establishments. I need not explain to you that those mountainous countries with their water power were foreordained to become very highly developed, and their highest development was one of the ideals we cherished. To this goal we were constantly progressing. In a few years we should have reached its fullest development. We cannot maintain ourselves with agriculture only, and we must be careful to keep in existence and develop such industries as we still have—a matter to which I shall come back soon—to develop the splendid opportunities of international commerce that our geographic situation affords us.

A great part of the wheat-growing plains has been left to us, but not the whole of it and not the best part either. The best part of it, southward from the center of Hungary, northward from the Danube where it flows again toward the east, the richest wheat-growing country in all Europe, has been taken away from us, with the result that the Budapest milling industry, which is second only to that of Minneapolis, is kept in a state of inefficiency. The capital invested in it cannot bring the percentage of return it ought to bring, because no wheat is allowed by their present masters to come to Budapest from those richest wheat fields. The efficiency of the Budapest mills in pre-war times was about half that of Minneapolis. Minneapolis, I have been told, works out some 15,000,000 bushels of wheat; Budapest worked out 7,500,000 bushels of wheat. Now Budapest operates with hardly half of that quantity.

But, the part of the lowlands which has been left to us suffers in another way from the dissection of Hungary. Our river system, which I mentioned before, has the character of a torrential system, meaning thereby that almost all the tributaries of the Danube, not only in Hungary, but even farther westward, in Austria and Germany, come down from the mountains. So according to the melting of the snow and the alternation of dry and rainy seasons, water stands low or high and the lowlands are thus subjected to alternate drought and inundation. We were just in the middle of our attempts to equalize these alternating conditions when our rivers were taken out of our hands, and in the highlands we lost command of them. An international river commission has been provided to attempt to make out some unity in the management of waters—but you all know how little international commissions are apt to approximate the unity of design which one government can secure.

Now, gentlemen, to make the picture to a certain degree complete, I will only allude to the distress which has come to us, with almost all of central Europe—the distress occasioned by unstable currency. Unstable currency makes saving, and therefore accumulation of new capital, almost impossible, for who will care to save if he does not know what his savings are going to be worth tomorrow? The result is that only that which can be immediately invested either in agriculture or industry is saved; the rest finds its way into unsound speculation, which enriches the least deserving and adds to the suffering, especially of the intellectual middle classes, the salaried and wage-earning people, because it is impossible, although salaries and wages are continually rising, to keep them at all times on a par with the rapid rise of prices. This situation makes it impossible for us to create safe, normal, reliable, commercial relations with countries that enjoy better currency conditions. But we have to do it somehow. We must have imports, heavy imports of textiles, and therefore the commercial balance goes heavily against us. We have heavy imports of materials for the purpose of reconstructing the machinery we lost through the occupation of one part of our country by Roumanian troops, who took with them everything that was movable, and in these imports we have a heavy balance of trade against us. We cannot have at present a balanced state budget, because it is impossible at one stroke to raise taxes to the amount required; it is impossible to put state expenditures down as low as circumstances would warrant.

I shall tell you in a word why and shall tell you one of the circumstances which make that impossible. Hungary is burdened with an enormous number of state employees who had been at work in old Hungary. Those who held offices in the parts of Hungary now severed from her are ruined, because the new masters do not care to keep the old Hungarian officials. So we are burdened with some 300,000 intellectual refugees from the parts of the country we have lost, and which common humanity makes it impossible for us simply to throw upon the streets, and whose activity is not needed in such a small political organization as ours is.

And so, the absence of a balanced state budget makes it necessary every year that new masses of paper currency should be issued, and the evil is growing in geometric proportion.

There is one circumstance, still, which I must mention. Hungary in her present crippled state is burdened by almost the whole mass of debts which the former great Hungary had contracted. Those states which have absorbed some of our territory have inherited only such parts of the loans as were mortgaged to certain objects—such as railroads. But this is the minor part of the state debt; because in proportion as the credit of Hungary became stronger, mortgages were offered and the loans devoted to the construction of railroads. Other invest-

ments had no special basis, but rested on the general credit of Hungary. And so the neighboring states, who took our territories, enjoy the fruits and the benefits, and we have to bear the burden of loans the results of which are not ours.

On this poor and crippled Hungary is still laid the burden of an unknown quantity of reparations, which hangs over our heads like the sword of Damocles!

The question might arise whether this situation is not such a desperate one, as to exclude every hope of remedy. But I do not so consider it—we do not. If we can get over the evil of an unstable currency, which means that we must get a loan of the same nature as that loan by which Austria has been saved, and the conditions of which the members of our government are now discussing at Geneva with the powers, great and small, and with the neighboring states more especially—if we can get that loan we can bridge over the very few years which must elapse before we have a balanced budget. And then, gentlemen, I feel absolutely hopeful and confident of the future. It will not be as brilliant or as bright as our prospects were as long as there stood the great force of our natural territory, but still it is full of promise. In that case saving will begin again, capital will be developed by our thrifty farmers and craftsmen, manufacturers and merchants, prices will be stable, and calculations will be possible in business, public and private. We expect then an influx of foreign capital, because there is room for much foreign capital in Hungary. Not only do I expect a speedy reconstruction of our agriculture, deteriorated by the abduction of cattle and machinery, and rendered precarious by the destruction of our water system, not only do I expect this, and not only do I expect a recuperative effect on such industries as have been left to us and the development of new ones, but I expect, perhaps chiefly, a great and most beneficial and magnificent commercial activity.

Budapest has a situation quite peculiar to itself. It is situated on the Danube, just at that section of the river which is navigable for large ships. It is the last exponent of western life. Just as Hungary, as a political organization, became absolutely western in her laws, in her way of thinking, in her democratic ideas, so Budapest is a western seat of commerce. As the very able commercial attaché of the English Legation in Budapest (Mr. HUMPHREYS) remarked that in Budapest the English merchant can feel quite as much at home as in London, because he finds there a government and a judiciary of the western type, he finds a banking system run upon the best western principles and rules, he finds a merchant class which is conversant with all the needs of the Near East and still absolutely western in its business morals—in one word, he finds there every condition of safety.

So that not only am I hopeful in that sense, that our merchants

will develop a magnificent commerce with the Near East, but that those western business men who care to transact business with the Near East and especially the Balkan States, will make Budapest the center of their operations.

So, gentlemen, though the present days are dark, though the present days do not in themselves contain much promise, still I feel there is promise, besides the justice and mercy of God, in our own undaunted energies. A young Roman soldier complained to his mother that his sword was too short. The Roman matron said: "You have only to add one step." We, too, have only to add one step. Against adverse circumstances we have to make one effort more, and that effort we shall make and we are resolved upon making. With the assistance of those civilized nations who cannot see without concern how, on the debatable ground between western and eastern civilization, the higher and superior type should collapse—with the assistance of these western nations, not upon altruistic lines but on their own well-considered interests, we hope the additional step will be made and that we shall conquer all the difficulties of our present position. (Prolonged Applause).

THE PRESIDENT.—Gentlemen, one of the deepest convictions which I brought back from Europe with me was that Hungary in her troubles deserves all of your friendly sympathy and support.

As there is no further business, the meeting will stand adjourned.

Regular Meeting, Thursday, November 1, 1923

A regular Monthly Meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, November 1, 1923, at 12 o'clock noon.

Present

IRVING T. BUSH, <i>President</i>	
WELDING RING	
LEONOR F. LOREE	} <i>Vice-Presidents</i>
JESSE ISIDOR STRAUS	
CHARLES T. GWYNNE, <i>Secretary</i>	

and two hundred and forty-six other members of the Chamber.

Minutes

The minutes of the Special Meeting and of the Regular Meeting of October 4th were read and approved.

NOMINATIONS FOR MEMBERSHIP

FREDERICK H. ECKER, Chairman of the Executive Committee, reported the following named candidates for membership in the Chamber and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
E. GATES BARNARD	ALFRED E. MARLING	ROBERT R. SIZER
FREDERIC E. CALKINS	WALTER H. NASH	HERBERT L. DILLON
ROBERT E. CHRISTIE, JR.	DEAN MATHEY	GROSVENOR FARWELL
WALTER L. CROPLEY	C. GERARD DODGE	FRANCIS M. WELD
FREDERICK A. DEWEY	E. PUTNAM CURRIER	GROSVENOR FARWELL
H. H. EGLY	DEAN MATHEY	GROSVENOR FARWELL
SAMUEL M. EVANS	J. VIPOND DAVIES	WILLIAM C. DEMOREST
DAVID L. GEORGE	DEAN MATHEY	GROSVENOR FARWELL
LOTON HORTON	THEODORE B. THOMPSON	CARL F. AHLSTROM
MAX KOPS	MAX EISMAN	MORRIS STERNBACH
H. C. MERRITT, JR.	DEAN MATHEY	GROSVENOR FARWELL
BAYARD F. POPE	WARREN F. HOYSRADT	GROSVENOR FARWELL
WILLIAM A. READ, JR.	DEAN MATHEY	GROSVENOR FARWELL
PHILIP C. RIDER	ERNEST E. QUANTRELL	BEN F. TRONELL
CHARLES D. ROBBINS	ROLLIN C. BORTLE	EARL E. BEYER
ROBERT J. SEEKAMP	JOSEPH P. DAY	CLARENCE H. KELSEY
JOHN S. TURNBULL	JOSEPH P. DAY	CLARENCE H. KELSEY
STEVENSON E. WARD	THOMAS W. LAMONT	JAMES S. ALEXANDER

The President appointed Messrs. GEORGE E. MOLLESON and MAX EISMAN to act as tellers and the vote taken resulted in the election of the above named candidates.

FEDERAL BONUS FOR EX-SERVICE MEN

Mr. ECKER, for the Executive Committee, presented the following preamble and resolution, and moved their adoption:

To the Chamber of Commerce:

Whereas, The Chamber, while recommending that everything possible should be done for the injured and disabled veterans of the World War, has repeatedly gone on record as strongly opposed to a general bonus for all soldiers and sailors who served in the War; and

Whereas, It seems reasonably certain that a bill providing for a general service bonus will be introduced in Congress at its December session; therefore, be it

Resolved, That the Chamber of Commerce of the State of New York hereby authorizes and empowers the Executive Committee of the Chamber to take such action as the Committee may deem best in carrying out the convictions of the Chamber as heretofore expressed.

The motion was seconded.

THE PRESIDENT.—Is there any debate?

Col. BIRCH HELMS.—Mr. President, may I just offer a suggestion upon this resolution? It is based upon my experience with the American Legion. I happen to be one of the men who attended the early conferences that led up to the formation of the American Legion in Paris. I continued with the American Legion through its early meetings and afterwards, until this bonus matter came up. I withdrew with quite a number of other people from the Legion, not so much because this bonus meant financial help, but because we felt that the Legion was not sincere or honest in advocating a bonus. It did not advocate the bonus simply because it meant any help to the veteran; it advocated the bonus more to build up its own organization.

At the time this bonus question came up the treasury of the Legion was almost bankrupt, and members were leaving the Legion. In order to hold its membership, in order to increase its treasury, the bonus was brought up in the Legion.

My suggestion is this, Mr. President: That in order to defeat the bonus bill in Washington the only way is to attack the weak

point in the armor of the Legion, and the weak point in the armor of the Legion, as much as I may be interested in its work, is this—that I do not believe today more than half, if half, of the Legion members would advocate a bonus. I think that this Chamber ought to ask the National Chamber, or itself ask every leading Chamber of Commerce in each Congressional district to take a poll of the veterans in that district. That can easily be done by first finding the number of veterans in the district, just by inquiring in Washington. Then for the benefit of the member of Congress in each district take a poll of the number of veterans in favor of the bonus.

I think you will find that a large percentage of the members of the American Legion do not favor the bonus, as it is claimed in Washington. Today the officers of the Legion advocate many useful measures in Washington, but they overawe Congress on this bonus. Just a short time ago I talked with Mr. MELLON about it, and Mr. MELLON told me that the counsel or a lawyer for the Legion came into his office and told him that there was no question of this bonus matter going through Congress. Apparently there was no use of Mr. MELLON's opposing it. I do not know whether he wanted to frighten Mr. MELLON or not; but if so it was just like water on a duck's back—it had no effect on him.

I think it is incumbent upon this Chamber and up to every organization of its kind strongly to back up Mr. MELLON, who is making a lone fight down in Washington. You may say it is expensive, and it is a long process; but I believe that if each leading Chamber of Commerce in every Congressional district made a poll of the veterans of the American Legion, it would find that but a fraction of the veterans belong to the American Legion, and that but a fraction of those who are in the Legion actually advocate the bonus. (Applause)

THE PRESIDENT.—I understand that your remarks are intended as a suggestion for the Executive Committee?

Col. HELMS.—Just as a suggestion.

THE PRESIDENT.—You move no amendment?

Col. HELMS.—No; it is just a suggestion to the Committee.

Major ALFRED WENDT.—Mr. President, in support of the resolution and in support of the remarks of the gentleman who has just spoken, I would say that there is a strong organization called the Ex-Service Men's Anti-Bonus League, composed probably of many of the best men in the Legion, who support the anti-bonus proposition very heartily, and they have given in this

little pamphlet, which I have received, strong arguments controverting most of the reasons for the bonus, and I would be very glad to show the pamphlet to anybody who wants to see it.

THE PRESIDENT.—I think that the position of the Chamber has been stated very completely and very well, and I should be very sorry to have anybody, outside of the Chamber, have the impression that the action of the Chamber was in any way influenced by a thought that the American Legion had not been honest or sincere in its convictions; because, after all, that is a matter of individual judgment. The position of the Chamber has been very clearly stated, and I think perhaps it is better to stand, as this resolution does, upon the position as taken.

A vote was then taken, resulting in the adoption, unanimously, of the preamble and resolution of the Executive Committee in respect to a Federal Bonus for Ex-Service Men.

Mr. ECKER.—Mr. President, may I say that the Executive Committee, I am sure, welcomes the suggestions that have been made pertaining to this particular subject. The members of the Executive Committee, I think, are cognizant of this situation, particularly of the Anti-Bonus League, and they are all matters receiving attention; but we always welcome suggestions from members of the Chamber.

STATE BONUS FOR EX-SERVICE MEN

To the Chamber of Commerce:

Mr. ECKER, also on behalf of the Executive Committee, presented the following and moved its adoption:

"Whereas, There are various proposals that the State of New York pay bonuses to the ex-service men of the American Expeditionary Forces who enlisted from the State of New York; and

"Whereas, The patriotic service rendered by these men was a national service and the Federal Government has undertaken to provide for the disabled men and the dependents of those who died in service; therefore, be it

"Resolved, That the Chamber of Commerce of the State of New York disapproves of a State Bonus to the ex-service men not only for the same ethical and economic reasons that it is opposed to a blanket bonus by the Federal Government, but

also because of the fact that their service was national in its character, and further because it would deprive the State of the use of funds seriously needed in other directions."

In order to reaffirm this policy of the Chamber, its Executive Committee now recommends the adoption of the following resolution:

Resolved, That the Chamber of Commerce of the State of New York reaffirms its previous action and, while it has recommended that the Federal Government should provide adequately for the disabled men and the dependents of those who died in the service, it expresses itself as opposed to the adoption of the proposed amendment to the Constitution of the State of New York providing for a State Bonus for ex-service men.

Col. HOWARD C. SMITH.—Mr. President, I suggest that an amendment be made authorizing the Executive Committee to take such steps as it may find necessary to carry out the views of the Chamber on this subject.

Mr. ECKER.—I am glad to accept that amendment, Mr. Chairman.

THE PRESIDENT.—If there is no objection by the members of the Chamber, the Committee will accept that amendment without formal vote, and I will call for a vote on the resolution.

The resolution was then adopted unanimously.

BOND ISSUE FOR STATE INSTITUTIONS

Mr. ECKER.—Mr. President, it is believed by the Executive Committee that it will be helpful for the Chamber to take a position and express its opinion on the proposed Bond Issue for State Institutions. With your permission I will present the report and move its adoption:

To the Chamber of Commerce:

On Election Day, November 6th, the voters of this State will be asked to vote on what is known as Proposition No. 1:

"Shall Chapter 591 of the laws of 1923, entitled 'An Act making provision for issuing bonds to the amount of not to exceed fifty million dollars for the construction of buildings for institutions for the care, support, instruction and training of the wards of the State . . . ' be approved?"

The fire on Ward's Island last February, in which twenty-five

lives were lost, served to bring to public attention the condition of the buildings of institutions for the insane, feeble-minded, epileptics and other dependents of the State. Investigations have shown that many of the buildings are of inflammable construction and that there is a very serious over-crowding, a combination constituting a serious menace to the lives of thousands of patients of these institutions in different parts of the State.

The present method of appropriations by the State for erection of new buildings for these institutions has proven inadequate and conditions are apparently growing worse. In order to meet this situation the Legislature at its last session, on recommendation of Governor SMITH, unanimously decided to submit to the voters at the next election the proposition providing for an issue of bonds, not to exceed fifty million dollars, to be appropriated over a period of years as needed. It is generally recognized that permanent improvements, the benefits of which will extend over several generations, may properly be paid for through a bond issue in place of present taxation.

In view of the economic as well as the humanitarian considerations involved, the following is recommended for adoption:

Resolved, That the Chamber of Commerce of the State of New York endorses Proposition No. 1, to be voted upon on election day, November 6th, providing for the approval of Chapter 591 of the laws of 1923, entitled "An Act making provision for issuing bonds to the amount of not to exceed fifty million dollars for the construction of buildings for institutions for the care, support, instruction and training of the wards of the State."

The report and resolution were unanimously adopted.

HUDSON RIVER BRIDGE REPORT HELD OVER

DAVID T. WARDEN.—Mr. President, your Committee on the Harbor and Shipping has prepared two reports for submission today. The first is on the subject of the proposed Hudson River Bridge. Since that report was mailed to the members it has been brought very forcibly to the attention of the Committee that there is a very large interest in that subject. I might say for the benefit of the Chamber that as I entered the Hall today the President handed me a long letter and a telegram from a very influential gentleman who is deeply interested in the subject. Your Committee in considering this matter thought that they had interviewed and conferred with practically all of those who they thought would be interested. It seems that there are a great many others who have views to express, with whom your Committee has not had the opportunity to discuss the matter.

With your permission, therefore, Mr. President, I would suggest that action by the Chamber on the report of the Committee on the Harbor and Shipping, on the proposed Hudson River Bridge, be deferred for one month.

THE PRESIDENT.—If there is no objection, gentlemen, the suggestion made by the Chairman of the Committee, who very promptly and courteously recognizes that there are other opinions to be expressed, will be followed, and the matter will not come before you for action today.

**Report on Proposed Hudson River Bridge Upon Which Action Was
Deferred For One Month**

To the Chamber of Commerce:

Your Committee on the Harbor and Shipping has had under consideration the project of the North River Bridge Company to construct a bridge over the Hudson River from 57th Street, New York, to the New Jersey side, and has reached the conclusion that the situation is such that the recommendation of any bridge at this time would be unwise. In its consideration of this project, your Committee has had primarily in mind its effect upon shipping and navigation in New York Harbor.

The site of the bridge is less than two thousand feet from piers at which the largest steamers are berthed. This distance, in our opinion, is not sufficient to make it safe for ships of 900 to 1,000 feet in length to maneuver in the process of docking and undocking, and this is especially so with flood tide. Even although the present outlook is that commercial ships will not be built larger than those now afloat, it cannot be concluded that new developments may not ultimately lead to another movement towards ships even larger than those now afloat. It is quite conceivable that with such a development it may be desirable, even necessary, to berth large ships above the site of the proposed bridge. Today there are a number of vessels which could not pass under the bridge without changing not alone their masts but their funnels as well. The masts are comparatively unimportant but the funnels present a greater problem.

In addition to ships engaged in commerce there is the U. S. Navy to be considered. Structures should not be placed over the Hudson River which might some day interfere with national defense.

Apart from the considerations which might affect navigation after the construction of the bridge is completed, there is the serious impediment to navigation during the period of construction; this period is estimated to be seven years, during a considerable part of which period free passage of the river would be impeded by the necessary barges and other equipment which

would be used for transporting the material to the site of the bridge for the purpose of being lifted up into their respective positions in the structure. Such an impediment extending for a period of years would present serious difficulties.

There are other practical matters to be considered in connection with a bridge across the Hudson River at that point: If a bridge were the only method of crossing the river, its construction would be more imperative and the emergency might warrant even certain impediments to water-borne commerce. It has, however, been demonstrated that tunnels can be built successfully under the river for all kinds of traffic, and these can be placed at any particular point where traffic demands, while a bridge can only be built in a certain place, and, owing to engineering problems, wind, strains, etc., it is necessary to construct a bridge of sufficient width and size generally to meet these problems.

The bridge now under consideration proposes thirty-two tracks to be used by automobiles, trucks, street railways, steam railways, besides roadways for pedestrians. It has for some years been known that the question of traffic in New York City has become a most serious problem, and decentralization of traffic appears, therefore, to be an absolute necessity. The bridge, however, would bring about the concentration of thirty-two tracks at one point in Manhattan, which in our opinion could not help but produce a most serious traffic congestion; even a much smaller number of tracks would do so. It is questionable, however, if so many tracks would be needed for many years to come, which raises the question of the improbability of utilizing the bridge to its capacity until our population and traffic caught up with the capacity of the bridge, and this also raises the question of a large capital investment in advance of the traffic necessities as the bridge must be built to its designed size.

On the other hand, tunnels can be built when and where necessary. With conveniently located tunnels, traffic across the river will not have to travel from various sections of the city to 57th Street, involving a saving of time and economy in transportation costs.

Furthermore, the upkeep of a bridge is understood to be much in excess of the upkeep of tunnels. While it would not be possible to build tunnels for thirty-two tracks at the cost of a bridge of similar capacity, still a large number of tunnels can be built for what this bridge would cost, and they could also be constructed in less time.

The vehicular tunnel (a double tunnel with four tracks) now under construction is expected to be completed in 1925. As on the proposed bridge, tolls will be charged for the use of this tunnel, but it is anticipated that under the scheme of amortization the vehicular tunnel will be paid for within a comparatively few years, and after that it is likely to be free to the public. A

free tunnel route under the river would be a serious handicap to the profitable operation of a bridge charging tolls. The success of the vehicular tunnel will more than likely lead to the demand for further tunnels conveniently located to meet the traffic needs and avoid the objections which motor trucks and commercial traffic generally would always raise to extra travel incident to the use of a bridge in a fixed location.

In view of this situation, your Committee does not feel warranted in endorsing the North River Bridge Company's project at this time. The following resolution is therefore offered:

Resolved, That the Chamber of Commerce of the State of New York places itself on record as being unable to recommend at the present time the construction of a bridge across the Hudson River between the Island of Manhattan and the Jersey shore.

Respectfully submitted,

EXTENSION OF COASTWISE LAWS TO THE PHILIPPINE ISLANDS

Mr. WARDEN, Chairman of the Committee on the Harbor and Shipping, presented the following report, which was approved unanimously:

To the Chamber of Commerce:

Section 21 of the Merchant Marine Act of 1920 provides, in effect, that after February 1, 1922, the coastwise laws of the United States shall extend to the island territories and possessions of the United States not now covered thereby, and the Shipping Board is directed prior to that time to establish adequate steamship service, at reasonable rates, to accommodate the commerce and passenger travel of said islands, and to maintain such a service until it can be taken over and operated upon satisfactory terms by private capital and enterprise. The same section further provides that the foregoing provisions shall not take effect, so far as the Philippine Islands are concerned, until the President of the United States, after investigation of the local needs and conditions, shall, by proclamation, declare that an adequate shipping service has been established, and fix a date for the foregoing provisions to go into effect.

The Shipping Board has done but little to carry out the mandate of Section 21 to establish adequate steamship service with the Philippine Islands, so far as the commerce between the Philippine Islands and Atlantic ports of the United States is concerned, and at the present time the preponderance of such commerce is carried on foreign vessels.

American vessels of private ownership cannot compete under present conditions with foreign vessels, and it therefore appears hopeless to expect that private initiative and enterprise can enter that service until the Shipping Board will co-operate with them in assisting to establish such services, to the end that the mandate of the act heretofore quoted may be complied with and a real effective aid given to the maintenance and upbuilding of the American Merchant Marine.

The coastwise laws of the United States have been extended for many years past to such island territories and possessions of the United States as the Territory of Hawaii and Porto Rico, and in the opinion of your Committee it would be equally proper to extend these laws to the Philippine Islands.

Your Committee therefore offers the following resolution:

Resolved, that the Chamber of Commerce of the State of New York hereby respectfully calls to the attention of the President of the United States the provisions of the Merchant Marine Act, above quoted, and respectfully urges upon him the desirability of drawing the mandate of the act to the attention of the Shipping Board, with a view to having the designated services established, and, upon establishment, as provided for in said act, to fix a date for putting the coastwise laws into effect between the United States and the Philippine Islands.

Respectfully submitted,

DAVID T. WARDEN, *Chairman*

AMENDMENT TO CONSTITUTIONAL DEBT LIMIT OPPOSED

CLARENCE H. KELSEY.—Mr. President, the Committee on Taxation has no formal report to present, but it thought it wise to call the attention of the Chamber to the fact that a constitutional amendment is to be voted upon at Tuesday's election which looks to the extension of the debt limit of the City, and also to the extension of the limit on the power to levy taxes on the part of the City.

The Chamber took a decided position on that question at its March 1st meeting, when the concurrent resolution looking toward submitting such an amendment to the voters was before the Legislature, and unanimously condemned the proposition by the adoption of the following resolutions:

“Resolved, That the Chamber of Commerce of the State of New York is opposed to any legislation to provide for a constitutional amendment or other legal steps which shall increase the borrowing power or taxing ability of the City of New York beyond those already possessed through existing provisions; and, be it

“Resolved, That the Chamber is opposed to Concurrent Resolution of the Senate and Assembly No. 557, Int. 541, to amend article eight of the Constitution affecting the limitation of indebtedness of cities and counties.”

The Committee on Taxation, therefore, without moving any further action, considers that the action in condemning the concurrent resolution condemns also the proposed amendment to the Constitution, and the position of the Chamber has been taken decidedly against that proposition.

MR. BERNHEIMER WELCOMED BACK AFTER ILLNESS

THE PRESIDENT.—The report of the Committee on Arbitration.

CHARLES L. BERNHEIMER.—No report, sir.

THE PRESIDENT.—I had intended to express the regret of the officers of the Chamber that the Chairman of our Arbitration Committee had recently been ill, when the door opened and he walked in. I am sure you will all be very glad to welcome him back.

PROPOSED PLAN FOR SUBWAY IN CENTRAL PARK OPPOSED

WILLIAM MCCARROLL.—Mr. President and Gentlemen: On the 4th of August the Board of Estimate and Apportionment approved the plan of the Rapid Transit Commission for the Fort Washington Avenue subway. That subway as contemplated was to extend from 59th Street or 63rd Street through Central Park West and St. Nicholas Avenue, to Fort Washington.

It was gratifying to the Committee that the approval of the

Board of Estimate and Apportionment was had at that time, as it indicated that some progress might be made toward additional subway construction so badly needed. Since that time, however, the Transit Commission suggested, and on October 11th, made application to the Board of Estimate and Apportionment for a change in the route, and in the plan of construction of the subway, so far as Central Park West is concerned. As the report of your Committee shows, the Commission now proposes to construct the subway through Central Park itself, on the westerly side, and not through or under the street (that is, not through Central Park West) as was approved by the Board of Estimate and Apportionment at its meeting in August.

The plan for this change in the matter of the route and also in the construction, is now before the Board of Estimate and Apportionment, to be considered by the Board during the coming week or the week following.

It may be admitted that the configuration of the land in Central Park perhaps lends itself to such construction along the westerly edge as now proposed by the Transit Commission, but, on the other hand, this configuration of the westerly side of the Park is such that to construct a subway, by the method now proposed along it, would deprive the people, for a very considerable time, of the use of a large section of the Park with its picturesque slopes and fine trees. We all know what the unavoidable result of open-cut construction for subways is. We know that for a long period it would continue to be an obstacle and a very objectionable drawback.

So your Committee opposes the construction of the subway through the Park by the open-cut method. It is not, however, opposed to it if it be done by tunneling, and your Committee believes it can be done by tunneling; but if it cannot, it should not be put there at all. This Chamber has, on previous occasions, taken action against propositions of invading the Park, and the Committee as well as the Chamber is opposed to any use of it other than for Park purposes. That opposition we hope will again be expressed now by the Chamber to this method of construction proposed by the Commission. We are at one with the people of the City for the early and speedy construction of subways, but we do not propose that the use and enjoyment of the Park by the people should be curtailed or interrupted as this proposed plan would necessitate. As this is made clear in the report of your Committee which is before you, I move the adoption of the report and resolutions:

Report on Proposed Plan For Subway in Central Park

To the Chamber of Commerce:

This Chamber has gone on record on a number of occasions

in opposition to the employment of Central Park for any purpose inconsistent with the idea of its founders and its present use. Ever since the park was started, back in the fifties, this Chamber and the great majority of the people of the City of New York have been in accord on this matter, and have been successful in several movements to protect the park from intrusions from war memorials, swimming pools, race tracks, world's fairs, numerous statues and various buildings.

Your Committee on Public Service in the Metropolitan District is opposed to the proposed plan now being discussed, to run the Washington Heights extension of the subway under Central Park. As proposed, the subway would run in the park from 63rd Street to 107th Street. By the original plan this extension was to be built under Central Park West (Eighth Avenue). Estimates have shown that less than two million and a half dollars could be saved if the open-cut methods of construction is used, which would be possible if the line was placed on the extreme western side of the park. This undertaking, however, would result in the destruction of several hundred trees, and would be an extreme step in diverting the park from its original purposes. It is generally agreed that not only those trees above the subway, but also those within a distance of several feet on the sides would be destroyed, for it is not possible for trees to thrive in soil above and adjacent to subways, unless the tunnel is placed very far below the surface. Landscape and park authorities state that more than two hundred and fifty trees, some of them over fifty years old, which would have to be removed for the construction work, could not be set back and be expected to grow and flourish. At the same time, during the period of construction, which will be several years, the park on the west side will be torn up and badly disfigured, and its enjoyment by the people interrupted.

With a population of 5,751,859 in 1921, this city had a park area of only 8,299 acres, or at the rate of one acre for every 693 people. The Borough of Manhattan, however, has for every park acre 1,456 people. A park area of an acre for every 250 inhabitants is not considered excessive in many cities. It is hardly possible to increase this park area in Manhattan owing to our built-up condition and high land values. Obviously our existing park acres should be carefully conserved.

It has already been decided in the case of *WILLIAMS* against *GALLATIN* in the Court of Appeals of the State of New York that the park could not be used for any but park purposes. It is accordingly very likely that any attempt to use the park for this subway extension could be blocked by court proceedings.

It should be added that your Committee would not be opposed to a tunnel driven under the park which would be so far below the surface that it could not in any way interfere with vegetation or the park's appurtenances, and which would be so close

to Central Park West that the subway stations might be located upon the streets and not in the park. The stations should also be provided with cross passage ways between the westerly and easterly sidewalk of Central Park West.

Your Committee offers the following resolutions:

Resolved, That the Chamber of Commerce of the State of New York is opposed to the proposed plan to build a subway by the open-cut method through Central Park, and to any destruction of the park area or any disturbance of its present condition and character; and, be it further

Resolved, That the Chamber would favor the construction of the proposed Washington Heights extension of the B. M. T. subway under Central Park by means of a tunnel parallel and adjacent to Central Park West, provided it is so far below the surface that it would not in any way interfere with vegetation or the park's appurtenances during construction or afterwards.

Respectfully submitted,

WILLIAM MCCARROLL, *Chairman*

NEW YORK, *October 22, 1923.*

Debate on Report on Proposed Subway in Central Park

Mr. MCCARROLL.—I assume, Mr. President, that the adoption of this report and resolutions by the Chamber would carry with it the authority to the Committee to appear at the hearings of the Board of Estimate and Apportionment and to take such other action as it may deem best to carry out the objects of the report.

WILLIAM LAWRENCE SAUNDERS.—Mr. President, I desire to oppose the resolutions. It is a dangerous thing for this Chamber to enter into any resolution or to express its opinion as to how a piece of work should be done. The best engineering in the accomplishment of a result is the most economical. To build the tunnel under the Park would probably cost twice as much as to construct the tunnel by the open-cut process.

Furthermore, Mr. President, is it not more desirable and less objectionable to the people of New York to have, for a temporary period, a little open-cut work in the Park, rather than

have it in the streets of the City? In order to solve this great traffic problem we must make some sacrifice, and surely we have made a great many in connection with the building of rapid transit tunnels in the past through the streets of the City. It is unquestionably an obstruction, and a great one, to the traffic and to the shopkeepers of the City while this work is going on, and the only compensation we have is that it is temporary. The Park is very large, it is not as congested as the streets, and this improvement cannot be made otherwise unless it is made in a very expensive way.

Col. SMITH.—Mr. President. I should like to ask the Chairman of the Committee on Public Service in the Metropolitan District if he can enlighten the Chamber as to whether there is any actual difference in the cost of the cut and cover method and the tunneling method, and also as to the length of time the Park would probably be disturbed.

Mr. MCCARROLL.—It is estimated the saving would be less than two million and a half dollars, if constructed by the open-cut method through the Park. No question arises as to the open-cut method through Central Park West; that was to be wholly by tunneling under the street. So there would be no opening if constructed through Central Park West. The open-cut method is proposed through Central Park itself, and it may be contended, Mr. President, that the work can be done quite as well or better by tunneling under the Park.

Of course, it is not for the Committee to decide upon the engineering questions involved, but we point in the Committee's report to the objections of defacement of the Park, and, as I have said, it is unnecessary to disturb the surface of the Park when it can be done by tunneling. The additional expense of approximately two millions of dollars, is inconsiderable as against the interruption of the enjoyment of the Park for a period of years, as it will take probably from three to five years.

Col. SMITH.—Mr. President, if I may, I would like to say, after getting that information, that it seems to me it should be the view of the Chamber that two and a half or three million dollars is not a sufficient economic saving to justify upsetting the park for three years or more.

Major JOHN F. O'ROURKE.—Mr. President, the matter of tunnels and of building subways is not a thing that the average layman is in a position to discuss. I have spent all my life in that business and have done as much of that work as any one else I know of. Thirty years ago I was Deputy Chief Engineer of the Rapid Transit Commission when the present type of sub-

way was adopted as the best that could be constructed at that time.

The building of tunnels, up to the time of undertaking the East River tunnels from the foot of Whitehall Street and from the foot of Old Slip, gave just as bad a disturbance of the streets as open-cut construction. The building of the Joralemon Street tunnels took four years; the street was blocked to traffic for six years. All substructures were destroyed; every stoop for the length of the tunnel dropped away from its place, and a large number of the fronts of buildings had to be rebuilt—all because at that time it was not understood how to build a shield tunnel and fill up the space left by the shield as it was shoved forward.

I had this matter in mind a good many years, and before we bid for the proposed new East River tunnels I was going along the street one day and saw what I had seen fifty times before, a sand blast apparatus cleaning the front of a building. Immediately I said to myself, "there is the way to fill the space behind the shield." That idea was put into practice, using gravel instead of sand, in the tunnels that went up through Montague Street, Clark Street, Fulton Street, Willoughby Street, and some other streets in New York and elsewhere, and was a success from the very beginning. As the shield moved forward, the gravel was blown into the space which it left around the tunnel with such velocity that it completely filled it. It was crushed by impact on itself, some of it being reduced to a powder, which acted like cement in uniting the mass of broken gravel into an embryo sandstone. There was no settlement of the street and, instead of the four years that it had taken on the Joralemon Street tunnels, the tunnels in Clark Street and Montague Street were each finished for the same distance in eight months, and, instead of having a million dollars damages to pay, which were paid by the City on Joralemon Street, there was not one penny claimed for damage on those two streets.

In other words, there was no evidence on the surface of the streets that any tunnels had been built. That method has since been used in several miles of other streets, both with concrete block tunnels and castiron tunnels. It is now an established practice that you can build a shield tunnel without any loss of ground, without any disturbance of buildings. You can even go under buildings, as has been done in a number of cases, without any damage or difficulty.

Coming to the Park and the Committee's resolution. The resolution condemns the open cut, and very properly. An open cut should be obsolete except in special cases. It speaks about putting the tunnels sufficiently deep that there will be no disturbance of the surface or drainage of the water in the ground. The depth of the tunnel has little effect on its capacity for

drainage. You realize that seams in the rock will let the water down one hundred feet as easily as ten feet; but if the tunnel is shield driven with the gravel packing and grout methods, that are now perfected, it may be driven as close to the surface as you please and not disturb the ground or anything growing in it. This depth should be below the roots of the trees, and it does not matter whether the subway is in rock or earth, the method applies equally to all cases.

The cost would be considerably less than by the structural steel open-cut method and the Park would not contain a trench that would continue draining at the bottom and sides of the subway for years and years afterward. It is absurd to think that filling in a trench stops its draining. It would be just the same as in streets of the City wherever a sewer is built. However watertight the sewer is in itself, the trench in which it is built drains the ground so that ground water is never found in any street above the level of the bottom of the sewer, which is usually the deepest substructure.

Therefore, Mr. Chairman, I am heartily in favor of all the recommendations of the Committee, and I assure my friend, Mr. SAUNDERS, that there is a great saving in using this method of construction over any other. I will show this by giving you an example. The Broad-Nassau Street subway can be built by this method for \$6,000,000, without any disturbance of streets, buildings, or traffic. The open-cut method would disturb the street for at least three years, as Broad and Nassau Streets are underlaid with mud and quicksand and would cost \$12,000,000. Bids received for half of it amount to \$5,987,000. The tunnel work would be done from a shaft at the foot of Broad Street which is there now, and a working point at the other end in the cellar of the Municipal Building.

I would move to amend the second resolution by omitting the following words: "It is so far below the surface," which fulfills the purpose of the resolution as well as if the depth were specified. With all deference to the Committee, I simply ask that they omit that part.

THE PRESIDENT.—Don't you think you are, really, merely saying in other words what has been said here, because if you put it six inches below the surface it would be "so far below"? It seems to me that the phraseology would cover your point.

Major O'ROURKE.—That is true, Mr. President, but anybody who reads it from the engineering standpoint would consider that you were going down so far that you would cause no disturbance of drainage or ground simply because of the depth. I admit that the depth might be anything, but you must have a

watertight subway and an effective means of filling in the excavation around the tunnel as you go along, as with gravel to prevent draining the ground and affecting the trees, shrubs and grass.

THE PRESIDENT.—The amendment is before the Chamber. Has it been seconded?

Mr. MCCARROLL.—I second it. On behalf of the Committee—I think the majority of the members of the Committee are here—if there is no objection from them I will accept the amendment.

THE PRESIDENT.—If there are no objections from any part of the house we will permit the Chairman of the Committee to accept on behalf of the Committee the amendment omitting these words from the last resolution: "it is so far below the surface."

J. VIPOND DAVIES.—I had not intended to speak to this motion, but now find it necessary to correct certain impressions conveyed by the previous speakers. I was connected with the Brooklyn Rapid Transit Company before the execution of the contracts for the present system, and until after the receivership. The whole question to be studied here goes to the purposes and the origin of this extension.

The Broadway-Seventh Avenue Line now operated by the Municipal Railway, was extended as a four-track line to Central Park, on the line of Seventh Avenue. It ends there with four tracks. Two of those tracks were built and are now in existence, intended for the purpose of extending up on the line of Eighth Avenue, or near thereto, to reach the Washington Heights district. It is the only way that line can be properly extended to reach through Brooklyn and up into the Washington Heights district, and the railroad as at present built is constructed for that purpose. Two tracks go east across the southern end of the Park and 60th Street to the Borough of Queens. The other tracks stop stub-end, with the intention of extending by this subway that is now under consideration.

To get to Eighth Avenue at all it is absolutely necessary, and as to this there is no point raised by this Committee, that the subway pass under and is intended to pass under the Park from Seventh Avenue and 59th Street to Eighth Avenue and 63rd Street. It is only there that the Committee in their report today bring up for consideration the question whether it goes up further north along the line of Eighth Avenue, from 63rd Street to 107th Street, under the Park, or in some other manner.

I think there is a very great misunderstanding as to what is meant by this method of open cut. The open cut is intended to be and is merely an open-cut and cover construction, which, after completing the work, will be covered over, the surface restored and all the purposes of the Park will unquestionably be restored to it all the way from Seventh Avenue and 59th Street through to the north end of the Park. There is no expectation and there is no question before us of leaving as an open cut permanently any part of Central Park, or any part of Eighth Avenue adjacent thereto, or wherever that subway is constructed. If the line is built under Eighth Avenue it will necessarily be a subway built by the open-cut method. The great object and purpose of a subway near the surface is to eliminate the necessity for mechanical means of elevation of every passenger up and down, due to the great depth, which is necessary by placing a subway in a tunnel at a great depth. No one is going to think for a moment about any such thing, as my friend Major O'ROURKE refers to—building anything with a shield on that line. I have probably built as much with shields, tunnels with shields under these conditions, as anybody, and it is absurd to talk about building this subway with a shield under the conditions existing. It is essentially a rock proposition. There may be places where the rock dips down and sand or soil comes into the cut, but there are only two alternatives in this matter; one is to go right down deep into the solid rock, whether under Central Park or under Eighth Avenue, and keep in the rock throughout, and the other is to build an open-cut subway covered over on the completion of the work.

If you are going to build by the open-cut method, and cover later and restore the surface, it stands to reason without this argument that Mr. MCCARROLL has put up of the two and a half millions, that in one case you are going to take advantage of the depressed surface on the west side of the Park and save a great deal of excavation, over the amount necessary to take out, by building a subway under Eighth Avenue.

Furthermore, for the entire duration of this contract, whatever contract is let for the construction, there will be no surface on Eighth Avenue, we will have a plank roadway and we will destroy the very fine pavement there, interfering very seriously with the use of Eighth Avenue as a southbound artery, which it now is, and other means will have to be provided to accommodate that traffic upon other streets.

There can be no such serious interference in the Park. It only means some forty or fifty feet width at the edge of the Park which is under question. As that edge of the Park is not utilized, it is west of the main roadways, this work would be purely a temporary inconvenience. All the functions, all the facilities and all the service of the Park will unquestionably be restored to the people on the completion of the work, and they

will have this artery of transportation constructed, with by far the least hazard and damage to the property fronting on Eighth Avenue (Central Park West) and Central Park, and that is a very important matter. It will expedite the construction by putting it under Central Park, as I have no doubt that at least a year will be saved by putting it under Central Park and not under the street. Also it will relieve us of difficult traffic problems during that period.

Major O'ROURKE.—Mr. President—

THE PRESIDENT.—I am sorry, Major O'ROURKE, but the rule of the Chamber is that a member may only speak once on a subject.

Major O'ROURKE.—But how about having your words characterized as farcical? May I not say anything in that event?

THE PRESIDENT.—I will have to rule that you cannot speak at this time without the unanimous consent of the Chamber.

JOSEPH M. PRICE.—Mr. President, I hardly think that enough stress has been laid on the destruction of the trees in the Park. The Committee points that out in its report, but the Chairman of the Committee did not mention it in his remarks. They figure that about 250 or more trees will be destroyed in making this cut along the westerly edge of Central Park, and the gentleman who has last spoken said that that will all be restored. He speaks, in comparison with that, of the fine pavement on Eighth Avenue that will be destroyed.

We all realize that the fine pavement can be put back on Eighth Avenue, but what about the edge of Central Park? We recollect the condition of upper Broadway on the West Side before the subway was constructed, with the beautiful trees in the center of the Avenue, and there was a great deal of objection made at that time to the destruction of those trees. It took years for them to grow, as we all know. We were promised that those trees would be restored and that they could be restored. A real effort was made to restore the center of Broadway as it had been before the subway was built, but it could not be done and it cannot be done. We know what Broadway looks like today, with its open gratings, with its pathway without shrubbery, because the shrubs will not grow and the trees certainly will not grow. Probably the same condition would occur on the west side of the Park, and we should not take the chance of having that beautiful west side of the Park destroyed, as it certainly will be, because the trees will not grow there in the way they are growing today.

I hope the resolution of the Committee will be upheld. (Applause)

WILLIAM H. TAYLOR.—Mr. President, I have been advised by the engineers of the Commission that of the 3,200 feet of tunneling now under the Park, 1,100 feet was open cut, and I do not think that any member of this Chamber who has examined the situation in the Park can tell where that open cut was. Another thing in connection with the proposed open cut, I am also advised that it is but a portion of the route on which it will be necessary to have an open cut, that the rest will be tunnel work, and that where this open cut is to be made is in very many cases hollow ground in the Park, that would be very much improved instead of the Park being injured by the fill that would be made after the work was accomplished. I simply want to state those facts in connection with the question under consideration.

[Cries of question!]

THE PRESIDENT.—The question is called for. I am afraid I can only recognize this one gentleman before we put the question.

MILTON L. LISSBERGER.—Mr. President, I want to add the thought that many of us will remember the old Battery Park. We heard very much the same argument about the restoration of Battery Park when we permitted the erection of the elevated railroads there. Gentlemen, I hope you will bear that in mind in connection with the proposition for the open cut in Central Park, and that the resolution that is proposed will prevail.

Report on Proposed Plan for Subway in Central Park Adopted

A rising vote was then taken, resulting in the adoption of the report and resolutions in respect to the proposed plan for a subway in Central Park by a vote of 137 in favor and 24 against.

ANNOUNCEMENTS

Annual Banquet

THE PRESIDENT.—I should like to call the attention of the members of the Chamber once more to the Annual Banquet which is to be held this year on November 15th. A large number of subscriptions have already been received, but the mem-

bers still have time to subscribe if they care to do so. I think it would be just as well if I do not name the speakers who will address us upon that occasion, because there might be changes; but the list which has already been secured I can assure you is a most interesting one.

Lloyd George Meeting

THE PRESIDENT.—I think perhaps I should say in deference to some of the members of the Chamber here who have labored so hard in connection with the Lloyd George meeting—a matter which I very fortunately and wisely escaped by going to California—that the Chamber as a Chamber has had no official part in that matter. It is true that when Mr. LLOYD GEORGE first expressed his intention of coming here we extended an invitation to him to be our guest either at a luncheon or dinner or to address us in this Great Hall. That invitation was at first accepted by him and he promised to speak to us here. I can imagine his feelings when he found that every other commercial and civic organization in New York felt that he should address them, and he was embarrassed perhaps by the fact that he had accepted our invitation and was compelled to decline all of these others. His representative in this country suggested that it would perhaps be wise and very helpful if it could be so arranged that our invitation was withdrawn and some arrangement made by which a joint meeting could be held in some one of the great halls of this city.

As a result of that the Citizens Committee was formed and Mr. GWYNNE has acted as voluntary secretary, and many of the members of the Chamber have served upon the committee and have labored very hard.

The Opera House accommodates 3,600 people, and at a very small estimate there are 36,000 people who would like to go. It is a very easy mathematical question to determine how many enemies the committee has made. If they had refused tickets to all of the 3,600 to whom they have been given, they would merely have been added to the balance of the 36,000, and we would have some other 3,600 happy, and those who have already received them would be unhappy.

As a matter of fact, we considered selling the tickets for some charitable purpose—which would have been a very nice

thing to have done in the interest of Mr. LLOYD GEORGE, who I am sure would have been glad to make that contribution to some charitable organization in this city—but experience in the past has taught that it is almost impossible to control tickets once they get beyond the hands of the committee, and speculation in them would have been rampant, so it was dismissed because it was an impractical thing to do without the possibility of scandal. Tickets were, therefore, distributed in the fairest way the committee could find, through the 350 members of the reception committee, and I can only say to you that the Chamber as a Chamber has had no official part in this matter, and those who have worked and worked well I am sure only wish that the Metropolitan Opera House could be enlarged to the size of Central Park and a special subway could be constructed there to take everybody up.

**Prizes to Be Awarded for Essays on Apples at Apple Exposition
and Fruit Show**

THE PRESIDENT.—I should like to call your attention to the Eastern Apple Exposition and Fruit Show, which is to be held at the Grand Central Palace beginning Saturday night, November 3rd, and to continue for a week. The Chamber, by action at the last meeting, I believe, approved this function, and a certain amount of money from the Hepburn Fund has been set aside to furnish the prizes for essays, on the desirability of the apple as a matter of diet, from students of some of the up-State schools. These prizes are to be awarded at the Apple Fair. I call the attention of the members to this fair. They may be interested in going, and I will tell them that I am sure if they will go they will be furnished with free apples, and I have been assured that the green apples will be carefully eliminated.

If there is no further business, the meeting will stand adjourned.

THE ONE HUNDRED AND FIFTY-FIFTH ANNUAL BANQUET

The One Hundred and Fifty-fifth Anniversary Banquet of the Chamber of Commerce was held at the Waldorf-Astoria on Thursday evening, November 15th, 1923. There were six hundred and seventy members and guests present, and it was indeed a distinguished and representative gathering of public officials and leading men of affairs.

The addresses, which appear in this volume, contribute a collection of able discussions of important topics of public interest. The menu was excellent and the hall and table decorations were particularly handsome.

President IRVING T. BUSH presided and his interesting and entertaining remarks as Toastmaster were greeted with considerable applause. The Right Reverend ARTHUR S. LLOYD, D.D., Suffragan Bishop of New York, pronounced Grace. During the service of the dinner musical selections were played alternately by the orchestra and on the pipe organ. Mr. ERNEST K. SATTERLEE, a member of the Chamber, served as organist for the occasion. At the close of the service of the dinner a toast was drunk to the health of the President of the United States.

In addition to President BUSH, there were three other speakers. The Honorable RAGNVALD ANDERSON NESTOS, Governor of the State of North Dakota, delivered a brilliant and effective address, with respect to the problems of his State and vicinity, entitled "The Spirit of the Northwest." The Honorable WILLIAM P. G. HARDING, Governor of the Federal Reserve Bank of Boston, spoke on "The Need for a National Co-operative Spirit." His address was in the nature of a reply to the speech of Governor NESTOS and was a very enlightening discussion of problems of public concern. The speaking was concluded by a witty and graceful address by the Honorable MARTIN W. LITTLETON. Mr. LITTLETON's address was also, to a certain extent, in reply to Governor NESTOS.

Besides the speakers, the following were seated at the President's table: The Right Reverend ARTHUR S. LLOYD, D.D., Suffragan Bishop of New York; Major-General ROBERT LEE

BULLARD, U. S. A.; Rear-Admiral CHARLES P. PLUNKETT, U. S. N.; Honorable RICHARD E. ENRIGHT, Police Commissioner, City of New York; Major-General GEORGE W. GOETHALS, Honorary Member of the Chamber of Commerce of the State of New York; THOMAS A. EDISON, Esquire, Honorary Member of the Chamber of Commerce of the State of New York; EUGENIUS H. OUTERBRIDGE, Esquire, ex-President, Chamber of Commerce of the State of New York; ALFRED E. MARLING, Esquire, ex-President, Chamber of Commerce of the State of New York; DARWIN P. KINGSLEY, Esquire, ex-President, Chamber of Commerce of the State of New York; LOUIS S. FOULKES, Esquire, President, Chamber of Commerce of Rochester; JOHN F. HORMAN, Esquire, President, Chamber of Commerce of Schenectady; C. W. FERGUSON, Esquire, Vice-President, Chamber of Commerce of Troy; R. A. TATE, Esquire, President, Chamber of Commerce of Utica; and ROBERT BOETTGER, Esquire, President, Hudson Valley Federated Chamber of Commerce.

Guests of the Chamber of Commerce

The complete list of guests of honor of the Chamber was as follows:

Honorable RAGNVALD ANDERSON NESTOS, Governor of the State of North Dakota.

Honorable WILLIAM P. G. HARDING, Governor of the Federal Reserve Bank of Boston.

Right Reverend ARTHUR S. LLOYD, D.D., Suffragan Bishop of New York.

Major-General ROBERT LEE BULLARD, U. S. A.

Rear-Admiral CHARLES P. PLUNKETT, U. S. N.

Honorable RICHARD E. ENRIGHT, Police Commissioner, City of New York.

Honorable MARTIN W. LITTLETON.

Major-General GEORGE W. GOETHALS, Honorary Member of the Chamber of Commerce of the State of New York.

THOMAS A. EDISON, Esquire, Honorary Member of the Chamber of Commerce of the State of New York.

Captain ARTHUR L. WARREN, U. S. A.

Lieutenant GORDON B. SHERWOOD, U. S. N.

Mr. FREDERICK CUNLIFFE-OWEN, C.B.E.

- IRVING T. BUSH, Esquire, President of the Chamber of Commerce of the State of New York.
- EUGENIUS H. OUTERBRIDGE, Esquire, ex-President, Chamber of Commerce of the State of New York.
- ALFRED E. MARLING, Esquire, ex-President, Chamber of Commerce of the State of New York.
- DARWIN P. KINGSLEY, Esquire, ex-President, Chamber of Commerce of the State of New York.
- LOUIS S. FOULKES, Esquire, President, Chamber of Commerce, Rochester, New York.
- JOHN F. HORMAN, Esquire, President, Chamber of Commerce, Schenectady, New York.
- C. W. FERGUSON, Esquire, Vice-President, Chamber of Commerce, Troy, New York.
- R. A. TATE, Esquire, President, Chamber of Commerce, Utica, New York.
- ROBERT BOETTGER, Esquire, President, Hudson Valley Federated Chamber of Commerce.
- ROLAND B. WOODWARD, Esquire, Secretary, Chamber of Commerce, Rochester, New York.
- BENJAMIN H. BONNAR, Esquire, Secretary, Chamber of Commerce, Schenectady, New York.
- JOHN G. DUFFY, Esquire, Secretary, Chamber of Commerce, Utica, New York.
- JULIUS HENRY COHEN, Esquire.
- W. P. BARCLAY, Esquire.
- PHILIP COAN, Esquire.
- B. C. FORBES, Esquire.
- ARTHUR M. HOWE, Esquire.
- ADOLPH S. OCHS, Esquire.
- CHARLES McD. PUCKETTE, Esquire.
- OGDEN MILLS REID, Esquire.
- VICTOR F. RIDDER, Esquire.
- HENRY L. STODDARD, Esquire.
- RUSSELL R. WHITMAN, Esquire.

Committee of Arrangements

The Committee of Arrangements, which had the Banquet in charge, was composed of DWIGHT W. MORROW, Chairman; CORNELIUS N. BLISS, JR., MICHAEL FRIEDSAM, ELBERT H. GARY, ADOLPH S. OCHS, SAMUEL REA and GUY E. TRIPP.

ORDER OF BANQUET PROGRAM

Call to Order by
President IRVING T. BUSH, Presiding

Invocation by the
Right Reverend ARTHUR S. LLOYD, D.D.

Service of the Banquet

Toast to
The President of the United States
The National Anthem

Speakers

IRVING T. BUSH
President of the Chamber

The Honorable RAGNVALD ANDERSON NESTOS
Governor of the State of North Dakota

The Honorable WILLIAM P. G. HARDING
Governor of the Federal Reserve Bank of Boston

The Honorable MARTIN W. LITTLETON

PROCEEDINGS OF THE BANQUET

President BUSH, at the appointed hour, 7 P. M., called the assemblage to order and requested the Right Reverend ARTHUR S. LLOYD, Suffragan Bishop of New York, to ask for Divine blessing upon the dinner.

Invocation

Bishop LLOYD.—We praise Thy name, Oh Lord our God, our Father in Heaven, for Thy mercy and goodness to us. May Thy spirit teach these Thy servants how to build our work on the foundation of Thy righteousness. We ask it through Jesus Christ our Lord. Amen.

(The service of the dinner occupied the greater part of an hour and a half, after which the proceedings were resumed.)

Music

During the service of the dinner selections of music were played alternately by Mr. ERNEST K. SATTERLEE on the pipe organ and by the WOLFIE Orchestra.

Toast to the President of the United States

PRESIDENT BUSH.—Gentlemen of the Chamber, I raise my glass and ask you to rise and drink with me of this beverage, which I am sure offends no laws save those gastronomic, to the health of the President of the United States.

(All present responded and drank the toast standing while the orchestra played the National Anthem.)

Address of President Irving T. Bush

I had determined not to make a speech to you this evening, but it seems a shame to miss such an excellent opportunity; so I have decided to compromise with my conscience by addressing a few words to our distinguished guest, who, like young Loch-in-var, came out of the West to sip a cup and tread a measure with us. I am afraid he will find it somewhat difficult to sip a cup with us, unless the Governor is better supplied in certain respects than we are; but at least I am certain that we can find many who will be willing to tread a measure with such a gallant representative of one of our great Western States. In fact, I have some sensitive memories of ladies here in this great city who have been reduced to dancing with elderly and decrepit gentlemen like myself, who have evidenced a willingness to tread almost anything (laughter); and if it were not for the occupants of a certain box and the fact that I must go home later, I am convinced—as I am one of those who can dance with everybody but my wife—I might find within the limits of my own family circle someone who could tread a measure somewhat more successfully with the Governor than she does with me.

It is of course a great delight to all of us to welcome Governor NESTOS here to New York, not only because of his personal character and the gallant fight which he put up two or three years ago against those elements of radicalism which have been put down—it was a very gallant fight, and never was a gallant

like this young Lochinvar. Governor NESTOS comes from a part of this country which I have sometimes described as being inhabited by people who believe that it is not an accident that one of the great entrances to New York is called "Hell Gate." (Laughter) We have never quarreled very seriously with them over that title, for the fact that one of the portals to New York is named after the entrance to Hell gives us at least the advantage, when in irritation with those who come from other parts of the country, to extend cordial hospitality and at the same time give vent to our pent up feelings.

While there have been many occasions when there has been a difference of opinion among our friends at Washington as to the desirability of appropriating money for the improvement of New York Harbor, I remember some years ago that there was a singular unanimity of opinion over the desirability of appropriating money for the deepening and widening of Hell Gate. Every one voted in favor of it, the contract was let, and the contractors sent their men, armed with good resolutions and a few sticks of dynamite and clothed in that peculiar garb which men wear when they are afraid drink will be forced upon them, down to the bottom of Hell Gate, and literally raised hell with Hell Gate.

I am a little uncertain whether the motive behind our friends in Washington in voting so unanimously for the appropriation of this sum was because they thought New York might be saved by making the exit more free or whether it was to make the pathway to sin easier. The fact remains, however, that since that time our population has almost doubled. (Laughter)

Fortunately, I escaped all those early temptations, for when I came here from the West I spent my early boyhood in the shadow and the atmosphere of the City of Churches across the river, and in that fair village of Brooklyn, which is now a borough of Greater New York, it was possible for me to share some of the criticism which we now know exists in many parts of the country against New York, and to grow up away from the unholy influences which were said to prevail on this side of the water. Later the City of Brooklyn was absorbed in the City of New York, and I determined to cross the Brooklyn Bridge, and, like a miniature and modern St. George, attempt to slay the dragon. To my surprise, after an extended residence on this side of the river, I have not been able to find any dragon

to slay, and I have concluded that the legend of wickedness which attaches to Greater New York is one of the most profound myths with which I have ever come in contact.

It is true that some of us wear spats, when the thermometer is below freezing and the snow is above our ankles, and I have sometimes wondered if that has not been our undoing. I was talking with a gentleman from the West, not very long ago, upon the effect of the movies upon the human mind, and to illustrate his point he said, "You will notice that whenever a capitalist from New York is thrown upon the screen he is always garbed in spats and the audience hates him on sight." This, gentlemen, it seems to me is something that should be given serious consideration by the Chamber of Commerce of the State of New York. We should pass a city ordinance forbidding the wearing of spats. It is useless for us to say that we wear them because we wish to keep our feet warm. Of course, if we could adopt that very delightful piece of footgear, called galoshes, which they use in some parts of the West, the Fifth Avenue parade might be even more fascinating than it is, but the tax burden here is so great that we can only afford those furnishings for the flappers of New York, and we fathers have to garb our feet in sort of earmuffs so we may wear our summer shoes in the winter time. (Laughter)

All this is by way of saying that we in New York are keenly conscious of this prejudice which exists in many parts of the country against New York City. We are conscious of it and we regret it very profoundly. It is, it seems to us, a case of misunderstanding. Those who come from the West tell us that the people who live in their parts believe that we here in New York are entirely out of sympathy with their purposes and their aims in life, and we sit here under the shadow of the Statute of Liberty and think that we are just as patriotic American citizens as those from any other part of the country, and that we are misunderstood in the other parts of the country.

There may be a few of us here in New York who were born here. I never happen to have met any (laughter), but I suppose that there were a few rugged souls who lived down the evil of their early surroundings and have survived. But most of the people of this great city do not seem to aspire to any position of leadership and immediately take a place in the chorus, which is

another evidence of the modesty of the people who were born in Greater New York. The positions of leadership in this great city are taken by those who come from the other parts of the country and become like Mr. LITTLETON, who will speak to you later, native New Yorkers without having been born here.

Governor NESTOS should carry back to his friends in North Dakota the message that the people of this City are just exactly like the people of the rest of the country, that we have exactly the same problems. We have our children to educate, our families to support, and we are only about two jumps ahead of the tax collector most of the time. He should take back to them the message that we are mere human beings, that we are profoundly interested in everything that affects their welfare, that we are not only interested in their welfare because we are loyal Americans as they are and no whit less patriotic in any of our motives, but if perchance they must have a selfish reason for our interest in them, he may tell them that we know full well that we cannot be prosperous here except as the entire country is happy and contented and prosperous. (Applause)

It does not take an unusual mental equipment to see that the world is disturbed by the spirit of hate and jealousy which seems to prevail everywhere, and I wonder if we here in America cannot set an example to the world of good understanding by beginning with understanding one another.

We welcome Governor NESTOS tonight because he is a spokesman of one of the great states of our great country, from a section where the farming industry is predominant—and I hope the fact, Governor, that I was born on a farm will not prejudice you against New York. I hope that when he goes back to his own people he will tell them that Hell Gate has been blasted away and we are without tails or even the cloven hoof; and that he will carry to them the most cordial greeting of love and brotherly feeling from us tonight, that we may join with them in endeavoring to make this a land of real democracy where happiness, prosperity and understanding may reign.

I should like to tell you that Governor NESTOS landed here a poor boy, as so many of those who were born on the other side have landed. But, I have learned that when he landed in Philadelphia thirty years ago at the age of sixteen—having spent the first sixteen years of his life in Norway—he came to America,

not to throw his lot with the poor and struggling people of America, but as a capitalist. He had eighty-five cents. With that fortune to start with, he found his way to the West, to North Dakota, where he finished his education, and after the gallant fight which he has recently passed through in suppressing or helping to suppress the element of radicalism in that part of the country, he is here tonight as our guest, and it is a great pleasure for us to greet him as a capitalist coming back to that part of the world where he may safely invest his eighty-five cents if he still has it.

Gentlemen, Governor NESTOS. (Applause, all standing)

THE SPIRIT OF THE NORTHWEST

**Address of the Honorable Ragnvald Anderson Nestos,
Governor of North Dakota**

MR. PRESIDENT, GUESTS AND MEMBERS OF THE CHAMBER OF COMMERCE.—I am happy to have the opportunity of addressing so distinguished and representative a group of the business men of this great city and to tell you the real facts about the conditions in and the spirit of the Northwest.

I am glad also that the Toastmaster has told you that I was born back in Norway, in a foreign land, otherwise you might never have suspected it. (Laughter) It might be well to explain, however, that I have become a citizen of the United States. I am a good deal in the position of one of my Scandinavian friends out in North Dakota. He was seated with some of his associates in a grocery store, and they were talking about the various nationalities composing their neighborhood, and Hans spoke up and admitted that he was a Dutchman, and Pat said he was an Irishman. Finally Ole felt that it was up to him. "Well," he said, "I would be a Swede, but I bane neutralized." (Laughter) And so, while I was born in the Kingdom of Norway, as soon as I had been in America five years I became naturalized, and I feel that I have the spirit of America as fully as though I had been born in the City of New York. (Applause)

In the past you have not been sufficiently interested to ascertain the true facts; you seem to have been content to accept at face value almost any startling story told about its people, its climate, its politics, and its economic conditions, with the result that most of you are woefully ignorant of the real conditions in the Northwest and the opportunities it offers. The time for misrepresentation of this great section should be past. A correct and appreciative understanding of the spirit of its people is alike

the urgent need of the East and the just demand of the region from which I come.

I assume that every person present is vitally interested in the welfare of the United States. If you are, you cannot remain indifferent to the condition and economic problems of any great section of the Union and especially so when the territory under consideration produces one of the great essentials of life—the finest milling wheat in the world. If you are public-spirited citizens and constructive business men, you will study closely and sympathetically the conditions, problems, and opportunities of the great Northwest.

Many of your leaders in industry, commerce, and finance seem to have formed the opinion that the farmers of Minnesota and the Dakotas are Socialists, Bolsheviks, Communists, and Red Radicals politically, ignorant barbarians socially, and on the way to the poorhouse financially, and this opinion is reflected in much of what is being said and printed in your city about the Northwest.

I am here tonight to challenge and to refute each and all of these statements as libels upon a splendid people who constitute the backbone of American industry, the hope of the Republic, and the ultimate guaranty of a republican form of government under our constitution.

It is true that most of the self-constituted leaders of the recent political upheavals in the Northwest were and are Socialists, Bolsheviks, and Reds, but these men do not represent and voice the real sentiment of the farmers of the Northwest. Those farmers, as a class, are home owners and do not believe in the doctrines and philosophy of the Socialist party. They are not followers of Lenine and Trotsky, or admirers of the work done or the results achieved by the present Russian leadership. They are progressive Republicans and Democrats who are looking for a square deal, who believe that the object of all government should be to keep the roads of opportunity equally open to all, and who feel that only too often has the course of legislation and the result of administrative acts been such as to accentuate certain economic and geographic handicaps already existing and to throw obstacles in the path the farmer must pursue to attain prosperity and happiness.

You will better understand the farmers and the reasons for these political upheavals. I am sure, if you try to put yourselves in the place of the average farmer who toils fourteen to sixteen hours a day, tilling the soil and raising a crop which in recent years has failed to pay even the cost of production.

When the wheat farmer finds that the average price secured for his wheat the past five years is 38 cents per bushel less than the cost of production, and this year 62 cents per bushel less, and that as compared with 1913 the purchasing power of his dollar in the terms of the main products purchased is only about

70 cents, he feels the need of some immediate and effective relief. Yet, when he asks for legislation that will help to right these wrongs and to stabilize the price of his wheat, he is told that no law save the law of supply and demand is available to him, that he is but giving evidence of his unsound political and economic theories by asking legislative relief, and that the only recourse for him is to raise less wheat so as to eliminate the American wheat surplus which during the past decade has averaged about 170,000,000 bushels per year. He appreciates, of course, the fact that as long as the farmers of America are raising a surplus of wheat, this must be sold in the world market in competition with the wheat raised by the farmers of Canada, India, Russia, Australia, and the Argentine with their cheaper lands, lower wages, smaller taxes, and poorer living conditions, and that these foreign producers in effect now determine the price of his wheat. He knows that a balance between our wheat production and the American demand must be sought and secured either by a decreased production or an increased consumption, or both, if his future welfare is to be assured. Yet, he also realizes that on account of the magnitude of wheat production, the widely scattered producers, the natural individualism and independence of the farmer and the climatic uncertainties under which he labors, it is going to be exceedingly difficult to secure such effective co-operation as will make it possible for the wheat farming group to even approximately fit their production to American demands.

He feels that in view of these difficulties, the government with its power and facilities for building an efficient organization should give him aid in stabilizing the wheat market, and yet when he asks such assistance he is told that it would be an unwise, unsound, and unwarranted exercise of legislative and administrative power, and that he must not ask it. This line of thought he finds it difficult to understand. He remembers distinctly how the manufacturers, to save themselves from the disastrous results of world competition, have demanded protective tariffs for their infant industries, which do not seem to progress beyond such infancy but are asking for higher tariffs with advancing age. The farmer has been a believer in such protective tariffs and is unable to see any vital distinction or difference between that sort of legislative aid, or the subsidies asked to encourage the building of an American merchant marine, and the form of aid he is asking. Yet he discovers to his great surprise that those who were the most insistent that ship subsidies should be granted and higher tariffs imposed are the very men who now are most certain that it is wrong for the farmer to ask and receive legislative aid in stabilizing wheat prices so that he may receive at least the cost of producing his crop.

When the farmer thinks over all of these things, is it really any wonder that it seems to him after all that it is not a ques-

tion of sound economics or of right and wrong so much as a question of what lines of business it is wise and expedient to foster and protect by governmental action? He feels that if such is the case, surely the one who is furnishing the nation's food supply and who is engaged in the line of business that is admittedly the basic industry of our country, should receive such governmental aid. The great majority of these farmers ask merely that in working out the solution of their problems, the economic soundness of such solution should be judged by the same standards as the soundness of a tariff, of ship subsidies, and of other forms of legislative aid. Yet, when the tariff helps him realize a small profit on his flax, the linseed oil interests immediately demand a tariff reduction on this product without offering, or even suggesting, an equal reduction on the manufactured product or on the articles the farmers must buy. When he discovers this difference in attitude, he feels that he is being deceived and discriminated against and the resulting bitterness furnishes much of the motive power for his recent political thought and action. I place these matters before you so that you may understand and appreciate the viewpoint of the farmer and in so doing become awakened to your own responsibility and therefore feel a keener and more intelligent interest in the farmer's problems and the difficulties under which he labors.

Various forms of solution for this perplexing problem have been offered, some of them wild, visionary, and unworkable; others sound, sane, and beneficent. I am firmly of the opinion that whatever remedy is applied and whatever solution of the problem adopted, should be economically sound and of such character as not only to give the farmers the temporary relief so badly needed now, but such as would insure the sound development of our agriculture in the years to come. In view of the fact that it is but two weeks until the President delivers his message to Congress in which he unquestionably will deal with this problem, I shall not take time to outline to you the solution recommended to the government by those of the West who have given this problem the most careful consideration and which we believe to be sound and workable, but with you we shall await the President's message and hope that in it will be proposed such a solution of this problem as shall revive the hope and restore the prosperity and morale of our farmers.

One can scarcely wonder that when a farmer is laboring under all of these distressing conditions and every request for aid is refused and ridiculed, that he is ready to follow the lead of the self-styled reformers who, with specious eloquence, promise him relief measures which we know are unsound and impossible of realization, which he may suspect but for which he has voted occasionally with the thought that conditions were so bad that it might be worth his while to try even the doubtful remedies offered.

The farmers of the Northwest naturally resent the misrepresentation of their political attitude as much as you gentlemen. I am sure, resent the opinion concerning the business men of New York, held in some parts of the West where a large proportion of the people honestly believe that you are a band of crooks, highbinders, and financial pirates who operate through Wall Street to deprive the laborers and farmers of the country of that which is their just due; and that the Federal Reserve System, of which the New York Bank is the most conspicuous unit, exists for no other purpose than to furnish lucrative positions and palatial office buildings for banker-politicians at the expense of the taxpayers and to serve Wall Street and the financial interests of the country by unjust credit manipulations and unwarranted price deflations. You will concede, I am sure, that a number of such crooks and pirates have been and still are operating in the City of New York and in Wall Street. Many of them, undoubtedly, are transient promoters of wildcat schemes from every part of the country who come to New York to initiate their projects so as to give the impression that the financial interests of your city are behind them. Each fraudulent and illegitimate transaction of these when exposed is considered of great news value and therefore aired in the press of the country, while the thousands of business transactions conducted in an honest, upright and legitimate way are considered of no news value and are never heard of outside of the immediate circle involved. Yet, we know that the honest, conscientious and constructive leader in the business life of your city suffers and will continue to suffer under the ill repute in which the dishonest operators have placed Wall Street and the business deals of this great city, until you are awakened to the need of frequent financial house cleanings, the prosecution of these pirates, and the bringing to the people of the interior a knowledge of the true facts with reference to the manner in which you do business.

No state or section lives to itself alone. Each must be interested in all, and all in each, as our fortunes are so inextricably interwoven that we inevitably prosper or go down together. I am sure that our people desire to know more about the financial operations and the conduct of the business in your great city, and I am confident that your welfare and the prosperity of your city would be promoted by a wider knowledge of and a keener interest in the growth, development and proper solution of the problems of the Northwest.

The unfortunate results of your failure to know and understand the conditions, problems, and spirit of the Northwest have been made very evident in recent weeks. MAGNUS JOHNSON, the senator-elect from Minnesota, came into your midst and the press of the East devoted much space and glaring headlines to his most trivial acts, even recording that he had an inexpensive

breakfast in Washington, and that he asked a colored attendant in the Senate office building where his office was, as though he were the first senator-elect to do and ask such things; belittling and laughing at this man as an actual dirt farmer who seemed to express a startling variety of half-considered ideas about his new position and to act much like a little boy with a new toy. Though I supported his opponent for the senatorship, I deplore this attitude. It shows an unwillingness or utter inability to comprehend the causes and conditions that led to the election of Mr. JOHNSON and to appreciate that unless these conditions are corrected and the distress of the American farmer relieved, many another man like JOHNSON may join him in the senatorial circle. If you of the East would search for the causes of these unusual manifestations, at which you are laughing today, I am sure you would do more serious thinking and help solve these perplexing problems rather than to laugh at those who represent them. Personally, I hope Mr. JOHNSON will surprise you all and represent the people of the Northwest intelligently, faithfully, and well in the Senate of the United States.

In interpreting to you the conditions and spirit of the Northwest, I believe it would be wisdom to deal with the history of my own state, where these tendencies in dealing with economic problems first crystallized into political action. This was in 1915 and 1916. Marketing conditions in North Dakota had been and were bad, and the farmers were much dissatisfied with the existing grain grading system. Irresponsible agitators had advocated many impossible remedies for these unfortunate conditions. The farmers, believing that a state-owned terminal grain elevator might help to improve conditions, had finally adopted a constitutional amendment which permitted them to establish such an elevator. When in 1915 a bill to appropriate \$300,000 for this purpose was defeated in the legislature and an action to dissolve the most active farmers' organization of the state soon commenced, the grain growers felt that they had been unfairly treated and became embittered over the recent economic and political developments. While the feeling caused by this action was at fever heat, a number of astute, well-trained, and experienced Socialist agitators took advantage of the situation by sending a fleet of Fords throughout the country districts and sold the new idea in its most seductive form to each farmer in turn, which systematic procedure made it possible to organize the Non-Partisan League easily, quickly, and thoroughly, as was done during the year 1916. We find, for instance, that of the fifty men who in fairness might be considered the leaders in this movement outside of the office holders, forty-seven were formerly active as writers, organizers, speakers, or leaders in the Socialist party, and that the editors of all of the leading farm papers organized by the League and of the most of the smaller papers also were former members of the Socialist party, and the Socialist party, as such, became extinct in North Dakota.

But while this was true of the leaders and while it was the evident purpose of all, and the declared design of some, to use these newspapers, magazines, speakers, and organizers in the process of educating and training the farmers and laborers in the doctrines and philosophy of Socialism under the guise of a farmers' program and the banner of the majority party so as to gain a hearing the more readily, yet it is true that only a small fraction of the farmers "fell" for this scheme even though they joined the organization. This educational program for that reason was but a partial success. The average farmer, when given a chance to study the actual facts, will generally arrive at a sound conclusion and use good judgment in dealing with economic and political problems.

Some of these farmers who joined the organization discovered very soon the real character and purpose of the leaders and dropped out almost immediately; others were slower in discovering the truth and retained their membership for a considerable period; while not a few actually did discover the truth early but were too proud to admit that they had so erred in their estimation of the character and purposes of the leaders that they remained members and worked with the organization long after they had discovered the selfishness and crookedness within the organization. That this is true is evidenced by the rapidly diminishing majorities received by the League candidates.

In the fall of 1916, for instance, when the Non-Partisan League was first organized, the majority of Governor FRAZIER over the joint vote of his two opponents was 64,699. By the fall of 1918, this majority had dwindled to 17,884, and by the fall of 1920 it had become further reduced to 4,630. The following year the forces opposed to the Non-Partisan League decided to avail themselves of the power to recall public officials provided for in the constitution by the League itself, and at this recall election on October 28, 1921, our forces were victorious for the first time and the majorities against the Non-Partisan League have increased with each succeeding election, the majority at the last election being 29,273, conclusively proving the strong and steady trend away from the League and toward sound and sane ideals of political thought and action.

These Socialist leaders, desiring to impress their radical associates in every part of the United States and the world with the fact that they were organizing and putting over in the State of North Dakota a social and industrial revolution of the most sweeping character, made bold claims as to the radical and complete economic and governmental changes that they were putting into effect in North Dakota, far beyond what the actual facts justified.

We find that whether it was a visit to the East of TOWNLEY, the founder of the Non-Partisan League, of Senator FRAZIER,

or of WALTER THOMAS MILLS; or a visit into North Dakota of MAX EASTMAN, the editor of the radical *Liberator*, of KATE RICHARDS O'HARE, or of Congressman VICTOR BERGER, the tale that was told by these to the country pictured the occurrences in North Dakota as a complete overturning of the social and economic structure of that state, making the state of North Dakota a Socialist experiment station for the world. There is no question but that this was what these leaders desired to do and ultimately hoped to accomplish. They claimed, and with them such Socialist papers as the *New York Call*, that "no matter what the farmers of North Dakota call themselves, they are really Socialists." These false claims are largely responsible for the erroneous impression that the farmers of the Northwest are Bolsheviks and Red Radicals.

But the fact was, as shown before, that the overwhelming majority of the farmers of the state were not Socialists and Socialistic and therefore when they discovered what these leaders resented bitterly the charge that they were Socialists or Socialistic, and therefore when they discovered what these leaders were calling them, telling the country about them and seeking to do to them, the best League farmers either left the organization or voted according to their own judgment instead of blindly following the advice or dictates of the bosses. LINCOLN might well have been speaking to these League leaders when he said: "You can fool all of the people some of the time and some of the people all of the time, but you cannot fool all of the people all of the time."

Instead of experiencing a social revolution or a complete overturning of the economic order of our state, a careful investigation will disclose the fact that while the preparatory constitutional changes needed were made for sweeping pseudo-reforms, and while there has been a considerable loss through the inefficiency, waste, corruption, selfishness, and greed of the public officials and leaders of the League, and while the losses have fallen most heavily upon the shoulders of those who were induced to join the organization and to contribute money or their credit for dues, stocks, accommodation notes, and campaign funds, yet as far as the state itself is concerned all that has been done is to conduct a few experiments—costly, it is true, but as compared with the total value of the property of our state and our great interest in agriculture, of comparatively small consequence, and the financial burden of their failure largely to be forgotten in another decade.

I did not approve of, but campaigned against, the state entering upon this great variety of experiments, but when I was elected governor the investments had been made and these institutions were in existence and I therefore deemed it my duty to do everything in my power to help make them a success wherever possible and, where success was impossible, to reduce the

losses to the minimum. The state farm loan business has already made a success and the state-owned mill and elevator is being honestly and efficiently managed and given a full and fair trial. The present administration has acted on the assumption that campaign promises should be faithfully kept, that public office is a public trust and not a private, factional or party graft, and that all political manipulation of the public business must cease if you are to achieve the best results for the taxpayers of the state; that full publicity of the public business should be given and that men should be secured and appointed who give to the public business the same honest, efficient and economical administration that they would give to their own business. This policy, so at variance with the practices of the League administration and leadership, has proven very popular with the thinking people of the state, who know that only through unselfish public service is the highest interest of the state promoted.

Though North Dakota is far from the Atlantic seaboard, as distances go, I can think of no good reason or excuse for the East being so grossly ignorant about the condition and resources of our state and of the great Northwest upon which your prosperity so largely depends. Not only are the economic theories and political ideals of the great majority of our people sound and wholesome, but North Dakota is justly proud of its progress and present status in education. There is now practically no illiteracy in our state. Our common school system is among the finest in the Union, and eight state educational institutions furnish a splendid leadership endowed with those graces of mind and soul which constitute the real culture of a people. All of these schools are well supported by taxation and by a generous endowment of public lands which has not been wasted and which insures their continued progress and greatness.

From an economic and financial viewpoint, the situation is equally fortunate. While we are far from the great markets and severely handicapped by heavy freight rates, our state possesses so many wonderful resources in proportion to its population that our basis for a prosperous future is as fine as that of any state in the Union. This is definitely established by certain indisputable and unassailable facts.

The government soil maps show that North Dakota possesses a larger percentage than any other state of the soils which, on account of their richness and productivity, are classified as the very best. The area of North Dakota, with but 646,872 people, is larger than the combined areas of New York, New Jersey, Connecticut, and Massachusetts with a population of 18,774,214, and even the cheapest lands in North Dakota are as easily cultivated and as fertile as the average lands in the New England States.

We were formerly a one-crop state, but discovered more than a decade ago that a stable, economic condition and lasting pros-

perity could not be attained where we were dependent upon one product alone, even though an excellent one. During the past five years, therefore, we have made such rapid strides in diversified farming that though we still produce more of the fine spring milling wheat than any other state, the value of the dairy, beef, and poultry products this year exceeds the value of wheat and durum. We have proven conclusively that North Dakota, which has long been recognized as a producer of the best milling wheat on earth, is also producing a yearly increasing volume of a great variety of farm products of the very finest quality.

In addition to the splendid crops of wheat, rye, barley, and oats, North Dakota raises more than half of the flax-seed produced in the United States and during the past year has raised nearly 25,000,000 bushels of corn of as fine a quality as that raised in Iowa and eagerly sought for seed even by our Canadian neighbors, as North Dakota potatoes have been sought for seed by the southern states. The corn acreage has increased 67 per cent. in the past five years, with the prospect of being more than doubled in the next five years.

JAMES J. HILL, the great railroad builder, who had a wonderful knowledge of agricultural possibilities, said that "the greatest non-irrigated alfalfa country in the world was in North Dakota and that land where they could raise alfalfa as successfully as they could there was worth \$200 per acre." Yet, despite the fact that alfalfa has been raised with great success in every part of the state, thousands of farms can be bought at from \$25 to \$75 per acre, and the state presents now the finest field for farm investment of any state in the Union. Clover crops have also proven well adapted to our soil and climate, and, with the long hours of daylight and the abundant sunshine for which our state is becoming justly famous, grow very luxuriantly. The acreage of tame grasses increased more than 86 per cent. during the five-year period, 1918-1922. The full measure of daylight and sunshine with the long warm days and the cool, comfortable nights, not only produce a luxuriant growth of clover but result in large yields of high-grade sugar-beets and are making North Dakota famous as the best honey producing state in the Union. In 1922 the average production of honey per colony in the United States was 53.8 pounds, while in North Dakota it was 157 pounds, or nearly three times as much.

"But," I hear you say, "how can this be possible since we have heard so much about the cold, the snow, and the awful storms of North Dakota?" Let me assure you that these reports are as exaggerated and false as most of the reports of our political, social, and economic development. The fact is that there is not a month in the year when the cattle cannot and do not roam over the prairies and undulating hills, gathering their

food from the fields. It is not a climate encouraging ease, but it is an ideal climate for the production of a fine quality of agricultural products and of strong, virile and red-blooded men.

The western half of the state is underlaid with immense layers of splendid lignite coal, close to the surface and so great in quantity that if every coal field in the United States were to be wiped out and the Union dependent upon North Dakota alone to supply it with heat and power, we could take care of all the country's needs for more than five hundred years and have enough left to take care of the needs of North Dakota for an additional period of five hundred years.

In addition to that, we have in the same regions clays of such excellent composition that even in their unwashed state as dug from the hills a few feet beneath the surface, the constituent elements are exactly the same and mixed in almost the same proportion as the prepared clays used at the great potteries of Trenton and East Liverpool in this country, Cornwall in England, or for the Berlin porcelains. As more than half a billion dollars worth of clay products are manufactured in the United States annually, you will easily understand that when the attention of those seeking investment has been called to the opportunities of western North Dakota, where the presence of power and raw materials in the same hill insures the cheapest production of ceramics and other allied products of any place in the world, advantage will surely be taken of this wonderful opportunity and a great development in manufacturing result.

During 1918 and 1919 when most of the states because of the high price of farm products experienced a tremendous inflation of land values, political conditions in North Dakota were such that there was no inducement for men of money to invest in our lands, and no inflation resulted; and no material deflation such as has handicapped other states has therefore been necessary since. Our credit was also poor during that period and our people therefore were prevented from going as heavily into debt as they otherwise might have done and as the citizens of almost every other state did. From these standpoints, North Dakota was the gainer by its apparent misfortunes and is now on an exceptionally sound and stable footing, and will come back faster than any other agricultural state in the Union. It is true that we have had a considerable number of bank failures during the past three years, but when you realize that North Dakota had 893 banks, or one bank for every 724 persons, while New York has but one bank for every 9,306 persons—a ratio between the two of 13 to 1—and when you consider how heavy the resulting charge for buildings, equipment, and salaries in proportion to the small volume of business when serving only 724 people, it was inevitable that many of these small banks should close as soon as the wheat crops brought scant returns, and most

of them have been closed at the request of the officers of the banks. We still have several times as many banks in proportion to population as any state in this part of the country. The aggregate deposits of all the banks closed up to the present time is less than \$15,000,000, equivalent to but one of the smaller banks of your city.

The bonded indebtedness of our state is very small and most of that consists of our splendid real estate series bonds, based upon the additional security of an equivalent amount of first-class farm mortgages. The total indebtedness of the state and all its subdivisions is estimated by our tax department at less than two per cent. of the property valuation of the state, and our per capita wealth is now \$3,841. According to the 1920 census, 73.3 per cent. of our farms were operated by the owners, and 76 per cent. of the people living in our towns and cities owned their own homes. Few states of the Union can show a more fortunate condition.

To those who may be looking for a chance to secure a rented farm on most favorable terms or to own one at a suprisingly low figure, or to those of you who are looking for a safe investment in bonds and mortgages, no state offers a better chance than North Dakota and you may well place the utmost confidence in the integrity of its people, the greatness of its resources, and the unexcelled opportunities for safe and remunerative investments in its lands, mortgages, bonds, mines, and manufacturing enterprises.

Great as are its natural resources of soil, coal, and clay, the greatest asset of North Dakota is the character of the sturdy stock that settled her prairies and has become the splendid citizenship of today. The citizens of North Dakota, as a class, are a home-owning, home-loving, and God-fearing people, who believe in the church, the school, and the home: who respect constitutions, obey the laws, and who—as a hard-working, frugal and conscientious people—are the very backbone of the Republic and its greatest hope for future progress and prosperity. Federal troops were required to guard against the Indians those pioneers who were driving the spikes in the railroad ties being laid across the prairies, half a century ago, and yet upon these very plains where then roamed the buffalo and the Indians they have now developed splendid farms and builded beautiful homes. The labors performed and the hardships endured by these pioneers in building the commonwealth developed sterling qualities of mind and heart and a rugged strength that will insure a sound development of our industrial, economic, and political life in the decades to come. The spirit of the Northwest is sound and when the storms now raging have quieted, the people of the East will know that in no part of the Union are the economic theories and political ideals sounder and more con-

ducive to the highest welfare of the Republic than upon the plains of the great Northwest.

Though our United States senators and a few others who pretend to speak for us would have you believe that our farmers favor a recognition of Soviet Russia, such is decidedly not the case and you may rest assured that as long as the present attitude of the Russian government continues to be antagonistic to the home, church, and private property and disregards treaties and international obligations, our farmers will not favor such recognition. The farmers of our state believe in the Christian religion and in the church, which is the organized expression thereof, and our Russian settlers in North Dakota themselves are a religious people and resent the attitude of Lenine and Trotsky and their associates in the homeland. On this subject, therefore, our senators do not express the sentiment of our people and most North Dakotans deplore the fact that during this year, when agriculture is in distress and when there has been the greatest need of the counsel and co-operation of every citizen who understands and appreciates the problems and difficulties of the farmers, to aid in finding and applying the wisest possible solution, that instead of staying at home and helping solve these problems, Senator LADD saw fit to spend the summer and fall in helping the Russian autocracy to solve its problems.

Some time ago, the man who now as our national leader is laboring to establish and justify the faith of the people in him, wrote a book entitled: "Have Faith in Massachusetts." I know that you have faith in the United States, and I believe that when you know the true facts about our state and its people you will more fully appreciate the spirit of the great Northwest, and you will agree that I ask only that which is our just due when I now demand renewed faith in the character and ideals of our people, with a restored and continued confidence in North Dakota. (Applause)

Remarks of President Bush, Introducing Honorable William

P. G. Harding

I would remind those few gentlemen who are edging toward the door that the last train for North Dakota has already gone (laughter) and we can all start together early in the morning.

It is seldom that a man reaches the pinnacle in public office that our next speaker reached, and yet finds still greater pinnacles to climb. We all know him for the very distinguished service which he rendered this country as Governor of the Federal Reserve System at Washington. After having filled that office with great credit, it might have been supposed that when his term

expired he should have passed to that oblivion which is reserved for officeholders of great positions of trust of this country, but that was not so with Governor HARDING; there was yet a greater height; he moved to Boston, and there he seems firmly established at the head of the Federal Bank of that section, until he descends from that height to take a seat upon some celestial cloud.

I have great pleasure in introducing Governor HARDING. (Applause)

THE NEED FOR A NATIONAL CO-OPERATIVE SPIRIT

**Address of Honorable William P. G. Harding, Governor of the
Federal Reserve Bank of Boston**

MR. PRESIDENT, GUESTS AND MEMBERS OF THE CHAMBER OF COMMERCE.—We frequently hear this quotation from KIPLING: "East is East and West is West, and never the twain shall meet." This sentence should be given its true interpretation as relating to the racial peculiarities and prejudices of peoples of distinct ethnological types inhabiting countries thousands of miles apart. These words are not applicable to the geographical subdivisions of our own country, which is not sectional in creed, in language, or in morals. The accepted standards of right and wrong are uniform throughout the vast area covered by the 48 States of our American Union. Within the broad expanse of 3,500 miles from the Atlantic to the Pacific, and 2,000 miles from the Canadian border to the Gulf of Mexico, are found the homes of 115 million people, their workshops, their farms, their mines, their forests and their busy marts of commerce. Their joys and sorrows, their hopes and aspirations, their traditions and their plans for posterity are centered in this land of their birth or their adoption, which possesses all the natural resources requisite for the up-building and maintenance of a great nation. These resources are so well distributed that while no section has a monopoly of all, there is none which cannot boast of some. Differences in soil and climate, accessibility to the sea or to the great interior arteries of water transportation, the varying allotment of mineral wealth, and of the riches of the forest, have naturally brought about a great diversity throughout the country in those activities which relate to production and distribution. Some sections have been settled for more than 300 years while others have been taken from the Red-man and the buffalo within the memory of men who are not yet willing to call themselves old. It is not unnatural, therefore, that there should have been and still are in a country like ours, sectional interests which at times have seemed to overshadow the broader considerations of national welfare.

We should not seek, however, to minimize the importance of large community problems nor to overlook the fact that national policies grow out of a reconciliation of many diverse and sectional interests.

The prosperity of the nation as a whole is dependent upon that of its important constituent elements. A community may be engaged essentially in manufacturing, in mining, logging, in commerce and shipping, cattle raising, dairying, in the production of major crops or in truck farming. These various lines of human activities are interdependent and no important industry can continue long to thrive if others are depressed over extended periods of time. No community or section is self-contained. It must deal with others. What one community produces another consumes and any serious impairment of the purchasing power of the people of one section is inevitably reflected in the slowing down of the business activities of other sections.

Here tonight the American East and the American West have met. Governor NESTOS has told us of the problems and of the achievement of his people in the great Northwest. We share, I am sure, in his admiration of their indomitable spirit and sturdy manhood, and sympathize with them in the trials and difficulties under which they labor. The address of Governor NESTOS was of peculiar interest to me. Born and bred in the South, and for many years a resident of that section, I have that familiarity which is gained only by personal contact, with some of the troubles of agricultural sections which we have heard so graphically described. I know that some of the factors which regulate production on the farm are essentially different from those which govern in other fields of activity. The mine operator, the lumberman and the manufacturer can in ordinary circumstances make good a diminished output during certain periods by an acceleration of energy at other times, but the farmer must operate under natural laws and his work in its various stages must be done at the proper season. Other producers can, generally speaking, regulate their operations and adjust the volume of their output according to conditions which develop from time to time, and with an increasing demand the volume can be augmented quickly and it can be curtailed as promptly when the trend of the market points to an oversupply.

Some elements which enter into production, such as the supply of labor and the financial ability to pay labor, apply to all classes of producers, but as the farmer's activities are seasonal he is unable to gauge as accurately and from as close a viewpoint as other producers can the conditions which will affect the market for his product. Certain crops must be planted at certain seasons or not at all, and as the growing crops are cultivated and brought to maturity, advantage must be taken of changing climatic conditions, otherwise the capital and energy expended in planting is lost.

As the crops mature they must be harvested within the time limit prescribed by nature or else permitted to go to waste. When the crops are harvested farmers are confronted with serious problems which call for the exercise of faculties totally different from the energies brought into play during the periods of planting, cultivation and harvesting. In the three stages preliminary to marketing the farmer's problems are largely physical in their character and the judgment which he must use relates to physical conditions. In marketing, however, while he still has physical difficulties to overcome in the matter of storage and transportation, the successful farmer must develop the qualities of a merchant under conditions often far more perplexing than those which confront the average merchant. His own product is but a small part of the large volume of similar products grown by other farmers, all of which are ready for market at the same time.

The average farmer in this country has but a limited knowledge of market conditions; his resources are small and his necessities are usually great. Those to whom he sells are comparatively few in number; they have the advantage of larger financial resources and of greater familiarity with all conditions affecting the market, not only in this country but throughout the world. The farmer is confronted with difficulties at every stage, and yet his existence and the continuation of his activities are essential, not only for the comfort but for the life of every other class. It is therefore a matter of vital necessity that the efforts of the farmer be supported and stimulated, and that he be aided in preserving the full measure of his harvest and of securing a market for his products on terms sufficiently remunerative to warrant his staying in the business of farming.

Any plan, however, to be effective in aiding the farmer must be based upon the fundamental principles of self-help and of co-operation on the part of the farmers themselves. No legislation, however sound and wise, can of itself produce a crop, nor can it control prices in the world market. The economic law of supply and demand is inexorable, and if production exceeds consumptive requirements, prices will decline. In such circumstances the market is affected by the unsalable surplus and the cost of production is not the controlling factor in the determination of prices, it is merely a norm. To restore a proper balance either production must be curtailed or means must be found to increase consumption.

History has a way of repeating itself, and some of the schemes which have recently been proposed for the relief of the wheat farmer are very much like those which have been suggested at various times in the past in behalf of the producer of other agricultural staples. I have had no particular familiarity with the problems of wheat farmers, but I have had some experience with the cotton farmer. About thirty years ago I happened to

be over night in a small town in the hill country of Alabama, and, having nothing else to do, I went over to the Court House to hear a political speaker. There was an aspiring gentleman there who desired to represent the district in the Congress of the United States. He made a very eloquent speech and, after opening in the usual way with a vigorous denunciation of Wall Street, he said something about like this: "Now," he said, "fellow citizens, after all the real trouble is with us here that we raise too darn much cotton. Now, if you send me to Congress I am going to put the price of cotton up from five cents a pound, where it is now, to ten cents a pound. I am going to relieve this distress. I say we raise too darn much cotton, but we can't help ourselves here, we don't know how to raise anything else, we can't credit advances to make any other kind of a crop, but I have got a remedy." Two or three men in the audience asked simultaneously, "What is your remedy? What are you going to do?" "Well," he said, "if you send me to Congress, I am going to pass a law to make them quit raising cotton in Texas." (Laughter) Anyhow he recognized the fact that there is something in an oversupply.

Governor NESTOS has told us that some of the plans which have been proposed for the relief of the wheat farmer are wild, visionary and unworkable; and he has expressed the opinion that whatever remedy may be applied, it should be economically sound and of such character as not only to give the farmer the temporary relief, so badly needed now, but to insure as well the sound development of our agriculture in the years to come.

Whenever any large body of farmers is in distress there seems to be an impulse to appeal to the Government for relief, and if no warrant of law can be found for the particular form of relief desired, Congress is urged to legislate. In the early 70s there were many who believed that large issues of greenbacks would prove a panacea for the woes of the farmer, and in the 90s a still larger number were persuaded that the remedy for economic and financial ills lay in the free and unlimited coinage of silver at the ratio of 16 to 1. In more recent years there have been others who have satisfied themselves that the remedy lay in unlimited advances through the Federal Reserve Banks on commodity loans at prices related to production costs rather than to market values.

Many of the nostrums which have been proposed from time to time would, if adopted, have been highly injurious to the country at large, and instead of benefiting the patient whose relief was sought would have rendered his condition infinitely worse.

In farming, as in any other industry, close attention, of course, should be paid to costs of production with the view of reducing them to the lowest possible figure, and few will question that a policy of gradual and orderly methods of marketing

agricultural staples is highly desirable not only from the standpoint of the producer but from that of the distributor and consumer as well. The farmer, as a rule, has only one turnover a year, while those engaged in other enterprises have the advantage of more frequent turnovers. Great staple crops, the production of which requires a period of several months, must meet the requirements of consumption until the next season's crops are produced. In order to prevent the possibility of shortage, it is desirable that there be a reasonable surplus carried over from one crop pending the marketing of the next. It is important, however, that the surplus held over be not too large or unwieldy, in order not to interfere with the succeeding crop, for the marketing of a crop and a half when the ordinary requirements call for only one crop would involve a loss unless an unforeseen abnormal demand should develop. On the other hand, the dumping upon the market within a short period of time of the greater part of a crop, the consumption of which extends throughout the year, means not only loss to producers, but involves also a great strain upon our transportation facilities and upon the banks in providing the funds necessary for large purchases in advance of actual requirements for consumption. Dumping of farm products promotes speculation and often results in a higher average of prices to the ultimate consumer.

Co-operative marketing has proved successful in many lines; notably in raisins, citrous fruits and tobacco, and the failure of some co-operative marketing associations has emphasized the importance of observing correct principles and of adopting the sound policies which have been carried out by those which have proved successful.

All plans which involve Government purchases of surplus crops, price fixing and valorization are impracticable and fundamentally unsound; and emergency measures taken by the Government during the period when it was engaged in the greatest war of modern times cannot now be taken as a precedent.

Mr. EUGENE MEYER, Jr., Managing Director of the War Finance Corporation, and Mr. FRANK W. MONDELL, a Director, have recently returned to Washington from an extended Western trip which was taken for the purpose of making a first-hand study of the wheat situation. In their report to the President they said that many of the conditions complained of were local and peculiar to particular areas, while other difficulties and problems were general and characteristic of the wheat situation generally throughout the sections covered by their trip. They said that in practically all the territory visited there was complaint regarding the large increases in local taxes during the past two years as well as regarding the scarcity and high cost of labor for agricultural purposes, and the inefficiency of the available farm labor. In many places increased freight rates, resulting in a dislocation of available markets, were presented as a factor of vital

importance. In other words, the economic status of the wheat producer was shown to be fundamentally prejudiced, on the one hand, by high cost of production due to increased taxes, increased cost of labor and materials used in production, and high prices of commodities and goods which the farmer buys. On the other hand, the prices realized by the farmer for his wheat, although higher than the pre-war figures, also higher than they were a year ago, are not sufficient to maintain the producer on a satisfactory basis.

In describing conditions in Governor NESTOS' own State, Messrs. MEYER and MONDELL say—and it is very evident from what I am going to read to you that Governor NESTOS was not at home when these gentlemen were in North Dakota (laughter), because here is what they say: "In North Dakota conditions have been made still more difficult this year by low yields due to continuous wheat cropping, unfavorable weather conditions and exceptionally extensive wheat rust. The facts presented indicate that in North Dakota and elsewhere many of the problems and difficulties are not so much the result of this year's operations, as they are the cumulative result of conditions over a series of years during which climatic difficulties, increasing tax burdens, high cost of production and relatively inadequate prices have all played their part. (Laughter) Over-stimulation of acreage during the period of high prices, over-extension of credit, speculation in land and extravagance in public and private expenditures, followed by a relatively sudden collapse of prices and markets, created a fundamental situation in 1920 from which it has been impossible entirely to emerge."

These statements, and these are not my words, they are the words of Messrs. MEYER and MONDELL, are highly significant and tend to show that the agricultural West has suffered not from lack of credit but from too much credit.

Specific reference is also made to the fact that increased taxes have been a factor in the high cost of production, and it might well be observed also that increased taxes in other sections have been instrumental in curtailing the demand for farm products.

The Government, because of its enormous expenditures during the war, has been compelled to increase greatly its revenue from internal taxes, and has for several years levied a heavy income tax. If I remember correctly somewhat more than 6 million income tax returns were filed during the last fiscal year. Returns which have been made public show an almost constant reduction year by year of the amount of taxes paid by those having the largest incomes. Although it was the intent of those who framed our revenue laws to exempt as far as possible those of moderate means from the payment of income taxes, and to have the burden increased proportionately upon larger incomes, it should be understood that the exemption has been largely fictitious. The masses of the people, the laboring man and the

farmer, while possibly not paying anything directly to the Government, pay more than a direct tax would amount to in the increased cost of living; higher rentals, higher prices for food and raiment, for fuel, for agricultural implements, in short, for everything in which human labor is a factor in producing.

Real estate never escapes taxation, and real estate taxes all over the country are far higher than they were some years ago. Some months ago I was on the trail of Mr. BRYAN of Nebraska, down in Florida. I asked him if it was not a fact that taxes in his own State of Nebraska, a typical western State, had not been actually increased in recent years. He said he did not have the figures. I said, "Mr. BRYAN, isn't it a fact? Don't you own some real estate in Lincoln?" and he said, "Yes"; and I said, "Isn't it a fact that your taxes on your real estate are about six times as great as they were in 1912?" Well, he admitted they were considerably higher.

The people of the very sections whose representatives have been most insistent upon principles of taxation which appear supercially to exempt the larger majority, are really the chief sufferers.

There has been an ever-increasing demand in all sections from those having very large incomes for tax-exempt securities. States, counties, cities and towns have issued bonds for various purposes, in many cases being tempted to do so by the ease with which these securities could be sold. The result has been higher local taxes on real estate. The farmer and the cattleman not only pay higher real estate taxes, higher prices for their equipment and things they consume, and higher wages, but they suffer also from the effect of a reduced demand for their products, which is reflected in the prices they receive. The merchant and the manufacturer, North, East, South and West, know how valuable a customer the farmer is, and they know how their own business is affected when his buying power is reduced; but has the farmer given enough consideration to the fact that the people whose spending power comes from the manufacturing, mining and transportation industries of America are his best customers and that the market value of his products is affected by their expenditures or by their enforced economies?

The present Secretary of the Treasury, who as a public official, business man, financier and builder of industry, is one of the ablest men America has ever produced (prolonged applause), pointed out more than two years ago the bad effect of excessively high surtaxes. He stated his reasons for believing that merely from a standpoint of revenue to the Government, it would be well to reduce the maximum on larger incomes from 65 per cent. to 25 per cent. He showed how a surtax so high as to be substantially confiscatory would inevitably increase investments in tax-exempt securities, thus diverting capital needed in the extension of industries, which would create larger payrolls

and add to the purchasing power of the people, into bonds to be hidden away in safe deposit boxes to be paid, principal and interest, by increased taxes on the homes and farms of America.

The revenue act of 1921 reduced the maximum surtax from 65 per cent. to 50 per cent. and made small reductions along the line. These reductions, however, have not been sufficient to stimulate industry nor to check the flow of capital into tax-exempt securities and the question of taxation still remains one which is pressing for proper solution.

A few days ago Secretary MELLON made public his new plan for tax reduction, which if adopted would lighten the burden now imposed upon seven million taxpayers, and would have the even more important effect of benefiting that larger number of citizens who pay no income taxes. The equitable and more scientific tax adjustment proposed by Mr. MELLON is designed to give new impetus to professional and industrial activities, to promote thrift, to discourage extravagance in governmental expenditures, and to remove the obstacles now in the way of economical employment of capital in productive enterprises. The plan proposed is intended to help all classes of people, including the particular groups which have been led to believe that their interest lies in heavier taxation.

Adverting again to the report of Messrs. MEYER and MONDELL, they say that many plans for dealing with the wheat situation were suggested at their various conferences, the more important of which are as follows:

- (1) An increase in the tariff on wheat.
- (2) Government price fixing, accompanied by the necessary control of the wheat trade.
- (3) Government purchase of the so-called surplus with the view of exporting it to foreign markets.
- (4) Distribution of \$58,000,000, which it was stated was a profit made by the Grain Corporation during its existence.
- (5) Modification of the present immigration laws so as to provide for the selective admission of a large supply of labor.
- (6) Organization and development of co-operative wheat marketing associations.

In commenting upon these proposals, Mr. MEYER does not express any opinion as to the advisability of increasing the existing tariff on wheat, but merely calls attention to the fact that the question has been referred to the Tariff Commission, which is now giving it consideration. Speaking as one who makes no pretension of being an expert on tariff matters, it is difficult for me to understand how a tariff on wheat can be of any material

benefit to the American producer. It is true that the tariff tends to prohibit Canadian wheat from crossing the American border, but as the Canadian as well as the American surplus finds its outlet abroad, it would seem that any foreign wheat which is prevented from coming into this country by the tariff increases the volume with which Americans producers must compete in foreign markets.

With respect to price fixing by the Government, Mr. MEYER says that while this policy was urged at some of the conferences, he found very much more opposition to it in the agricultural districts through which he traveled than there was support for it, and that representatives of agricultural interests were not blind to the difficulties of such a proposition, from the viewpoint of both national policies and practical administration. It is evident, however, from the report of Messrs. MEYER and MONDELL that there are two plans, both essentially unsound, which have considerable support in the wheat districts. One of these is that as the Government made a profit, said to be \$58,000,000, in connection with the Grain Corporation during and immediately following the war, this profit should be paid to the wheat growers or otherwise expended for their benefit. Mr. MEYER expresses no opinion as to the merits of this plan, but states that he has no accurate information on the subject and merely reports it as a view which seems to be widely prevalent in the wheat-growing sections. If the United States Grain Corporation made a profit of \$58,000,000 some years ago and the amount has been turned into the Treasury, it is rather hard to understand why these specific funds should be used for the benefit of the wheat growers or for any other special class, or why if this amount is given to the wheat growers it would be different in any way from a subsidy to be paid out of moneys in the Treasury not otherwise appropriated.

That part of the report of Messrs. MEYER and MONDELL which touches upon the proposed Government purchase of surplus wheat is of especial interest. They say, "There seemed to be considerable sentiment in favor of having the Government buy the so-called surplus wheat with the view of exporting it to foreign markets. The expectation of those who advocate this plan appears to be that by this means the general level of wheat prices in the United States could be raised. The surplus bought by the Government would, according to this plan, be sold abroad at whatever price could be obtained, and the loss either borne by the Government or assessed, by some form of special taxation, against the wheat producers of the country as a whole.

"We found, on the other hand, a clear understanding in certain quarters of the practical difficulty of such a plan. There is, in the first place, some confusion as to what constitutes the surplus which the Government is supposed to buy. Certain sections of the country produce varieties of wheat especially suited for

export, and not needed, in the quantities produced, for domestic consumption. In other parts of the country wheats of special quality are produced for which the domestic demand even now appears to exceed the present available domestic supply, so that some Canadian wheat of the desired quality is actually being imported despite the tariff of 30 cents per bushel. A distinction must be drawn, therefore, between surplus wheat and export wheat. The result of the plan might easily be that wheat would be grown in the United States for export, bought by the Government, and sold abroad at a loss, while other varieties of wheat needed for domestic use were at the same time being imported.

"The proponents of the plan state it in very simple terms, but it is, of course, by no means as simple as it appears. The proposal is that the United States Government should be the active agency in a policy of dumping American wheat abroad, below cost, to the detriment of foreign producers. If the situation were reversed, if the Government of a neighboring country were to inaugurate, through a Governmental agency, a policy of dumping wheat below cost in the United States, it is not likely that we would long remain quiescent.

"The largest part of the export wheat of the world is produced by Canada and Australia, both British colonies. The largest wheat importing nation of the world is Great Britain. It is difficult to believe that the British colonies and Great Britain would stand by and permit the demoralization of foreign markets, such as dumping by the United States of large quantities of wheat necessarily would involve, without taking action to meet the situation, and that action undoubtedly would be designed at least to offset any beneficial results that might be expected to accrue from the plan under consideration."

The report contains more than one reference to the universal complaint regarding large increases in local taxes and in the discussion of tax-exempt securities goes on to say: "It is well understood, of course, that the present higher tax brackets on income, commonly known as surtaxes, greatly encourage investors to buy State, county and municipal tax-exempt securities; and the market for such securities, enlarged and stimulated as it has been, is reflected in a corresponding increased ability on the part of public political corporations to float large issues. This has led to extravagant expenditures by public agencies in many of the agricultural districts. While the funds have been raised at somewhat lower rates of interest than otherwise would have been possible, the borrowings of State, county and municipal agencies have been stimulated to such an extent that the aggregate interest, and therefore, the aggregate taxes, have increased to a point where they represent a serious burden. No new suggestions for remedying these conditions came to our notice, and it appears that there can be but two methods of combating the growing evil of extravagant public expenditure in rural districts:

“(1) The abolition of the tax-exemption privilege by Constitutional amendment, which would curtail the over-stimulated market for State, county and municipal issues, and which, as you know, would require some years to put through, if at all; or

“(2) The reduction of the income surtaxes to a figure which the actuaries of the Treasury Department may determine to be the figure that would induce capital to turn from tax-exempt securities into taxable investments.”

Let me say here that the disposition to increase public indebtedness is not confined to the West or to any other section. It seems to be general throughout the country. Three proposals involving the expenditure of large sums of public money were voted upon in New York State in the election a few days ago. All of them were approved by large majorities. Without discussing the merits of these proposals, a leading morning paper had this to say editorially:

“It is remarkable how easily citizens can be got to appropriate in this way a hundred millions or so by a popular vote. They complain bitterly of the extravagance of Congress and State Legislatures and city governments, but when the occasion is offered them they outdo everybody else in lavish or unthinking use of funds that must be raised by taxation. What is the attitude of mind that lies behind this? Why is it that a referendum authorizing a large drain on the Treasury almost always carries?

“Wrong-headed notions about taxes notably have a good deal to do with it. The large revenues derived from income taxes and from taxes on corporations have given great masses of people the idea that public expenditures can be met by levies on only a small class. They think that they will not be personally affected by voting away great amounts of public money, and are readily got to favor that method for the unexpressed reason that somebody else, not they themselves, will have to pay. Such persons are in need of elementary lessons in the incidence and shifting of taxation. They ought to be shown in a clear and convincing way that swollen taxes inevitably express themselves in the form of swollen prices. A city or a State cannot go on spending unconscionable sums without raising the cost of living to all citizens. They may imagine that they do not have to pay, because no tax collector comes to them direct. But they are subject, nevertheless, to a heavy and inescapable taxation in the form of higher rents and a greater outlay for food and clothing and the other necessities of life.

“It is a fallacy often exposed to argue that the expense of government can be met solely out of the taxes paid by the rich. The latter cannot, indeed, avoid paying their pro-

portionate share of taxation, nor do they desire to do so. But when taxes are laid that are intended to bear upon them exclusively, or so severely as to amount to a capital levy, they always find a way of passing on a part of the burden to the average citizen. He may delude himself into believing that he escapes the tax made necessary by public extravagance, but, in fact, he does not. The working of economic law in this business is more powerful and inexorable than can be the effect of a mere fiscal enactment. And it should somehow be beaten into the consciousness of voters that every time they favor a large public expense they are really voting to make higher their own cost of living."

Mr. MEYER, in his report, states that among the agricultural interests throughout the territory visited he found the sentiment for a modification, along selective lines, of the immigration laws so as to permit the admission of a large supply of more efficient labor; and he has this to say about co-operative marketing: "The subject of co-operative marketing was discussed at every conference, and strong approval of the movement was expressed by those present. Even in places where the sentiment for Government price-fixing, or for Government buying of the so-called surplus, was evident, it was generally conceded that the orderly marketing of wheat through soundly organized and properly managed co-operative associations is an essential and fundamental factor in the ultimate solution of the difficulties of the wheat producer."

He expresses the opinion that: "Co-operative marketing associations, organized along sound lines and with competent management and business guidance, offer, at the present time more promise of helpful results than any other plan or program that has been suggested. They can do what the speculator cannot, with safety, be relied upon to do. They can by orderly marketing, regulate the flow of wheat so that supply is adjusted from time to time to the consumptive demand. The cotton grower, the tobacco grower, the rice grower, and the California fruit grower, through co-operative marketing associations soundly organized and properly managed have been able to achieve favorable results, and there is no reason why the wheat grower, if properly organized, should not be able to obtain similar results by applying the principle of co-operative marketing, on a sufficiently large scale, to the sale of his product."

Mr. MEYER stresses, however, the importance of conducting the co-operative movement without regard to political considerations. "If it keeps itself free from politics, and is conducted by men who are willing to work for the cause rather than for their own personal advancement, it has a magnificent chance of success and a wonderful opportunity for useful service to a great group of farmers all over the country."

He says, however, that a well-defined opposition to the co-operative marketing movement was evinced by the grain trade in Minneapolis. Their opposition is based on the broad statement (1) that the present method of marketing wheat is the most economical that can be devised, and that it is a demonstrated success; (2) that the statistical records of wheat prices in terminal markets over a long series of years indicate that gradual, orderly marketing of wheat would result in no benefit to the producer; (3) that while the principles of co-operative marketing may be successfully applied to fruits in California, to cotton and tobacco in the South, and to other products in other sections, it cannot be applied in a practical way to wheat; (4) that the cost of handling by co-operative marketing association is excessive in comparison with the cost of handling by the regular marketing machinery.

As a result of their trip, Messrs. MEYER and MONDELL say that they feel that the solution of the wheat problem lies along two lines:

“(1) The adjustment of production to American needs if the world market is oversupplied from other producing countries at lower prices than are satisfactory to the American producer under prevailing condition;

“(2) The development of an improved marketing system such as we believe can be brought about by the organization of the producers of the country for the purpose of marketing their wheat under the co-operative marketing plan, making it unnecessary to rely so completely upon the uncertain functioning of the speculative public contract market.”

In the case of wheat or any other major crop it seems to me that adjustment of supply to demand is of first importance. This involves diversification of crops, which is a difficult but not insoluble problem. The friends of the farmers should aid them in working it out.

Governor NESTOR in his address has told us that the farmers of the northwest naturally resent misrepresentations of their political attitude. We all realize, of course, that there is no absolute unanimity on political questions anywhere in the country, not even in Vermont or Mississippi, but the prevailing political sentiment of a State is usually gauged by the votes and utterances of its representatives in our national councils, and its effective utterance, in any event, effective expression. Some of these representatives are loud and enthusiastic critics of the Federal Reserve System.

I am going to say in conclusion that no sections of the country have received more distinct benefits from the operations of

the Federal Reserve System than have our great agricultural districts, but due to persistent efforts on the part of some to discredit the System and those responsible for its administration, there is, unfortunately, as Governor NESTOS has told us, a sentiment of resentment and antagonism toward it, which is most pronounced in the sections which have been its greatest beneficiaries. This sentiment, however, is subsiding as is bound to be the case when people will take the pains to learn the real facts.

During the summer and autumn of 1921, there was an exhaustive inquiry into the policies and operations of the Federal Reserve System by a Joint Committee of Congress, of which the Hon. SYDNEY ANDERSON of Minnesota was Chairman. In February, 1922, this Committee submitted an elaborate report to Congress, and critics of the Federal Reserve System never use this report, which so thoroughly refutes their allegations. Official figures which cannot be disputed show that while great world-wide economic reactions took place during the year 1920, there was in this country during that year an increase and not a reduction in Federal Reserve bank credits, and an increase and not a reduction in the volume of Federal Reserve notes. These increases amounted to several hundred millions of dollars. The figures show also that the greater part of the rediscounts of several of the Federal Reserve banks were made directly in support of agricultural and livestock interests, and estimates made on September 3, 1920, of loans by several of the Reserve Banks to these interests were as follows:

Chicago	48.3%
Minneapolis	65.6%
Kansas City	59.8%
Dallas	50.0%
San Francisco	58.7%

of their total loans.

The total advances made by the Federal Reserve Bank of Chicago to its member banks in the great agricultural State of Iowa amounted at one time to more than \$98,000,000, more than six times as much as all the national banks in the entire country were rediscounting or borrowing in September, 1907, on the eve of the great panic of that year. The Federal Reserve Bank of New York in 1920 was the mainstay of the bill market, and it is well known how important a factor the bill of exchange is in the movement of crops and commodities.

The Federal Reserve Banks of Boston, Philadelphia and Cleveland were lending for several weeks in 1920 more than two hundred and fifty million dollars to Reserve Banks in agricultural sections.

The law does not permit any Federal Reserve Bank to make

advances to any but member banks and other reserve banks, nor to any member banks except those in its own district; and yet the Federal Reserve Bank of New York, which was at one time supporting its own member banks in their advances to banks all over the country in the face of a decline in the deposits of New York City banks of more than \$1,400,000,000, has been criticized for not lending more money to farmers, and the assertion has been gravely made that its ability to lend to farmers was impaired because of the cost of the building it was erecting to house its 3,000 employees. At the time referred to, however, the bank had not made a single contract for its building, and even the plans of the architects had not been completed.

Those were trying days in 1920 and 1921, but the trials were peculiar to no one industry, nor to any one section. They were suffered by all, and but for the effective aid which was rendered by the Federal Reserve System, many concerns and individuals abundantly solvent today would have been hopelessly insolvent. Indeed there is good reason to believe that but for the Federal Reserve Banks this country would have experienced the most disastrous financial cataclysm in its history. Many banks which had loaned not wisely but too much were sustained by the heavy advances obtained from the Federal Reserve Banks; and the mortality of banks not members of the Federal Reserve System was far greater than that of the member banks.

Federal Reserve Banks are obliged to comply with many legal restrictions in the extension of credits, and they are not permitted to extend financial aid or credit to farmers or to anyone else unless credit has been given first by a member bank which will rediscount with the Federal Reserve Bank. Congress, within the last year or two, has authorized the creation of other instrumentalities which have been established for the express purpose of extending agricultural and livestock credits which legally cannot be granted by the Federal Reserve Banks. This agricultural credit legislation is in itself an effective answer to the contention of critics that the Federal Reserve System wilfully discriminated against farmers and cattlemen.

After all, our troubles are trivial as compared with those of the nations of the old world. In fact it is due to their troubles that many of our own exist. There is no occasion for sectional economic standards or for sectional antagonisms in this country. There should be, on the other hand, a national spirit of co-operation for the common good of all. There should be, and is in my opinion, a growing disposition everywhere to build up rather than to destroy, and in the constructive work ahead of us, we can accomplish most through a thorough and sympathetic understanding of the various local and sectional problems whose proper solution has so important a bearing upon our national welfare. (Applause)

Mr. Ernest K. Satterlee Organist at Banquet

THE PRESIDENT.—Before introducing the next speaker I should like to say that we have been privileged to hear the delightful numbers on the organ which have been played this evening because one of our fellow members, Mr. ERNEST K. SATTERLEE, has officiated at the organ for us, and at the end of the evening he will play Auld Lang Syne as we go out.

Mr. Gwynne Misses First Banquet in Thirty Years

THE PRESIDENT.—I am sure that you will all be very sorry to hear that our very genial and capable Secretary and Vice-President, who will have been with this Chamber thirty years next April, misses tonight the first Banquet during that period of thirty years because he is ill at home.

**Remarks of President Bush, Introducing Honorable
Martin W. Littleton**

I referred a few moments ago to Mr. LITTLETON as now being a native New Yorker. Of course we adopt the philosophy here that a man must be loyal to his native city whether he was born there or not. (Laughter) Judged by that standard we can accept Mr. LITTLETON as a native New Yorker. He first saw the light of day in the South, I believe, but, unlike Governor HARDING, he has been unable to achieve Boston, so he has lingered here quite happy and loyal in our midst.

The last time I had the privilege of having a speaking part on the same platform with Mr. LITTLETON was quite a number of years ago during the fight for the change in our banking and currency laws which resulted in the establishment of the Federal Reserve System of which Governor HARDING has been the head. I was invited to speak before the largest civic organization in Baltimore to give them a few pearls of wisdom as to the necessity for a change in our law. We were received with that true Southern hospitality and were given a dinner which included terrapin and every Southern delicacy. At between eleven and twelve my limit and midnight had been almost reached, but Mr. LITTLETON was going strong, and then the speaking began. (Laughter)

There were fourteen speakers. (Laughter) Mr. LITTLETON was the twelfth and I was the thirteenth. I never could believe

that it was a coincidence that I was the thirteenth speaker and had to follow Mr. LITTLETON. But when his time to speak came he arose and, in that inimitable way which only he can command, and that quaint charm with which he always speaks, he told his classic story of the college professor from Harvard and the Southern hog farmer. There may be a few here who have not heard that story, so I will sketch it very briefly. This college professor ventured into the South, where he discovered a Southern farmer feeding his hogs corn on the ear. The professor said, "Why don't you grind the corn?" The farmer said, "What for?" and the professor said, "To save time." The farmer turned away in disgust and said, "What the hell does a hog know about time?" (Laughter) The story ended with that query. After about three hours of speeches, Mr. LITTLETON sat down. I went to bed that night and wondered what a hog did know about time, and ever since then I have been turning it over and over in my mind and have never been able to get the answer. (Laughter) When Mr. LITTLETON accepted our invitation to speak tonight I said, "I will at last have a chance to know what a hog does know about time," and so I am going to say to Mr. LITTLETON, "The evening is yours, Mr. LITTLETON." (Laughter and applause)

I am just going to add this one thought, too, so that we ourselves may get our just deserts, and say that no matter how much of a hog you do make of yourself, Mr. LITTLETON, we will be the more delighted, because the kind of speech that Mr. LITTLETON always delivers never requires any grinding or pepsin or any artificial aid for us to digest it very, very easily. MARTIN W. LITTLETON. (Prolonged applause)

ADDRESS OF HONORABLE MARTIN W. LITTLETON

MR. PRESIDENT, GENTLEMEN OF THE CHAMBER, AND LADIES AND GENTLEMEN.—A belated vacation kept me out of the city until a very few days ago, and I did not know anything about this attack that had been made on North Dakota, or I would have tried to prevent it. I don't know who it was that stepped on North Dakota. (Laughter) I venture the prediction that he won't do it again.

I feel a kinship toward any man who comes from the West, though mine was in a softer and more southern sky. I never have been in North Dakota, and I am ashamed to confess it. I remember reading about North Dakota. (Laughter) I read

about an editor in North Dakota who was running a small paper, a hand press which was generally out of condition; and he read in one of the exchanges something about those wonderful restaurants that HARVEY used to have on the Santa Fe Railroad. Some of you who have had occasion to travel in the West remember them. The editor happened to read this facetious line: "We see that one of HARVEY's restaurant cooks kneads dough with her gloves on." He quoted this, and put "Exchange" under it, and he said, "This may seem somewhat peculiar, but there are others." He said, "The editor of this paper needs dough with his shoes on." (Laughter)

He followed by saying, "He needs dough with his pants on, and if some of the delinquent subscribers to this old rag of freedom don't pay up pretty soon he will need dough without a damn thing on." (Laughter)

But I dare say since the discovery of the boundless empire of the lignite coal—if that is the proper name for it—the supply of which is sufficient for some five hundred or a thousand years in the future, and since we have discovered that all of these reports, which I read religiously, from Bismark regarding the thermometer are entirely unfounded, and particularly as my heart has been softened by the Governor's statement that only a few days ago he was playing golf near this great city in North Dakota, I feel that it was a distinct revelation to have him come and explain, to these effete, wornout, dejected and sclerotic New Yorkers, where there is a healthy, wholesome and soft climate.

I know there has been some prejudice between the West and the East, as aforetime there was some betwixt the North and the South. Happily it has not reached that point that the earlier struggle reached. I remember an Attorney General from Nebraska came to make a speech on one of these occasion in New York and he got up at a much later hour than I have. There had been as many speakers as the Chairman says were present at the Baltimore occasion, and he had been twitted a good deal about the fact that he came from the wind-blown reaches of Nebraska. Everybody had referred to it, and he was a man of conspicuous bearing and dress. He got up and said, "You know, I have been wondering why it is you build these buildings so high in New York, those dizzy heights, those alarming elevators, but, after all," he said, "I guess it is a very good idea. Maybe some of you will go up to the top of these buildings and look out, and see that there is something beyond Jersey City." (Laughter) That was the resentment he felt about it. But little did I dream that if there was to be a debate between New York and its prejudices and the Northwest with its prejudices, the cudgels for New York would be taken up by a Virginian, now recently adopted by Boston.

I was particularly happy tonight as a Democrat—sometimes—

to hear the suggested schism which might rise in the Republican party. Says the Governor of North Dakota to the gentleman of the East who fattened upon the bounty of protection, "How dare you as Republicans thrive and grow fat upon protection as a Republican policy and deny to us in the great Northwest, who furnish you with electoral votes, the right to have our prices fixed when wheat goes down?" How well the Democrats can rejoice over this, because they have maintained—at least some of them—that the Government has no business doing either, not with any great amount of success, but with a patience altogether beyond the wisdom of political leadership.

I called you, Governor HARDING, a Virginian; I put you in Virginia because TOM HEFLIN comes from Alabama and I did not think you wanted me to speak of him. (Laughter and applause) I have made the mistake in referring to the gentleman as a Virginian. I did not want to say an Alabamian. I really did think he was from Virginia, but I would not have said it even if I had known better, because as a matter of fact we know that a certain United States Senator, with whom I happened to serve in the House, has thrived mightily upon the fact that the Governor was such a distinguished and able and resolute Governor of the Reserve Bank. But as I think of it now, as he comes from Alabama, it only makes the story all the better, though the story arose in Virginia.

You know prejudice is a peculiar thing, and without it there would be no art in the world, no architecture, no beauty. This ideal of wishing to relegate this country to a dull uniformity, to strike out those States whose emblems are here all about these boxes, to take all that local color and sometimes the local prejudice, and reduce it to a dull uniformity of common prosperity, with no struggle and no disadvantages, would make the country even worse than ZANGWILL thinks it is. (Laughter).

You know ZANGWILL said the other day that we were a half educated people. I could not make out whether he meant that all of us were half educated or half of us were educated and the other half were not. But I happen to remember a very brilliant remark of HORACE PORTER, who said there was a class of people in the world who were educated beyond their intellects. I wondered if Mr. ZANGWILL might not have fallen into that classification himself when he made the attack.

I would not rob the country of its prejudices, gentlemen, ardently as the Governor of North Dakota has pleaded for it, and softly as Governor HARDING has urged it.

In the State to which I refer there was an old Democrat—and there are Democrats that never change, just as there are men from Vermont (laughter)—and this old Democrat went hunting and fishing, and in the deep of the forest he was overtaken by the greatest flood of the year. He took refuge in a hollow

log, and there in the soft bosom of that old log he fell asleep; and it rained and poured, and he slept in the silence of the forest. When he awoke he discovered that the log had swollen, and when he started to move in either direction he found himself imprisoned. He saw that he must make his peace with his Maker, so he asked for forgiveness for the frivolities of his youth, the more serious things of his young manhood, and the maturer iniquities of his life; and then his mind recalled the last election and he suddenly remembered that he had voted the Republican ticket and he felt so damned small that he slipped right out of the log. (Laughter)

Who would rob the world of these prejudices? These gentlemen have spoken with great authority upon questions affecting the marketing of wheat. Of course, I am not tremendously interested in the marketing of wheat. (Laughter) I cannot be; I have too many other things that require my attention; but after we search for the bottom of all these problems, whether it be the greenback question, or the gold and silver question, or the now deflated condition of the farmer, or the protection question, or the tariff question, and we call them "troubles," economical and sociological, and we get all aflame with passion about them, we must remember, gentlemen, that it is but the price we pay for democracy and a democratic form of government. All these things with which we contend and about which we dispute—inefficiency, over-taxation, extravagance of government, the waste of funds—this is the price that we pay for the experiment of democracy, of government by the people, of rule by popular will. No democracy has been or will be efficient, but it will be enjoyable (laughter); it gives people the opportunity to have a say, and that they like—sometimes, when they are aroused. You remember the great New England statesman who cried, "A monarchy is like a great merchantman; you get aboard, and you fight the winds and the tides until you hit a reef, and then you go to the bottom; a democracy is like a great raft; you never sink, but your feet are always in the water." (Laughter)

So as I look at the names of the States which have been put upon the boxes here, and think of how they all came about, and how so many people from the other side of the world, and some on our own side of it, think that this nation was made, and then divided into States for convenience sake, and certain powers parcelled out, people who don't remember, or never learned, that from the position of independent colonies they formed States, and from States reluctantly and grudgingly formed a nation, holding back always, even until the great strife between the North and the South, holding, clinging tenaciously to local feeling, to local color, to local environment, so much so that we can easily say of the very men who, in the Civil War were fighting for the dismemberment of the Union, that they had a certain kind of patriotism, the transfer of which to the nation has

made our nation what it is (applause), and what would have been characterized in any other time as "treason" was but the attachment of those people to the organization in whose very bosom they live, whose very life they breathe, whose traditions they love, and whose prosperity they hope to promote. It was, after all, the very essence of a patriotism which, as I say, had only to be transferred to this nation to make us what we are, when they strove against the enemy that had to be met; and it was then truly demonstrated how loyal they were; and how fortunate was the Government when that common devotion of the people for their States had at last been sufficiently transferred to the standard of a nation to make a national patriotism that was the great step in the development of the national life of our people in this country. (Applause) So I say, because of the forty-eight sovereignties with their peculiar problems, those things which at first were our opportunities have now become our embarrassments, those things which at first furnished us with all our possibilities now seem matters of difficulty. But we cannot cast them aside, we cannot reject them, we cannot dispense with them. They are, after all, the art and the architecture of our nation, and we must work with them and through them and by them, as the great agencies and means coming to us through the traditional changes, the great agencies and means by which we are to achieve our greatness.

I hail the earnest note of this brave Governor from North Dakota. It was really refreshing to hear him speak with such ardor and enthusiasm for that great empire over which he presides, with its possibilities and its productivity, to hear him protest against too much indictment of his people, against too much harshness when occasionally they are led astray. Who has not been led astray? What State is free from an occasional wandering upon some question? And shall the Northwest be more blamed than other States that have strayed from the path?

Underneath it all, I make this one trite but earnest suggestion: There is no policy that ought to succeed, there is no program that ought to be adopted, there is no legislation that should be proposed and made successful, which does not find absolute conformity to the best and clearest interpretation of the great organic instrument of our country, the Constitution, without which, gentlemen, there can be no salvation for the West or the East or the North or the South. (Applause) I make that plea because it is so easy in the hours of distress to take a shortcut. It is so easy under the pressure of great difficulties to suggest some new plan. Altogether the tinkering that has been done has done that instrument no particular good, except perhaps in one or two instances; and the more you travel, and the more you read, the more you contemplate the troubles of the Old World, the more you think about the catastrophe that has spread itself over the face of Europe, the more you realize

that the cause of it all and the curse of it all and the consequence of it all has been absoluteism in government instead of a government of restraint by a written constitution upheld and enforced. And I make that plea to my friend from North Dakota, to his people, as he is the leader now of the conservative forces of his own country, not surrendering or drawing away in a new atrophy of conservatism, but at least rejecting the wild and fatal nostrums of the people who for a time passed a shadow upon his great commonwealth.

I make this plea. There can be no mistake made if we will adhere faithfully to the Constitution of our country.

I thank you. (Applause)

(At the end of the proceedings the organist played "Auld Lang Syne.")

Regular Meeting, Thursday, December 6, 1923

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, December 6, 1923, at 12 o'clock noon.

Present

IRVING T. BUSH, *President*

WELDING RING

LEONOR F. LOREE

JESSE ISIDOR STRAUS

} *Vice-Presidents*

CHARLES T. GWYNNE, *Secretary*

and three hundred and two other members of the Chamber.

Guests

Senator PAUL DUPUY, of France, publisher and owner of "*Petit Parisien*" and other French papers.

Colonel JOHN M. THOMPSON, of the General Staff of the Military Order of the World War.

Mr. EMILE GARDEN, Representative of the Lyons Fair.

Mr. EMILE UTARD, President, Franco-American Board of Commerce and Industry.

Mr. GEORGE KLOTZ, of the Franco-American Board of Commerce and Industry.

Mr. J. PERRET, Director, Office Francais du Tourisme.

Mr. H. DE WEINDEL.

Mr. A. AGHION.

Minutes

The minutes of the meeting of November 1st were read and approved.

NOMINATIONS FOR MEMBERSHIP

CLARENCE H. KELSEY, on behalf of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Non-Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
MALCOLM R. LOVELL	ERNEST E. QUANTRELL	ROLLIN C. BORTLE
EUGENE E. O'DONNELL	DAVID T. WARDEN	ALFRED GILBERT SMITH
CHARLES LATHROP PACK	ELON H. HOOKER	WILLIAM MCCARROLL
STANLEY WASHBURN	ELON H. HOOKER	WILLIAM MCCARROLL

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
BENJAMIN L. ALLEN	UNION N. BETHELL	HOWARD BAYNE
HARRY A. ASTLETT	JOHN B. NIVEN	DAVID T. WARDEN
EDWIN H. BIGELOW	DEAN MATHEY	CHARLES T. GWYNNE
HENRY M. DUYS	JOHN B. NIVEN	DAVID T. WARDEN
ROBERT H. GOFFE	WALLACE REID	ALFRED E. MARLING
JOHN GRIMM, JR.	ERNEST E. QUANTRELL	ROLLIN C. BORTLE
WILLIAM WEBSTER HALL	ALEX. McMILLAN WELCH	WILLIAM FELSINGER
RALPH G. HUBBELL	RODNEY HITT	CHARLES T. GWYNNE
WILLIAM G. KELSO, JR.	ERNEST E. QUANTRELL	PHILIP C. RIDER
BERNARD J. LARKIN	ERNEST E. QUANTRELL	WARREN J. HOYSRADT
GEORGE LEBOUTILLIER	SAMUEL REA	WM. WALLACE ATTERBURY
HUME LELAND	LAWRENCE PRIDDY	WILLIAM M. HARRIS
ROBERT E. LIVINGSTON	LEWIS B. GAWTRY	NICHOLAS F. BRADY
ROY C. MIDDLEBROOK	JOSEPH P. DAY	FREDERICK M. HILTON
GARDNER W. MILLETT	EDWARD L. BALLARD	STEPHEN C. MILLETT
ERNEST W. NIVER	ERNEST E. QUANTRELL	ROLLIN C. BORTLE
FREDERICK K. NIXON	ALFRED A. WHITMAN	WALTER H. NASH
GEORGE P. RUTHERFORD	ROBERT E. CHRISTIE, JR.	CHARLES T. GWYNNE
LEON E. STROPP	GEORGE W. BOVENIZER	FREDERICK M. WARBURG

The President appointed Messrs. EDWARD CORNING and LIONEL SUTRO as tellers and the vote taken resulted in the election of the above named candidates.

HUDSON RIVER BRIDGE REPORT HELD OVER FOR ANOTHER MONTH

DAVID T. WARDEN.—Mr. President, at the last meeting of the Chamber, action was deferred for one month on the report of the Committee on the Harbor and Shipping on the proposed Hudson River Bridge. Since that time we invited the Chamber's Committee on Internal Trade and Improvements and the Committee on Public Service in the Metropolitan District to sit with us in the consideration of that report, and extended an invitation to all those from whom we had heard and who were desirous of saying something on the subject. The joint meeting was held, but unfortunately those who had most strongly expressed themselves as desiring to be heard were unable to be present; and on that day we only had the benefit of the opinion of Professor WILLIAM H. BURR, an eminent engineer. At the

time the meeting was held we had just received a notice from the Port Authority in which they announced hearings to be held on December 5, at the request of the Governors of the States of New York and New Jersey as to the advisability of the construction of further tunnels and/or bridges across the Hudson River. Your Committee felt, in view of the possibility of developments of considerable interest at these hearings, that it would be well not to proceed with the report until the hearings had been held and an abstract of the proceedings obtained for consideration by your Committee. Therefore, while your Committee has not yet seen any reason to change its views as to the report it submitted, it was felt wise to ask for further time to ascertain what takes place at the hearings, which were started only yesterday afternoon. I attended part of the time and expect to get an abstract of them before long. I therefore ask that the Chamber's consideration of this report be postponed, at all events, for another month.

THE PRESIDENT.—Do you make any formal motion to that effect?

Mr. WARDEN.—I will be very glad to move you, sir, that consideration of the report be postponed until the next monthly meeting of the Chamber.

The motion was unanimously carried.

REDUCTION IN FEDERAL TAXATION

CLARENCE H. KELSEY.—Mr. President, the report of the Committee on Taxation concerning the proposition of Secretary MELLON for reduction of the income taxes is before the Chamber.

In addition to the facts stated in that report, the Committee would like to call attention to one or two other significant facts:

Secretary MELLON himself estimates that the saving to those with earned incomes not exceeding \$10,000 in amount will approximate very nearly 50 per cent. of the taxes which they are now paying. As those with incomes not exceeding \$10,000 number in all over 6,400,000 taxpayers, or 97 per cent. of all there are, it is probable that at least half of that 97 per cent. are salaried income earners, or earning their incomes in other ways by their own efforts; and, therefore, at least 3,000,000 or 4,000,000 of taxpayers throughout the country will receive relief to the extent of about half their present income taxes. Secretary MELLON also estimates that of the \$225,000,000 of reductions in income taxes, only 5 per cent. of that sum, or about \$11,000,000, will accrue to those having incomes of \$100,000 or more.

It would seem, therefore, as if this proposed legislation is in no way sectional or class legislation, but affects the taxpayers in

every State of the Union; and if they will only make their voices heard they cannot be denied relief.

Now, if you adopt these resolutions, we would like to call to your attention the fact that it is not enough simply to adopt the resolutions; it is hoped that the members of the Chamber will carry out the suggestions made in these resolutions that they write to their own Congressmen and Senators, that they get their correspondents to do the same, because we feel certain that if these taxpayers all over the United States really make their wishes in this respect known to their Congressmen and Senators, they will secure the relief desired.

I, therefore, present the report and resolutions:

Report on Reduction in Federal Taxation

To the Chamber of Commerce:

Your Committee on Taxation takes it for granted that the Chamber of Commerce is in favor of an immediate reduction in taxation and, in general, approves the plan brought forward by Secretary MELLON.

It desires to call the attention of the Chamber, however, to certain features of that plan which should commend themselves to all voters and secure the adoption of the plan. It is estimated that it will reduce income taxes by some \$225,000,000, and that over 41 per cent. of this will be taken off the taxes of those having incomes of \$6,000 or less and 23 per cent. from those having incomes of more than \$6,000 but not more than \$10,000—that is to say, at least 64 per cent. of the reductions will enure to the benefit of those having incomes not exceeding \$10,000, and these, in 1921, the last record available, numbered 6,400,000 persons, or more than 97 per cent. of all the income tax payers. These are the ones whom it is most desired to relieve.

The hope of making this reduction is found in the results of the operations of the Treasury for the current fiscal year which are likely to turn an expected deficit of \$800,000,000 into a surplus of \$300,000,000. This is partly due to sales of assets, but substantially also to the operations of the budget system, and in the extension and widespread application of that system lies the hope of still further reductions.

The increase in both federal and state taxes between 1914 and the present time has been very great and has been estimated by the National Industrial Conference Board to make them three times what they were in 1914. It is estimated that now one-sixth of the current national income goes in taxes for government support, both national and local.

There is every reason, therefore, to urge the adoption of the reductions recommended by Secretary MELLON and it should be impressed upon the minds of Senators and Congressmen that there is no more important duty presented to them than to secure this measure of relief for their constituents. It should also be impressed upon them that in the face of the great increase in taxation

which the public has submitted to, and the possibility of securing, by economy, this proposed reduction in taxation and this relief for the taxpayers, it will be entirely unacceptable to the mass of the voters if a scale of expenditure is voted by the Congress which will preclude the possibility of the hoped-for income tax relief. If the government does not reduce its expenditures and so be able to reduce its tax levies, how does it expect the citizens to reduce their expenditures, give up their extravagances and return to the habits of thrift and productivity which have made the country prosperous in the past and are vitally necessary now if it is to maintain its dominance in world competition and insure the comfort and prosperity of its people?

It is recommended that the members of the Chamber take the trouble to express their views with great positiveness to their own Senators and Representatives in Congress and take pains to see that their correspondents and customers take the same trouble. It is plain that there is a country-wide demand that substantial tax relief be granted and at least 6,000,000 voters need it and expect it and will not be satisfied if it is denied them. The position of each one of them should be brought home to his or her Congressman and Senator, and if it is, the demand can hardly fail to be granted. Therefore, the following resolutions are offered:

Resolved, That the Chamber of Commerce of the State of New York heartily endorses the proposed reductions of the income taxes recommended by the Secretary of the Treasury in his letter to Congressman GREEN of November 10, 1923, and calls upon its members to use their efforts to impress upon Congress the importance of securing the proposed relief for the taxpayers and to support the efforts of the Secretary of the Treasury and the government at Washington to reduce expenditures and enforce economies; and

Resolved, That the officers of the Chamber and its Committee on Taxation be authorized and instructed to take such steps as they may deem expedient to put the views of the Chamber before the Congress and to impress upon other bodies and individuals who share its views the importance of exerting themselves to secure their acceptance and favorable action thereon by Congress.

Respectfully submitted,

CLARENCE H. KELSEY, *Chairman*
DONALD G. GEDDES
FREDERICK H. HURDMAN
H. HOBART PORTER
WILLIAM P. PHILIPS
WILLIAM D. BALDWIN
ALBERT A. TILNEY

} *Committee on
Taxation*

NEW YORK, November 28, 1923.

The report and resolutions were adopted unanimously.

Members Urged to Write Personal Letters to Their Congressmen and Senators Regarding Tax Reduction

THE PRESIDENT.—The Chair would like to echo what Mr. KELSEY has said, that the duty of the members in expressing their opinions to Congress goes far beyond acting here today by vote, or even joining in signing general petitions and sending telegrams similar in character, which is so often done. There is nothing that the people in Congress wish so much to know as the wishes of their constituents. Members should take the trouble to sit down and write personal letters to their Senators and their Congressmen, as they will be glad to know just how you feel.

I realize that in a great city like this many of us do not charge our memories with exactly who our representatives in Congress are, and I would like to say that the Librarian in the Library on the floor above the main Luncheon Room has a list of all of them, and if you will either call upon her in person after this meeting, or if you will telephone in, she will give you the name and the address of the Congressman who represents your district, if you will give your official residence.

SIXTH AVENUE IMPROVEMENT TO RELIEVE TRAFFIC CONGESTION FAVORED

WILLIAM MCCARROLL.—Mr. President and Gentlemen of the Chamber, I desire to present the report of your Committee in respect to the proposed improvement of Sixth Avenue to relieve traffic congestion. It is proposed to relocate the Sixth Avenue Elevated pillars from the roadway to the sidewalk adjoining the curb, between 30th and 42nd Streets. At the same time, the needful changes at the stations are to be made in the stairways leading both to the elevated line and to the subways. This movement was inaugurated some time ago, and it was found that neither the City authorities nor the Transit Commission had the necessary power to proceed without enabling legislation. That legislation was had at the last session of the Legislature, and it is now proposed to go on with the work under the direction of the Board of Estimate and Apportionment.

These facts are set forth in the report of your Committee:

Report on Sixth Avenue Improvement to Relieve Traffic Congestion

To the Chamber of Commerce:

In order to relieve the traffic congestion on Sixth Avenue, particularly at the intersection of Thirty-fourth Street and Broad-

way, it is proposed to relocate the Sixth Avenue Elevated pillars from the roadway to the sidewalk adjoining the curb between Thirtieth Street and Forty-second Street. At the same time the needful changes at the stations are to be made in the stairways leading both to the elevated lines and to the subways. At the last session of the Legislature the necessary laws were passed, now known as Chapter 771 of the New York State Laws of 1923, to make these changes possible. This law empowers the Board of Estimate and Apportionment to order the removal or relocation of the railroad tracks or structures on Sixth Avenue between West Thirtieth Street and West Forty-second Street. It is provided that the cost of the work shall be shared equally by the City of New York and the Transit Corporation, and also that the Transit Commission must approve the undertaking before it can be put into effect.

The law provides that public hearings shall be held by the Board of Estimate and Apportionment before adopting a resolution of this kind. In accordance with this requirement, the Board of Estimate and Apportionment held one public hearing last month and has announced another for December 14th to consider the entire matter. It is hoped that prompt action will follow, so that the work may be speedily proceeded with.

Your Committee on Public Service in the Metropolitan District has carefully studied this project. It believes that traffic conditions would be greatly benefited by relocating, as proposed in a resolution now before the Board of Estimate and Apportionment, the "L" columns on Sixth Avenue between Thirtieth Street and Forty-second Street, and also changing the position of the stairways of the stations in that section connecting with the elevated and subway lines. It is universally recognized that the serious congestion in the streets requires the removal wherever possible of every obstruction to traffic. At the intersection of Sixth Avenue and Broadway and Thirty-fourth Street especially, which is a center of important retail business, and the present terminus of the Hudson and Manhattan Tubes, pedestrians overcrowd the sidewalks, and the traffic is greatly impeded. This is also the case around Forty-second Street. The proposed improvements would afford considerable relief.

In line with these improvements it is also proposed by the City authorities to remove entirely the elevated railroad from Sixth Avenue between Fifty-third and Fifty-ninth Streets. This section of track is operated as a spur, with shuttle trains going back and forth. It is little used by the public. By removing the "L" structure constituting the spur, transit facilities would not be especially interfered with, while the movement of vehicular traffic up Sixth Avenue and into Fifty-ninth Street would be greatly facilitated. This would be all the more advantageous if the proposed new roadway from Sixth Avenue into the Central Park be opened.

Your Committee therefore offers the following resolutions:

Resolved, That the Chamber of Commerce of the State of New York urges upon the Board of Estimate and Apportionment the passage of a resolution to order the relocation of the Sixth Avenue Elevated pillars to the sidewalks adjoining the curb between Thirtieth and Forty-second Streets, and also the changes of the stairways leading to the elevated and underground railroads, in accordance with the general plan for improving the conditions in this district as herein set forth; and, be it

Resolved, That the Chamber recommends that the Sixth Avenue elevated structure from Fifty-third to Fifty-ninth Streets, now operated as a spur to the main line, be entirely removed, and that the "L" pillars between Forty-second and Fifty-third Streets also be relocated as is proposed between Thirtieth and Forty-second Streets, if sufficient funds are available; and, be it further

Resolved, That copies of this report and resolutions be sent to the Board of Estimate and Apportionment and the Transit Commission, and that the Committee on Public Service in the Metropolitan District be authorized to appear at hearings and elsewhere to advocate the changes recommended in this report.

Respectfully submitted,

WILLIAM MCCARROLL, *Chairman*
WILSON S. KINNEAR
CHARLES W. LEAVITT
JAMES C. STEWART
JOHN V. JEWELL
ELON H. HOOKER
J. FREDERICK TALCOTT

} *Committee on
Public Service
in the
Metropolitan
District*

NEW YORK, *November 28, 1923.*

Mr. MCCARROLL.—I move the adoption of the report and resolutions.

The motion was seconded.

THE PRESIDENT.—Is there any debate.

ALFRED E. MARLING.—May I ask, through you, Mr. President, whether the proposed plans involve a relocation of the tracks themselves up to the edge of the sidewalk? As is indicated in the preamble, the law empowers the Board of Estimate

and Apportionment to order the removal or relocation of the railroad tracks and structures on Sixth Avenue, and so on; while in the resolutions themselves it would seem to refer merely to the moving of the pillars up to the edge of the sidewalk. I suppose most of us would look with regret upon any attempt to bring about any radical change in the elevated structure, except its abolition. Its *existence* is the condition that confronts us, and I presume we must submit to it, but I would like to know whether the tracks are to be moved nearer the edge of the sidewalk, or are to remain where they now are, and merely remove the pillars to the edge of the curb?

MR. MCCARROLL.—That is what is intended—just to relocate the pillars, and have the remainder of the structure accommodated to that—the tracks to be left in the center over the roadway, so that the noise reaching the buildings would be less or no greater, it is hoped, than at the present time.

The motion was then put, resulting in the adoption of the report and resolutions.

THE PRESIDENT.—Is there any new business?

MR. MCCARROLL.—Mr. President, there are two matters which I think may be of interest to the Chamber—somewhat in the nature of an informal supplementary report.

THE PRESIDENT.—You may have the floor, Mr. MCCARROLL.

REMARKS OF WILLIAM MCCARROLL

Subway Proposed Through Amsterdam Avenue Instead of Central Park

MR. MCCARROLL.—You will remember, the Chamber at its last meeting adopted a report of your Committee opposing construction by open cut in Central Park of the Washington Heights Subway. In doing so, the Chamber merely voiced and indicated the attitude which has been further developed and made manifest on the part of the public, as well as by the Chamber, of disapproval and opposition to the use of Central Park for any but park purposes, or the interruption of its use by an open cut in the construction of the proposed subway through the park.

A number of hearings were held by the Board of Estimate and Apportionment, at which the Chamber was represented by a member of your Committee, Mr. LEAVITT. At those hearings the public disapproval seemed to be very general and very emphatic, as indicated by the large attendance. The interest was so great that the hearings, as arranged for, were not sufficient for those who desired to speak to have opportunity to do so, and another hearing is to be held this week on the same subject.

In the meantime, the Chairman of the Transit Commission, at a meeting of the Broadway Association last week, presented a proposed change in the route of the subway—a very important change, too. The Commission now proposes, according to the statement he made, to carry the subway from 59th Street up through Amsterdam Avenue, to Washington Heights, and that would not be a two-track extension, but would be made a four-track trunk line subway. It seems obvious, at any rate on first examination, that this is a most desirable change, not only because it would afford a solution as to Central Park, but even more particularly in that it would provide a main line subway of enlarged capacity, susceptible of a number of expansions and connections, which would add very greatly to the general transportation facilities of the city. We can therefore report progress, Mr. President and gentlemen of the Chamber, for, judging from present indications, it would seem entirely unlikely that the subway will be constructed through Central Park. Personally, as I can only so speak now, I should be inclined to go even farther, and say that every encouragement possible should be offered to the plan of its construction as now proposed through Amsterdam Avenue.

Co-operation of the Board of Estimate and the Transit Commission

Mr. McCARROLL.—The other matter to which I would refer, has to do with the establishment of improved relations for co-operation between the Board of Estimate and Apportionment and the Transit Commission. This is of very great importance to the City. What I might call, in diplomatic language, a *modus vivendi*, was established through the appointment by the Board of Estimate and Apportionment last June, belated though it was, of a Transit Committee to consult and co-operate with the Transit Commission. That has grown, in fact, not only as a *modus vivendi*, but I might say, has become a veritable *entente cordiale*, and Chairman MCANENY had this to say of the relations that now prevail between those two bodies. I quote his words as reported:

“There is abundant evidence of a common purpose to do the most that can be done within the City’s present resources, and to concentrate upon these particular measures that are most urgent in character. Such the West Side Extension has been considered to be. I have no doubt that final agreements will be reached, in the same spirit of co-operation, on every detail affecting it.”

And in this morning’s Press I find a report to the effect that Acting Mayor HULBERT has joined in the same cordial expression with the Chairman of the Transit Commission, and said:

“I came also to record the fact that he and his associates and

I and my associates are working in harmonious co-operation for some real results in the way of a solution of the traffic problem."

This is in line with the action which has been urged by the Chamber. You may recall that in the month of June a resolution by your Committee was adopted setting forth: First, the necessity for progress and of co-operation between these bodies; and, second, the fact that—notwithstanding the outcry for changes and additional legislation—in the existing laws both for the Transit Commission and for the Board of Estimate, there are abundant powers and latitude for the carrying out of the rapid transit construction which the City so badly needs. All that is needed is performance of the requirements of these laws in a spirit of co-operation and civic loyalty, which, it seems to me, is well worth while commending. I am pleased to say I believe it is now being exemplified, and that, I think the City and also the two bodies themselves are to be felicitated.

We sometimes hear men inquire, I think rather disparagingly, if not in self-excuse:

"What is accomplished by civic and commercial organizations, such as this, in public affairs?" These two instances are an answer, and a demonstration, if any were needed, of two things: First, the power of public opinion; Second, the necessity of marshalling that public opinion, which, when so marshalled and expressed, assures success. (Applause)

ANNOUNCEMENTS

Apple Essay Contest and Letters Received from Winners

THE PRESIDENT.—I sometimes wish, gentlemen, that it were possible for me to share with you some of the unpleasant things which come with the very great honor which you give to the man whom you elect President of this Chamber; but I am equally anxious to share with you some of the pleasant things that come to him.

You will recall that at the last meeting of the Chamber it was announced that prizes would be given by the Chamber to school children throughout New York State for essays on the apple as an article of food, the prizes to be distributed at the Apple Fair which was held a few weeks ago.

The prizes were awarded, and, of the successful contestants, I think only eight of the children were able to accept our invitation to come to the city and receive their prizes in person. There were many more, but their prizes were forwarded to them. The few who were able to come, however, afforded an excellent opportunity for Mr. GWYNNE and myself to take the

children to the theatre. We took advantage of it, as we were looking for an excuse of that kind (laughter), and the next day they came to call upon me in my uptown office, at the top of the Bush Terminal Building, to see the view. I have received many letters from them, twenty-five, I believe, and I thought I would read one or two of them to you, so that you might share with me some of the pleasure which comes as a result of this activity of the Chamber.

Here is a letter from a little girl (reading):

"If the Chamber of Commerce, of which you are President, could realize how happy I was to have won first prize in their contest, I know they would feel glad because they were so generous, not only in their awards, but for holding it and making it possible for all rural school children, of which I am one, to compete with other school children in this statewide contest. My teacher, Mrs. LOUISE RICH PRENTICE, also thanks you for giving these prizes, and asks me to tell you you could not have awarded the prize to a person who works harder for an education and who would appreciate the honor more than the one to whom the first prize was given. (Laughter)

"I walk a mile and a half to school every day, and have missed only two days this year. I am twelve years old and in the seventh grade. My mother and father are as anxious as I am that I get along well in school, and were very happy that I won first prize."

I will not attempt to read the whole letter, but it closes by saying.

"Please express my thanks to the Chamber for their generosity and tell them I appreciate the gold pieces, and would have enjoyed so much to have gone to New York City, but coming so sudden and unexpectedly, my parents could see no way to say 'Yes' to my going. Some day I hope to be able to see the wonderful things in our great New York City, of which I read so much in geography." (Laughter and applause)

The second letter begins: "Dear President" (laughter)—I hope none of you mention this in Washington—

"I wish to thank you and the Chamber of Commerce for the prizes that I have recently received from you. The trip to New

York, with its points of interest, was well worth the work put on the essay, saying nothing about the cash prize. The ticket that you gave me to the theatre was well worth twice the price paid. (Laughter)

"Last, but by no means least, the trip to the top of your building is not to be easily forgotten. On Friday, while looking out of the hotel window, I was wishing I could go to the top of that building, but never dreamed it possible; and when I was told we were going to the top of that building that I had thought was far beyond my reach, I did not know what to say."

There were many other letters of a very interesting and charming type, and I thought you would pardon me if I took a few moments of your time to read those two.

Remarks of President Bush, Introducing Senator Dupuy of France

The tragic problems of France lie very close to the hearts that beat here in these happily United States on this side of the Atlantic Ocean. Nearly one hundred and fifty years ago the romance of the affection of the people of America for the people of France began. During that long period many governments have come and gone, but there has never been a time when the hearts in America have not been full of affectionate and sympathetic interest for the problems of the people of France.

A solution for these problems lies very near to the heart of the economic world, and we in this Chamber endeavor to keep our fingers upon the pulse which records the throbs of that heart.

Senator DUPUY, both because he is a Senator of France and the proprietor of some of the great journals of that country, is very close to the problems of France, and close to the economic heart of his home country. Senator DUPUY will tell us something of those problems, and we will listen with profound interest. Senator DUPUY. (Applause)

ADDRESS OF SENATOR PAUL DUPUY OF FRANCE

MR. PRESIDENT AND GENTLEMEN OF THE CHAMBER OF COMMERCE.—I feel very deeply the great honor you have done me in inviting me to speak here today. I am particularly grateful to your President and to yourselves for your very kind reception.

Your organization has, since the early days of your national life, participated actively in the development of the country, and is now at the very head of America's industrial and economic undertakings.

In constant touch with the rest of the world, you are better situated than any other organization to understand the problems of the present day; and as I am about to leave America, I thought that it was a good opportunity to give you a few of my impressions.

It has been a most interesting journey for a man engaged in the publishing of newspapers. I visited your most important cities in the East and in the Middle West; everywhere I was welcomed by the owners and editors of your newspapers in the warmest and most touching way. The development of the American press is one of the most extraordinary phenomena of our modern life; but I must say that it is only a consequence of the development of your commerce and your industries.

When, after putting together what I have seen during these six weeks, I shall speak to the French people of the wonderful activities of your country, without any doubt, they will say at once: "It is all very well, but America has 110 millions of inhabitants." Yet even such a large population does not explain your admirable growth, and I must confess that we are left far behind, even if we take into consideration our smaller population. The true explanation is to be found in your admirable psychology and in your realization of the needs of the public. You know what the public wants, you know what its needs are, and you devote yourselves to the task of giving satisfaction to them. When I am here, I feel that you do not engage in an undertaking because somebody else has made a success of it or because of the prospect of sharing in a profit, but because you see in it a new opportunity to be of service.

I made this trip in order to study your journalistic methods, and without any political purpose, but as I have today the opportunity to speak before a most representative and distinguished gathering, I would like to call your attention to some misinterpretations of the true attitude of France which I have occasionally met with.

I cannot let people say that Mr. POINCARÉ's policy is that France should not begin to pay her debt to America before receiving payment from Germany; I cannot let people think that France and England were about to break away; and I cannot let people say that France likes the occupation of the Ruhr and wants to remain there—all of which is false, as well as the rumor that the friendship of America for France has in any way diminished. And to this, when I go back to France, I can bear witness myself. How many times have I seen complete strangers come up to me during my trip simply because they heard me speak French and they wanted to tell a Frenchman of their friendship for my country.

To you it is hardly necessary to say again that we are in the Ruhr against our wishes; that the only thing we want is to get out of it; that we are ready to withdraw most of our forces so as to establish what is called invisible occupation, and that we do not wish the disintegration and collapse of Germany, for our very interest is to keep her together. But as long as we have nothing better than the Versailles Treaty we have got to stick to it. This does not mean, however, that we shall do so without due respect for humanity nor without taking new circumstances into consideration. Civilization itself would collapse if it were possible for bad faith and deceit to dodge responsibilities and escape solemn promises.

A sincere and willing Germany would obtain from France patience and protection, and nobody has to tell us of the suffering of the vanquished. France has never trampled upon a vanquished enemy; but we consider that there is no possible discussion without evidence of good faith. Some people said that France and England were about to quarrel. Such a statement contains so little truth that not for a long time have the relations between the two great European countries been better. These relations do not depend, as some seem to believe, upon what is thought by Mr. LLOYD GEORGE or by Mr. BRIAND or by Mr. BALDWIN and Mr. POINCARÉ; they depend upon what the two peoples think of each other. Democracies are today well enough educated to know what they want; France and Great Britain want to remain united, and united to America. France loves America as she always has, and she would love her even if America ceased to love France.

I shall always remember that morning of June, 1917, when the first American soldiers entered Paris. There were some four or five hundred of your boys, without any band, but with the Star-Spangled Banner. All Paris was there and your boys marched through the streets in the midst of a human ocean. People shouted and applauded, but most of them wept, and mothers said to their children that America had come to save France. Since that day France loves the United States as the United States has loved France since 1776.

And since I am speaking of the early years of your history as an independent nation, let me tell you the interest I took in a film that I saw in New York recently. It was an episode of the conquest of your immense empire; colonists carried in covered wagons, going amidst dangers and privations to establish a new life and build cities, marching ahead into an unknown region, inspired by this idea of growth and progress which today is to be found in your commerce and your industries.

Enthusiasm allied with discipline, untiring efforts for the common good and common interests, or, in a word, a wonderful sense of co-operation, such were the qualities most prominently displayed in that episode of your history. Co-operation is at

the very foundation of your national life, it remains the best principle of development, and more than ever the United States believe in co-operation. If they ceased to co-operate, they would sacrifice their own happiness, and this is the reason why they take such an interest in everything that happens in the world. But if the United States exist today it is only because, at a certain time, they knew how to detach themselves from the Old World. On the second of December, 1823, President MONROE signified to the Holy European Alliance the intangibility of the liberated colonies and their separation from European affairs. A few days ago your distinguished Secretary of State, Mr. HUGHES, indicated his interpretation of the Monroe Doctrine and its present application to the affairs of the world. Thus the American nation is solicited in two different directions: on the one hand, she wants to follow a policy of detachment from European affairs; on the other hand, she wants to follow the ideal of co-operation which has built the greatest nation in the world. This policy of co-operation can no longer be satisfied by remaining confined in limits too narrow for its activities in a world which becomes smaller and smaller every day because of the modern means of communication.

The doctrine of 1823 can be compared, in my view, to a most revered patriarch, who is always consulted in cases of emergencies or great difficulties. But the patriarch is not well informed of the progress which has been accomplished and of modern exigencies. One cannot go to him every minute without asking too much of him; if you do it he will show opposition to new undertakings; he still lives in his century, while we are living in the present day.

While I was discussing with the owners and publishers of your great newspapers and magazines, I learned much. They are men who know well the mind of the nation; they know it better than statesmen, because they are in more direct contact with it. A representative runs for election every two years, but a newspaperman has to deal with public opinion every day. One of them was telling me that in order to interest the public one has to project the reader into the story. If you select as a title for an article: "The economic situation in the West," the reader will pass it by, but if you call it: "How I made my living more easily in California than in the East," the reader will be interested.

Now, I believe, that strictly from the American point of view, it is the same with regard to the affairs of the world. Americans must not consider the settlement of the consequences of the war as a purely European matter, but as the only possible solution for their own problems. It is not possible here to discuss the different aspects of the question. Let me simply mention that I have already on another occasion indicated the possibility of establishing in some international taxes that consumers would

pay almost without knowing it, but which would provide sufficient returns to pay to each country the interest on the billions spent or lost during the war and to amortize them.

All of us are still bearing the consequences of a war which no one nation would have been able to win without her allies. The damages resulting from the greatest calamity in the history of the world cannot be repaired by the vanquished people alone. One must have the courage to declare it today. The co-operation of the entire world is not too much to rebuild the world. But by mutual co-operation wounds can be healed and the world made better for mankind. Without American co-operation there is no hope that the world will recover.

Before I finish and before I leave the United States, there is a personal tribute I wish to pay to your country. To America I owe my personal happiness; to the methods I learned from you I owe a large part of my business success, and because of America's participation in the war France owes her for the liberation of her territory.

May the Chamber of Commerce of New York grow and prosper, and long live the United States! (Prolonged applause)

THE PRESIDENT.—Senator DUPUY has said that none of us has recovered from the effects of the war; and this Chamber, in its attitude toward what has been called the adjusted compensation for those who were under arms, has always said that there is no sacrifice too great for the people of this country to make for those who fought and who suffered through wounds or illness during that war.

Colonel JOHN M. THOMPSON, of the Military Order of the World War, will speak very briefly upon topics which are very close to the heart of his organization. Colonel THOMPSON. (Applause)

DISABLED EMERGENCY ARMY OFFICER RETIREMENT AND BETTER HOSPITALIZATION FOR DISABLED SOLDIERS

**Address of Colonel John M. Thompson of the Military Order of the
World War**

MR. PRESIDENT AND GENTLEMEN OF THE CHAMBER OF COMMERCE.—It is a great privilege to be accorded the opportunity to speak to such a representative body of merchants and citizens on a subject which is dear to the heart of every ex-officer of the World War, or I may say, of every ex-soldier.

Although more than five years have elapsed since the armistice, there has been nothing accomplished toward the retirement of the emergency army officer who was disabled in the World

War. He receives no compensation except that fixed by the Veterans Bureau for Disabled Soldiers, while the emergency officer in every other branch of the service has been given or accorded the opportunity of receiving full retirement and pay and allowance as that of the regular officer.

There were six general classes of officers in the war: Regular officers of the army, emergency officers of the army, regular officers of the navy, emergency officers of the navy, regular officers of the marine corps, and emergency officers of the marine corps. In using the word "emergency" I refer to the volunteers, to the men who volunteered, the men who served in the National Army.

The regular officer who is disabled in the line of duty, whether in peace or war, is retired, no matter how small a degree of disability, if it prevents him from continuing in the armed service of the country. This is a time-honored and proper policy of our nation in taking care of the disabled officer in the regular service.

Shortly after the war Congress passed a retirement act giving full retirement, with rank, pay and allowances, to the emergency officers of the navy and to the emergency officers of the marine corps. Only the emergency army officer has been denied the right of retirement, so that five out of the six classes have been afforded this retirement. Several bills have been introduced in Congress to correct this injustice, but without success. The Senate in February, 1922, by a vote of 50 to 17 passed a bill introduced by Senator BURSUM, which provided for retirement of the disabled emergency army officer to a limited extent. The bill was sent to the House of Representatives, and referred to the Committee on Military Affairs, where it remained dormant for more than a year, until the session of Congress expired and the bill died, although strenuous efforts were made to get the Committee to report the bill, and a large majority of the members of the House had declared that they would support the bill if it were introduced. This bill did not ask for retirement of all, as provided for in the five other classes; it asked retirement only for the disabled emergency officer whose earning capacity had been reduced 30 per cent. He was to receive full rank at the time of discharge, pay and allowance. The man with a physical disability between 10 and 30 per cent. was to be retired with rank, but not to receive any pay, other than the compensation allowed by the Veterans Bureau. A similar bill, changing the ratio from 30 to 20 per cent. will be introduced in the present Congress.

In regard to this bill, I will quote from an editorial in the *New York Times*, December 19, 1922. It is a page long, but I will only read one paragraph:

"The statutory justification of the bill is Section 10 of the Selective Service Act of 1917, which directed that 'all officers

and enlisted men of the forces herein provided for, other than the regular army, shall be in all respects on the same footing as to pay, allowances and pensions as officers and enlisted men of corresponding grades and length of service in the regular army.' The exception to retirement with graded pay for disability incurred in action is the officer of the Guard or the National Army. To illustrate: If four officers, a regular, a navy man, a marine, and a Guardsman or National Army man, had fallen with an airplane during the war and suffered injuries necessitating retirement, the first three would have become entitled to retired pay—there would be no pay for the fourth. The bill is a protest against the exclusion."

This bill has the endorsment of veterans' associations composed of 90 per cent. of the enlisted men; it has the endorsement of the Military Order of the World War, the American Legion, Veterans of Foreign Wars, Disabled American Veterans of the World War, United Spanish War Veterans, Women's Auxiliary, the Service Star Legion (also a woman's organization), National Guard Association of the United States, Adjutant Generals' Association, Officers' Reserve Corps Association, American Medical Association, and numerous other societies, as well as several state legislatures.

The officers who would be benefited by the bill are few in number—less than 1,800. We have a list of 77 who have "Gone West" since the Armistice, doubtless more than double that number have passed on of whom we have no record. Their numbers are being depleted rapidly, year by year, by reason of their injuries, making them easy prey for disease. These officers, the great majority of them are the boys who got "theirs" going "over the top," the young first and second lieutenants who were cut down as they were entering the prime of manhood and are unable because of their disabilities to compete with their fellow men. Many of them have families, some of them war brides. Most of them, being too old for vocational training, are returned to civil life to struggle for existence hampered by wounds and disease.

There are broad phases of public policy involved in this question of equal rights and privileges to the volunteer or emergency officers of the World War who were seriously disabled in the service. The whole plan of our national defense rests on a small regular army, coupled with a large volunteer force of National Guardsmen and Reserves. This American ideal of the citizen-soldier and citizen-officer as the mainstay of national security can only be maintained if the emergency defender of the Nation is assured equality of care in case of permanent disability incurred by his service. Refusal of retirement for disabled emergency officers of the World War can only mean that the citizen-officer of the army shares with the regular officer only the privileges of danger, death and sacrifice of health, with an unequal share in the Nation's protection.

Another class of soldiers who have not received justice are those compelled to receive hospital treatment for diseases and injuries incurred in the war. Six thousand five hundred men—mostly tubercular, mental and nervous cases—are in contract hospitals. This condition is being remedied as rapidly as possible by the present administration of the Veterans Bureau, but, circumscribed by existing laws, there remains much to be accomplished. Pressure should be brought to bear on Congress to pass laws abolishing contract hospitals and providing for better treatment of disabled soldiers. The Government hospitals are unevenly apportioned among the fourteen districts upon the basis of population. Of these hospitals there are three classes: the general, the tubercular, and neuro-psychopathic, and as a rule patients are not transferable. In some districts there are disabled men without beds, and in others there are empty beds. These beds are empty because they are in the wrong place or of the wrong class. Expert medical authorities state that disabilities will continue to increase until 1929 or 1930, especially the tubercular and neuro-psychopathic cases. Recently the net increase per month was 1,500. Throughout our generation, men will succumb to latent defects from service. The discharge papers of 46,000 men show predisposition to tuberculosis, and 76,000 to mental and nervous troubles.

The interests of citizens should be stimulated, not based upon critical intent, but in a desire to co-operate with the present excellent administration of the Veterans' Bureau in the welfare of the disabled ex-service men who are fighting an unfinished battle. It is the hardest they have fought and it will be decisive. War casualties did not cease with the fighting. Old wounds are re-opening, defects from service are causing breakdowns long after discharge. This means life or death to them. Through fatal delay many soldiers have been found in charity wards, almshouses, jails and asylums. They ask not charity but justice.

These subjects will be discussed at Town Hall, 121 West 43rd Street, Saturday evening, December 8th, commencing at 8 o'clock, by such men as U. S. Senator H. O. BURSUM, of New Mexico; General FRANK T. HINES, Director of the Veterans' Bureau; Congressmen LANGLEY of Kentucky and LA GUARDIA of New York; A. FITZROY ANDERSON of the Citizens Committee of America, and R. G. PATERSON, New York County Chairman of the American Legion. The meeting will be held under the auspices of the following:

Military Order of the World War.

American Legion.

Veterans of Foreign Wars.

Disabled American Veterans of the World War.

Disabled Emergency Officers of the World War.

Military Order of the Loyal Legion.

Women's Auxiliary of the American Legion.
World War Mothers.
National American War Mothers of New York and New Jersey.
Citizens Committee of America.
Salvation Army.
"Lest We Forget" Committee.
The Dug-Out.
The Old Canteen.
National Security League.
American Defense Society.
Naval Order of the United States.
Jewish War Veterans of the Wars of the Republic.
Sons of the American Revolution.
Daughters of the American Revolution.
Daughters of the Revolution.
Society of the Cincinnati.
Military Training Camps Association.
Spanish War Veterans.
Society of Colonial Wars.
Army and Navy Club.
Kiwanis Club.

I am here, gentlemen, to invite the members of the Chamber of Commerce to that meeting, where these matters will be discussed more fully than I have been able to discuss them at this time; and may I ask, if it is proper to do so, if you approve of what I have said, that you get together, and, as your President has said, not only pass resolutions, but write to your Congressmen and see that these disabled men get their rights? You will recall that the late President HARDING said "Everything for the disabled soldier." (Applause)

THE PRESIDENT.—If there is no further business, the meeting stands adjourned.

Regular Meeting, Thursday, January 3, 1924

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, January 3, 1924, at 12 o'clock, noon.

Present

IRVING T. BUSH, <i>President</i>	
WELDING RING	} Vice-Presidents
LEONOR F. LOREE	
CHARLES T. GWYNNE, <i>Secretary</i>	

and two hundred and twenty-one other members of the Chamber.

Guest

Dr. OSCAR JASZI, Professor of Sociology, former Minister of the National Minorities in the Hungarian Cabinet under Count KAROLYI, was present and occupied a seat at the right of the President.

Minutes

The minutes of the meeting of December 6th were read and approved.

NOMINATIONS FOR MEMBERSHIP

FREDERICK H. ECKER, Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Non-Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
CALVIN AUSTIN	HERBERT B. WALKER	DAVID T. WARDEN
CHRISTOPHER G. MEMMINGER	ELLIS P. EARLE	LOUIS G. KAUFMAN
PHILIP L. REED	HOWARD C. SMITH	ARTHUR B. HOLDEN

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
EDGAR T. APPLEBY	MALCOLM STUART	JOSEPH F. SIMMONS
C. EVERETT BACON	ROLLIN C. BORTLE	CHARLES E. GARDNER
CHARLES E. CLAPP, JR.	ROBERT A. BOULD	HEARN W. STREAT

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
PETER F. CROSSMAN	C. GERARD DODGE	FRANCIS M. WELD
EDWIN L. DAME	EUGENE E. AILES	ROLLIN C. BORTLE
DERBY FARRINGTON	RALPH G. HUBBELL	SANGER B. STEEL
SAMUEL L. FULLER	GEORGE F. HAWKINS	WILLIAM FERGUSON
WILLIAM J. T. GETTY	FRANCIS H. HOWLAND	JAMES H. SCHMELZEL
CHARLES W. HALSEY	FRANK R. CHAMBERS	FRANCIS GUERRLICH
AUGUST HECKSCHER	ELLIS P. EARLE	CLARENCE H. KELSEY
JAMES M. HOCART	EUGENE E. AILES	ROLLIN C. BORTLE
ALVIN E. IVIE	CLARION B. WINSLOW	HURLBURT B. CUTTING
J. H. WALTER LEMKAU	ABRAM L. BURBANK	ROBERT C. ANDERSON
WILLIAM D. MCGURN	WILLIAM M. HARRIS	JAMES E. BRIGGS
WILLIAM F. NEWBERRY	CLARION B. WINSLOW	BYRON D. MILLER
ALVAN W. PERRY	ALFRED WENDT	WM. CRITTENDEN ADAMS
FRANK PHILLIPS	ELLIS P. EARLE	LOUIS G. KAUFMAN
E. F. GRANT TAFF	GILBERT G. BROWNE	C. GERARD DODGE
ERNEST C. VAN DYKE	EARL E. BEYER	CHARLES T. GWYNNE
ANTON E. WALBRIDGE	JAMES K. ANDREWS	JOHN V. JEWELL
JOHN HALL WATSON	WILLIAM C. DELANOV	W. HUNT HALL
HENRY D. WHITON	JULIAN P. FAIRCHILD	EVERETT B. SWEETZ
ALLAN A. WILSON	EUGENE E. AILES	ROLLIN C. BORTLE

The President appointed Messrs. CHARLES H. STOUT and LOINEL SUTRO as tellers and the vote taken resulted in the election of the candidates named by the Executive Committee.

HUDSON RIVER BRIDGE AT 57TH STREET OPPOSED

DAVID T. WARDEN.—Mr. President, the report on the proposed 57th Street Hudson River Bridge, which was prepared for presentation at the November meeting of the Chamber, was held over for one month at the express desire of some of the members of the Chamber to permit them to present their views to the Committee. It was held over again at the December meeting for another month because of the fact that the Port Authority had scheduled hearings on this very important subject.

These hearings were held, the Port Authority's report has been made to the Governors of the two States, and your Committee has embodied sections of that report in its report.

I offer the report and will simply read the resolution, as copies of the report were sent to all of you in advance of this meeting.

Report

To the Chamber of Commerce:

Your Committee on the Harbor and Shipping prepared the following report opposing a Hudson River Bridge connecting New Jersey with the Island of Manhattan at 57th Street for presentation at the November meeting of this Chamber.

To the Chamber of Commerce:

Your Committee on the Harbor and Shipping has had under consideration the project of the North River Bridge Company to construct a bridge over the Hudson River from 57th Street, New York, to the New Jersey side, and has reached the conclusion that the situation is such that the recommendation of any bridge at this time would be unwise. In its consideration of this project, your Committee has had primarily in mind its effect upon shipping and navigation in New York Harbor.

The site of the bridge is less than two thousand feet from piers at which the largest steamers are berthed. This distance, in our opinion, is not sufficient to make it safe for ships of 900 to 1,000 feet in length to maneuver in the process of docking and undocking, and this is especially so with flood tide. Even though the present outlook is that commercial ships will not be built larger than those now afloat, it cannot be concluded that new developments may not ultimately lead to another movement toward ships even larger than those now afloat. It is quite conceivable that with such a development it may be desirable, even necessary, to berth large ships above the site of the proposed bridge. Today there are a number of vessels which could not pass under the bridge without changing not alone their masts but their funnels as well. The masts are comparatively unimportant but their funnels present a greater problem.

In addition to ships engaged in commerce there is the U. S. Navy to be considered. Structures should not be placed over the Hudson River which might some day interfere with national defense.

Apart from the considerations which might affect navigation after the construction of the bridge is completed, there is the serious impediment to navigation during the period of construction; this period is estimated to be seven years, during a considerable part of which period free passage of the river would be impeded by the necessary barges and other equipment which would be used for transporting the material to the site of the bridge for the purpose of being lifted up into their respective positions in the structure. Such an impediment extending for a period of years would present serious difficulties.

There are other practical matters to be considered in connection with a bridge across the Hudson River at that point: If a bridge were the only method of crossing the river, its construction would be more imperative and the emergency might warrant even certain impediments to water-borne commerce. It has, however, been demonstrated that tunnels can be built successfully under the river for all kinds of traffic, and these can be placed at any particular point where traffic demands, while a bridge can only be built in a certain place, and, owing to engineering problems, wind, strains, etc., it is necessary to construct a bridge of sufficient width and size generally to meet these problems.

The bridge now under consideration proposes thirty-two tracks to be used by automobiles, trucks, street railways, steam railways, besides roadways for pedestrians. It has for some years been known that the question of traffic in New York City has become a most serious problem, and decentralization of traffic appears, therefore, to be an absolute necessity. The bridge, however, would bring about the concentration of thirty-two tracks at one point in Manhattan, which in our opinion could not help but produce a most serious traffic congestion; even a much smaller number of tracks would do so. It is questionable, however, if so many tracks would be needed for many years to come, which raises the question of the improbability of utilizing the bridge to its capacity until our population and traffic caught up with the capacity of the bridge, and this

also raises the question of a large capital investment in advance of the traffic necessities as the bridge must be built to its designed size.

On the other hand, tunnels can be built when and where necessary. With conveniently located tunnels, traffic across the river will not have to travel from various sections of the city to 57th Street, involving a saving of time and economy in transportation costs.

Furthermore, the upkeep of a bridge is understood to be much in excess of the upkeep of tunnels. While it would not be possible to build tunnels for thirty-two tracks at the cost of a bridge of similar capacity, still a large number of tunnels can be built for what this bridge would cost, and they could also be constructed in less time.

The vehicular tunnel (a double tunnel with four tracks) now under construction is expected to be completed in 1925. As on the proposed bridge, tolls will be charged for the use of this tunnel, but it is anticipated that under the scheme of amortization the vehicular tunnel will be paid for within a comparatively few years, and after that it is likely to be free to the public. A free tunnel route under the river would be a serious handicap to the profitable operation of a bridge charging tolls. The success of the vehicular tunnel will more than likely lead to the demand for further tunnels conveniently located to meet the traffic needs and avoid the objections which motor trucks and commercial traffic generally would always raise to extra travel incident to the use of a bridge in a fixed location.

In view of this situation, your Committee does not feel warranted in endorsing the North River Bridge Company's project at this time. The following resolution is therefore offered:

Resolved, That the Chamber of Commerce of the State of New York places itself on record as being unable to recommend at the present time the construction of a bridge across the Hudson River between the Island of Manhattan and the Jersey shore.

One of the reasons for delay in presenting this report has been the fact that it was learned that the Port Authority was to hold a hearing upon this subject. This has taken place and the Port Authority has rendered a formal opinion in a special report to the Governors of New York and New Jersey. From this report the following extracts bearing upon bridges over the Hudson River, are taken:

A study of all the views presented reveals a large majority in favor of additional vehicular tunnels and opposed to any bridges below 170th Street.

There was, however, substantial approval for a highway bridge at a location suggested about West 178th Street, Manhattan.

When formulating the Comprehensive Plan for the reorganization of the terminal freight systems of this port and for the future development of the port, the Commissioners of the Port Authority gave very careful consideration to the bridge proposed by the Hudson River Bridge Corporation for which it had a Federal Charter and which it proposed should be located at West 57th Street. The Commissioners were forced to conclude that the proposed bridge did not form an economic solution in relation to freight handling between New Jersey and Manhattan. Later on the Commissioners again had conferences with the projectors of this bridge and gave careful consideration to the proposals in relation to its facilities for highway traffic, for trunk line passenger trains and for rapid transit commuter service between New York and New Jersey..

In September last the Commissioners were asked by the Board of Army Engineers on Rivers and Harbors, to whom an application had been made by the Hudson River Bridge Corporation for a permit to construct their proposed bridge at West 57th Street, to advise the Board of the Commissioners' opinion relating to this proposal. The Commissioners again gave careful consideration to this matter in all its bearings as relating to the Comprehensive Plan, navigation of the river, railroad passenger and highway facilities, and were compelled to advise the Board of Army Engineers on Rivers and Harbors that in the Commission's opinion

"detailed plans and studies regarding approaches, requirements and methods of handling traffic, and concurrence with municipal officials, should be made and progressed to a much clearer and more definite state than has yet been done before final authority to construct such a bridge at that point is given."

The solution of the problem of motor traffic both for trucks and passenger motors appeared to the Commissioners, especially as relating to Manhattan, to lie in decentralization and distribution rather than in concentrating many lines of traffic at one point.

This principle, while especially applicable to vehicular traffic which had to use the City streets, was also applicable to the concentration of trunk line passenger traffic which would in itself involve a large amount of street traffic by taxicabs and motors to carry passengers to and from such a union passenger station. Some leading Railway Executives expressed the opinion that the establishment of a Union passenger station there would create a new point of congestion which in a few years would be likely to require new methods of relief to be devised.

Conferences with the North Jersey Rapid Transit Commission developed the fact that they did not believe that a bridge at 57th Street would satisfactorily solve their problems.

The Committee on "The Plan of New York and Its Environs" of the Sage Foundation which, with an experienced and competent staff, has been devoting special study to traffic conditions and plans in the large metropolitan area covered in the purview of its work, presented a very important and thoughtful paper at the public hearing, giving forceful reasons why it opposed the construction of a bridge at 57th Street and equally important and logical reasons why it favored the construction of a bridge for vehicular traffic at about 178th Street, and it favored tunnels at points to be determined between the tunnel now under construction and its proposed location for a bridge.

The studies of the staff of the Port Authority indicate that a bridge pouring fourteen to sixteen lanes of traffic into Manhattan at 57th Street would cause intolerable congestion of Manhattan's streets and that truck hauls resulting from the concentration of so many lines of traffic at one crossing of the river would be unduly long on both the New York and New Jersey sides.

The testimony offered regarding bridges, and especially that of the Committee on Plan of New York and Its Environs of the Russell Sage Foundation indicates that a bridge north of 125th Street would serve a large amount of traffic between New Jersey, North Manhattan, Westchester, Bronx, Queens and New England territory.

The Commissioners recommend that preliminary engineering and traffic studies and plans should be promptly undertaken relating to this project, with similar studies relating to tunnels, as these proposed methods of communication are necessarily related in considering the question of which will first be most assuredly self-supporting.

Your Committee on the Harbor and Shipping does not find in the conclusions of the Port Authority any statements inconsistent with its original report opposing this bridge. The construction of a bridge at 178th Street should be possible without interfering with the movement of vessels in the river, which is the problem with which this Committee is especially concerned.

The following amended resolution is therefore offered for your adoption:

Resolved, That the Chamber of Commerce of the State of New York hereby endorses the recommendation of the Port Authority relative to bridges over the Hudson River as set forth above, and is opposed to the construction of the proposed bridge at 57th Street across the Hudson River.

Respectfully submitted,

DAVID T. WARDEN, *Chairman*
CLIFFORD D. MALLORY
LOWELL L. RICHARDS
WILLIAM E. HALM
GEORGE W. BACON
HERBERT B. WALKER

*Of the
Committee on the
Harbor and
Shipping*

NEW YORK, *December 28, 1923.*

Mr. WARDEN.—I move its adoption.

The motion was seconded.

THE PRESIDENT.—Is there any debate?

Debate on Report on the Proposed Hudson River Bridge at 57th Street

LEONOR F. LOREE.—Mr. President, I rise to oppose the motion. I hope it will not be concurred in by the Chamber. I do not agree with the Committee either in its conclusions or in the manner in which the subject is presented.

The Committee begins by laying stress on the fact that the masts of the ships now using this harbor are so high that they could not get under the bridge as proposed, and that that is true also of the funnels of some of the vessels. They think the masts do not present a very serious question, but that the funnels do.

It does not seem to me that either is consequential. When one thinks that the Navy without any trouble handles the turrets of the battleships, with 14-inch guns in the turrets, it would seem as though telescoping the funnels of ships could be accomplished without very much trouble, to take care of the few ships whose funnels are so high that this bridge might constitute an obstacle

to them. It would not seem at all a serious proposition, or one that can be put forward very seriously.

They also call attention to the fact that they would not like to see anything put across the river that might interfere with the national defense. Now, on the Atlantic seaboard we have three great first class naval stations: one at Guantanamo, in the Island of Cuba, one at Norfolk, Virginia, and the third is what the Navy calls the New York-Newport station. The means of approach and the means of communication between New York and Newport are through the East River and Long Island Sound. We know that there are already plenty of bridges over the East River, and I take it that this Chamber would not oppose the construction of three or four more of them, if they were thought desirable. To raise a question of that kind appears inconsequential. It seems to me to be more in the nature of creating atmosphere and sentiment than of any practical considerations. Certainly the Hudson River has no significance in national defense. The Committee says that it has already been demonstrated that tunnels can be built successfully under the river for all kinds of traffic, and then it recommends that tunnels be built, although it says that facilities of this character could not be provided at the same cost and to an equal extent as would be afforded by a bridge.

It is a rather broad and unwarranted assumption to say that it has been demonstrated that tunnels can be built successfully to provide the necessary facilities. I should say, rather, so far from being a matter of demonstration, that it was just a matter of hopeful possibility. We all, I think, or a great many of us, at any rate, who have considered the subject, hope that the opinion of the engineers who have passed on the ventilation of the tunnel project is correct, and that when the one that is being built shall have been completed, it can be used by gasoline motors and that people can ride through it safely, but I fancy that most of us would hesitate about going through ourselves, or sending our families through for the first five or six months, until it had been thoroughly tried out. It is a very costly experiment, and one which we hope will turn out well, but it would be the height of folly to count upon it until we have had a real trial and a thorough demonstration of what it can do. To speak of it now as being demonstrated, when it has not even been tried, is rather stretching the point.

The Committee speaks of the congestion that would be caused by the erection of this proposed bridge, and of the necessity for diffusing and decentralizing traffic. I agree with the latter, but I do not quite see where the former comes in. I have been a student of this terminal situation since about 1881. I began to study it when Mr. CASSATT proposed to come into the Island of Manhattan with the Pennsylvania Railroad by crossing Arthur Kill, the Narrows, and coming up through Brooklyn, crossing

the East River, and establishing a station off Madison Avenue on Murray Hill. Since then various methods have been proposed. Mr. CASSATT worked out the details of a bridge across the Hudson River and a union station on the West Side, to be used, not only by all the roads terminating on the Jersey shore, but by the New York Central as well, for through business, and he presented his plan to all the roads, asking them to become equal partners in the enterprise. At that time I was President of the Baltimore & Ohio Railroad, and that road was the only one that expressed a willingness to join in the project. Failing to get the others to come in, he built the Pennsylvania station at 33rd Street.

I was invited to become a member of the Board of Directors of this Bridge Company, and I declined to do so, because I could not see that it would serve any useful purpose as a freight transportation utility. I think freight can be brought into this Island very well by floats, as is now done; and it can be brought in at half the rise and fall that is necessitated by a bridge, through tunnels electrically operated. So I declined to join in this enterprise because I could not see its usefulness as a freight facility. But as a means of bringing in passengers and as a means of trucking and for pleasure vehicles I think it is of very high importance.

So far from concentrating traffic, it would tend to diffuse it. The station, if put up at about 57th Street, would be used only for long-distance travel, which would relieve the New York Central's present station at 42nd Street and the Pennsylvania's station at 33rd Street from that travel, and permit them to be devoted to local travel, so instead of having two stations with both local and through travel mixed up together, you would have three stations, one for through and interchange business, where that travel would be concentrated, and two through which the local business could be moved.

I do not see why this Chamber is called upon at this time to make a declaration on this subject, which has not been worked out, which has not been brought to a practical issue, for by such action we would only get in the way. One has the uneasy feeling that very skillfully—and I say this in connection with a position that the Chamber took the other day in recommending that the New Jersey Central consolidate with the New York Central—one has the feeling that very skillfully, and somewhat unconsciously, we are being maneuvered into a position where we are furthering private interests rather than public interests, and for all these reasons I hope this Chamber will not concur in the recommendation of the Committee.

ARTHUR S. LELAND.—Mr. President and Gentlemen, I think there is one matter that has not been brought to the attention of the Chamber, and that is relative to these large ocean steamers,

like the *Majestic* and the *Leviathan*. These vessels draw 38 feet 3 inches and 38 feet 5 inches, and it is necessary for them to come in on high tide. On September 3, 1923, when the *Leviathan* came in, we were forced to waste nearly twelve hours in getting into the harbor, for fear that we might strike a subway. This is indeed a very serious matter. As long as these large steamers, drawing more than 38 feet of water, are permitted to come into the harbor, they are liable to strike a subway. Furthermore, with regard to the proposed bridge it seems to me that it might be elevated high enough so that warships could take down their masts safely and run under the bridge. Furthermore, I understand it is proposed that the bridge is to have twelve tracks underneath—and twelve tracks would certainly afford great facilities. It seems to me that if we do have a bridge—and I am not sure that 57th Street is the proper place for it—that a bridge of the character which these plans call for, would produce a much better situation and afford much greater facilities than any vehicular tunnel. Furthermore, we are not thoroughly satisfied yet that it will not be dangerous to permit automobiles to run through these subways because of the monoxide gas which is liable to occur, with the likelihood of people being seriously affected by the gas.

If steamers like the *Majestic* and the *Leviathan* are permitted to come into this harbor and are liable to be held up for nearly twelve hours, in getting in, for fear that they will strike a subway, it seems to me that is something we should think of very seriously.

WILLIAM MCCARROLL.—Mr. President and Gentlemen, having just come in I feel somewhat diffident in speaking now on this report, particularly because of its reference to the Port Authority, which I should desire to support, but I am quite in agreement with the remarks that I have heard Mr. LOREE make. I feel that this is not the time for this Chamber to go on record in opposition to a bridge. In looking over the report, I find that one of the main things emphasized is the great volume of traffic which the new bridge would bring through 57th Street. It seems to me that that argument rather goes to show the necessity for the construction of the bridge, and the desirability of it, rather than against it. Of course it involves the problem of traffic congestion, which now is, as it always will be a serious problem here in Manhattan. But it seems to me that it should not be beyond the range of the engineering skill and ability at our command to adapt surrounding conditions to meet the new situation created by the traffic which would come over the bridge. The location has manifest advantages, notwithstanding the apparent difficulties.

I feel it would be very unfortunate indeed if the Chamber, at this time, should go on record in opposition to the construction of this bridge.

Mr. WARDEN.—Mr. President, I, of course, deeply regret to find myself on the opposite side of a question to Mr. LOREE and Mr. MCCARROLL.

One of the questions raised by Mr. LOREE was the situation in the East River. The East River is no more to be compared to the Hudson River, than a star is to be compared to the sun. It is a narrow river; it has not the depth of water that the North River has; and yet, even with its narrowness and lack of capacity to handle large steamers, I venture to say that if our ancestors who established the old Brooklyn Bridge, were alive today, they would hesitate very seriously in placing structures of that kind even over the East River—at all events at the height at which they were placed, of about 135 feet.

The status of the East River has been definitely fixed, not by its own capacity, but by the fact that these bridges are there, and by the limitation that those bridges have placed upon the East River.

With regard to the question of the Navy of the United States, your Committee is informed by reliable authority that the Navy Department has for years been very much handicapped by having been forced to design their vessels, with their fighting tops, of a height that would pass under the East River bridges. Their ability to meet the conditions that a man-o'-war is expected to meet and to cope with, has been impaired by the design forced upon them by the East River bridges. But even granting that the Navy can take care of that matter, by reducing the height of their fighting tops, which all modern battleships have, your Committee has carefully considered the matter, after consulting eminent engineers and getting all the expert advice it could on the subject, and we sincerely hope that the Chamber will put itself on record today as being opposed to a bridge at 57th Street.

The Port Authority in their report to the Governors of the two States place the location of a bridge across the Hudson River at certainly not below 125th Street. A committee of the Russell Sage Foundation—I have forgotten the full name of it—say, after a careful study, that the best place for a bridge is at 178th Street. I personally should greatly regret to see this Chamber go on record as favoring a bridge at 57th Street, when these large vessels, of which the gentleman on the other side spoke a few moments ago, are now berthing within 2,000 feet, I think, of the site of the proposed bridge. Their draft is not sufficient, so far as I have ever heard, to cause any real anxiety about interference with subways. The principal difficulty is in the height of these vessels, the height of their smokestacks, not their masts, because that is a matter they can easily take care of, but the height of the smokestacks is the great difficulty from an engineering standpoint. It would be a great mistake, in my opinion, to limit in any way full freedom of commerce on the Hudson River above 57th Street.

WILLIAM H. WILLIAMS.—Mr. President, in support of Mr. LOREE, I would make just one suggestion, and that is as to building the bridge further down the river when it is built. It should be brought as far south as possible, because if a bridge is built at 57th Street, in place of 178th Street, a tremendous amount of automobile traffic could be taken care of at the lower point, thus eliminating the necessity of carrying it a mile or two through the congested City of New York. The further south the bridge is built the less congestion will be encountered on the New York side, where traffic congestion is developing into a more terrible menace all the time.

[Cries of question!]

THE PRESIDENT.—The resolution, at the end of the report presented by the Committee on the Harbor and Shipping, reads as follows:

“Resolved, That the Chamber of Commerce of the State of New York hereby endorses the recommendation of the Port Authority relative to bridges over the Hudson River as set forth above, and is opposed to the construction of the proposed bridge at 57th Street across the Hudson River.”

The motion to adopt the resolution was then put to a rising vote, resulting in its adoption by a vote of 60 in favor and 48 against.

ANNOUNCEMENTS

Continued Prosperity in New Year Looked for Because of Confidence in President Coolidge

THE PRESIDENT.—Gentlemen, this is the first meeting at which it has been my privilege to greet you in 1924, and Mr. GWYNNE reminds me that it is customary for the presiding officer to call attention to the fact that this is the first meeting of the year, and, in doing so, I wish to avail myself of the privilege of wishing you all a very happy and prosperous New Year.

As we look back upon 1923, one of the outstanding facts that we remember is the very tragic death of President HARDING, and as we look forward to 1924, with, I believe, a great deal of hope for a continuation of the prosperity and the happiness of the people of this country, I am sure that we feel that after the removal of President HARDING by the hand of death, it is a

matter of very sincere congratulation for us to feel that we have in Washington a man who, though he speaks but seldom, speaks definitely and to the point. (Applause) The atmosphere of quiet dignity which now emanates from Washington is one of the causes which will bring to us, I am sure, a continuation of the happiness and prosperity which we have enjoyed during 1923.

General Haller Visits West Point as Guest of the Chamber

THE PRESIDENT.—I also wish to report to the Chamber that General JOSEF HALLER, who was Commander of the Polish Army, was the guest of the Chamber, on December 12, on a trip to West Point. General HALLER, while in the City, was the guest of the American Legion, primarily, but the Legion suggested that we co-operate with them and arrange a trip to West Point. Mr. GWYNNE, Secretary and Vice-President, and Mr. WARDEN, of the Executive Committee, accompanied the party, and acted as hosts for this Chamber; and I understand it was very interesting and very enjoyable trip.

That concludes the business for the day, which has been an unusually short session.

Remarks of President Bush, Introducing Dr. Oscar Jaszi

We have as our guest, who will speak to us, a gentleman who immediately after the war was one of the cabinet of the Government of Hungary. It was a cabinet that was formed to pick up the reins of government when the Hapsburg dynasty fell, and it existed for a short period in the form of a republic, but ultimately, at the expiration of about six months, I believe, was driven out by the coming in of a Bolshevik regime—a Bolshevik Coup.

Dr. JASZI, who will speak to us, is a Hungarian. His native town, while it had been for many generations a part of Hungary, is now included in the boundaries of Roumania; but, because of his connection with the short-lived republican form of government, he has been an exile from his country for five years, and has made his home in Vienna, and he is here in this country delivering a series of lectures before various universities and other gatherings in different parts of the United States. Before becoming a member of the Hungarian Cabinet, he was a pro-

fessor at one of the Hungarian colleges in Transylvania, later a professor of sociology in the college at Budapest. We have heard, I think, that there are sometimes differences of opinion in that part of the world which is described as the Balkans, and Dr. JASZI will speak in favor of a close economic confederation of that part of Central Europe, for the purpose of avoiding future wars. I am sure that the members of this Chamber are in favor of anything that will enable avoiding future wars, and my own observation in the Balkan States and in Central Europe has convinced me that no matter what the political convictions of one may be, there is a necessity for a close economic union, because their industries have been so separated from their natural sources of supply that unless some confederation of that kind is brought about, the ordinary processes of industry will find, and they are finding now, great difficulty in functioning.

I take great pleasure in introducing to you Dr. OSCAR JASZI. (Applause)

ECONOMIC CONFEDERATION IN CENTRAL EUROPE TO AVOID FUTURE WARS

Address of Dr. Oscar Jaszi, Professor of Sociology

MR. PRESIDENT AND GENTLEMEN OF THE CHAMBER.—I am very much indebted to your President for his kind introductory remarks. I am conscious of the great privilege I enjoy in addressing this most representative gathering of American economic life.

The cause I have the honor to represent before you is a problem to which I have devoted the greatest part of my conscious life. This cause is now almost without champions before international public opinion, owing to the fact that all democratic, progressive, popular and republican forces of Hungary are silenced today. The platform I beg to present to your benevolent consideration is nothing else than the following of the great and powerful lesson the history of your splendid republic has given to humanity. I dare say that this platform represents the great majority of the Hungarian people, the public opinion of the peasants, workers and the creative intelligentsia.

I must begin with the Hungarian problem proper, but I consider my task as much broader and more international. I have always been of the opinion that the Hungarian question is not an internal question of Hungary, but a Danubian question, and, as such, a Central European question, connected by hundreds of ties with the general European situation. Therefore, it is a world problem. As long as the mutilated body of my unhappy

country is constantly agitated by political ghosts and demagogic fever, no real peace or sound economic development is possible in Central Europe as a whole.

The catastrophe which has overtaken Central Europe, and the tragedy of Hungary in particular, was no surprise at all to my friends and myself. For more than two decades we clearly saw and realized that the position of the so-called Dual Monarchy became a desperate one, envenomed by an intolerable atmosphere of race hatred and social oppression, for this Dual Monarchy was in itself an anachronism, a moral impossibility. This artificial framework of a state (Mr. LLOYD GEORGE called rightly a ramshackle empire) gave the power in Austria into the hands of the Hapsburgist army and bureaucracy, and in Hungary to the Magyar feudal classes. This order of things led to a system of Germanization in Austria and Magyarization in Hungary, directed against Czechs, Slovaks, Roumanians, Serbs, Croats, Slovenians, Ruthenians, Poles, Italians—peoples who constituted the large majority of the population. At the same time this system of national oppression was combined, especially in Hungary, with a system of social oppression and an entirely feudal agrarian constitution, which excluded the great majority of the people of all landed property.

My friends and myself denounced this feudal and anachronistic constitution, as we clearly saw that it pushed inevitably toward war and menaced the very foundations of the Hungarian state. Therefore, we advocated for more than two decades a vast scheme of democratic and social reforms, with the goal to rebuild the old antiquated state on a fresh and solid basis.

Unfortunately, our voice was lost in the desert. All our efforts were shattered against the powerful wall of Hungarian feudalism. The Dual Monarchy was compelled, in order to save itself, to adhere closer and closer to the German imperialism.

But sociological laws are natural laws which cannot be suppressed for a long time. The moral atmosphere of the Monarchy became more and more intolerable, and the fanaticism of the irredentistic sentiment burst out in the assassination at Sarajevo of Archduke FRANCIS FERDINAND, which tragic event led directly to the war. The consequences of this war, as you are aware, turned out to be very tragic to Hungary. When her German ally was defeated, the situation of the Monarchy became desperate. Large portions of the army were in national uproar, others were entirely bolshevized, and a terrible vogue of anarchy and national dissolution took the place of order and discipline. In Hungary the superhuman task of saving the country from anarchy and political dismemberment fell to the government of Count KAROLYI. Count KAROLYI and his cabinet clearly saw the impossibility of the task, but we considered it our patriotic duty to attempt the impossible. We introduced the necessary reforms to rebuild the old feudal country on a democratic basis.

Universal suffrage and secret ballot were established, the aristocratic public administration was replaced by a democratic one; but above all we tried to realize the most fundamental reform in order to regenerate Hungary; we began the dismemberment of the big latifundist system and the creation of a new independent farmer class. The initiative in this direction was given by Count KAROLYI himself, one of the richest landlords of Hungary, who surrendered his immense estates spontaneously to the landless peasantry. At the same time we endeavored to reconcile our alien nationalities on the basis of a free national autonomy.

Alas, our efforts came too late. Hungary was dismembered by armed force. We have lost about two-thirds of our territory and fifty-nine per cent. of our population, besides very important Magyar minorities (according to the official figures, about three millions) came under foreign rule. This situation made the position of the pacific KAROLYI government impossible, and it was swept away by an armed coup of the Bolshevists. National humiliation, the territorial dismemberment, the economic blockade of the Entente drew the unhappy country into the arms of the Russian propagandists.

This tragi-comic copy of the Russian experiment was soon overthrown by the invading Roumanian army. The allies, again masters of the country, gave the power to Admiral HORTHY, who, under the pretext of extirpating communism (which was an actual dead dog after the defeat of the Red Army) inaugurated a reign of White Terror, affecting not only Communists, but all progressive, liberal and republican elements.

The worst methods of the Communistic experiment were not only followed, but exaggerated, and at the same time a series of emergency laws were passed in the interest of feudalism and the military dictatorship. Universal suffrage was curtailed and secret ballot was suppressed in the vast majority of our constituencies. The elections were carried on under the sway of the terroristic detachments; an attempt at assassination against the liberal leaders was resorted to; the entire electorate of the country was terrorized by physical brutality of the armed bands fostered by the government; freedom of speech and press became a dead letter, exactly as under the Bolshevik system. Governor HORTHY created a new Order of Knights (so-called heroes) who obtained landed property for military services in a strict feudal spirit. Under the slogan: "Effective defense of the Constitution," a law was passed, which metes out heavy imprisonment to all those who criticise the terroristic system abroad. Another emergency law is in effect against all propaganda for the restoration of a republic. Many leaders of the republican movement are in prison. At the same time the Hapsburgist propaganda is encouraged by the official apparatus and all financial means of the government. The workers of the coal mines were militarized

and became a species of modern bondmen. Speaking generally, I must say that the most elementary liberties of the people are withheld and therefore the true public opinion cannot manifest itself either in the internal or in the external policy.

I will not continue this distressing survey. I will only elucidate before you what this restoration of feudalism really means and what are its effects on the broader problems of Central Europe. This historical anachronism means especially three distinct political endeavors. First, to re-establish the Hapsburg Dynasty and the former territorial integrity of Hungary by preparing for a new war; second, to guarantee the unearned increment of the officers and officials of the pre-war regime; third, to impede all attempts of the people to carry on an agrarian reform aiming at the legal expropriation of the feudal system and the creation of a class of independent farmers, which is a problem of life and death to our modern Hungary.

Taking all these facts into account, you will immediately realize the fatal importance of the Hungarian situation for the peace of Central Europe. Her geographical position, her historical traditions and her prominent cultural activity make Hungary the real center of the Danube basin, the true Archimedian point of the whole situation. The feudal atmosphere, the racial and religious intolerance, continuous hidden preparations for and demagogic menaces with war make not only a consolidation in the Danube basin impossible, but also reinforce all chauvinistic and reactionary as well as dictatorial tendencies in the neighboring countries. This situation is the more dangerous as the whole of Europe reeks with gunpowder and explosive material. The World War has solved important problems. The creation of the new national states was surely a historical necessity. But on the other hand the World War brought forth new and dangerous problems. I have already mentioned the new and large Hungarian irredenta which the peace treaty brought into life. But that is only one feature of the situation. Similar embittered antagonism exists among Germans and Czechs, Ukrainians and Poles and Russians, Germans and Poles, Lithuanians and Poles, Armenians and Turks, Albanians and Jugoslavs, Italians and Serbs, and other more or less important national units.

This envenomed national situation is still more aggravated by the economic situation. The relative national integration caused by the war was followed by a far greater economic disintegration. A great number of new political frontiers, customs barriers and military demarkations were set up, which impede the economic and cultural intercourse between the nations affected. A system of neo-mercantilism arose, which wants to develop every tiny state to be self-supporting and try to exclude all foreign trade. At the same time the system of export and import licenses operates in some countries with tremendous co-efficient of corruption and bureaucratic red tape, under which honest trade and business

enterprise suffer the most. These difficulties are still greater among those smaller economic units which constituted before the war a natural division of labor and a traditional common market. The political dismemberment of these ancient units often led to a serious unemployment or a kind of slow starvation.

No wonder, under these conditions, a new spirit of mediaevalism swept across Europe and the greater part of the old Continent has actually abandoned Parliamentarism and democracy and lives subjected to military dictatorships. Europe is in a state of dissolution. Imagine what would happen in America if on a dismal day the forty-eight States of your great Union—many of them much larger than Hungary or any of the newly formed States—would proclaim the European dogma of national sovereignty, and if New York, Ohio, Texas, Pennsylvania, California and the other States would demand complete independence, would prepare for war against each other, would erect customs barriers, one against the other. A simple consideration of such a change will convince you that this system of the so-called national sovereignty would paralyze, envenom and destroy your mighty and prosperous republic in a few years. Now, this hypothesis, which must seem a feverish dream to you, is the actual reality in Europe.

Everybody feels that this situation becomes daily more and more intolerable, that it must lead to anarchy and economic bankruptcy. The general depression directs European masses principally in two dangerous directions: The one is the way of the various counter-revolutionary dictatorships in Europe, who desire to restore the old order of things by armed force, by the final economic prostration of the victim, by the erection of new buffer states, by a system of secret military alliances, or by the restoration of the old frontiers, pushing the newly liberated nations into the old servitude. The other blind alley is the way of the Russian Bolshevism, which will completely destroy the ancient culture of Europe by civil war and the extirpation of the so-called bourgeoisie.

I am opposed to both these ways because I have seen both of them in operation with my own eyes, have seen their frantic dogmas and terrible harvests, and I place all my hopes on the Anglo-Saxon way, the essence of which is a democratic confederation between democratic peoples. The basis of this system, as far as I see, is to be found in two fundamental institutions: one, a perfectly free trade among all the parties to the confederation; the other, a system of an honest national and cultural autonomy for all the national minorities.

No adequate ethnographical frontiers are possible, or even imaginable, in Central or Eastern Europe. All new arrangements of the old frontiers would mean new national minorities, new irredentas, new suppressions. The problem of the national minorities is not a geographical problem but of cultural liberty

and national autonomy. Such a peaceful economic confederation would eliminate all serious causes of a future conflagration.

This would be the case with Hungary. The present feudal dictatorship made much of the slogan that Hungary in her present form is incapable of life, and only the restoration of her ancient frontiers could help her. But this restoration of her frontiers would immediately lead to a new European war which would mean the entire and final collapse of our civilization. On the other hand, a peaceful and democratic Hungary would not only be capable of life, but could become a very prosperous, even a rich country, a veritable Denmark of the Danube Basin, if she would rebuild her antiquated, feudal agriculture on modern lines. Excellent agricultural experts are of the opinion that the agricultural production of Hungary could easily be doubled by the application of somewhat more rational methods. This reconstruction of her agriculture on the one side, the elimination of all kinds of feudal sinecure incomes on the other, surplus production and parsimony—these are the two principles without which no loan of the world can save Hungary.

That my conclusion is right is sufficiently demonstrated by the fact that a much poorer country than Hungary, which has lost far more of her ancient economic and political resources, Austria, was capable of restoring her vitality by following the peaceful line I have indicated. But a policy of a loyal and peaceful approachment towards the neighboring states, could attain even more—a more just rearrangement of her frontiers and an outlet for Hungary to the sea. President MASARYK of Czecho-Slovakia told a Budapest journalist only recently that if a Hungarian government would come, the peaceful and loyal intentions of which could be believed, he would be inclined to make a spontaneous step towards the revision of the frontiers. On the other hand, some leading Jugo-Slav statesmen assured me that in that case they would efficaciously support the Hungarian effort to get a free port in the Adriatic. At the same time Hungary could rejoice over the advantages of her incomparable geographic situation which would enable her to be a real centerpoint of the world traffic between the East and West, North and South.

But the advantages of such an economic federation would be propitious for all the countries concerned. As these territories of the Danube basin and the Balkans are linked together with powerful economic, geographical and cultural ties, a peaceful co-operation among them seems to be the order of Destiny. The advantages of such an economic and cultural co-operation are so evident that already more than half a century ago LOUIS KOSUTH, the great Hungarian patriot, proclaimed in the dark years of his exile a scheme of a Danube Confederation—which I consider immortal—opposing it to the Dualistic scheme which he regarded as a crime against the Hungarian people. I draw only some economic consequences of the political testament of this great man.

I know the difficulties of this plan are even now almost unsurmountable. Only slowly and step by step can we attain this. Without the elimination of Hungarian feudalism and the adventurous dreams of a Hapsburg restoration, without a complete democratization of Hungary and of all of the neighboring States, no serious step can be made in this direction.

The envenomed, suspicious and hostile atmosphere of present Europe is unsuitable for all creative international work. And that is the reason why I am convinced that Europe will never be restored without the mighty and human aid of the United States. You are unbiased by the political creeds and dogmas of the European Continent. You have the firm intuition of a juvenile civilization. You do not champion either the feudal dogma of the national sovereignty of each petty state, or the proletarian dogma of the Marxist communism. It would be too audacious for a foreigner to give you concrete advice concerning the great issues of your policy. Should you or should you not enter the League, should you or should you not abandon your claims in the reparation question? What I clearly see is but this: Europe of today is so demoralized, so disturbed by race hatred, by imperialistic rivalries, that we cannot settle our problems without the benevolent, conscious, far-sighted and equitable interference of a power who would stand *au-dessus de la mêlée*, who would regard things from a broad humanitarian point of view. I think the United States is the only world power fit for this task at the present moment.

GOETHE, the greatest German poet, the first good European, in the Nietzschean sense of the word, had prophetically grasped the world-saving new attitude of the American people almost a century ago in these remarkable and long-forgotten rhymes:

America, thou art better off
Than our Continent, this old one;
Thou hast no decayed castles
And no dungeons, carved in basalts.

Thou art undisturbed in thy soul
When time is urging
By useless reminder
And futile struggles.

(Applause)

THE PRESIDENT.—The meeting stands adjourned.

Special Meeting Thursday, January 24, 1924

A special meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, January 24th, 1924, at twelve o'clock noon.

Present

IRVING T. BUSH, *President*

WELDING RING, *Vice-President*

CHARLES T. GWYNNE, *Secretary*

and three hundred and thirty-one other members of the Chamber.

Guests

Hon. DAVID A. REED, United States Senator from Pennsylvania, and Sir JOHN HENRY, of Great Britain, were the guests of the Chamber and occupied seats on the right and left of the President.

Call for the Meeting

The request for the special meeting of the Chamber was as follows:

New York, January 10th, 1924.

IRVING T. BUSH, Esq., President,

Chamber of Commerce.

Dear Mr. BUSH:

We, the undersigned members of the Chamber of Commerce of the State of New York, respectfully request that you call a special meeting of the Chamber on Thursday, January 24th, at 12 o'clock noon, to hear an address by the Honorable DAVID A. REED, United States Senator from Pennsylvania, on the Prospects for Tax Reduction.

Respectfully yours,

WILLIAM MCCARROLL
JOHN V. JEWELL
CHARLES W. LEAVITT
DAVID T. WARDEN
ROBERT W. SWANSON
CHARLES D. ROBBINS
WILLIAM SIMMONS

WILLIAM M. HARRIS
JOHN L. SWAN
ALEX. L. DOMMERICH
ALEXANDER TORRANCE
WILLIAM I. ROSENFELD
ROBERT B. FREEMAN

THE PRESIDENT.—The meeting will come to order, please. This is a special meeting of the Chamber which under our by-laws must be called by the officers if the requisite number of members sign a request, and I call your attention to the fact that under our by-laws no business can be considered at this meeting except that for which it was called. It is called for the purpose of hearing Senator REED, so we are limited to that.

Radio Broadcasting of Proceedings

THE PRESIDENT.—Arrangements have been made for broadcasting Senator REED's address through what is designated by the mysterious letters "WEAF," which I believe mean the American Telephone and Telegraph Company, and it is necessary for us to halt just a moment while the adjustment of the apparatus is being made.

REMARKS OF PRESIDENT BUSH, INTRODUCING SENATOR REED

THE PRESIDENT.—It is so easy to criticize and misunderstand the motives of others in this world, which seems to be stumbling along on its misunderstandings instead of marching as it should on its understandings, that I do not wonder that the motives of the members of this Chamber in advocating reduction of taxation are misunderstood by some.

I suppose there is no other body of men in these United States that includes in its membership so many men who are charged with the responsibility of conducting industry, and it is a very real responsibility. It is a responsibility not only to the stockholders who own those industries, but it is a responsibility to the men who work in them. I spoke last night at the same table with Secretary of Labor DAVIS and he referred to capital and labor as being like the Siamese twins, who recently died in Chicago, being held together by the same nerve forces and kept alive by the same blood supply; when one died, both died.

The members of this Chamber are deeply conscious of the fact that the growth and development of this country, from its small beginning to the position which it now occupies as the greatest country in the world, has not been an accident but has been because courage was given to capital and because men were

willing to take unusual risks. This courage and the taking of these risks have partly opened the resources of this great country, but the work is only partly done. This nation today of one hundred millions will some day be three hundred millions, and if these added millions are to have employment and if the industries of the country are to expand as they should it is important that the courage of capital and the courage of the leadership of this country be not killed.

Probably every man in this room has had the same experience some time within recent years when talking with some man about making an investment in a business enterprise of having him say, "Why should I take the risk? If it succeeds I would receive only a small part of the profits, and if the enterprise fails all would be lost." And he usually ends by saying, "I prefer a sound investment without the risk."

The members of this Chamber are, of course, human, and they would like to see a lessening of the burden of taxation which is upon their shoulders. But far beyond that selfish motive is the responsibility for the great interests which are represented by the membership of this Chamber. And it is the knowledge that the present taxation of this country is killing that courage, which inspires the hope that a policy of taxation will be adopted which will give to the young men of today and of the future the same opportunities which the young men of our fathers' time had, and that the priceless heritage of courage and opportunity and initiative of the people of this great country shall be preserved.

Senator REED has come from Washington today to talk to us about this problem of taxation. It is hardly necessary for me to say anything to you in introducing him. He is, I believe, the one member of the Senate of the United States who saw active service with the fighting forces in France. (Applause) And he therefore has a peculiar right to express his views, not only upon the question of taxation but upon that other question which is so closely involved with it, the question of the bonus to ex-service men.

I take great pleasure in presenting to you Senator REED of Pennsylvania. (Applause)

THE PROSPECTS FOR TAX REDUCTION

Address of Honorable David A. Reed, United States Senator
From Pennsylvania

MR. PRESIDENT AND GENTLEMEN OF THE CHAMBER OF COMMERCE.—I appear before you with that diffidence which is appropriate to a country politician in the presence of the lords of the Nation's business. But it occurs to me that perhaps there may be something useful in giving the views of one who stands midway between the wolves of Wall Street and that abode of all the virtues and of all piety which we find in the Middle West.

I do not think that this question of tax reduction is so narrow that it can be considered solely from the point of view of those who control the vast aggregations of capital which lie behind the business of the Nation. I think that the question goes deeper even than that, that it goes to the welfare and the happiness and the prosperity of every man in America, whether he calls himself a capitalist or regards himself as the most oppressed of all the poverty-stricken individuals in this land. The question touches every American and every member of every American family, and not merely the men who make out the checks for the large payments of tax.

The safety of America lies not so much in our written Constitution as in the sound common sense that gave birth to that Constitution and the sound common sense that prevails throughout our country and vitalizes that Constitution today. In that sound common sense lies the remedy for our present tax problems, if there is a remedy. It is to the sound common sense of all Americans that appeal must be made, and from it that the remedy must rise.

I often think of American public opinion as being like a carrier pigeon that wheels around when it is first released and faces in all directions, but ultimately, through some miracle that we cannot call reasoning and cannot exactly call instinct, heads in the right direction and never changes till it reaches its goal. I believe that today that carrier pigeon is headed in the right direction on this question of taxation. There has gradually come throughout the country a realization that the great drain of taxes which flows into the American national treasury comes from all our people; a realization that somewhere between the earning of that family's livelihood and the spending of those earnings there is an invisible hand which is taking away from the comfort and the welfare of each American family about \$140 each year. Americans gradually have come to see that that affects each of us and not merely a few rich men who are paying surtaxes. They have come to see that the rent that each family pays, be it ever so little, is

a larger rent because the owner of the land on which a tenement or a house may be built has greater taxes to pay to some taxing authority. The man who today pays \$25 each month in rent is beginning to realize that that tax burden rests on him, and that if it were not for this greedy drain out of the people into the national treasury his rent would be distinctly lower, and that he would be getting the same accommodation for \$20, let us say. He is beginning to realize, too, that when he buys a pair of shoes for one of the youngsters that out of the price that he pays for those shoes is paid the tax of the cattle raiser, the tax of the railroad that carries that cattle to the slaughter house, the tax of the packer who kills the cattle and sells the hide, the tax of the railroad that carries the hide to the tanner, the tax of the tanner, the tax of the manufacturer of the shoes, and the tax of the retailer, so that when all is said and done the price he pays for that pair of shoes for the youngster at home is very largely made up of a lot of invisible taxes which in the last analysis he and nobody else is paying.

That impression has begun to spread through the national conscience. Maybe it is trite for me to say these things to you. You have all realized them for years, but the great American people has not realized them for years, and it is the most hopeful sign at the present time that they are beginning to realize them now.

Out in the Middle West, out in the great prairies of Dakota and Nebraska and Kansas, where the greatest part of our wheat is grown, men have begun to see that a large part of their day's work is being invisibly absorbed, somehow, and they have decided now that they know where it is going—it is being absorbed by the tax gatherer. The farmer today is working as hard as he ever did in his history. The men in the mills today are working as hard as ever they did, and yet there is less coming back to them in supplies and comfort for their families than would be the case if the whole Nation, and each of the States, and each of its Cities, was not draining away too much for what is largely an unnecessary expenditure.

People have begun to see that, and because they have, because the sound common sense of America is aroused, we can look forward with optimism to a reduction of that burden, because what the people demand they are generally going to get.

In my experience in legislative work I have never known so widespread or so insistent a demand coming from the people for any particular measure of legislation as is coming out this minute from all parts of the United States for a prompt and radical reduction in the tax burden levied by the Nation.

There can be just one answer to that. The demand will be satisfied, it must be satisfied, and there is every reason for our being optimistic in feeling that the result will be prompt.

But then you say, "Why all this discussion that fills the newspapers? Why is it a debatable question in Congress?" Because, gentlemen, the tax proposal as it comes before Congress does not call for a mere "yes" or "no" on a single question that can be answered categorically. It comes in the form of a large book, a revision of the entire tax law. Voltaire once said that there is no burden of any tax law which is comparable with the burden of having to read it. (Laughter)

And that is particularly true of this one, because it is many hundreds of pages long. It is written by a scholar who knew some other language than English. (Laughter) It would be very much improved if it could be translated into common, understandable, white man's English. It is a most complicated problem, and I hope that you will have more sympathy with the Committees of the Congress that have to consider it. The question is not susceptible of a categorical yes or no, but must have lots of study; each detail in it will have to be pored over at great length. So I beg you to have patience with the Congress that has assumed the task.

There is another understanding that is beginning to spread throughout the population, and that is with regard to the surtaxes. Originally, I think, it was thought that the surtaxes would be paid only by men of vast wealth who did not need the money, anyway; that they would pay it because they had to pay it and could find no escape, and that all the rest of the country could look on more or less apathetically while they were making out their checks from this excess of their incomes. But now there is coming a new realization about that. People are beginning to see, and the understanding is spreading very generally, that riches always flee from unfair burdens.

When they look at the figures they find that there were 950 millions of income in 1916 received by men who had over \$300,000 a year and therefore subject to the highest brackets. They find now that that money has taken flight, and that last year out of the whole of the United States there was returned only 150 millions of that same income by men in that same class. The amount of taxable invested income, or taxable income from investments, subject to the highest surtaxes, has fled silently but very effectively; and that decrease has been constant.

So that today the tax gatherer finds within his fingers and subject to tax scarcely more than fifteen per cent. of the amount that he found six years before. You can see what an effect that has upon the revenue from those surtaxes. People discover now that by means of "registering off losses,"

by means of charging depreciation, by means of investing in tax-free bonds and the other devices that are legally open to very rich men, the surtaxes are in the main not reaching the rich men of the country. They are coming to see generally that the people who are being crucified by these high surtaxes are the men who work, the men of talent, who either by professional service or by greater artistic talent, or by a superb ability for upbuilding, create an "exertion income," if it can be called that. They see that these high surtaxes which we aimed at the millionaires of the country, the people of great invested wealth, are missing their target entirely; that the bolt is going over the shoulders of those men and is striking the men whose talent, above all things, we ought to encourage if America is to advance. (Applause)

It is beginning to be understood, particularly in Congress, that it is not the men of long-held fortunes, like the Rockefellers, the Vanderbilts, and such well-known families, who are paying those taxes, but it is the Carusos, the doctors like the Mayos, the architects like Cramm, and Gilbert, the writers like Mrs. Rinehart, the engineers like Goethals, the people who are working for every cent they get and who have no means of escape because there is no device yet for creating tax-free brains.

That is going to have its effect and already in Congress we find even the most radical of men conceding that the present schedule of surtaxes is too high. We find a disposition to play politics with the surtaxes. I'm afraid that will always be there. To a great many men in Congress, you know, governmental action is merely one phase of a battle between rich and poor. If it ever becomes a battle between rich and poor, we would land where France did in the revolution, or Russia in her last overturn, and if our common sense should slip in some way so that we subscribe to that doctrine, we can't stop anywhere short of confiscation of all property. Of course we all know that in a country where sanity prevails as it does in this country, such an outcome is impossible. But there always will be a few men who will talk in that key. I beg you not to allow yourselves to be too much disturbed by their antics because that kind of talk falls on deaf ears in a sane land like ours.

Gentlemen, be patient with your Congressmen, but by all means write to them. Such an outpouring of sentiment, I think, has never been seen as we have witnessed in the last two months. In my own poor little office the last tally showed that we had received and replied to 4,700 odd letters on the subject of reduction of taxes in the last six weeks, and that is not easy to do when the Government permits you only a couple of stenographers. I am sure that if there is one subject my stenographers never want to hear of again, it is taxes. But that has had its effect and I ask you in all earnestness if any of you have not yet written your Congressmen and your Senators, to do so, and

to write your own letter. Don't sign somebody else's printed form, because that is worse than useless. Don't sign somebody else's post card and send it off mechanically, because those things hurt more than they help. In my office I have received nearly a thousand letters written on the same typewriter in the same words, each of them enclosed in an envelope bearing the name of the same corporation. It is obvious that the man who handed out pay on Saturday night handed out a pen and one of these blanks. Nobody pays any attention to that kind of thing, but your Congressmen down there are intelligent, patriotic men who sincerely want to do what the people at home reasonably ask of them, and if any of you have not written your feelings to your Congressman, for Heaven's sake do it and do it now.

Now, about the bonus. I think there has been a distinct change in sentiment on the subject of soldier's bonus within the past year and a half, since the bill was last in Congress. I believe that that change is greater than the votes so far apparent in Congress would indicate. I believe that there has come throughout the country a general realization that, while this country owes a lot better care than she has given to the men who suffered from their war service, there is no obligation, in all fairness, to give a bonus to able-bodied soldiers who did not suffer as a result of their wartime experience. (Applause)

And there again I ask your sympathy for the men who were in the army and who are now demanding a bonus. They ask it because they see only a part of the picture. In their minds there is the contrast between the soldier who worked an indefinite number of hours every day, and the loafer in the shipyard who scarcely worked at all and got ridiculous wages; there is the contrast between themselves and the men who worked on the railroads who got a raise in pay every time they asked and sometimes when they didn't; there is the contrast between them and the people they called the profiteers. They think, without knowing the details, that a large part of the stay-at-home population of the United States became millionaires as a result of wartime contracts. It is natural, thinking that way, that they should ask a bonus. What they don't see is the fact that the vast majority of Americans were poorer when the war was over than when it started; the fact that the cost of living went up for everybody and the income of most people did not go up. What they don't see, probably because it has not been called to their attention, is that there is a great mass of American people, like the retired school teachers, like the widows and the old people, who were living on invested income, very moderate, small incomes, just barely sufficient for their keep. They don't see that those people suffered cruelly as a result of the advance in cost and the failure of their income to advance.

But the soldiers will see, if it is fairly presented to them, that to grant this great gift, now, to all service men indiscriminately, will sadly punish the great mass of our American people who were patriotic during the war and who got no advantage whatever out of it.

The soldiers will see that. Many of them do already, and among them themselves there has been a marked change in sentiment regarding this indiscriminate bonus that so many of them supported enthusiastically a year and a half ago.

In one division which just finished its convention down at Atlantic City there were three thousand men present who decided with practical unanimity that none of them would keep any bonus that was offered to them, but that the whole amount should be put in a common fund for the benefit of the men who were wounded or disabled and the families of those who were killed.

If that is their feeling, I think the country ought to adopt their idea. We should make it plain that there is nothing too much that we can do for our disabled men, but there is nothing that we should do in all fairness for the men who were not disabled.

Now, one word on that. I am firmly opposed to this indiscriminate bonus. I spoke against it and voted against it a year and a half ago when it came up in the Senate. (Applause) But if there is one thing that makes me want to vote for it, it is some of the arguments that come in against it. Don't write letters down there calling the proponents of the bonus traitors to our country, because they are not. Don't write letters calling them raiders of their country's funds. They are not. They are asking what seems to them to be a reasonable payment, and we won't make our best headway by denouncing them personally. That kind of denunciation hurts more than it helps, and it is not fair. It is not just to the men who are asking this. We must remember that they are patriotic Americans, and they have proved their patriotism, and by criticism of them does not lie the best opposition to their proposal.

Now, gentlemen, I think I have exceeded my time, but I want to say in closing that the prospects of tax reduction are good and are obvious to all of us, but the amount of tax reduction is not obvious to anybody. The President is standing firmly for the reductions recommended by Mr. MELLON and I hope he will get them. (Applause) But remember that this session is only one rung in a long ladder, that the common sense of America is going to continue to demand reduction. If we get a reduction this time it is only one of many. The country is going to continue to demand more of it until the time comes when there will not be a ball and chain on the men of America who are willing to work—and that is what the present tax laws are. Thank you very much. (Prolonged applause)

THE PRESIDENT.—This Chamber has always stood for doing everything possible for those who were wounded or who suffered during the war. Nothing is too great to be done for them. But I think the feeling of the members of this Chamber toward those who performed their fine service and made their wonderful record, but came back sound and whole, is well expressed by an associate of Senator REED in the Senate, Senator BORAH, who, in speaking here not long ago, said that if he had been one of those who had given this magnificent service in France and had achieved this magnificent record, he would consider it an insult if there should be written across that record the words "Adjusted compensation."

We will adjourn, gentlemen.

Regular Meeting, Thursday, February 7, 1924

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, February 7th, 1924, at 12 o'clock noon.

Present

IRVING T. BUSH, *President*
WELDING RING, *Vice-President*
CHARLES T. GWYNNE, *Secretary*

and two hundred and fifty-eight other members of the Chamber.

Guests

Honorable JAMES P. GOODRICH, former Governor of Indiana, was present as a guest and occupied a seat on the dais. Honorable HERBERT L. BRIDGMAN, of the Board of Regents of the University of the State of New York, was also present as a guest.

Minutes

The minutes of the regular meeting of January 3rd and the special meeting of January 24th were read and approved.

NOMINATIONS FOR MEMBERSHIP

FREDERICK H. ECKER, Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
LORENZO BENEDICT	JAMES C. ELMS	EDWARD O. STANLEY
AMBROSE W. BENKERT	WARREN J. HOYSRADT	BERNARD J. LARKIN
HAROLD D. BENTLEY	WARREN J. HOYSRADT	ROBERT A. BOULD
EDWIN M. BEROLZHEIMER	ALFRED C. BEROLZHEIMER	CHAS. L. BERNHEIMER
WILLIAM S. BIGELOW	E. S. H. PENDERGAST	HEARN W. STREAT
F. MALBONE BLODGET	C. EVERETT BACON	RODNEY HITT
JOHN R. BRANDON	WELLINGTON E. BULL	GEORGE P. RUTHERFORD
AARON COLEMAN	MORRIS MAYER	RALPH J. JACOBS
NATHAN COLEMAN	MORRIS MAYER	RALPH J. JACOBS
JOHN SPEED ELLIOTT	WARREN J. HOYSRADT	SENECA D. ELDREDGE

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
ROBERT W. GREEN	JOHN V. JEWELL	JAMES K. ANDREWS
JOHN D. HAGE	EDWARD W. BROWN	EDWARD R. CARHART
SYDNEY H. HERMAN	MORRIS MAYER	HENRY OLLESHEIMER
WILLIAM V. HIGGINS	WILLIAM FERGUSON	FRANCIS D. BARTOW
JAMES F. HUGHES	ARTHUR F. ELLIOT	ALBERT McCLAVE
JOSEPH T. KELLY	RICHARD ROELOFS, JR.	LEONARD D. NEWBORG
RUSSELL C. LEFFINGWELL	THOMAS W. LAMONT	HOWARD C. SMITH
JACOB F. LOEB	MORRIS MAYER	LEWIS L. CLARKE
HENRY P. MCKENNEY	WILLIAM L. DETMOLD	ELKAN NAUMBURG
JAY R. MONROE	JAMES C. ELMS	EDWARD O. STANLEY
WM. CARD MOORE	MASON B. STARRING, JR.	DEAN MATHEY
ALFRED H. NEWBURGER	MORRIS MAYER	LEWIS L. CLARKE
JACQUES C. NORDEMAN	MORRIS MAYER	RIDLEY WATTS
J. EDWARD OGDEN	DEWITT VAN BUSKIRK	CHRISTIAN B. ZABRISKIE
CHARLES F. PARK, JR.	WARREN J. HOYSRADT	GROSVENOR FARWELL
EDWARD E. PORTER	DERBY FARRINGTON	RALPH G. HUBBELL
EDWARD PRIZER	EDWARD O. STANLEY	JAMES C. ELMS
DONALD S. ROGERS	RODNEY HITT	GROSVENOR FARWELL
HENRY SEARING	LOUIS V. HUBBARD	DAVID T. WARDEN
EDWARD J. SISLEY	JULIAN S. MYRICK	LOUIS A. CERF
MYRON C. TAYLOR	THOMAS W. LAMONT	FRANCIS L. HINE
JAMES S. WOLF	MORRIS MAYER	LIONEL SUTRO

For Non-Resident Member

<i>Candidate</i>	<i>Nominated by</i>	<i>Seconded by</i>
HARRY H. THOMAS	JAMES C. ELMS	EDWARD O. STANLEY

The President appointed Messrs. CHARLES H. STOUT and LIONEL SUTRO as tellers, and the vote taken resulted in the election of the candidates named by the Executive Committee.

RELIEF FOR DISABLED ARMY OFFICERS IN THE LATE WORLD WAR

Mr. ECKER, for the Executive Committee, presented the following report and resolutions:

To the Chamber of Commerce:

The Executive Committee of the Chamber at its December meeting appointed, as a sub-committee, HOWARD C. SMITH, CLEVELAND E. DODGE and ALFRED WENDT to consider and report upon a request from the Military Order of the World War that the Chamber support the proposed legislation to entitle the disabled emergency officers of the World War to the same privileges and emoluments as are now given to disabled officers of the regular army. The sub-committee carefully considered the sub-

ject and made the following report, which the Executive Committee now recommends to the Chamber for adoption:

The Chamber of Commerce of the State of New York has repeatedly endorsed the idea that everything possible should be done for the disabled veterans of the World War, and your Committee individually and collectively support this proposition most heartily.

At first appearance the request of the Military Order would seem to come within the scope of the attitude of the Chamber, but after carefully considering the proposed legislation, in the opinion of your Committee, it would create an injustice and inequality for World War veterans that has never been contemplated by any action of the Chamber and is wholly un-American, and, furthermore, with the existing provisions for the care of disabled cases through the Veterans' Bureau, such additional legislation is unnecessary.

In the first place, the proposed Bill provides that emergency officers shall receive the same recognition on the Retired List as regular army officers with retiring pay rated on rank. An army officer's rank bears a very close relation to his length of service in the army, and the retirement provisions for regular army officers is an immediate factor in keeping officers in the army at a rate of pay materially lower than they could receive in civil life. Furthermore, during the war many regular army officers were temporarily advanced in rank, and after the war returned to their former rank. Their retirement pay is based on the lower rank and not on the higher rank due to the emergency of the war. The emergency army officers hold the emergency rank without regard to length of service, and men received Lieutenants', Captains' and Majors' commissions, after Plattsburg training, irrespective of their length of service. It would be palpably unjust to give men with practically equal service and sacrifice totally different retirement allowances or to give them retirement allowances based on emergency rank which are denied to regular army officers.

In Section 2 of the Selective Service Act it is stated that "the personnel inducted into Military Service thereunder shall be subject to laws and regulations governing the regular army so far as such laws and regulations are applicable to persons *whose retention in the military service on the active or retired list is not contemplated.*" This clearly indicates that the law which created emergency officers did not contemplate the provisions contained in the proposed legislation, and that the United States Government did not place emergency officers on the same footing as the regular army officers.

Reference has been made above to the Veterans' Bureau. Under existing laws covering this Bureau, compensation allow-

ance is provided for disabled emergency officers, and if the amount or amounts now provided by Congress are inadequate to meet the proper care of these disabled officers, your Committee would strongly urge that Congress make additional provisions through its appropriations for the work of this Bureau.

In the emergency which brought about the creation of a national army many enlisted men entered the service and sacrificed an earning ability in civil life far in excess of the earning ability of their emergency officers, yet this Bill would create a preference for the officers against the enlisted men without regard to the individual sacrifices made or the risk of life and limb assumed by the individual in the war. Again, the regular army officer has given his whole life to a special training for army service and is largely unprepared to enter civil life in competition with men whose education and training have been for the purpose of preparing them for civil work. It is only just that if disabled in service the army officer should receive retirement allowances. Many disabled emergency officers would not suffer in their earning ability in civil life because of their disability, and, therefore, the same justification for retirement allowance does not exist. When such justification is found to exist, however, the provisions of the law under which the Veterans' Bureau acts provide adequate means of caring for such cases.

It is stated by those who are seeking to secure the passage of the special legislation referred to that only 1,800 emergency officers are affected, and that this number would be the limit to which the special privileges of this legislation could be granted. Your Committee cannot accept this expression of opinion as final. If the principles included in this proposed legislation become a law, there is no reason why it should not be applied also to the enlisted men of the World War and the veterans both officers and enlisted men of the Spanish War, and when consideration is given to these possibilities the number of men involved and the amount involved would be vastly greater than contemplated by those who favor this special legislation.

The fact that the privileges and emoluments belonging to the regular officers of the Navy and Marine Corps have by law been granted to the disabled emergency officers in these branches of the service does not *ipso facto* justify the extension of that idea to the army branch of the service on the ground that two wrongs do not make a right, and your Committee is not impressed with that argument. Your Committee, therefore, respectfully suggests that the following resolutions be presented to the Chamber for its consideration:

Resolved, That the Chamber of Commerce of the State of New York urges upon the Veterans' Bureau of the United

States that full and adequate compensation should be paid to disabled emergency army officers, and if existing appropriations do not provide that sufficient compensation be paid, the Chamber urges upon Congress that adequate appropriations be made to that end; and, be it further

Resolved, That the Chamber of Commerce of the State of New York is opposed to the passage by Congress of legislation entitling disabled emergency officers of the World War to the same privileges and emoluments as are provided for its disabled officers of the regular army, and hereby authorizes its officers and Executive Committee to present its views and to represent the Chamber in the furtherance of these views.

The report and resolutions were adopted unanimously.

THE PRESIDENT.—At this point I had expected to recognize Mr. ECKER with the view to the introduction of a motion that the regular order of business be suspended for the purpose of rendering a tribute to the memory of ex-President WILSON; but as the members are so slow in gathering today, with your permission, that action will be deferred until there are more present.

REDUCTION OF PASSPORT FEES RECOMMENDED

WILLIAM E. PECK, Chairman of the Committee on Foreign Commerce and the Revenue Laws, presented the following report and moved its adoption:

To the Chamber of Commerce:

Your Committee on Foreign Commerce and the Revenue Laws recommends the passage of the Mills Bill, H. R. 648, reducing passport fees from \$10 to \$5. On July 1st, 1920, the fee in this country was raised to the present \$10 by increasing the fee for issuing the passport from \$1 to \$9 in addition to a fee of \$1 for execution. This action by the United States was followed by other countries raising their charges for Americans only to approximately the same figure, so that an American going to Italy by way of France and Belgium paid \$40 in passport fees. However, among themselves European countries have quite generally abolished passport fees.

Last year at the Congress of the International Chamber of Commerce in Rome a proposal was approved to abolish all passport visés. The delegates believed these are a serious hindrance to travel. It is a great annoyance without reasonable justification to require a traveler, before he sets out upon his journey, to

obtain a visé from a consular representative of each country through which he expects to pass, no matter how short a time he plans to spend therein. The passport requirements were largely placed during the war, and the reason for them no longer exists. Commerce would be benefited if the visés were eliminated. Not only does each visé cost a sizable fee, but to secure it involves much time and red tape. No country charged more than a nominal sum for a visé until America began the practice, and in fact Americans are practically the only ones now to pay European governments more than a nominal fee. The additional revenue which the United States Government receives from high passport fees does not justify their existence. They hamper international trade, produce bad blood and petty irritations, and are not at all in keeping with international harmony.

Your Committee therefore offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York hereby places itself on record as opposed to high passport fees, and advocates the passage of H. R. 648, now in Congress, or similar legislation to reduce passport charges.

Respectfully submitted,

The report and resolution were unanimously adopted.

UNIFORM LAWS REGULATING SALES AND CONTRACTS TO SELL IN INTERSTATE AND FOREIGN COMMERCE

Mr. PECK, on behalf of the Committee on Foreign Commerce and the Revenue Laws, also presented the following report, which was adopted unanimously:

To the Chamber of Commerce:

Your Committee on Foreign Commerce and the Revenue Laws is in favor of the passage of a Federal law which shall produce uniformity in the laws applying to sales and contracts to sell in interstate and foreign commerce, and in general endorses Bill S. 1006 in the Senate, known as H. F. 747 in the House. This

measure constitutes about twelve thousand five hundred words, and sets forth laws which shall prevail in interstate and foreign commerce transactions of purchase and sale. It provides a uniform law for all states so far as extraterritorial business is concerned. Among the subjects covered are the Statutes of Frauds; Existing and Future Goods; Destruction of Goods Sold or Contracted to be Sold; Definition or Ascertainment of Price, Warranties of Various Kinds; Passing of Title; Rules for Ascertaining Intention; Reservation of Right of Possession or Property When Goods are Shipped; Sale by Auction; Rights and Duties of Sellers and Buyers in Matters of Delivery, Shipment and Acceptance; Legal Interpretation When Contract to the Contrary is not Shown; Meaning of Terms F. O. B., C. I. F., C. A. C., etc.; Definition of and Remedies of Unpaid Sellers; Liens; Ways of Exercising the Right to Stop Goods in Transit; Rescinding Sales, etc., etc.

This Chamber has been in sympathy with the various efforts to secure uniformity in laws throughout the United States, especially in respect to negotiable instruments, warehouse receipts, bills of lading, etc. At the monthly meeting on January 5th, 1922, a report was adopted recommending that uniform laws affecting corporations of other states enacted by the various states, as this would facilitate the business of the nation and eliminate needless expenses now borne by corporations doing business outside their home state. For instance, the great divergence merely in the time and the nature of annual reports to the various state authorities, is a source of great expense and needless waste in doing business.

As a vast volume of merchandise goes into interstate and foreign commerce, a uniform understanding of the legal rules affecting sales and purchase would be of great benefit to American commerce. The bill now in Congress proposes to apply the law in effect for twelve or more years in approximately twenty-five of our largest commercial states. It has had the careful study and criticism of many of the best legal minds, lawyers and jurists in the country. Its enactment would not only promote commerce by bringing about unity of law in transactions between citizens of different states, but also would be a great move toward uniformity of understanding of all commercial transactions, both domestic and foreign.

Business men cannot be experts upon the various laws prevailing in all our different states. A dispute may arise over the mere determination of the state under which the sale was made. If a sale is made in Missouri the law applied may be quite different from that which prevails in New York. With a Federal Sales Act there would be no disputes as to the place of the sale, and business men engaged in interstate trade could readily ascertain the laws applying to their sales and purchases.

Your Committee feels that a Federal Sales Act is comparable in importance to the Federal bankruptcy laws or the uniform regulations brought about by the Interstate Commerce Commission in bills of lading, etc., and offers the following resolution for your adoption:

Resolved, That the Chamber of Commerce of the State of New York recommends the passage of S. 1006, H. R. 747, or similar legislation, to create uniformity of law throughout the United States in respect to sales and contracts to sell in interstate and foreign commerce; and, be it further

Resolved, That copies of this report be sent to the President, members of Congress, and commercial organizations, and that the Committee on Foreign Commerce and the Revenue Laws be authorized to appear at hearings to advocate these conclusions.

Respectfully submitted,

SINGLE EXECUTIVE FOR U. S. SHIPPING BOARD RECOMMENDED

DAVID T. WARDEN, Chairman of the Committee on the Harbor and Shipping, offered the following preamble and resolutions, which were unanimously adopted:

To the Chamber of Commerce:

Whereas, It is generally recognized in the administration of all business and commercial affairs and Government Departments that the best results are obtainable by one executive head; and

Whereas, Experience has shown that the division of power in the United States Shipping Board resulting from seven commissioners with equal responsibility is a source of weakness, and has apparently proven to be most costly; and

Whereas, The successful administration of a Merchant Fleet calls for long practical experience and the highest ability together

with the exercise of the most modern business-like methods; therefore be it

Resolved, That the Chamber of Commerce of the State of New York strongly urges the passage of such legislation as will place all powers now vested in the United States Shipping Board in a single executive head who shall be responsible only to the President of the United States; and, be it further

Resolved, That copies of this preamble and resolution be sent to the President and that the Committee on the Harbor and Shipping be authorized to appear at hearings and otherwise advocate legislation of this character.

Respectfully submitted,

NEW YORK, *January 12, 1924.*

GOVERNMENT PURCHASE OF CAPE COD CANAL FAVORED

Mr. WARDEN, on behalf of the Committee on the Harbor and Shipping, also offered the following report and resolutions:

To the Chamber of Commerce:

Your Committee on the Harbor and Shipping has had under consideration the proposal now before the Federal Government looking to the purchase of the Cape Cod Canal from the private company which now owns it, known as the Boston Cape Cod and New York Canal Company.

The actual work of construction was begun on June 19th, 1909; the Canal was opened for traffic for vessels drawing not over twelve feet on July 30th, 1914, and at various dates thereafter for vessels of greater draft, until in May, 1916, the full depth of twenty-five feet was attained.

Negotiations for the purchase by the Federal Government of this waterway have been going on for a number of years, and it appears that Congress in 1917 authorized the Secretary of War, the Secretary of the Navy, and the Secretary of Commerce to examine and appraise the value of the works and franchise of the Cape Cod Canal with reference to the advisability of its purchase by the United States, and the construction over the

route of said Canal of a free waterway with or without a guard lock and having a depth and capacity sufficient to accommodate the navigation interests that are affected thereby.

Under the foregoing authority the necessary investigation was made, and the then Secretaries of War, Navy and Commerce were all in favor of the acquisition of said Canal, and negotiations were entered into with the Canal officials looking to the acquisition of this property by the Government, and in the meantime a complete audit of the books of the Canal Company and the Cape Cod Construction Company, which latter Company had done the actual work of construction, was made at the request of the Government by Messrs. Price, Waterhouse and Co. of New York. This audit was completed in January, 1918, and the negotiations for the purchase of the property by the Government resulted in an offer by the then Secretary of War, Honorable NEWTON D. BAKER, of \$8,250,000 for the purchase of the property.

This offer was refused by the officials of the Canal Company, and a counter proposition made of \$13,000,000. In January, 1919, Secretary of War BAKER notified the Canal Company that his previous offer of \$8,250,000 would not be increased and that he was referring the entire matter to the Attorney General with a view that condemnation proceedings be started. These condemnation proceedings were commenced in April, 1919, and in November of the same year a jury trial was had and a verdict rendered by the jury of \$16,801,201.11, less a deduction of \$150,000 alleged by the jury to be due the United States for "deferred maintenance," so called, consisting largely of dredging, etc., done by the United States while the Canal was under Federal control.

The Circuit Court of Appeals in February, 1921, set aside the judgment of the District Court and granted a new trial for errors in the admission of testimony and in the Court's instructions.

Thereupon the Secretaries of War, Navy, and Commerce again opened negotiations for a compromise, which resulted in an agreement between them and the Canal Company in July, 1921, whereby the price agreed upon for the purchase of the Canal Company's property, including 932 acres of land outside the Canal location, not included in Secretary BAKER's first offer, was \$11,500,000.

The measure which is now before Congress is for the carrying of this contract into effect by the payment in cash of \$5,500,000 and assuming the principal sum of \$6,000,000 in bonds, together with interest falling due on these bonds on and after December 31st, 1921.

Your Committee is naturally not in a position to pass upon the question as to whether the value of the Canal property is

correctly stated in any of the various sale prices quoted above, but it appears that Messrs. PRICE WATERHOUSE reported to the army engineers that up to August 31st, 1917, the combined expenditures of both the Canal Company and the Construction Company amounted to a total investment of \$13,763,605.35, which represented, however, not only cash expenditures for direct and overhead costs, but payments with securities for engineering services, franchise rights, cost of providing capital, contingencies, etc.

This Canal is an important link in our intracoastal waterway system which has been advocated for many years by eminent authorities in military, naval and economic affairs. It not only provides a short and safe inland passage between New York and Boston, but can also be used to advantage by a considerable volume of other traffic, principally along the coast, while in the event of war it might prove of inestimable value for the movement of military supplies and naval vessels.

The total traffic passing through the Canal during 1923 was as follows:

Number of vessels	6,771
Gross tonnage of these vessels	4,051,869 tons
Cargo carried	1,389,457 tons
Passengers carried through Canal.....	116,309

It will be seen from the tonnage of the vessels using the Canal that most of them are small. This is accounted for by the fact that the Canal is not capable of handling large vessels, and it is questioned today whether it is a safe channel for vessels more if anything over eighteen feet draft, brought about by filling is from the banks, tidal causes, etc.

In report No. 1016, May 18th, 1922, made by the Committee on Interstate and Foreign Commerce of the House of Representatives upon the purchase of the Cape Cod Canal property, the following estimate of traffic was made:

“The probable increase of traffic passing Cape Cod either going around the Cape or going through the Canal for the decade between 1920 and 1930 will be approximately 21 per cent. and for the succeeding decade 18 per cent. Applying these percentages the probable traffic passing Cape Cod in 1930 will be between thirty and thirty-five million gross tons, and in 1940 between thirty-five and forty million gross tons. These estimates are based upon statistics covering growth of population and production in New England over a period as far back as 1890, but principally for the years between 1897 and 1916, inclusive.

During the year 1920:
 1,913,196 tons of cargo passed through Canal,
 the estimated value of this cargo is.....\$303,421,328
 The estimated value of the 4,707,735 tons of
 vessels which passed through is..... 616,132,575
 Total\$919,553,903

During the year 1921:
 The estimated value of the 1,372,875 tons of
 cargo on board vessels passing through the
 Canal was\$307,128,688
 The estimated value of 4,215,696 gross tons of
 vessels was 478,748,840
 Making a total of\$785,877,528

The number of passengers on vessels carried through the
 Canal during the year 1920 was 119,088 and during the
 year 1921, 112,731."

There is no doubt in the minds of your Committee that a
 Canal at this point is desirable and economically sound; it cuts
 off about sixty-five miles in the trip between New York and
 Boston, and those sixty-five miles saved contain very dangerous
 waters, in which many ships have been wrecked. A more gen-
 eral use of the Canal therefore would result in cutting down
 loss of life and property at sea, and one important advantage of
 the shorter distance is that by using the Canal route goods
 may be shipped in either direction between Boston and New
 York, and frequently delivered to their customers the following
 day, which would seldom be possible without using the Canal
 route.

Practically every commercial and industrial organization in
 New England as well as many in Atlantic coast states to the
 south have urged the acquisition and improvement by the Gov-
 ernment of this Canal, and its operation as a public waterway,
 and it is worthy of note that at the hearings which have been
 held before the appropriate Congressional committees no opposi-
 tion appears to have been evidenced. While the commercial and
 industrial organizations, above mentioned, have contented them-
 selves with recommending the acquirement of the Canal by
 the Government, your Committee feels that the Chamber should
 not do so without the proviso that the Canal should be widened
 and deepened so that large vessels could make use of the water-
 way. To provide a channel thirty-five feet deep and two hun-
 dred feet wide the board of Army Engineers has estimated the
 cost as about \$10,000,000.

In view of the foregoing, which is only a condensed report

from a mass of documents submitted to it, your Committee offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York advocates the purchase by the U. S. Government of the Cape Cod Canal, provided it can be secured at a reasonable price, and provided that a proper and sufficient appropriation is made for its improvement and maintenance as a public water-way for the general welfare of the Nation; and, be it

Resolved, That copies of this report be sent to the Federal authorities and others concerned with this matter; and, be it further

Resolved, That the Committee on the Harbor and Shipping be and it is hereby authorized to advocate such action before the proper authorities, attend hearings and take such other steps as in their discretion may further this project.

Respectfully submitted,

HERBERT B. WALKER

*Of the
Committee on the
Harbor and
Shipping*

NEW YORK, *January 28, 1924.*

Mr. WARDEN.—I move the adoption of this report.

The motion was seconded.

THE PRESIDENT.—Is there any debate?

EUGENIUS H. OUTERBRIDGE.—Mr. President, this report clearly sets forth the history of various proceedings that have taken place in reference to the Government acquiring the Cape Cod Canal, and I interpret the intention of the Committee to be to ask this Chamber to strongly endorse that proposal.

I am very much in sympathy with what appears to be the purpose of the report, but as I read the resolutions I think they very greatly weaken the report itself and do not accomplish what I think the Committee undoubtedly had in mind and wished to do—namely, to convey to the Government and to the Congress

an expression of opinion by this Chamber that this Canal should be acquired as a Government Canal.

I want to offer an amendment to the resolutions in order to have them more consistent with the body of the report.

The proceedings which took place between the Government and the Canal corporation over a period of years, clearly stated in the report, show that private negotiations for its purchase were undertaken by Secretary of War BAKER, and, as an agreement on compensation could not be reached, the matter went through the ordinary course of condemnation proceedings. The Government appealed from the award, which was about twice the amount Secretary BAKER had offered, and, pending the appeal proceedings, negotiations by Secretary of War WEEKS and Secretary of Commerce HOOVER with the Canal corporation resulted in an agreement upon a price that was several millions of dollars less than the condemnation proceedings award.

This resolution reads that the Chamber recommends or advocates the purchase by the Government provided it can be secured at a reasonable price. That would seem to imply that this Chamber doubts that Secretary WEEKS and Secretary HOOVER have arrived at a reasonable price, although that price is stated in the report to be several millions less than the condemnation proceedings provided should be paid for it. It seems to be a reopening, so far as this Chamber offers the suggestion, of the whole negotiations, which have long since been closed; and it also says, "and provided that a proper and sufficient appropriation is made for its improvement and maintenance as a public waterway for the general welfare of the Nation." Which would seem to qualify the Chamber's endorsement of the purchase, dependent upon an appropriation in the Rivers and Harbors Bill for this specific purpose. Ownership by the Government must precede any expectation that the Committee on Rivers and Harbors would appropriate funds for its improvement.

I do not think that either of those qualifications are exactly consistent with the statements that precede it in the report, and I would like to offer an amendment to this effect:

Resolved, That the Chamber of Commerce of the State of New York advocates the purchase by the United States Government of the Cape Cod Canal, and that proper provision be made for its improvement and maintenance as a public waterway for the general welfare of the Nation.

The motion was seconded.

THE PRESIDENT.—Is there any debate upon the amendment?
(No response.)

If not, all those in favor of the adoption of the amendment will please so signify by saying "Aye." (Chorus.) To the contrary. (None.)

The amendment is unanimously carried.

Is there any further debate on the report as amended? (No response.)

If not, all those in favor of the adoption of the report as amended will please say "Aye." (Chorus.) To the contrary. (None.)

The report is unanimously adopted.

PERMANENT BOARD TO STUDY CITY TRAFFIC MATTERS RECOMMENDED

WILLIAM MCCARROLL.—Mr. President and Gentlemen of the Chamber, in submitting this report and resolutions favoring a Permanent Board to deal with City Traffic matters, I do not think it necessary to say anything about the importance of the subject, because the urgency of it is familiar to all.

Your Committee has, since early in 1921, been engaged in studying the various phases of our street traffic. We have held several meetings and conferences regarding it. As the outcome of one of these, in the early part of last year, Police Commissioner ENRIGHT undertook to have tabulations of observations made by his traffic officers showing specific conditions at a number of the most congested sections. This, which he later transmitted to us, supplied useful information. It was embodied in a recent, very full, report, made by him for the Board of Estimate and Apportionment, that also contains a number of valuable and important recommendations and suggestions. Copies of it having been sent to your Committee by him, it was made the subject of further consideration.

Following this it was decided in view of its importance to invite a preliminary conference with other commercial organizations. The Police Commissioner, having readily acceded to the request of your Committee to attend such meeting and make further presentation of his views, it was held on the 25th of last month in one of the rooms of the Chamber. It was attended by representatives of leading organizations and others, including General PARSONS.

The Commissioner pointed out that the matter is now largely in the hands of the several Borough Presidents, who were giving it attention from their various viewpoints, also that the chief function, respecting it, of the Police Department is for the regu-

lation of the traffic. The Borough President of Manhattan has presented also a very excellent and detailed report, with many valuable suggestions for its relief, which your Committee has before it.

Following the suggestive statement made by the Commissioner, some informal discussion was had. It was decided to hold a further meeting after those present had opportunity to report to and confer with their respective organizations.

From the studies thus indicated, your Committee meantime came to the conclusion, which was also that of the conference, that the much involved traffic problem could only be solved effectively by some board—an official board—connected with the City Government, which should have jurisdiction and power. It should be a continuous board. It should have thorough survey and study made by qualified experts and definite plans worked out for relief with the city's growth in view, and these carried out, to meet the situation in an effective and permanent way.

This report, therefore, recommends the adoption by the Chamber of the resolution authorizing your Committee to pursue the subject along this line, and I offer it accordingly:

Report

To the Chamber of Commerce:

Your Committee on Public Service in the Metropolitan District has since its appointment, in the early part of 1921, been studying various phases of traffic conditions in this city. It has reached the conclusion that the problem is of such vast importance, and involves such a great number of integral parts, that a permanent board to study city surface traffic matters should be organized as a part of our city government. In the opinion of your Committee such a board should cause an immediate survey of the situation to be made by competent engineers and experts who, in turn, should submit a comprehensive plan to provide for the present and future handling of the vast traffic which flows along our city's streets. A few of the essential elements of such a plan should be to provide for additional street space, better bridge approaches, subway and elevated traffic roadways. A continuous board adequately manned seems absolutely necessary if we are to work out our traffic congestion.

In a report by Commissioner ENRIGHT of the Police Department to the Board of Estimate and Apportionment, on January 7th, 1924, he points out that the street surface is daily thronged with vehicles in such increasing proximity with one another, that if present ratio of increase continues without interruption and extensive street improvements, the rate of speed of vehicles will drop to a snail's pace. Fully three hundred thousand cars are

registered in the City of New York. This compares with seventy thousand automobiles in London, where there is a great outcry over the congestion in the streets. Although London has about twice the area of New York, a comparison of the number of cars and area of the two cities roughly indicates how much worse conditions must be in the City of New York. In fact, it is being suggested that in order to relieve the situation here, certain types of vehicles be excluded from many of our streets, as those drawn by horses or those being used for pleasure.

Owing to the congestion in our streets, the work of the Fire Department is impeded, the cost of handling merchandise is increased, the loss of life is appalling, and the community suffers in many other ways. It is believed that all traffic regulations possible have been established, and the limit of human ingenuity in this particular has been reached. Any additional regulations would of necessity be of such a highly technical and complicated character as to defeat the purpose for which they were designed.

The creation of a permanent board, which would not be affected by changes in the city administration is essential. All these various problems should be placed in the hands of such a board, which should have jurisdiction as well as practical and technical knowledge and capacity to deal with the many problems involved in working out a solution of our traffic conditions.

Resolved, That the Chamber of Commerce of the State of New York recommends immediate action by the city authorities and others involved to provide for the creation of a permanent board to make a complete survey of our surface traffic conditions and prepare a comprehensive plan which shall offer a solution for present congestion and at the same time lay down a policy for the future which will insure adequate facilities for the rapidly increasing number of pedestrians and vehicles in our streets.

Metropolitan
District*

NEW YORK, *January 22, 1924*

The report was adopted unanimously.

INCREASE IN THE NUMBER OF POLICE RECOMMENDED

Mr. McCARROLL, on behalf of the Committee on Public Service in the Metropolitan District, presented the following report and moved its adoption:

To the Chamber of Commerce:

In connection with the report upon the general subject of crime in the City of New York presented by the Executive Committee and adopted by the Chamber May 4th, 1922, it was resolved that the police force of this city was numerically inadequate and ought to be materially enlarged at the earliest possible moment. At the present time an increase in the police force is being agitated. The Commissioner of Police and great numbers of citizens are in favor of it, and your Committee believes it is urgently needed.

A comparison of the number of police and the population of several European cities with the City of New York is interesting.

<i>City</i>	<i>Population</i>	<i>Force</i>	<i>Force Pro Rata</i>
New York City*....	7,000,000	12,585	556
Rome	750,000	5,900	129
Brussels	216,000	1,053	205
Berlin	2,000,000	9,000	225
Vienna	1,841,325	6,700	275
Paris	2,907,482	10,500	276
London	7,500,000	20,487	365

*Includes 100,000 transients.

In commenting upon this matter, Commissioner ENRIGHT recently made the following statement:

"In all of these European cities, the police are dealing with a homogenous population, less than 5% of the population being foreign born, whereas 39% of the population of New York City is foreign born, many of whom are unable to speak our language. None of these European capitals have a great harbor problem such as we have in New York, and none of them, with the possible exception of London, have a traffic problem that in any way compares with the traffic problem in New York City.

"These figures plainly indicate that our city is under-policed, for all of the European cities mentioned above, with a far less difficult and complex police problem, have at least double the number of men that we have pro rata to the population."

Your Committee on Public Service in the Metropolitan District believes the statement of Commissioner ENRIGHT is correct, and wishes to ask the Chamber to reaffirm its former conclu-

sions upon the Police Department, and to give your Committee the necessary power to appear before the authorities upon this matter; therefore be it

Resolved, That the Chamber of Commerce of the State of New York hereby reaffirms its resolution of May 4th, 1922, to the effect that the police force of this city is numerically inadequate, and ought to be materially enlarged at the earliest possible moment, and hereby empowers the Committee on Public Service in the Metropolitan District to appear at hearings and otherwise advocate an adequate increase in the number of police.

Respectfully submitted,

WILLIAM MCCARROLL, *Chairman*
 WILSON S. KINNEAR
 CHARLES W. LEAVITT
 JAMES C. STEWART
 JOHN V. JEWELL
 J. FREDERICK TALCOTT

*Of the
 Committee on
 Public Service
 in the
 Metropolitan
 District*

NEW YORK, *January 22, 1924*

LIONEL SUTRO.—Mr. President, I desire to second the motion and wish to emphasize the importance of the resolution by calling the attention of the Chamber to the fact that the Grand Jurors' Association of New York County, whose members when serving come in contact with the criminal results of our complex traffic, have thoroughly investigated this situation, and I can state that were it not for the efficient manner in which our police force is coping with the problem, under the direction of Commissioner ENRIGHT and Commissioner Dow, there would be many more deaths and accidents caused by the traffic in our City.

I therefore heartily endorse these resolutions and advise close co-operation with our Police Department in its effort to secure a larger force.

The report was unanimously adopted.

REVISION OF THE BY-LAWS OF THE CHAMBER

Remarks of Darwin P. Kingsley

MR. PRESIDENT.—On behalf of the Committee of ex-President MARLING, ex-President OUTERBRIDGE, Mr. WILLIAM H. WILLIAMS, Mr. CHARLES D. HILLES and myself, I present a proposed revision of the By-Laws in the more or less imperfect form

that you have before you. I want to suggest at this time, if it is agreeable to the Chamber, that we do not discuss the proposals today, but take time between now and the March meeting, when fortunately for me perhaps I will not be present, to discuss it thoroughly, and make whatever changes the Chamber sees fit to make at that time, so that the finally agreed upon By-Laws can be voted on at the April meeting and be in force for the May meeting, which is the date contemplated in this revision.

But I would like briefly to outline the program on which the Committee has worked.

First, it deals with the office of the President and limits him to a service of two years, excepting that after he has retired from office and somebody else has served he may serve again.

There are several reasons for that. One reason was that if we approach a man now, the kind of man we want, for President of this Chamber, and he recognizes the fact that he is under a kind of moral obligation to give up three years to it, he might run away and say, "No, I cannot do it." Whereas, if it were only two years, he might be willing to do it.

And, again, there is the condition that if there was no limitation—and of course we have a sort of moral limitation established by Mr. HEPBURN—and it happened that you had a President that you wanted to get rid of and it would not be convenient for you to do it, by this rule you are sure to get rid of him in two years anyhow, and if he is a man of such outstanding capacity that the Chamber needs him again, you can call him back.

That is in brief the way the minds of the Committee worked upon that subject. Then we proposed to create the office of Executive Vice-President. That is an office we tried to establish here some years ago under another form, but it did not work very well, and this program would be effective, we think. Then, broadly speaking, we prepare you to make a new deal: we clean the slate. In these proposals everybody goes out of office at the meeting in May—all the committees, all the chairmen, all the vice-presidents, everybody, and the program arranges for the election of the thirteen vice-presidents, twelve outside the Executive Vice-President, three each year, to be nominated by the Nominating Committee, and their terms of office are to be designated by the Committee on the ballot so that when you vote you will know exactly what your ballot means. And it is exactly the same with all of the committees if this proposal goes through; they will all go out, the chairmen and the members. The chairmen of the committees after that may serve only two years unless, after they are out of office a year, they may be re-elected, and the members of committees will be elected with their terms of service designated upon the ballot.

That is a very sweeping suggestion, and I apprehend that there

will be more or less vigorous discussion over it when the time comes. Another important suggestion upon which there might be some discussion is the fact that all committee reports hereafter, if this suggestion is adopted, both standing and special committee reports, must first be approved by the Executive Committee; but if any committee report is disapproved by the Executive Committee, that Committee may, if it sees fit, nevertheless send its report direct to the Chamber. The reason why the Committee advocates this is that sometimes the best of men go—not exactly wrong—but their ideas are not altogether in harmony with the ideas of the rest of us, and reports are sometimes made that should have been, with all due respect to the committees, revised.

This, of course, will be met with the criticism that you are putting too much power in the hands of the Executive Committee. But there should be some revision, some central authority, to revise these reports, so that the Chamber will never be put in a wrong position; but with the saving clause that the Committee can nevertheless present its report to the Chamber. We hope that that suggestion may meet with your approval.

In the text of the report, as we have it now, changes have been made in Article III, paragraph 4th, which has to do with the possible expulsion and disciplining of members. The Committee makes this change because Mr. COHEN, Counsel for the Chamber, says we must be very careful how this is worded, because there are property rights involved here, and if you take action of that kind you must be very sure what you are doing. The revised copies which will be sent to you by Mr. GWYNNE will change that paragraph which begins, "The Chamber may, by a two-thirds vote at a regular meeting," so that the Committee will substitute this: "For dishonorable conduct or dealings the Executive Committee, after a hearing, may recommend to the Chamber that any member charged with such conduct be expelled, suspended or disciplined. The Chamber may by a two-thirds vote at a regular meeting expel, suspend or discipline such member, provided due notice has been given by the Secretary of the Chamber both to the accused and to the membership at large of the day and hour when recommendation of the Executive Committee shall be acted on, and provided further that if the accused member does not appear for such hearing in person or by proxy action may be taken by the Chamber as though he had appeared." It is a mere revision of that paragraph.

Also in paragraph 6th, Article III, in order to make a distinction between resident and non-resident members a little clearer, we suggest it should read: "There shall be two classes of members: resident (those who reside or do business in the City of New York), and non-resident (those who neither reside nor do

business in the City of New York.)” You can correct that in your copy, or Mr. GWYNNE, I presume, will send you a corrected copy.

Beyond that I call your attention to the fact that we have introduced or suggested two new by-laws, which are really only putting into the By-Laws what are already the established rules of the Chamber, and I do not think that it is necessary for me to say anything more.

The Executive Committee, including the members at large, if this is adopted, all go out of office, and provision is made, where the membership of the Executive Committee is recited, that all the chairmen of standing committees are members *ex officio*, which has never been clearly stated before, and the members at large go out of office and are re-elected seriatim. Their nomination will be designated on the ballot, and a proper designation of the members of all committees with their terms.

There are one or two changes embodied in the By-Laws which are typographical mistakes, so they are not material. The reference to the special committees also is new, it has never been referred to before, and there is an article, XV, about those interim reports and about letting a committee, when there seems to be a crisis and when it seems that it is necessary to say something for the public benefit, to say it even though the Chamber has not authorized it. But it is to be clearly stated that such action is with the authority of the Committee only, and on no other authority.

There are one or two other minor changes, but I do not propose, Mr. Chairman, to take any more time, because the revisions will be submitted to each member. I do not now move the adoption of these amendments, for the reason that I stated: that they should lie on the table—must lie on the table, anyway—and perhaps will be ready in March. But be ready to discuss the matter fully then, and in the mean time I suggest that if you have any differences of opinion or any suggestions to make, see Mr. GWYNNE or write him fully so that the suggestions may all be assembled and we may find out just how far the Chamber is willing to go along the lines of our suggestions.

PROPOSED REVISION OF THE BY-LAWS

NOTE: *New matter is in italics; old matter to be omitted included between brackets [].*

ARTICLE I

Officers and Their Election

THE officers of the Chamber shall be a President, twelve Vice-Presidents, an *Executive Vice-President*, a Treasurer and a Sec-

retary, all of whom shall be chosen by ballot, [and] a majority of the votes cast at each election [shall be] *being* necessary in each instance to elect. [The Chamber may elect as one of the Vice-Presidents the same person whom it elects to fill the office of Secretary.]

[At the first regular meeting in May, 1894, All of the foregoing Officers shall be chosen, and they shall hold office for one year, except as hereinafter provided.]

[As soon as convenient after the election aforesaid the Vice-Presidents so elected shall meet and divide into four classes, by allotment, of three to each class. The first class to serve for one year; the second class for two years; the third class for three years, and the fourth class for four years; after the expiration of their respective terms of office they shall be ineligible for re-election until one year has intervened.]

The terms of office of officers now in service shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, and annually thereafter, all officers as defined in this article shall be elected to hold office for one year, except that the twelve Vice-Presidents elected at the Annual Meeting in May, 1924, shall be chosen, three to hold office for one year, three for two years, three for three years, three for four years, their respective terms of service being designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, three Vice-Presidents shall be chosen to serve for three years to take the place of those whose terms of office then expire. After the expiration of a Vice-President's term of office he shall be ineligible for re-election until one year has intervened.

No member shall hold the office of President for more than two consecutive years, but a member who has been President may be elected to serve again, provided another member has served as President in the intervening time, and provided that no member shall serve in all more than four years.

[At the first regular meeting in May, 1895, and annually thereafter, there shall be chosen a President, a Treasurer and a Secretary, to serve for one year, and three Vice-Presidents, to serve for the term of four years, in place of those whose terms of office shall then expire.]

All persons elected to office shall take the oath or affirmation required by the Charter, and shall continue in office as above provided, or until their successors shall have become duly qualified according to the Charter.

Should any person so elected decline to serve, or resign his office, or his office become vacant by his death, or disability, the vacancy shall be filled by an election at the next regular or any subsequent meeting of the Chamber, held after such declination or resignation shall have been reported to the Chamber.

[No person shall hold the office of President for more than three successive yearly terms, unless he shall be re-elected by a vote of three-fourths of the ballots cast at the election; and the same vote shall be necessary for each succeeding re-election of the same person to the same office thereafter.]

ARTICLE II

Meetings

The regular meetings of the Chamber for the transaction of business shall be held in the Hall of the Chamber on the first Thursday in each month. (the summer vacation only excepted,) at twelve o'clock noon. When the first Thursday in any month shall fall on a legal holiday, the regular monthly meeting shall be held on the Thursday following, unless otherwise ordered by a vote of the Chamber.

Special meetings may be held at such other places, and at such other times as the President, or, in his absence, one of the *twelve* Vice-Presidents, according to seniority, may designate, upon the written requisition of ten members; provided, that one day's notice of the time, place and object of the meeting shall have been publicly given; and also provided, that no other business except that designated in such call and notice shall be acted upon.

ARTICLE III

Members and Their Election

No persons shall be admitted members of this Corporation but merchants or others resident of this or contiguous States engaged in trade or commerce, or in pursuits directly connected therewith.

All nominations for membership of the Chamber must be made in writing, signed by one member, seconded by another member, together with a statement of the occupation and qualification of the candidate and be addressed to the Executive Committee for consideration.

If the Executive Committee approve the nomination, they shall report the same to the Chamber at the first regular meeting thereafter. The candidate shall be then balloted for; and if five or more negative ballots appear, he cannot be admitted a member, nor be again proposed until after the expiration of a year from the time of such rejection.

The Chamber may, *by a two-thirds vote at a regular meeting*, expel, *suspend or discipline* any member for dishonorable conduct or dealings, but only after [a hearing of such member at a regular meeting, and by a two-thirds vote of the members present] *such member has been duly heard*; provided, that the Executive Committee shall have recommended such expulsion, *suspension*

or discipline, and that due notice *has been* [be] given by the Secretary of the Chamber both to the accused member and to the Chamber at large, of the day and hour when such hearing *shall* [may] be had; and also provided, that if the accused member does not appear for such hearing, in person or by proxy, *action* [the vote] may be taken [on his expulsion] as though he had appeared.

The Secretary of the Chamber shall furnish to each member *in good standing* who may apply therefor, [and who shall have paid his admission or annual fees], an engraved certificate of membership, duly signed and authenticated.

There shall be two classes of members: resident, *those who reside or do business in the City of New York*; *non-resident, those who reside or do business outside of the City of New York*. [all others shall be classed as non-resident.]

[When the number of the former shall have reached two thousand, (exclusive of Honorary members,) and that of the latter two hundred and fifty, no more shall thereafter be admitted, except to fill vacancies.]

When the resident membership shall number 2,000 (exclusive of honorary members), no more members shall be admitted to that class, except to fill vacancies that may thereafter occur; and when the non-resident membership shall have reached 250, no more members shall be admitted to that class, except to fill vacancies that may thereafter occur.

ARTICLE IV

Honorary Members

Honorary members may be elected at any *regular* meeting of the Chamber, or at a *special meeting called for that purpose*, [whether regular or special,] on the nomination of the Executive Committee, and without ballot, unless called for. They shall be entitled to all the privileges of regular members, and *shall pay neither initiation fee nor annual dues*. [be exempt from payment of any fees whatever.]

The Secretary shall furnish each honorary member, thus elected, with a certificate of membership, duly signed and authenticated.

ARTICLE V

Fees

[Each member elected to the Chamber shall pay a fee of one hundred dollars, which shall be in full for all dues until the first of January next succeeding his election, and thereafter shall pay an annual fee of one hundred dollars on the first of January in each year. For non-resident members the fee shall be twenty-five dollars, payable in like manner.]

[Every new member shall pay upon election an initiation fee of fifty dollars.]

After candidates have been duly elected by the Chamber they shall become members upon payment within thirty days of an initiation fee of fifty dollars. The annual dues of resident members shall be one hundred dollars per year, payable on the first day of January of each year, but the annual dues of any member elected after the January meeting shall be for that year, and that year only, \$8.33 per month, payable in advance at the time of election.

For non-resident members the initiation fee shall be fifty dollars and the annual dues of twenty-five dollars payable in like manner.

The Executive Committee may, in its discretion, for reasons satisfactory to itself, remit the annual dues of any member; and it may accept the resignation of any member, at any time, if the annual [fees] dues of such member, to the date of such resignation, shall have been paid or remitted.

[If the fees of any member remain unpaid for a term of two years, the name of such defaulting member may be stricken from the rolls of the Chamber by order of the Executive Committee.]

If the annual dues of any member remain unpaid for one year his name may, after due notice to the said member, be stricken from the rolls of the Chamber by order of the Executive Committee.

ARTICLE VI

Duties of Officers

OF THE PRESIDENT.—The President shall exercise a general supervision of the affairs and interests of the Chamber. He shall preside at all meetings of the Chamber, regular and special, and all motions of business and adjournment shall be addressed to him. He shall appoint all Special Committees, except where the Chamber shall otherwise order. He shall sign all official documents of the Chamber. He shall countersign the annual accounts of the Treasurer, when duly audited. He shall call special meetings of the Chamber, on the written requisition of not less than ten members, stating the object thereof, and shall designate the time and place at which such special meeting may be held, and direct the due notification thereof.

OF THE EXECUTIVE VICE-PRESIDENT.—*The Executive Vice-President shall devote himself entirely to the affairs of the Chamber. He shall have charge of the administrative work of the Chamber, supervising the duties of the Secretary and of all the salaried staff of the Chamber, and of those employed by the Board of Trustees of the Real Estate. He shall, under the direc-*

tion of the President and the Executive Committee, conduct the correspondence of the Chamber, especially with reference to its external affairs. He shall be, *ex-officio* without vote, a member of all Committees, regular or special, and shall attend as far as possible all meetings of the Chamber and of its Committees. He shall, under the guidance of the President and the Executive Committee, supervise all publications of the Chamber. He shall be the custodian on behalf of the Chamber of the Great Hall and other rooms of the Chamber, and shall have the care of its Library, portraits, and other property not otherwise provided for, except its real estate. He shall keep such property insured against fire. He shall relieve the President in every way possible of all routine or ordinary details of the work of the organization. He shall assist the Committees of the Chamber so far as is in his power. In the absence of the Executive Vice-President the Secretary shall act in his place.

OF THE VICE-PRESIDENTS.—The *twelve* Vice-Presidents, in the order of seniority, shall, in the absence of the President, have the same power and authority as the President.

OF THE TREASURER.—The Treasurer shall have the charge of all moneys collected or received for the use of the Chamber, except money arising from or in any way connected with its real estate, or appropriated for, or received to acquire or improve the same. He shall disburse the same whenever not otherwise provided for by these by-laws, only upon the written warrants of the Executive Committee. He shall keep books of account of all receipts and disbursements, and the vouchers therefor, in the usual form, and shall produce a copy of the same, fairly stated, for the inspection of the members, at each Annual meeting. Such a copy of accounts shall be duly audited by auditors appointed for the purpose by the Chamber, and be signed by them and countersigned by the President, on or before the Tuesday next preceding the Annual meeting. The Treasurer shall deliver over to his successor the cash remaining in his hands, as also any certificates of stock or other securities, the property of this Chamber, together with the books of account, chest and key, and may require a receipt therefor. In the absence of the Treasurer-elect, the same shall be delivered to the President. In the absence of the Treasurer, the Chairman of the Executive Committee shall perform the duties assigned to the Treasurer.

OF THE SECRETARY.—The Secretary shall, *under the supervision of the Executive Vice-President*, devote himself entirely to the affairs of the Chamber. He [shall be the custodian of the Hall and other rooms, and other property of the Chamber, except its real estate, and] shall have the general care [of the furniture,

library, pictures, portraits, and] of all documents and correspondence belonging to the Corporation. [He shall keep such property insured against fire.] He shall attend all meetings, and keep a fair and correct register of all proceedings, rules and regulations of the Chamber, which shall be regularly entered in [the] a book of minutes [after the ancient usage]. He shall also attend upon and keep minutes of the proceedings of the Executive and other Standing Committees, and shall assist the Special Committees as far as is in his power. [He shall have charge of the office staff and shall see that all officers and Committees of the Chamber are furnished with such clerical assistance as they may need. He shall, under the direction of the President, conduct the correspondence of the Chamber. He shall have charge, under the general guidance of the Executive Committee, of the publications of the Chamber, such as the monthly bulletins, the annual report, and special reports.] He shall duly notify members of their election, sign all documents jointly with the President, and have the custody of the seal of the Chamber for their proper authentication. He shall give due notice of all meetings, both regular and special. When neither the President, nor any of the *twelve* Vice-Presidents is present at any meeting regularly called, the Secretary shall, after reasonable delay, adjourn the meeting *sine die*.

He shall see to the collection of all dues from members, and regularly return the same to the Treasurer, and shall render him all required assistance in the clerical part of his duties.

An Assistant Secretary may be appointed by the Executive Committee. He shall assist the Secretary in the performance of his duties, and in the Secretary's absence act in his place. He shall hold office during the pleasure of the Committee.

ARTICLE VII

Board of Trustees of the Real Estate

MEMBERSHIP.—*The Board of Trustees of the Real Estate shall consist of the President of the Chamber, ex-officio, as Chairman, and six members to be elected as hereinafter provided.*

ELECTION.—[At each Annual Meeting of the Chamber there shall be elected from among the members two trustees for a term of three years, to fill the vacancies of those whose term of office will then expire. The six trustees so elected shall, with the President, constitute a Board, and have charge and control of the real estate of the Corporation. Any vacancies in said Board otherwise occurring shall be filled at the next regular or any subsequent meeting of the Chamber.]

The terms of office of the members of the Board of Trustees of the Real Estate shall expire at the Annual Meeting in May,

1924, or as soon thereafter as their successors are chosen. At the Annual Meeting of the Chamber in May, 1924, six members shall be elected to serve as Trustees of the Real Estate, two for one year, two for two years, two for three years, their terms of service being designated on the ballot by the Nominating Committee. Thereafter at the Annual Meeting each year two members shall be elected to take the place of those whose terms of office then expire. Any vacancy or vacancies in said Board of Trustees otherwise occurring shall be filled by the Chamber as soon thereafter as possible.

POWERS AND DUTIES.—The President of the Chamber shall be the Chairman of the Board of Trustees ex-officio, and the Secretary of the Chamber shall be Secretary, ex-officio, *without vote*, and said Board may elect a Treasurer, and appoint such other assistants as it may require. The Board of Trustees shall have the custody, control and management of all real estate of the Corporation, and of all funds and other property appropriated or received for the purchase, improvement, or any other purpose affecting real estate, and shall have full power in the name of the Chamber to contract for and acquire such real estate as it may deem wise, and to improve the same by demolition, alteration or erection of buildings or otherwise, adopt plans, modify the same from time to time, and make all appropriate contracts therefor and for the management of said real estate. The Board may provide for such compensation to its appointees and assistants as it may deem wise, and pay the same from any funds in its control. No sale or mortgage of the real estate shall be made, except by authority of the Chamber by resolution adopted at a regular meeting or special meeting called for that purpose. All conveyances, mortgages, leases or contracts of, or affecting the real estate of the Chamber, shall be authorized by said Board and the President, or a majority thereof, and shall, when so authorized, be executed under the seal of the Corporation, attested by the signatures of the President and Secretary of the Chamber.

The Hall shall be used exclusively for meetings of the Chamber, unless consent for other temporary use be given by a two-thirds vote of the Board of Trustees of the Real Estate and the President of the Chamber at a regular meeting or special meeting called for that purpose, *or in writing*.

The Board shall [annually, and] from time to time as it deems wise, make reports to the Chamber.

[The Board is authorized and empowered in the name of the Chamber to execute, issue and deliver certificates of indebtedness for subscriptions to the building fund received under letter of the Building Committee of May 7th, 1897, or under any other plan for providing funds to erect a building for the use of the Chamber, which certificates shall be of such form and contain such provisions as the Board may from time to time prescribe.]

The Board is authorized and empowered to receive from the Treasurer of the Chamber all gifts and bequests of money or securities given to the Chamber in trust in the way of endowment or otherwise, for any object connected with the operations of the Chamber, except the Charity Fund, and to invest, control, manage and disburse the same as provided by the donors thereof.

DUTIES OF OFFICERS.—The President shall preside at the meetings of the Board of Trustees when present, and shall perform the usual duties of that office. The Secretary shall keep true and careful minutes of the meetings, and perform such other duties as shall be assigned to him by the Board. The Treasurer shall be the custodian of all funds under control of the Board, shall collect and receive all money arising from rents or otherwise, make such disbursements and payments as the Board shall direct, and keep accurate books of account therefor. All cheques against said funds shall be signed by the Treasurer and President (or, in his absence, the senior member of the Board,) and appropriate vouchers shall be taken for all disbursements. The Treasurer shall, under the direction of the Board, be the general manager of the real estate.

ARTICLE VIII

Standing Committees

The Standing Committees of the Chamber shall be:

An Executive Committee, which shall consist of a Chairman to be elected by the Chamber at the regular Annual Meeting in May of each year, and, *ex-officio*, the Chairman of the Committee on Finance and Currency, the Chairman of the Committee on Foreign Commerce and the Revenue Laws, the Chairman of the Committee on Internal Trade and Improvements, the Chairman of the Committee on the Harbor and Shipping, the Chairman of the Committee on Insurance, the Chairman of the Committee on Taxation, the Chairman of the Committee on Arbitration, the Chairman of the Committee on Commercial Education, the Chairman of the Committee on Public Service in the Metropolitan District, the President of the Chamber, the *Executive Vice-President*, the senior Vice-President, the Treasurer and the Ex-Presidents of the Chamber, with three members of the Chamber at large. *The terms of office of the members at large shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, three members at large shall be elected, one for one year, one for two years, one for three years, their terms of service to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a member at large shall be elected to take the place of the one whose term of office then expires.*

[to be elected at the Annual Meeting in May, 1921, whose terms of office shall be arranged so that one member shall retire at the Annual Meeting in May, 1922, one in May, 1923, and one in May, 1924, and that at the Annual Meeting in May, 1922, and thereafter, there shall be elected for a term of three years, a member to take the place of the one whose term of service will then expire. No member at large of the Executive Committee shall be eligible for re-election until one year from the expiration of his term.]

A Committee on Finance and Currency.

A Committee on Foreign Commerce and the Revenue Laws.

A Committee on Internal Trade and Improvements.

A Committee on the Harbor and Shipping.

A Committee on Insurance.

A Committee on Taxation.

A Committee on the Charity Fund of the Chamber of Commerce.

A Committee on Arbitration.

A Committee on Commercial Education.

A Committee on Public Service in the Metropolitan District.

Each of these Standing Committees, except the Executive Committee and the Committee on the Charity Fund of the Chamber of Commerce, shall consist of a chairman and six members. *The terms of office of the chairmen and of all members of standing committees shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen.* [who shall be elected at the regular annual May meeting. The chairman shall continue in office during the pleasure of the Chamber.]

At the Annual Meeting in May, 1924, chairmen of all standing committees shall be elected, and six members constituting each standing committee shall also be elected, two for one year, two for two years, two for three years, the chairman and the terms of office of the other members to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a chairman and two members of each standing committee shall be elected to take the place of those whose terms of office then expire. The chairmen of the standing committees shall be elected for a period of one year, but they may be re-elected once, and one year after the end of their service they may be elected to serve again. No member of a standing committee, except the chairman, shall be eligible for re-election to the same committee until one year after the expiration of his term. Vacancies occurring in any committee may be filled at any regular meeting of the Chamber upon nomination of the Executive Committee.

[The members shall be elected for a term of three years, except at the election held in 1902, when six members shall be elected,

two for a term of one year, two for a term of two years, and two for a term of three years. No member of a Standing Committee, except the Executive Committee, shall be eligible for re-election to the same Committee until one year from the expiration of his term. Vacancies occurring in any Committee may be filled at any regular meeting of the Chamber upon nomination of the Executive Committee.]

Three members of any committee shall constitute a quorum for the transaction of business.

ARTICLE IX

Duties of Standing Committees

OF THE EXECUTIVE COMMITTEE.—The Executive Committee shall, under the direction of the Chamber, have a general control of the property and affairs of the Chamber. It shall [act as an advisory committee to the Secretary,] *supervise the work of the Executive Vice-President*, and direct the preparation of the Annual Report of the Chamber. *It shall pass upon all reports or resolutions of standing or special committees before their presentation to the Chamber.* [It shall audit all bills and claims against the Corporation and direct their payment, if approved except bills for salaries and rent, which shall be approved by the President, and paid upon his order, or that of one of the Vice-Presidents, in his absence, and except all bills affecting the real estate or funds under control of the Board of Trustees.]

Excepting bills for salaries and rent which shall be approved by the President and paid upon his order or in his absence upon the order of one of the twelve Vice-Presidents, and excepting bills connected with the Real Estate owned by the Chamber and bills affecting the funds under the control of the Board of Trustees of the Real Estate, the Executive Committee shall audit all bills and claims against the corporation and direct their payment if approved. It shall fix the amount of compensation received by the Executive Vice-President and by the Secretary. It shall have authority to employ such clerical and other help as in its judgment may be necessary. It shall fix the amount of all salaries and compensation for such service. The Executive Committee shall submit at the regular meeting preceding the annual election the names of seven members for appointment by the Chamber to nominate Officers and Standing Committees for election at the Annual Meeting to serve for the ensuing year, or for such periods as these By-Laws prescribe. [It shall have power to accept resignations and remit fees as hereinbefore provided by Article V. The Executive Committee shall nominate all candidates for election as officers and members of standing committees to fill vacancies except at the Annual Meeting, when all nominations shall be made by a Nominating Committee to be elected as provided in these By-

Laws. In nominating members of standing committees after January 1, 1921, the Executive Committee shall arrange that the terms of office of the members of committees shall expire two in one year; two in two years, and two in three years.]

[Upon the complaint by any member charging dishonorable conduct or dealings on the part of any other member, it may, in its discretion, report the complaint to the Chamber, with recommendation to expel the offending member, but not otherwise; always provided that it give to the member complained of an opportunity for a hearing, either in person or by proxy, before making such report.]

OF THE COMMITTEE ON THE CHARITY FUND.—This Committee shall take charge of the moneys and securities received from Mrs. JOHN C. GREEN, and from any other source, for benevolent purposes, and invest and re-invest the same from time to time, and shall have power to make distribution of the income thereof among those intended to be benefited. The Committee shall have power to fill any vacancies that may occur in their number by death, resignation or otherwise.

OF THE COMMITTEE ON ARBITRATION.—This Committee shall have complete supervision of all matters of arbitration referred to the Chamber and shall make rules and regulations for the conduct and disposition of all matters submitted in arbitration; it shall provide a form of agreement not inconsistent with existing provisions of law by which, so far as practicable the decision of the arbitrator or arbitrators shall become as effective as a judgment of the Supreme Court.

It shall compile and from time to time revise and keep a list of qualified persons, not less than fifty, willing to act as arbitrators under these rules, who shall be members of the Chamber. This list shall be known as—"THE LIST OF OFFICIAL ARBITRATORS" of the Chamber of Commerce.

Any matter in controversy may be referred by the disputants signing the form of agreement provided by the Committee, together with a stipulation to the effect that they will abide by the decision of the arbitrator or arbitrators, by them selected, and waiving any and all right to withdraw from such submission after the acceptance of their appointment by the arbitrator or arbitrators selected, and designating at their option either

(a) One of the persons named in said "List of Official Arbitrators," who shall act as sole arbitrator; or

(b) Any two persons to act as arbitrators, who in turn shall designate from said "List of Official Arbitrators," a third person to be associated with them as arbitrators; or

(c) The Committee on Arbitration of the Chamber of Commerce or a quorum thereof.

In any case the Committee on Arbitration may, in its discretion, decline to entertain a matter submitted for arbitration, in which event the selection of special Arbitrator or Arbitrators shall be void.

The Committee on Arbitration shall, from time to time, establish a schedule of moderate fees to be paid in all matters submitted, which fees shall be chargeable as decided by the arbitrators.

The Secretary of the Chamber of Commerce shall be the Clerk of the Committee on Arbitration.

Of Other Standing Committees

Their duties shall be to examine into and make report upon such subjects as may be referred to them by the Chamber, or they may originate and report to the Chamber such views as they may deem proper for its consideration. *All reports of standing committees must be approved by the Executive Committee before they are presented to the Chamber, provided that any Committee whose report has not been approved by the Executive Committee may present such report direct to the Chamber for its consideration.*

They shall, respectively, keep regular minutes of their meetings and proceedings, in which the Secretary shall give them all required assistance, and they shall make [an annual written report] reports to the Chamber as provided above, [at its regular annual May meeting] from time to time as they may deem advisable.

ARTICLE X

Special Committees

In addition to the standing committees of the Chamber, including the Committee on the Charity Fund, the Board of Trustees of the Real Estate, Commissioners of Pilots, and the Commissioners for Licensing Sailors' Hotels or Bearding Houses, there may be, on authorization of the Chamber, special committees, the members of which, including the chairmen, shall be appointed by the President or by the Chamber. The tenure of office of the membership of all existing special committees shall cease on the day of the Annual meeting of the Chamber in May, 1924, or as soon thereafter as their successors may be appointed. The President elected at the Annual Meeting of each year shall then, or as soon thereafter as may be convenient, reconstitute these committees and report the membership of all these committees, including their chairmen, to the Chamber for its information. He shall at the same time indicate whether in his judgment any of these committees should thereafter be discontinued.

The Chairmen and members of such reconstituted committees shall serve for one year and until their successors in the discretion of the President are named. Any or all of these committees may be discontinued at any time by vote of the Chamber.

These committees shall keep regular minutes of their meetings and proceedings. They shall make reports upon such subjects as may be referred to them by the Chamber or they may originate and report to the Chamber such views as they may deem proper for its consideration. All reports of special committees must be approved by the Executive Committee before they are presented to the Chamber, provided that any special committee whose report has not been approved by the Executive Committee may present such report direct to the Chamber for its consideration.

ARTICLE [X] XI

Of Election of Special Officers Under the Laws of the State

The Chamber shall elect, in conformity with the laws of the State, the following named officers:

COMMISSIONERS OF PILOTS.—There shall be elected by ballot, to serve for two years, at a special meeting called for the purpose, three members of the Chamber to act as Commissioners of Pilots. Whenever any vacancy shall occur by death, resignation or otherwise, of either of such Commissioners so elected, the vacancy shall be filled at a special meeting of the Chamber, and the term of service of the member so elected shall date from the day of such election (as by law of the State of New York, passed June 28, 1853, and amendments).

COMMISSIONER FOR LICENSING SAILORS' BOARDING HOUSES OR HOTELS.—There shall be elected by ballot, to serve for one year, at the annual meeting of the Chamber in May, a member of the Chamber to act as Commissioner for Licensing Sailors' Boarding Houses or Hotels in the *City* [Cities] of New York [and Brooklyn] (as *required by the* law of the State of New York, passed March 21, 1866).

Whenever any vacancy shall occur in the above named offices by death, resignation or otherwise, except in that of the Commissioners of Pilots, the same shall be filled at the regular meeting of the Chamber next following.

ARTICLE [XI] XII

Quorum and Adjournment

Twenty-five members of the Chamber, of which number the President or one of the *twelve* Vice-Presidents must always be one, shall be necessary to form a quorum for the transaction of business, or to ballot for members.

In case a quorum shall not be present at the time fixed for any regular or *special* meeting of the Chamber, the President, or, in

his absence, the senior Vice-President present, may adjourn the meeting to such other day in the same month as he may judge proper; [but in case there be no quorum present at the time fixed for any special meeting, such adjournment shall not be made, except by consent of two-thirds of the members present.]

If there fail to be a quorum from the absence of the prescribed officers, it shall be the duty of the Secretary to declare the meeting adjourned sine die.

ARTICLE [XII] XIII

Rules of Order

At all regular meetings of the Chamber, the [regular] order of business shall be:

1. Reading of the minutes.
2. Report of the Executive Committee on nominations for membership.
3. Ballot for members.
4. Report of the Executive Committee.
5. Reports of Standing Committees, in their order.
6. Report of Trustees of Real Estate.
7. Reports of Special Committees.
8. Unfinished business.
9. New business.

Members having any motion or remarks to make shall rise and address the Chair. All resolutions or propositions, of whatever nature, must be reduced to writing before they can be entertained. *The Chairman of any special or standing committee submitting a report shall be permitted five minutes in addition to the time necessary to read the report for explanatory remarks in reference thereto. Members participating in the debate shall be heard only once and shall be permitted not exceeding ten minutes except that by unanimous consent the time of any member may be extended. The Chairman of the Committee whose report is under discussion, or any member of the Committee who may be designated by the Chairman, shall be permitted ten minutes' argument in conclusion. The usual parliamentary rules as laid down by Robert shall be followed.* [The time to be taken by any member in debate may be limited by the presiding officer at the request of the Chamber. Each member shall be entitled to the floor, without interruption, for such time as may be allowed to him. Where reports of Committees are submitted to debate, the Chairman of the Committee introducing such report may open and close the debate.]

At special meetings called by the Chamber [to hear and consider reports of Committees ordered by the Chamber, no new propositions or resolutions in the nature of substitutes (except the report of the minority of the Committee, if any), shall be

introduced or debated until after final action shall have been taken upon the report of such Committee; when, if it be rejected, such new propositions or resolutions may be entertained, but] no business other than that named in the requisition and call for the special meeting shall be entertained, even though unanimous consent be had.

[Members having appeared in the Chamber shall not withdraw previous to adjournment, except by permission from the President.]

[Whenever] *If any resolution or report (other than reports or resolutions from standing or special committees of the Chamber) [shall be proposed in the Chamber] which calls for an [the] immediate expression of the Chamber's [its] opinion or for action by the Chamber [touching any public matter] is proposed and [if the same be] is objected to by any member present, it shall be the duty of the President to state the objection, and to call upon those who sustain the same to rise. [and] If one-fourth of the members [present] voting rise in support of such objection, then such resolution shall be referred to a Standing or Special Committee, who shall report thereon at the next meeting of the Chamber; and upon the presentation of such report, the same, and the original resolution, and the subject referred to, may then be acted upon as provided in this article [without further right of such objection.]*

ARTICLE [XIII] XIV

Privileges of Strangers

Members may, by ticket, introduce *any person* to the Rooms of the Chamber and the use of the Library or other facilities of the building subject to such rules as the Executive Committee may from time to time adopt. [Newspapers and Magazines, any stranger, and such ticket shall be available for one month from date.]

ARTICLE XV

Interim Reports

Whenever it appears that immediate expression of the Chamber's views on any given subject is sought, or when such expression is deemed advisable, and when by reason of the summer recess or when for any other reason it is deemed impracticable to secure action by the Chamber as a body, any standing or special committee may present to public officials at hearings or otherwise, reports or recommendations of the Committee, provided: that such report is concurred in by a majority of the Committee and by the President of the Chamber or the Chairman of the Executive Committee; that it is made plain in the presentation or publication

that the report represents the opinion of the Committee only; that such report be presented to the Chamber at its next meeting with a statement of the action of the Committee; that the action then taken by the Chamber be transmitted to all those previously advised of the Committee's recommendations.

ARTICLE [XIV] XVI

Powers of Delegations

Delegations or Committees, which may be appointed by this Chamber at any time to represent it at any meeting of Chambers of Commerce or Boards of Trade, or at any other Convention, meeting or Assembly whatever, shall have no authority, by virtue of such appointment, to bind this Corporation to concur in the action of any such body, *except that when the Chamber has taken definite action upon the subject or subjects under consideration, such delegate may speak for and represent this Chamber with whatever powers have been delegated to him, but no other*; but such Delegations or Committees shall *subsequently* report their action to the *Executive Committee* [Chamber all propositions or actions of such body for its concurrence or dissent.]

ARTICLE [XV] XVII

Amendments to By-Laws

All proposed amendments to the By-Laws shall be submitted in writing, at a regular meeting of the Chamber; but no such amendments shall be acted upon before the next regular meeting.

THE PRESIDENT.—As Mr. KINGSLEY has indicated that he is going to escape the March winds—I think he is going up north somewhere—I would suggest that you send in the suggestions in time so that he may get them before he goes away. I believe the Committee has done a very excellent job, and in the present circumstances I think you will see that it should be definite that the President cannot be elected for successive terms.

I will now recognize Mr. ECKER.

FREDERICK H. ECKER.—Mr. President, I move, sir, that the regular order of business be suspended for the purpose of having presented to us a tribute to the memory of the late ex-President, WOODROW WILSON.

The motion was unanimously approved.

THE PRESIDENT.—I will now recognize Mr. KINGSLEY.

DARWIN P. KINGSLEY.—I have departed from the usual procedure—in fact, I think I am in a manner violating the rule of the Chamber, which provides that questions must be presented in the form of preamble and resolution. But it seems to me on an occasion of this kind that preambles and resolutions are not in good form. I call this “A Minute on the Death of Ex-President WOODROW WILSON”:

**MINUTE
ON THE DEATH OF EX-PRESIDENT
WOODROW WILSON**

The Chamber of Commerce of the State of New York in recognition of the public services of

WOODROW WILSON

directs this Minute to be inscribed upon its records:

WOODROW WILSON brought to the Presidency qualities all of which no one of his predecessors possessed to the same degree. He was a student, a scholar, an idealist, a thinker who dreamed dreams, a crusader who fought with unflinching courage to make his dreams realities.

Neither amongst his predecessors in Washington nor perhaps in all history can his analogue be found.

From the Executive chair of a sister State to a position where he filled the eye of the world he went almost over-night; he not only filled the eye of the world but he reached the heart of the world. For the voiceless masses, of all creeds and races and countries, he re-created a great Hope, a Hope that had almost vanished, and he so phrased the expression of that Hope that they understood him and hailed him as a Great Deliverer.

That Hope was first born long ago, born of the spirit that sent the *Mayflower* to New Plymouth, born of the vision that saw a world in which

“ . . . the war drums throbbed no longer and the battle flags were furled.”

That he did not and could not permanently hold the almost more than Kingly place he briefly occupied in the hearts and hopes of men is not strange. But we shall fall into dangerous

error if we forget and the governments of the world will be fools and blind not to remember that the Hope aroused in the hearts of the masses of humanity by

WOODROW WILSON

still lives; it has neither been realized nor satisfied. Woe to your governments! Woe to your Society! Woe to your civilization if that Hope is not finally realized!

He was a Prophet who died fighting. He did not see the complete fulfillment of his prophecies; but he threw a flaming light across the blackness that covers all frontiers; he lighted a torch that will be kindled again and again until in some form at some time his dreams will come true.

We may differ as to the wisdom and practicability of his Great Plan. We may quarrel over the soundness or unsoundness of his effort to establish that Plan. But without reservation of any sort and with no differences of opinion we uncover in the presence of the Leader who offered himself as a sacrifice on the Altar of his Faith.

The Secretary of the Chamber is directed to send a copy of this Minute duly engrossed and attested to the widow of the deceased ex-President.

The minute was adopted by a rising vote.

Major ALFRED WENDT.—Mr. President, is it practicable to have this tribute printed immediately and sent to each member of the Chamber? I think it would be greatly appreciated.

THE PRESIDENT.—The Secretary will see that that is done.

CREDENTIALS IN COMMERCE AWARDED

THE PRESIDENT.—Gentlemen, we now come to a delightful part of the program for today, which is the presentation of certificates to those who have passed the examinations for Credentials given by the Chamber. Dr. McCREA has the successful young gentlemen here.

The requirements for the Senior Credential are passing examinations in the following subjects: English, Handwriting, Commercial Arithmetic, Commercial Geography, Business Or-

ganization and Administration, Economics, a modern foreign language, and two other subjects from a group of electives; for the Junior Credential: English, Handwriting, Commercial Arithmetic, Commercial Geography and a modern foreign language, and two other subjects from a group of electives.

There were 105 registered for these examinations since last February. Most of them have received credits in one or two subjects. To all of those who passed the examinations short of the full requirements for the credentials an informal certificate is awarded, but the distinction of receiving the credential of the Chamber at a meeting is restricted to those who have passed all examinations and met the full requirements. It is a very difficult test and I am glad to report to you that there are a number who have qualified for the Senior Credential. They are: DAVID A. WALSH, G. A. MILLER, THOR GULLICHSEN, JOHN CHRISTENSEN, HERMANN M. ROST, JR., WILLIAM DANA HATCH, JAIME C. GIL, ISADORE LEVIN, and THOMAS ROWAN HAMILTON, making a total of nine who are to receive the Senior Credential; and Mr. MARTIN MILLER, who is to receive the Junior Credential.

Dr. McCREA, will you present these young men?

ROSWELL C. McCREA.—Will the senior candidates please rise? Mr. President and Gentlemen, I have the honor of presenting these nine young gentlemen for the award of the Senior Credential in Commerce.

THE PRESIDENT.—By virtue of the authority conferred upon me by the Chamber of Commerce of the State of New York and with the authorization of the Board of Regents of the University of the State of New York, I confer upon you the Senior Credentials in Commerce, with all of the prerogatives pertaining thereto, attested by the seal of the Chamber, and signed by its President, its Secretary, and its Director of Commercial Examinations.

Mr. DAVID A. WALSH receives Credential. (Applause)

Mr. G. A. MILLER receives Credential. (Applause)

Mr. THOR GULLICHSEN receives Credential. (Applause)

Mr. JOHN CHRISTENSEN receives Credential. (Applause)

Mr. HERMANN M. ROST, Jr., receives Credential. (Applause)

Mr. WILLIAM DANA HATCH receives Credential. (Applause)

Mr. JAIME C. GIL receives Credential. (Applause)

Mr. ISADORE LEVIN receives Credential. (Applause)

Mr. THOMAS ROWAN HAMILTON receives Credential. (Applause)

Dr. McCREA.—I would like to present the candidate for the Junior Credential.

THE PRESIDENT.—By virtue of the authority conferred upon me by the Chamber of Commerce of the State of New York and with the authorization of the Board of Regents of the University of the State of New York, I confer upon you, Mr. MARTIN MILLER, this Junior Credential in Commerce, with all the prerogatives pertaining thereto, attested by the seal of the Chamber, and signed by its President, its Secretary, and its Director of Commercial Examinations.

Mr. MARTIN MILLER receives Credential. (Applause)

THE PRESIDENT.—We also award, from the Hepburn Fund, two prizes in gold for the applicants passing the best examinations in Spanish. The first prize is \$100 in gold and has been awarded to Mr. JAIME C. GIL, and the second prize of \$50 in gold has been awarded to Mr. JOHN CHRISTENSEN.

Mr. JAIME C. GIL receives award. (Applause)

Mr. JOHN CHRISTENSEN receives award. (Applause)

THE PRESIDENT.—There is not time for extended remarks, but I want to say to you that the members of this Chamber take a very deep interest in the young men who take these examinations and successfully pass them. You are starting on the same road that many of us have traveled, and some of us would perhaps wish that we were in your places and starting the road again. It is a long road sometimes, but I want to impress upon you the one fact that it is the straight road, that there are no by-ways, there is only one road to success, and that is through honest effort, hard work, thrift and application, and we wish you all Godspeed. (Applause)

**REMARKS OF PRESIDENT BUSH, INTRODUCING EX-GOVERNOR
GOODRICH OF INDIANA**

Most of the members of the Chamber know how deep an interest your officers have taken in the signs which have sometimes been apparent of misunderstanding between those who live in our great Western States and those of us who live along the Atlantic Coast. It is very easy in a family to have matters of irritation spring up. I think all of us realize and I am sure that I hear constantly expressed in New York the fact that we can only prosper and grow as the great territory and the people of the United States prosper and grow.

But misunderstandings do arise, and one of those has been over the construction of what is known as the St. Lawrence Waterway. We have had our opinions here in New York and those who live in the West have held their opinions. They have said many times in Western communities that our action was hastily taken and we did not have before us all of the facts. I have told some of the representatives of the West that this Chamber was never too proud to change its mind if it could be convinced that its action had been wrong; and I have told them that if there was one man in New York who might have had a selfish reason for opposing the construction of the St. Lawrence Waterway, probably I was the man; for everything I have in the world is invested in the facilities for the handling of commerce at the Port of New York. I have also told them that looking at it strictly from the selfish standpoint, I had not the slightest fear of any competition from the Lake ports, for the reason that they are closed by ice for probably four months of the year, and that if my experience in trying to move commerce four miles down the Bay to the South Brooklyn shore was any indication of the troubles in moving it miles inland, there would be some great lapse of time before that could be accomplished, particularly with the barrier of ice which exists four months of the year.

But there are other reasons why this matter should be considered very fully and carefully upon its merits as they have developed today after a more prolonged study than had taken place when the matter was last before the Chamber, which, I think, was in 1920.

President COOLIDGE, in his message to Congress, endorsed the

idea of a careful consideration of the St. Lawrence Waterway Project. There is an important power problem attached to it which will be of great benefit to the Eastern States and probably of no benefit to the States of the West. And so I have told these gentlemen from the West, who have conferred with me as President of the Chamber about the matter, that we would be delighted to have a frank expression of their views, if they would appoint a speaker who would come here and tell us why they thought we were wrong in our position of opposition to the St. Lawrence Waterway.

I am very happy that the choice fell upon a man who many of us know very well, ex-Governor GOODRICH of Indiana, and he has come here today as the spokesman of the people from the West, to tell us about the St. Lawrence Waterway and the reasons why the people in the West think we should advocate its construction rather than oppose it.

It is not expected that any action will be taken today. After Governor GOODRICH has finished his address, I am going to suggest to the proper committee of the Chamber that, as this matter has not been considered since 1920, in the light of what Governor GOODRICH tells us today, and in the light of any other information which may have come to us, the whole matter should receive consideration again by that Committee, and that they should report their findings, whatever they may be, for action at some later meeting of the Chamber.

I have great pleasure in introducing ex-Governor GOODRICH of Indiana. (Applause)

WHY THE WEST DEMANDS ACCESS TO THE SEA

Address of Honorable James P. Goodrich, ex-Governor of Indiana

MR. BUSH AND GENTLEMEN OF THE NEW YORK STATE CHAMBER OF COMMERCE.—It is a signal honor in representing the Western States to be permitted to address your organization in this historic Chamber, rich in the memory of great men who lived and wrought for the development of the State and Nation.

As we contemplate the faces that adorn the walls of this room, we of the West realize how much we owe to your great State and to the master minds of the past who in state craft and in finance had that vision to see and the courage to follow through, that transformed the boundless prairies and trackless forest of the West into prosperous communities and mighty States.

I do not know why I am asked to speak for the West today,

for I am not of the West. We are not "out West" until we cross the Mississippi. Perhaps it is because I come from the State where the centre of the population of the United States is found, one of the commonwealths bordering on the Great Lakes and desiring an outlet to the ocean.

I address you today with a full appreciation of my inability properly to present to you so important a subject. I have been advised by Mr. BUSH "to speak softly and not even to carry a big stick." I can only assure you that in all I say there is no intention to give offense, but we must speak the truth as we understand it, must give you our viewpoint as we see it, and if this offends we can only say we regret it.

I wish you could place yourselves in the great West today, the food-producing section of the country, and visualize our situation. Marooned by the high freight rates and crowded back by the increase during the past six years, more than fifteen hundred miles farther from the world's market, where the price of every bushel of our grain is fixed, we are selling our grains at a less price than we did before the war and compelled on account of the high freight rates, increased wages and cost of manufacture and distribution, to pay almost double the pre-war price for everything we buy.

When we apply for relief through reduction in freight rates, we are very properly told that the reduced rates would imperil invested capital. When we ask for the waterway that we believe will give us relief, the General Assembly of your State, without any investigation whatever, passes a resolution against the improvement. The Governor of your State takes a like position. Your great commercial organization opposes us and you tell us, among other things, that this improvement we believe so vital to our prosperity must not be made for the reason that it will take some business away from the ports of New York and Buffalo and endanger your investment in the Erie Canal.

We have tried to see and understand your position and have with great care considered your objections. Today we wish to answer these objections and to present to you our position with the hope that out of this discussion may come a modification of your views. The story is told that two knights in olden times met one day along the highway on opposite sides of a shield suspended over the road. Said one to the other: "This is a beautiful white shield." "No," said the other, "but it is black." The first knight replied: "Thou liest. It is white." A furious battle began during which the knights changed sides and lo! each beheld the other spoke the truth, for it was white upon one side and black upon the other. So today we again express the hope you will come over to our side, not in the midst of lusty battle, as the two knights of old, but come led by a generous desire to help us. In helping us you may help yourself, for if we find freer markets and obtain a better price for the grain

we raise, it is only loaned to us for a little while. After we have taken out enough on which to live; the rest we use to pay the interest on the mortgages and the bonds you hold against us, or to purchase the manufactured goods we must have and which you produce. Whatever you may temporarily lose in the way of lost shipping, may be but bread cast upon the waters that will return to you many times over in the added prosperity to the great hinterland without the development of which you cannot succeed and prosper.

The time at my disposal does not permit me to go into the history of the movement for the construction of a waterway connection of the Great Lakes with the ocean. To this audience this can hardly be necessary, for I presume you would not have placed the stamp of your disapproval on a project of such vast importance as this without first having acquainted yourselves with the history of the efforts made to accomplish it. It is not improper, however, to suggest that three international joint commissions have been appointed to investigate the entire subject. Two surveys have been made by competent engineers and the last went into an exhaustive survey of the proposed work and made a most complete estimate of its cost. The third commission held hearings in the principal cities of the United States and Canada. The report of the engineers and the three commissions were all unanimously in favor of the construction of the waterway. The last reports filed in December, 1922, we believe answer in the most complete fashion every objection urged by your organization in 1921.

President HARDING declared in favor of the waterway and said: "It is the most important domestic project before the people of any nation today." President COOLIDGE urged its construction in his first message to Congress. HERBERT HOOVER, whose accurate knowledge of the subject is beyond question and whose breadth of vision is nation-wide, referred to the St. Lawrence Waterway last month as "the outstanding opportunity of the American people." JULIUS BARNES, President of the American Chamber of Commerce, has recently endorsed it in most emphatic terms. Mr. COOPER, who constructed the great Keokuk Dam across the Mississippi, not only endorsed it, but says: "That it is justified by the amount of power produced which will in the end pay for the entire improvement." It has been recommended by the American Bankers Association, the State Farm Bureaus of the various States, the Mississippi Valley Association, the American Farm Bureau Federation, the Associated Industries of America. Eighteen States with 40 per cent. of our population producing 73 per cent. of our corn, 77 per cent. of the wheat, 81 per cent. of the oats, 54 per cent. of the cattle, 49 per cent. of the sheep, 66 per cent. of the hogs, 56 per cent. of the eggs and 51 per cent. of the butter of the country are committed to the waterway by formal resolution and by appro-

priations of money to bring about its construction. Opposition to it has been confined to the State of New York, to the ports of Baltimore and Philadelphia in this country, and to Montreal in Canada.

Notwithstanding this almost universal approval, if our faith in this great enterprise is not well-founded, our will should not prevail. Temporary majorities are not always right and if we are to succeed, we must be able to give good reason for the conviction we hold, to demonstrate that the enterprise is of such national importance as to justify the government in directly undertaking the work or lending its credit to an international corporation organized for that purpose.

I am certain that if each one of you could take the time carefully to examine the report of the Commission and engineers, the State of New York, and your organization would no longer stand alone of all the American States in opposition to this great national enterprise, but that you would lend your influence to the speedy construction of the work.

Among the objections offered by your organization to the construction of the Canal are:

1. That "it will cost from three hundred to five hundred million dollars, according to unofficial estimates."

There is no need of guesswork on this matter now. The official estimates are on file and have been since December, 1922, and they show the cost of a thirty-foot seaway, including the development of 1,465,000 horsepower to be two hundred and seventy-five million dollars. These are the estimates made by the very best engineering talent in America.

From the experience at the Welland Canal, the Roosevelt Dam and other works of similar character, we feel warranted in saying that the estimates on the St. Lawrence are well within the cost. The Welland engineers say that they are 10 to 15 per cent. too high. The actual cost of the earth excavation of the Welland Canal is 60 to 65 cents a cubic yard, for rock \$1.66, for concrete \$7 to \$8 a cubic yard. The Roosevelt Dam 50 to 60 cents for earth, \$1.97 for rock and \$6.69 for concrete, while the engineers' estimates on the St. Lawrence Waterway is 50 cents for earth excavation, \$1.75 for rock excavation and \$12 for concrete, substantially more than either of the others.

Again you say, there is "nothing in the record of traffic statistics of the Great Lakes which would point to a likelihood, present or prospective, of a movement of export or import freight by this route sufficient to justify such an expenditure."

This same assertion was made years ago against the construction of the New York Central Railroad in opposition to the Erie Canal.

The two factors that make traffic are cheap transport and a productive and consuming region to furnish the freight. The

Panama and Suez Canals were justified by traffic which did not move at all until waterways made it possible. The tonnage in sight from the Lakes-to-Ocean route is more than ten times the tonnage in sight for the Panama Canal twenty years ago. The movement of steel products between the shores of the Great Lakes and Atlantic Seaboard is at least fifteen million tons a year. One and one-half to two and one-half million tons of iron ore move each year from Lake Superior to the Atlantic. Not one ton of it now goes by water. Mr. E. G. GRACE of the Bethlehem Company says: "Certainly it would go by water as far as Sparrow's Point is concerned." Knox Brothers of Montreal and the President of the British Empire Lumber Company, heavy lumber dealers, say a heavy traffic in lumber is certain to move direct from Pacific ports to the cities on the Lakes. In short, all of the witnesses before the Commission except those from New York, Philadelphia, Baltimore and Montreal testified that *ocean* ships would sail to the Great Lake ports and that there was ample traffic in sight to warrant the construction of the waterway.

It is also objected that "as vessels must use a channel involving a distance of 1500 miles with restricted channels, the waterway will not be largely used. That is not a fair statement of the exact facts. The Commission found there was less than sixty miles of restricted channels and with this exception the way was as open and free to navigation as the sea itself. They also found the delay on account of locks would only be from twelve to sixteen hours in the entire way from Duluth to Montreal.

Ocean going vessels now move up the Yangste River of China more than 1,000 miles against a swift and treacherous current to obtain cargoes. They ascend the Amazon for more than 1,500 miles and move a very considerable tonnage each year. One Hundred Million tons of traffic move every year through the Soo Canal. Experience has taught those familiar with lake navigation that the delays and dangers incident to passage through the limited length of restricted channels is insignificant and will have no appreciable effect on either rates or traffic.

Again you say "It seems conclusive that the movement now passing through the United States ports would not be diverted from existing routes in sufficient amounts to make the St. Lawrence route the factor that is contemplated by its advocates."

If your organization is correct in this, then the fears of Buffalo, New York, Philadelphia and Baltimore are groundless and the new way will do no damage to these ports.

The Buffalo papers do not agree with your position in this regard and recently stated, that "all export grain would go through to destination in the ship in which it was originally loaded and Buffalo get none of it if the waterway is constructed."

The first cargo of Douglass fir came into Montreal via Panama Canal in 1922. Eight ship loads went in last year, one of them

going direct to Toronto. The President of the British Empire Lumber Corporation states that thirty-five million feet of lumber were brought from Puget Sound to Montreal in 1923 and that the saving in rates on a single cargo was \$60,000.

A large part of Chicago's lumber comes from the Pacific Coast. Is there any doubt that the same vessels that now sail from Puget Sound to Montreal and even to Toronto, a voyage of thirty-five days, would take from two to five days longer to haul that cargo to the great cities on the lakes, thereby saving from twenty-five to fifty per cent. of the freight rate? Is there any doubt, too, but that they would take back a return load of the manufacturers from the lake cities? These eight ships that brought lumber from the Pacific each took back a return cargo. The net result of the entire operation has been a saving of \$12 a thousand feet, together with a handsome profit to the ships moving it.

With the possibility of the enormous saving in freight rates to the great empire surrounding the Lakes, it is an insult to the intelligence and genius of the American people to think that with the waterway completed they will not develop ships to carry the traffic. We say to the people of New York that the construction of this waterway is just as essential to the great West as is the development of the New York harbor to your success and your development.

Mr. BUSBY, your President, has said: "If the Canal will save several cents a bushel in the cost of grain shipments to Europe, the Canal should be built—for this saving in transit will be added to the price realized by the farmer."

We are so certain that it will, that we are satisfied to stand or fall by the facts in support of our position. It is an admitted axiom of economics that the price of the entire crop is the price of the surplus. It is equally true that the price to the American farmer is the price obtained at the final market in Europe less the cost of reaching that market.

This is conclusively shown by the fact that when the Interstate Commerce Commission ordered a reduction on November 20, 1921, of grain rates in certain western sections, the bid prices for grain in the territory affected advanced the next day $3\frac{1}{2}$ cents per bushel, the exact equivalent of the reduction in rate. The rate on grain from Duluth to Buffalo—1,000 miles—is from two to five cents a bushel, the lowest rate in the world. From Lake Erie to Montreal—380 miles—it is $7\frac{1}{2}$ cents. From Buffalo to New York it is 7 to 9 cents. Grain rates to all European points are identical from New York and Montreal and we are justified in comparing the cost from Buffalo to New York and Montreal after the waterway is completed.

Make any conclusion you like as to the cost of moving a ship already loaded from Buffalo to Montreal, (two days at the outside), and you must concede that the Montreal rate cannot possibly be twenty-five per cent. of the present Buffalo-New York

rate. This saving alone means at least six cents per bushel to the grain growers of the West.

It costs more to ship grain from Buffalo to New York, including terminal charges and loading on vessels, than the entire water haul from Duluth to Liverpool. If this waterway is completed to thirty foot depth and the Welland Canal open to navigation, all lake vessels can then go direct to Montreal. Ocean-going vessels of thirty foot draft can go to Lake Erie and of twenty-four foot draft to the head of the Lakes. Eighty per cent. of all ocean-going vessels today are twenty foot draft and under. While the tendency is to build larger ships, yet last year Lloyd's register showed over 50 per cent. of the new ships added to the world's fleets to be twenty foot draft and under.

The average rail rate is about 10.87 mills per ton mile, while the marine rate is 1.47 mills per ton mile. In short, the rail rate is seven times more per ton mile than the water rate.

Applying these rates to our domestic traffic, the present rail rate from Seattle to Duluth is \$19.76 a ton, while the all-water rate based upon the mileage by water via the Canal would be but \$14.66 per ton or 25 per cent. less than the rail rate.

Apply the ton mile water rates to the present rail rate and water distance between Duluth, Chicago, Detroit and other Lake ports and New York, Boston and Atlantic seaports and the water rate would be less than one-half the all-rail rates in every instance.

There is no doubt but that with a free way open as contemplated by this waterway, lake vessels would at least go the 380 extra miles in less than two days' time from Lake Erie to Montreal for from one to two cents a bushel and add from six to eight cents to the value of every bushel of grain raised in the Western country.

The Commission found as a fact that it would save at least five cents a bushel, enough to pay the entire cost of the work in less than ten years.

We of the West supported the Panama Canal, while you of the East hesitated or opposed it. This canal has reduced more than half the rates between the East and West coasts, brought the lumber and raw materials of the West and the manufacturers of the East 1,500 miles nearer than they were before and greatly benefited the commercial interests of both the Atlantic and Pacific coasts.

The advance in freight rates during the past six years has more than doubled. The price of every bushel of grain raised in the West has been reduced from fifteen to twenty cents a bushel on this account.

The Panama Canal has made more difficult for us any further freight reduction. The railroads in their struggle to compete with the canal and maintain their trans-continental traffic have built a rate structure that places the haul from coast to coast on

a far less ton-mile basis than the inter-continental haul. When we ask for a reduction of rates we are told that it cannot be done without affecting the stability of the railroads. We know the struggle the Northwestern roads are now going through in order to preserve their property, and we do not want to impair in any way the investments in these roads. The only hope for us in securing a better outlet for our traffic and an increased price for our commodities is through the construction of this waterway and the rate reduction that is certain to follow.

It is important that this work be started at the earliest possible moment. With the return of stable conditions in Russia, that great country, formerly the greatest exporter of food products in the world, will soon be back in the world market with her old-time surplus and make more difficult our situation.

But you say to us: "Long before the St. Lawrence project could be completed . . . the barge canal will be provided with facilities to take care of the traffic." The difficulty with this statement, from our viewpoint, is that the barge canal has never been a factor in moving grain from the West to the East.

In 1921 the barge canal only carried 13,736,000 bushels of grain, or but 9 per cent. of the total grain traffic moving into New York harbor. The other 91 per cent. moved by rail. During that same year 100,945,000 bushels of American grain moved by the Lakes to Europe via Montreal. However advantageous this canal may have been to New York, it never added a single cent to the value of a bushel of grain raised in the Western States. The ton-mile rate on the barge canal is and has always been in excess of the ton-mile rail rate where there was no possible water competition.

To illustrate: In 1921 the rate from Omaha to Chicago was 20½ cents per hundred pounds, or 8 2/10 mills per ton mile, while the rail and barge rate on wheat from Buffalo to New York, exclusive of elevation was 20½ cents per hundred pounds, or 10¼ mills per ton mile, or 25 per cent. higher than the grain rate for the typical haul between Omaha and Chicago.

The farmers of the great West are not content to remain at the mercy of the Erie Canal, which up to this time has had no effect whatever upon grain rates and which has moved but an insignificant percentage of the total export grain of the United States.

Incident to the construction of the waterway and next only in importance to it is the fact that 1,465,000 primary horsepower will be developed. At the low rate of \$20 per thousand per annum at the bus bar, the electrical power developed will pay the operating expense, interest on investment, and amortize the entire sum in less than fifty years. The power generated will take the place of fifteen to twenty million tons of coal per annum and extend far into the future the life of the coal fields of America. This will fit in with the great super-power lines

now advocated for the northeastern part of the country and guarantee to New York and New England an abundance of cheap power as long as the waters run in the river. The advance in science in the development of improved means for the generation and distribution of electric power, the necessity of conserving our coal supplies, all make the development of electrical power one of the most important questions before the country. This phase of the work does not directly benefit the West but the New England States and New York will be benefited very greatly by the large addition of electric power.

It is important from a National viewpoint. Every year the construction delay means the irrevocable waste of 20,000,000 tons of coal for the water that runs unhindered to the sea each year will furnish no power in the years to come.

We do not come to you today breathing threatenings and slaughter. We come pleading the justice of our cause. We come to say to you in kindness, yet with firmness, that this great work shall be, must be accomplished. It is manifest destiny. The American people will never allow the State of New York, and the ports of Philadelphia and Baltimore to prevent their free access to the sea. To use the words of one of your great citizens, GEORGE ROBERTS of the National City Bank: "New York cannot afford to oppose an enterprise which is supported by all the cities on the Great Lakes, by the State governments of fifteen States . . . upon no other grounds than that the route to the sea would be a rival of the New York route. That position is untenable and unworthy of the City of New York."

New York is so related to the United States and for that matter to the whole North American continent that anything which enlarges the productive capacity and adds to the prosperity of the interior inevitably benefits the city. We believe that the construction of this waterway will help every farmer in the northwest part of our country, that it will increase the prosperity of every city upon the Great Lakes, that it will return its cost many, many times over in the increased price of the agricultural products of the country. You cannot build up any part of America without helping New York. It is the financial centre of our country. We believe it is destined to become the financial centre of the world. To you we come for help and financial guidance in every great undertaking. Your banks are filled to overflowing with the money from the States vitally interested in this work. We come to you to insure our property and our lives, to borrow money to develop our resources and we gladly yield to you the leadership in everything of that kind. But we believe that the great power you possess is a power that comes to you by reason of your relation to the whole country, and carries with it an obligation to use that power not simply for the upbuilding of your own selfish interests, but for the advancement of the whole country. As you help the farmers of the Northwest, you add to your own power and your own wealth.

We think we have made out our cause by the overpowering weight of the evidence and we trust that New York State and a few Eastern ports that have alone stood in opposition to this project will lay aside every selfish purpose; that you will catch the spirit of the great pioneers whose faces surround the walls of this hall today and see that in helping us you are helping yourselves, that any contribution you make to the development of any part of the nation will in the end greatly benefit the great Empire State and your magnificent city, the pride of our common country. (Prolonged applause)

THE PRESIDENT.—The meeting will adjourn.

Regular Meeting, Thursday, March 6, 1924

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, March 6, 1924, at 12 o'clock noon.

Present

LEONOR F. LOREE, } *Vice-Presidents*
WELDING RING, }
CHARLES T. GWYNNE, *Secretary*

and two hundred and twenty-seven other members of the Chamber.

Guests

Sir WILLIAM PRIESTLEY, Vice-President of the Bradford Chamber of Commerce of England, and Mr. ALPHEUS GEER, President of The Marshall Stillman Movement, were present as guests and occupied seats on the right and left of the Presiding Officer.

Mr. LOREE, Vice-President, presided.

Minutes

The minutes of the monthly meeting of February 7th were read and approved.

NOMINATIONS FOR MEMBERSHIP

DAVID T. WARDEN, Acting Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
EARLE BAILIE	DARWIN P. KINGSLEY	ALBERT STRAUSS
DOUGLAS D. BALLIN	CHARLES W. BALLARD	RUDOLPH L. WALTON
JOHN GOLDHAMMER	CLARENCE H. MACKAY	EDWARD REYNOLDS
CHARLES HAYDEN	WILLIAM C. ORTON	FREDERICK H. ECKER
HAROLD A. HERRICK	EDWIN H. BARKER	ROBERT E. CHRISTIE, JR.
ARTHUR W. LOASBY	WILLIAM C. ORTON	ALVIN W. KRECH
GEORGE B. LA BOYTEAUX	DAVID T. WARDEN	HENRY M. DUYS

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
JOHN H. MICHENER	HENRY C. MERRITT, JR.	ROBERT E. CHRISTIE, JR.
EDWARD B. MILLAR	RODNEY HITT	GROSVENOR FARWELL
FRANCIS F. RANDOLPH	JONATHAN BULKLEY	HENRY A. COLGATE
BENJ. FREDERICK REINMUND	JULIAN S. MYRICK	LAWRENCE PRIDDY
ALBERT ROTHBART	EARL E. BEYER	MAURICE W. NEWTON
HANS S. ROTHSCHILD	MALCOLM R. LOVELL	ROLLIN C. BORTLE
LOUIS F. SAILER	FRANK J. HUMPHREY	J. HERBERT CASE
SIDNEY SCHWAB	MORRIS MAYER	MOISE L. ERSTEIN
HENRY C. SCHWABLE	ROBERT E. CHRISTIE, JR.	WILLIAM A. READ, JR.
NOBLE W. SHELDON	ERNEST E. QUANTRELL	GROSVENOR FARWELL
MARCK L. TOOKER	ROLLIN C. BORTLE	MALCOLM R. LOVELL
ERNEST UEHLINGER	EDWIN H. BARKER	ROLLIN C. BORTLE
JESSE H. VAN ALSTYNE	ABRAHAM G. MILLS	WILLIAM L. DETMOLD
ROBERT V. WHITE	WILLIAM P. PHILIPS	GROSVENOR FARWELL

Messrs. CHARLES H. STOUT and LOWELL L. RICHARDS were appointed tellers and a vote was taken, resulting in the election of the candidates for membership in the Chamber.

DELEGATES TO MEETING OF AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE

Mr. WARDEN, also for the Executive Committee, offered the following resolution, which was approved unanimously:

Resolved, That the President be, and he is hereby, authorized to appoint three delegates to represent the Chamber at the twenty-eighth Annual Meeting of the American Academy of Political and Social Science to be held in Philadelphia, Pa., May 16th and 17th next.

THE VICE-PRESIDENT PRESIDING.—The Chair will not appoint the delegates at this time, but will leave their appointment to the President upon his return.

MR. HENRY HENTZ NOMINATED FOR HONORARY MEMBERSHIP

Mr. WARDEN, on behalf of the Executive Committee, presented the following and moved its adoption:

To the Chamber of Commerce:

Mr. HENRY HENTZ is in point of membership the oldest member of the Chamber. On May 6th of this year he will have been a member of the Chamber for sixty-six years, having been elected May 6, 1858.

During all these years Mr. HENTZ has been a valued and active member. He served as Chairman of the Executive Com-

mittee 1889-1896; a Vice-President 1896-1900 and 1915-1919. He also served as a member of other Committees of the Chamber from time to time.

In view of this long service, the Executive Committee gladly takes this opportunity to express to Mr. HENTZ its hearty appreciation and best wishes, and the Committee recommends that the Chamber adopt the following Resolution in order fittingly to give expression to the high regard and respect in which Mr. HENTZ is held by the members of the Chamber:

Resolved, That the Chamber of Commerce of the State of New York, in recognition of the long membership and active interest of Mr. HENTZ, hereby elects him an honorary member of the Chamber.

THE VICE-PRESIDENT PRESIDING.—The Chamber has heard the motion, which has been seconded. This is quite an unusual happening. Mr. HENTZ joined the Chamber three years before the outbreak of the Civil War, and he is, in point of membership, the oldest member of the Chamber at this time, and has been a member of the Chamber longer than its records show any other man to have held membership in it. I would suggest that the Chamber indicate its action, if favorable, by a rising vote.

The motion was unanimously adopted by a rising vote.

LOWER TAXES-LESS LEGISLATION LEAGUE

Mr. WARDEN, for the Executive Committee, also presented the following:

To the Chamber of Commerce:

The Chamber at its meeting of December 6, 1923, passed resolutions endorsing the general Tax Reduction Program as outlined by Secretary of the Treasury MELLON, in his letter to Congressman GREEN of November 10, 1923.

The Special Committee of the Executive Committee, which was appointed in October, 1923, for the purpose of arousing public interest to bring about tax reduction, received an invitation in December, 1923, from Mr. C. A. DYER, Chairman of the Executive Committee of the Lower Taxes-Less Legislation League to co-operate with that League. The invitation was accepted, and since that date the Special Committee has been assisting the League as much as possible.

In October, 1923, certain officers of the Ohio State Grange and the Ohio Farm Bureau Federation conceived the plan of

having old-fashioned prairie schooners travel from point to point in the State of Ohio to rouse the people as to the necessity of using the estimated surplus of \$310,000,000 in tax reduction and for a return to the ways of our fathers, by having more simplicity, honesty and economy in Government.

It is reported that the movement has been a success from its inception, there being over 100,000 petitions to Congress in favor of Tax Reduction deposited in the wagons as they traveled through the State.

Since the start in Ohio, the League has carried forward its desire to make the League a truly National Organization, composed of non-dues paying members in favor of the purposes of the League which have been set out in its printed platform. The New York State Grange and the New York State Farm Bureau Federation has endorsed the program and a Prairie Schooner was started at Fredonia, N. Y., on January 28th. That wagon is now in Rochester and will go to Syracuse and then to New York City. A like wagon will start in Nassau County within the next thirty days, and one sponsored for by the State of Virginia Farm Federation, plans to start in the Shenandoah Valley on March 17th. It is planned to have the wagons from all parts of the country assemble in Washington in the spring of the year.

Inasmuch as the Chamber has repeatedly recommended a reduction of taxes; therefore be it

Resolved, That the Chamber of Commerce of the State of New York, believing that the League represents no political party, and is designed to serve the fundamental interests of all the people, approves in general the purposes of the Lower Taxes-Less Legislation League; and, be it further

Resolved, That the President of the Chamber be, and he is hereby authorized to appoint not to exceed four members of the Chamber to co-operate with the Lower Taxes-Less Legislation League, in such manner as they may deem wise.

MR. WARDEN.—It gives me pleasure to move the adoption of this report and resolutions.

THE VICE-PRESIDENT PRESIDING.—Is there any discussion?

WILLIAM H. WILLIAMS.—Mr. Chairman, I am very much in favor of the entire report and resolutions. The State of New York has just reduced the income taxes of the people of New York by 25 per cent. It seems to me that a proper commendation by this Chamber should be in order, and what I would like to have the Chamber comment upon, if we could possibly put

it in these resolutions, is with respect to the way the State of New York has approached the question in a non-partisan way. It has gone through the Senate and the Assembly, which has a Republican majority, and has been signed by a Democratic Governor of the State, and we have had some 25 per cent. reduction in income taxes in the State of New York. I am suggesting this, and you may rule me out of order if you wish, but it might be stated in one of the resolutions that the Chamber of Commerce commends the non-partisan manner in which the Legislative bodies of New York State have approached the question of income tax reduction, the result of which has been of substantial benefit to the taxpayers of the State.

I feel that when the Legislature does something well it should be commended. It is something that the United States Congress might well emulate.

THE VICE-PRESIDENT PRESIDING.—How would the Chairman feel about accepting that amendment?

MR. WARDEN.—Mr. President, whether it is a proper amendment to this report I am afraid I am not sufficiently versed in parliamentary procedure to say, but I think we will all agree with the views expressed by the gentleman who has just spoken, and if it seems proper parliamentary usage I feel safe in saying for the Executive Committee that there would be no objection on their part to endorsing the attitude that has been taken by the Legislature and Executive of the State of New York.

HOWARD C. SMITH.—Mr. President, might I state that this subject, as brought up by Mr. WILLIAMS, is slightly foreign to this particular report that is now under discussion, and I would move to ask unanimous consent that the resolution prepared by Mr. WILLIAMS be adopted as a separate resolution.

THE VICE-PRESIDENT PRESIDING.—That will come up a little later, then, Mr. WILLIAMS. Are there any further remarks on the resolutions of the Committee? (No response)

The report and resolutions were then unanimously adopted.

THE VICE-PRESIDENT PRESIDING.—The appointment contemplated in the resolution, of four members of the Chamber to co-operate with the Lower Taxes-Less Legislation League, will be left to the President to be made upon his return.

EQUALITY FOR AMERICAN CORPORATIONS IN CHINA

WILLIAM E. PECK, Chairman of the Committee on Foreign Commerce and the Revenue Laws, presented the following report:

To the Chamber of Commerce:

Legislation has been passed by Congress, known as the China Trade Act, to assist Americans desiring to do business in China. On June 3rd and October 7th, 1920, this Chamber endorsed bills which provided for Federal charters for corporations organized to employ capital in foreign countries and which finally in 1922 resulted in the China Act. In the Chamber's report of October 7th, 1920, particular emphasis was laid upon the necessity in any legislation adopted of giving certain tax exemptions to the capital invested in these Federal corporations. This matter was again dealt with in a report adopted March 2, 1922. However, the legislation as passed did not contain the necessary exemptions to place American capital on an equal basis with foreign capital. The necessity of such exemptions seems obvious if American companies are to meet the tax-free competition of similar companies of other nations. Competition in foreign fields is intense and it is essential to the interests of our foreign trade that our citizens should not have their business taxed in a greater degree than is the case with their competitors operating under the laws of other governments. The tax exemption asked for does not extend to ordinary foreign trading enterprises, but only to enterprises conducted entirely outside of the United States.

The China Trade Act has not so far been availed of to any extent, and new legislation known as H. J. Res. 149 "to amend the China Trade Act 1922 and the Revenue Act of 1921," has been introduced to make this Act workable.

This joint resolution provides a number of amendments in respect to details of incorporation, etc., like the number of incorporators, location of principal office, names and addresses of directors, the corporate seal, issue of stock at par value, and other details intended to make the China Act of more practical utility. It also provides that hereafter no corporation shall be formed under any law of the United States to carry on business in China except under the provisions of the China Trade Act. In addition there is an amendment for the purpose of putting American interests engaged in business in China on an equality with other nations from a standpoint of individual and corporation taxation. If this amendment is adopted, the statement has been made in Congress that American corporations doing business locally in China will be put on an equal basis with British and other corporations.

This Chamber has on so many occasions approved the principle that Americans engaged in foreign commerce should be placed upon a parity so far as possible with competitors in other

countries, that your Committee on Foreign Commerce and the Revenue Laws believes this proposed legislation will meet with your approval, and therefore offers the following resolutions:

Resolved, That the Chamber of Commerce of the State of New York urges upon Congress that H. J. Res. 149 be enacted into law so that the handicap on American interests desiring to do business in China under Federal incorporation may be removed; and, be it further

Resolved, That copies of this report be sent to the President and the members of Congress.

Respectfully submitted,

NEW YORK, *February 27, 1924.*

The report was approved unanimously.

BILL TO ESTABLISH A FOREIGN COMMERCE SERVICE FAVORED

Mr. PECK, on behalf of the Committee on Foreign Commerce and the Revenue Laws, also presented the following report and resolution, which were unanimously adopted:

To the Chamber of Commerce:

Your Committee on Foreign Commerce and the Revenue Laws has on several occasions advocated improvements in the work of the Bureau of Foreign and Domestic Commerce of the Department of Commerce. A bill to this end of more than usual importance is now in the House of Representatives, H. R. 7034, commonly referred to as the Winslow Bill. This measure proposes to establish a Foreign Commerce Service of the United States as a Division of the Bureau of Foreign and Domestic Commerce. This Service is to consist of officials to be graded and known as commercial attaches, assistant commercial attaches, trade commissioners, and assistant trade commissioners. The Act would establish the duties of men in this service as follows:

“(a) Promote the foreign commerce of the United States; (b) Investigate and report on economic, commercial and industrial conditions and activities in foreign countries, and economic and commercial aspects of agriculture, manufacturing, mining, forestry, shipping, transportation, finance, labor and legislation and of all other activities in foreign countries which may be of economic, commercial or industrial interest to the United States; (c) Perform such other duties as the Secretary of Commerce may direct in promoting trade and industries of the United

States; (d) Direct, within their respective jurisdictions and under the supervision of the chief or acting chief diplomatic officer of the United States, the economic and commercial investigations and reporting, and the trade promotion and commercial intelligence activities of all other officers and employees of the United States."

This bill would also establish a salary range as follows: Class 1, \$8,000 to \$10,000; Class 2, \$7,000 to \$9,000; Class 3, \$6,000 to \$8,000; Class 4, \$5,000 to \$7,000; Class 5, \$4,000 to \$6,000; Class 6, \$3,000 to \$5,000; Class 7, below \$3,000.

To a large extent the work which this Foreign Commerce Service is directed to undertake is the same which the Bureau of Foreign and Domestic Service has all along been carrying on. The passage of this bill, however, would give full recognition in law to the work of the Bureau in developing foreign trade. At the same time the bill provides for some advance in salaries to those engaged in the work. Your Committee all along has supported the Bureau of Foreign and Domestic Commerce and has also advocated higher pay for its employees in order that able men might be attracted to the foreign service and permanently remain in the work. Expansion of our foreign trade is recognized as essential to our prosperity and the Government should have able men devoted to it.

The Winslow Bill has been framed so that it empowers the Secretary of State to veto both the appointment of ranking foreign commerce service officers to an area abroad, and to pass upon the acceptability of appointees. Unlimited authority is given to the ranking diplomatic officers abroad to supervise the work of the Department of Commerce within their respective jurisdictions. These features of the bill make it acceptable both to the Department of State as well as to the Department of Commerce.

Your Committee therefore offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York urges upon Congress the enactment into law of H. R. 7034 to establish in the Bureau of Foreign and Domestic Commerce of the Department of Commerce a Foreign Commerce Service of the United States to carry on work as outlined in the Bill.

Respectfully submitted,

NEW YORK, *February 27, 1924.*

COMPLETION OF IMPROVEMENTS OF MISSISSIPPI, OHIO AND MISSOURI RIVERS RECOMMENDED

DELOS W. COOKE.—Mr. President and gentlemen of the Chamber, before reading the resolutions, your Committee would like to say that it is fully conscious of the desirability at this time of opposing any expenditure of the public funds that can be avoided or that might be made at a time when the financial condition of the country is in its present state. We do feel, however, and we have abundant evidence of it, that a great and growing section of the country west of us has the very distinct idea that New York is antagonistic to anything in the way of expenditures excepting those things that concern themselves, and, because of that feeling that we know obtains among these people in the Mississippi Valley who are very strongly in favor of this great improvement and in having it brought to its conclusion when it may be done, your Committee feels that it might properly present this report and resolution:

Report

To the Chamber of Commerce:

For a number of years the United States Government has been improving the Mississippi, Ohio and Missouri Rivers for purposes of navigation, and has spent during this time \$174,000,000 exclusive of expenditures made solely for flood control. In 1910 Congress approved a project to improve the Ohio River from Pittsburgh to its mouth, and also two projects for improving the Mississippi River between the mouth of the Ohio and the City of Minneapolis. In 1912 a project was approved to improve the Missouri River from its mouth at St. Louis to Kansas City. But under the present system of appropriation, these and other projects have been only partially completed.

A bill is now before Congress known as H. R. 3921 providing for the improvement and completion of prescribed sections of the Ohio, Mississippi and Missouri Rivers. These sections are the Ohio River from Pittsburgh to Cairo; the Mississippi River from the mouth of the Ohio River to the northern boundary of the City of St. Louis; the Mississippi River from St. Louis to the mouth of the Illinois River; the Mississippi River from the mouth of the Illinois River to the City of Minneapolis; the Missouri River from its mouth to the upper end of Quindara Bend. The bill directs the Secretary of War to enter into contracts at a cost not to exceed \$73,000,000 to carry out and complete these improvements within a period of five years. The cost of these improvements is to be met by a bond issue of \$73,000,000, or so much thereof as may be necessary, redeemable at the pleasure of the United States after ten years and payable in thirty years, interest at 4%.

The bill H. R. 3921 has been drafted with the Panama Canal

Act as a guide, and has been approved by the Army Engineers, and the expenditure therein specified is the estimate of the Chief of Engineers. It is understood that practically all of the commercial interests of the middle west have expressed themselves in favor of its enactment, in the belief that the improvement would be of the greatest possible benefit to that entire section.

This Chamber has gone on record many times in favor of inland waterway improvements in general and also in favor of Mississippi River improvements. In 1859 the Chamber recommended the removal of obstructions at the mouth of the river, as they threatened the interests of the City of New Orleans as well as the interests of the merchants of the City of New York and other cities. On March 4th, 1869, this Chamber adopted the following:

Whereas, The Mississippi River being our great natural highway and medium of water navigation from the falls of St. Anthony to the Gulf of Mexico, free forever for the commerce of all the States, and as such should be jealously guarded by the general government; and

Whereas, Any impediment to its free and safe navigation is injurious to the general welfare of the country; therefore, be it

Resolved, That we consider it not only wise and proper, but an imperious necessity for the government to remove all natural barriers to the safe and free navigation, and effect a radical improvement of the Mississippi and Ohio Rivers.

Your Committee on Internal Trade and Improvements believes that an improvement of such magnitude calculated to benefit such an important section of the country must likewise be of benefit to the country, as a whole, and is convinced that the present bill before Congress, H. R. 3921, or a similar one to provide for the early completion of the work on which so much money has already been spent, should be enacted into law. With sections still incompleted, navigation cannot be successfully conducted on any of these rivers. The work should be completed as soon as possible that the expenditures already made may not turn out futile. When this is done the entire system will be hooked up, which, among other things, will provide a nine-foot waterway from Chicago and Pittsburgh to the Gulf of Mexico, and a six-foot channel on other sections of the waterway system.

Your Committee recommends the adoption of the following resolution:

Resolved, That the Chamber of Commerce of the State of New York favors the enactment into law of H. R. 3921 or similar legislation to provide as soon as possible for the improvement and completion of the various inland river projects on prescribed sections of the Mississippi, Ohio and Missouri Rivers; and, be it further

Resolved, That copies of this report be sent to the President and members of Congress.

Respectfully submitted,

DELOS W. COOKE, *Chairman*
MILTON W. HARRISON
RUSSELL R. WHITMAN
ELIHU C. CHURCH

} *Of the
Committee on
Internal Trade
and
Improvements*

NEW YORK, *February 28, 1924.*

The report was adopted unanimously.

INCREASE IN POSTAL EMPLOYEES' WAGES ADVOCATED

Mr. COOKE.—I will say again, on behalf of the Committee, that we are reluctant at this time to recommend further governmental expenditures, but here is a case which is so manifestly deserving and that comes so close to the personal and the business life of every member of the Chamber that we believe it is worthy without a doubt.

I therefore offer the following report and resolutions and move their adoption:

Report

To the Chamber of Commerce:

A measure is now before Congress known as the "Edge-Kelly Bill," H. R. 4123—S. 1898, to increase the pay of post office clerks and letter carriers to a minimum of \$2,000.00 and a maximum of \$2,400.00 according to length of service, grade, etc. Furthermore, at the end of stated periods of service there is an opportunity for employees of first and second class post offices to become special clerks at salaries of \$2,500.00 or \$2,600.00 a year. The proposed increases would mean postal employees would receive from \$38.50 to a maximum of \$50.00 per week. At present these employees receive from \$1,400.00 to \$1,800.00 per annum, which is \$26.92 to \$34.42 per week.

Your Committee on Internal Trade and Improvements believes that this bill or a similar measure should be enacted into

law. In comparison with wages paid to railroad employees and union labor in general, post office employees fare very poorly. Although there has been a great advance in the cost of living since the war and a great increase in the business of the post offices, the salaries of the employees have not been advanced to any extent. The men in the postal service, however, are a hard working, loyal body of public servants.

The increases proposed in the bill before Congress are moderate. It is generally recognized by those who have made even a slight investigation of living conditions that a postal employee and his family cannot live in a normally healthful and self-respecting manner upon his present remuneration.

Your Committee therefore offers the following resolutions:

Resolved, That the Chamber of Commerce of the State of New York recommends that H. R. 4123—S. 1898 be enacted into law to provide increased wages to postal clerks and letter carriers; and, be it further

Resolved, That copies of this report be sent to the President and members of Congress.

Respectfully submitted,

DELOS W. COOKE, *Chairman*
MILTON W. HARRISON
RUSSELL R. WHITMAN
ELIHU C. CHURCH

} *Of the

and
Improvements*

NEW YORK, *February 29, 1924.*

The report and resolutions were unanimously approved.

THE VICE-PRESIDENT PRESIDING.—Under unfinished business the Chair will recognize Mr. MARLING, the acting Chairman of the Special Committee on the Revision of the By-Laws.

REVISION OF THE BY-LAWS OF THE CHAMBER

Remarks of Alfred E. Marling

MR. PRESIDENT.—There has been distributed among all the members of the Chamber the proposed change in the by-laws, and for convenience sake the existing by-laws have been put on the left-hand side and the proposed changed by-laws on the right-hand side, so that it will be quite clear to all of us.

I should like, Mr. President, together with my fellow members of the Committee, to pay tribute to the acumen and wisdom

of our President in solving the very difficult problem as to what to do with our past Presidents. Early in his official life he conceived the idea of undertaking the enchanting job of revising the by-laws, and we have been spending some anxious hours over this very delightful work and have succeeded, I think, unusually well, with your assistance.

When Mr. KINGSLEY presented them in their unfinished condition last month he invited you to send any suggestions or criticisms, etc., and we have carefully considered these suggestions. Colonel SMITH sent in some, Mr. STOUT corrected our bad English, and others made several suggestions. We were very glad to receive them, and with that courtesy, Mr. Chairman, which is an attribute of "has-been Presidents," we have accepted them almost in toto.

One of the criticisms was that we had made the Chairmen of the various standing committees accept a period of life that was too short. We have modified it to this extent—that we have made the life of the standing chairmen (with one exception) to correspond to the length of life of the President of the Chamber; that is to say, he can be elected one year, he can be re-elected another year, that is, two, then there can be an interim of one year and then, if they want the chairman back, he can be re-elected.

That seems to me a perfectly simple way. We do not want to make any distinction and give the chairmen of the standing committees any longer official life than we are pleased to grant to the President of the Chamber. That is No. 1. The other is in relation to the Chairman of the Arbitration Committee, and there we have a real live delicate problem calling for gentleness, diplomacy, tenderness and yet forcefulness. What we really wanted to accomplish was this—to make an exception where there ought not to be an exception, to know perfectly well that the Chamber would be with us in making the exception and know perfectly well at the same time that we are breaking all rules.

To bring about that happy result required some consideration. But here again these "has-been" presidents were perfectly and happily successful. The problem was simply this—that we have in the Chairman of the Arbitration Committee a very unusual man in the person of CHARLES L. BERNHEIMER. He is almost the Arbitration Committee himself, and he has put the Committee on the map. How absurd it would have been for those of us who have been presiding officers of this Chamber and who are supposed to know the inner workings of it and of the difficulty of getting good men to be constantly on the job—how absurd it would be to sacrifice the services of such a man *for a rule*. As some one said to me, "Why, what is the use of a rule except to break it in some emergency?" So we said, "We will still retain the Committee as one of the standing committees, but

in this case we will be pleased to grant power of re-election of the Chairman of the Arbitration Committee year by year." So he is still on his good behavior, but much as we love him and admire him we can bounce him when we wish. But we do give ourselves the privilege of retaining him there if that is our royal desire. (Applause)

Now, we are not going to ask you to pass upon these today, we are going to ask you to give us further suggestions so that on the 3rd of April when the Chairman of the Committee, Mr. KINGSLEY, will be here, we will have your entire mind on the subject of these amendments, etc., so that we can then pass it at once, probably without any further discussion. I think with this very clear-cut statement, Mr. President, the members of the Chamber will be very glad to have me cease. (Applause)

PROPOSED REVISED BY-LAWS

If the changes suggested by the Special Committee to Survey the Organization and By-Laws of the Chamber are adopted, the By-Laws will read as follows:

ARTICLE I

Officers and Their Election

THE officers of the Chamber shall be a President, twelve Vice-Presidents, an Executive Vice-President, a Treasurer and a Secretary, all of whom shall be chosen by ballot, a majority of the votes cast at each election being necessary in each instance to elect.

The terms of office of officers now in service shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, and annually thereafter, all officers as defined in this article shall be elected to hold office for one year, except that the twelve Vice-Presidents elected at the Annual Meeting in May, 1924, shall be chosen, three to hold office for one year, three for two years, three for three years, and three for four years, their respective terms of service being designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, three Vice-Presidents shall be chosen to serve for four years to take the place of those whose terms of office then expire. After the expiration of a Vice-President's term of office he shall be ineligible for re-election until one year has intervened.

No member shall hold the office of President for more than two consecutive years, but a member who has been President may be elected to serve again, provided another member has served as President in the intervening time, and provided that no member shall serve in all more than four years.

All persons elected to office shall take the oath or affirmation required by the Charter, and shall continue in office as above provided, or until their successors shall have become duly qualified according to the Charter.

Should any elective office become vacant through any cause whatsoever, such vacancy shall be filled by election at the next regular meeting or any subsequent meeting of the Chamber after such vacancy has been reported to the Chamber.

ARTICLE II

Meetings

The regular meetings of the Chamber for the transaction of business shall be held in the Hall of the Chamber on the first Thursday in each month (the summer vacation only excepted) at twelve o'clock noon. When the first Thursday in any month shall fall on a legal holiday, the regular monthly meeting shall be held on the Thursday following, unless otherwise ordered by a vote of the Chamber.

Special meetings may be held at such other places, and at such other times as the President, or, in his absence, one of the twelve Vice-Presidents, according to seniority, may designate, upon the written requisition of ten members; provided, that one day's notice of the time, place and object of the meeting shall have been publicly given; and also provided, that no other business except that designated in such call and notice shall be acted upon.

ARTICLE III

Members and Their Election

No person shall be admitted a member of this Chamber except merchants or others engaged in trade or commerce or in pursuits directly connected therewith.

The membership of the Chamber shall consist of two classes: resident, those who reside in or do business in the City of New York; non-resident, those who neither reside in nor do business in the City of New York.

All nominations for membership of the Chamber must be made in writing, signed by one member, seconded by another member, together with a statement of the occupation and qualification of the candidate and be addressed to the Executive Committee for consideration.

If the Executive Committee approve the nomination, they shall report the same to the Chamber at the first regular meeting thereafter. The candidate shall be then balloted for; and if five or more negative ballots are cast, he shall not be admitted a member, nor be again proposed until after the expiration of one year from the time of such rejection.

For dishonorable conduct or dealings the Executive Committee after a hearing, may recommend to the Chamber that any member charged with such conduct be expelled, suspended or disciplined. The Chamber may by a two-thirds vote at a regular meeting expel, suspend or discipline such member, provided due notice has been given by the Secretary of the Chamber both to the accused and to the membership at large of the day and hour when the recommendation of the Executive Committee shall be acted on, and provided further, that if the accused member does not appear for such hearing in person or by proxy action may be taken by the Chamber in his absence.

When the resident membership shall number 2,000 (exclusive of honorary members), no more members shall be admitted to that class, except to fill vacancies that may thereafter occur; and when the non-resident membership shall have reached 250, no more members shall be admitted to that class, except to fill vacancies that may thereafter occur.

The Secretary of the Chamber shall furnish to each member in good standing who may apply therefor, an engraved certificate of membership, duly signed and authenticated.

ARTICLE IV

Honorary Members

Honorary members may be elected at any regular meeting of the Chamber, or at a special meeting called for that purpose, on the nomination of the Executive Committee, and without ballot, unless called for. They shall be entitled to all the privileges of regular members, and shall pay neither initiation fee nor annual dues.

The Secretary shall furnish each honorary member, thus elected, with a certificate of membership, duly signed and authenticated.

ARTICLE V

Dues

After candidates have been duly elected by the Chamber they shall become members upon payment within thirty days of an initiation fee of fifty dollars. The annual dues of resident members shall be one hundred dollars per year, payable on the first day of January of each year, but the annual dues of any member elected after the January meeting shall be for the unexpired portion of that year, payable in advance at the time of election.

For non-resident members the initiation fee shall be fifty dollars and the annual dues of twenty-five dollars payable in like manner.

The Executive Committee may, in its discretion, for reasons satisfactory to itself, remit the annual dues of any member; and it may accept the resignation of any member, at any time, if the annual dues of such member, to the date of such resignation, shall have been paid or remitted.

If the annual dues of any member remain unpaid for one year his name may, after due notice to the said member, be stricken from the rolls of the Chamber by order of the Executive Committee.

ARTICLE VI

Duties of Officers

Of the President.—The President shall exercise a general supervision of the affairs and interests of the Chamber. He shall preside at all meetings of the Chamber, regular and special, and all motions of business and adjournment shall be addressed to him. He shall appoint all Special Committees, except where the Chamber shall otherwise order. He shall sign all official documents of the Chamber. He shall countersign the annual accounts of the Treasurer when duly audited. He shall call special meetings of the Chamber, on the written requisition of not less than ten members, stating the object thereof, and shall designate the time and place at which such special meeting may be held, and direct the due notification thereof.

Of the Executive Vice-President.—The Executive Vice-President shall devote himself entirely to the affairs of the Chamber. He shall have charge of the administrative work of the Chamber, supervising the duties of the Secretary and of all the salaried staff of the Chamber, and of those employed by the Board of Trustees of the Real Estate. He shall, under the direction of the President and the Executive Committee, conduct the correspondence of the Chamber, especially with reference to its external affairs. He shall be, *ex-officio* without vote, a member of all Committees, regular or special, and shall attend as far as possible all meetings of the Chamber and of its Committees. He shall, under the guidance of the President and the Executive Committee, supervise all publications of the Chamber. He shall be the custodian on behalf of the Chamber of the Great Hall and other rooms of the Chamber, and shall have the care of its Library, portraits, and other property not otherwise provided for, except its real estate. He shall keep such property insured against fire. He shall relieve the President in every way possible of all routine or ordinary details of the work of the organization. He shall assist the Committees of the Chamber so far as is in his power. In the absence of the Executive Vice-President the Secretary shall act in his place.

Of the Vice-Presidents.—The twelve Vice-Presidents, in the order of seniority, shall, in the absence of the President, have the same power and authority as the President.

Of the Treasurer.—The Treasurer shall have the charge of all moneys collected or received for the use of the Chamber, except money arising from or in any way connected with its real estate, or appropriated for, or received to acquire or improve the same. He shall disburse the same whenever not otherwise provided for by these by-laws, only upon the written warrants of the Executive Committee. He shall keep books of account of all receipts and disbursements, and the vouchers therefor, in the usual form, and shall produce a copy of the same, fairly stated, for the inspection of the members, at each Annual Meeting. Such a copy of accounts shall be duly audited by auditors appointed for the purpose by the Chamber, and be signed by them and countersigned by the President, on or before the Tuesday next preceding the Annual Meeting. The Treasurer shall deliver over to his successor the cash remaining in his hands, and also any certificates of stock or other securities, the property of this Chamber, together with the books of account, chest and key, and may require a receipt therefor. In the absence of the Treasurer-elect, the same shall be delivered to the President. In the absence of the Treasurer, the Chairman of the Executive Committee shall perform the duties assigned to the Treasurer.

Of the Secretary.—The Secretary shall, under the supervision of the Executive Vice-President, devote himself entirely to the affairs of the Chamber. He shall have the general care of all documents and correspondence belonging to the Corporation. He shall attend all meetings, and keep a fair and correct register of all proceedings, rules and regulations of the Chamber, which shall be regularly entered in a book of minutes. He shall also attend upon and keep minutes of the proceedings of the Executive and other Standing Committees, and shall assist the Special Committees as far as is in his power. He shall duly notify members of their election, sign all documents jointly with the President, and have the custody of the seal of the Chamber for their proper authentication. He shall give due notice of all meetings, both regular and special. When neither the President, nor any of the twelve Vice-Presidents is present at any meeting regularly called, the Secretary shall, after reasonable delay, adjourn the meeting *sine die*.

He shall see to the collection of all dues from members, and regularly turn over and pay the same to the Treasurer, and shall render him all required assistance in the clerical part of his duties.

An Assistant Secretary may be appointed by the Executive Committee. He shall assist the Secretary in the performance of his duties, and in the Secretary's absence act in his place. He shall hold office during the pleasure of the Committee.

ARTICLE VII

Board of Trustees of the Real Estate

Membership.—The Board of Trustees of the Real Estate shall consist of the President of the Chamber, *ex-officio*, as Chairman, and six members to be elected as hereinafter provided.

Election.—The terms of office of the members of the Board of Trustees of the Real Estate shall expire at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting of the Chamber in May, 1924, six members shall be elected to serve as Trustees of the Real Estate, two for one year, two for two years, two for three years, their terms of service being designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, two members shall be elected to serve for three years to take the place of those whose terms of office then expire. Any vacancy or vacancies in said Board of Trustees otherwise occurring shall be filled by the Chamber as soon thereafter as possible.

Powers and Duties.—The President of the Chamber shall be the Chairman of the Board of Trustees, *ex-officio*, and the Secretary of the Chamber shall be Secretary, *ex-officio*, without vote, and said Board may elect a Treasurer, and appoint such other assistants as it may require. The Board of Trustees shall have the custody, control and management of all real estate of the Corporation, and of all funds and other property appropriated or received for the purchase, improvement, or any other purpose affecting real estate, and shall have full power in the name of the Chamber to contract for and acquire such real estate as it may deem wise, and to improve the same by demolition, alteration or erection of buildings or otherwise, adopt plans, modify the same from time to time, and make all appropriate contracts therefor and for the management of said real estate. The Board may provide for such compensation to its appointees and assistants as it may deem wise, and pay the same from any funds in its control. No sale or mortgage of the real estate shall be made except by authority of the Chamber by resolution adopted at a regular meeting or special meeting called for that purpose. All conveyances, mortgages, leases or contracts of, or affecting the real estate of the Chamber, shall be authorized by said Board and the President, or a majority thereof, and shall, when so authorized, be executed under the seal of the Corporation, attested by the signatures of the President and Secretary of the Chamber.

The Hall shall be used exclusively for meetings of the Chamber, unless consent for other temporary use be given by a two-thirds vote of the Board of Trustees of the Real Estate and the President of the Chamber at a regular meeting or special meeting called for that purpose, or in writing.

The Board shall from time to time as it deems wise, make reports to the Chamber.

The Board is authorized and empowered to receive from the Treasurer of the Chamber all gifts and bequests of money or securities given to the Chamber in trust in the way of endowment or otherwise, for any object connected with the operations of the Chamber, except the Charity Fund, and to invest, control, manage and disburse the same as provided by the donors thereof.

Duties of Officers.—The President shall preside at the meetings of the Board of Trustees when present, and shall perform the usual duties of that office. The Secretary shall keep true and careful minutes of the meetings, and perform such other duties as shall be assigned to him by the Board. The Treasurer shall be the custodian of all funds under control of the Board, shall collect and receive all money arising from rents or otherwise, make such disbursements and payments as the Board shall direct, and keep accurate books of account therefor. All cheques against said funds shall be signed by the Treasurer and President (or, in his absence, the senior member of the Board,) and appropriate vouchers shall be taken for all disbursements. The Treasurer shall, under the direction of the Board, be the general manager of the real estate.

ARTICLE VIII

Standing Committees

The Standing Committees of the Chamber shall be:

An Executive Committee.

A Committee on Finance and Currency.

A Committee on Foreign Commerce and the Revenue Laws.

A Committee on Internal Trade and Improvements.

A Committee on the Harbor and Shipping.

A Committee on Insurance.

A Committee on Taxation.

A Committee on Arbitration.

A Committee on Commercial Education.

A Committee on Public Service in the Metropolitan District.

The Executive Committee shall consist of a Chairman to be elected by the Chamber at the regular Annual Meeting in May of each year, and, *ex-officio*, the Chairman of the Committee on Finance and Currency, the Chairman of the Committee on Foreign Commerce and the Revenue Laws, the Chairman of the Committee on Internal Trade and Improvements, the Chairman of the Committee on the Harbor and Shipping, the Chairman of the Committee on Insurance, the Chairman of the Committee on Taxation,

the Chairman of the Committee on Arbitration, the Chairman of the Committee on Commercial Education, the Chairman of the Committee on Public Service in the Metropolitan District, the President of the Chamber, the Executive Vice-President, the senior Vice-President, the Treasurer, and the ex-Presidents of the Chamber, with three members of the Chamber at large. The terms of office of the members at large shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, three members at large shall be elected, one for one year, one for two years, one for three years, their terms of service to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a member at large shall be elected to serve for three years to take the place of the one whose term of office then expires.

Each of these Standing Committees, except the Executive Committee, shall consist of a chairman and six members. The terms of office of the chairmen and of all members of standing committees shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen.

At the Annual Meeting in May, 1924, chairmen of all standing committees shall be elected, and six members constituting each standing committee shall also be elected, two for one year, two for two years, two for three years, the chairman and the terms of office of the other members to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a chairman, and two members of each standing committee to serve for three years, shall be elected to take the place of those whose terms of office then expire. The chairmen of the standing committees shall be elected for a period of one year, but they may be re-elected once, and one year after the end of their service they may be elected to serve again, provided the Chairman of the Arbitration Committee may be re-elected at the will of the Chamber. No member of a standing committee, except the chairman, shall be eligible for re-election to the same committee until one year after the expiration of his term. Vacancies occurring in any committee may be filled at any regular meeting of the Chamber upon nomination of the Executive Committee.

Three members of any committee shall constitute a quorum for the transaction of business.

ARTICLE IX

Duties of Standing Committees

Of the Executive Committee.—The Executive Committee shall, under the direction of the Chamber, have a general control of the property and affairs of the Chamber. It shall supervise

the work of the Executive Vice-President, and direct the preparation of the Annual Report of the Chamber.

Excepting bills for salaries and rent which shall be approved by the President and paid upon his order or in his absence upon the order of one of the twelve Vice-Presidents, and excepting bills connected with the Real Estate owned by the Chamber and bills affecting the funds under the control of the Board of Trustees of the Real Estate, the Executive Committee shall audit all bills and claims against the Corporation and direct their payment if approved. It shall fix the amount of compensation received by the Executive Vice-President and by the Secretary. It shall have authority to employ such clerical and other help as in its judgment may be necessary. It shall fix the amount of all salaries and compensation for such service. The Executive Committee shall submit at the regular meeting preceding the annual election the names of seven members for appointment by the Chamber to nominate Officers and Standing Committees for election at the Annual Meeting to serve for the ensuing year, or for such periods as these By-Laws prescribe.

Of the Committee on Arbitration.—This Committee shall have complete supervision of all matters of arbitration referred to the Chamber and shall make rules and regulations for the conduct and disposition of all matters submitted in arbitration; it shall provide a form of agreement not inconsistent with existing provisions of law by which, so far as practicable the decision of the arbitrator or arbitrators shall become as effective as a judgment of the Supreme Court.

It shall compile and from time to time revise and keep a list of qualified persons, not less than fifty, willing to act as arbitrators under these rules, who shall be members of the Chamber. This list shall be known as—"THE LIST OF OFFICIAL ARBITRATORS" of the Chamber of Commerce.

Any matter in controversy may be referred by the disputants signing the form of agreement provided by the Committee, together with a stipulation to the effect that they will abide by the decision of the arbitrator or arbitrators, by them selected, and waiving any and all right to withdraw from such submission after the acceptance of their appointment by the arbitrator or arbitrators selected, and designating at their option either

(a) One of the persons named in said "List of Official Arbitrators," who shall act as sole arbitrator; or

(b) Any two persons to act as arbitrators, who in turn shall designate from said "List of Official Arbitrators," a third person to be associated with them as arbitrators; or

(c) The Committee on Arbitration of the Chamber of Commerce or a quorum thereof.

In any case the Committee on Arbitration may, in its discretion, decline to entertain a matter submitted for arbitration, in which event the selection of special Arbitrator or Arbitrators shall be void.

The Committee on Arbitration shall, from time to time, establish a schedule of moderate fees to be paid in all matters submitted, which fees shall be chargeable as decided by the arbitrators.

The Secretary of the Chamber of Commerce shall be the Clerk of the Committee on Arbitration.

The Committee shall from time to time as it deems wise make reports to the Chamber.

Of Other Standing Committees.—Their duties shall be to examine into and make report upon such subjects as may be referred to them by the Chamber, or they may originate and report to the Chamber such views as they may deem proper for its consideration.

They shall, respectively, keep regular minutes of their meetings and proceedings, in which the Secretary shall give them all required assistance, and they shall make reports to the Chamber as provided above, from time to time as they may deem advisable.

ARTICLE X

Special Committees

In addition to the standing committees of the Chamber, including the Committee on the Charity Fund, the Board of Trustees of the Real Estate, Commissioners of Pilots, and the Commissioners for Licensing Sailors' Hotels or Boarding Houses, there may be, on authorization of the Chamber, special committees, the members of which, including the chairmen, shall be appointed by the President or by the Chamber. The tenure of office of the membership of all existing special committees shall cease on the day of the Annual Meeting of the Chamber in May, 1924, or as soon thereafter as their successors may be appointed. The President elected at the Annual Meeting of each year shall then, or as soon thereafter as may be convenient, reconstitute these committees and report the membership of all these committees, including their chairmen, to the Chamber for its information. He shall at the same time indicate whether in his judgment any of these committees should thereafter be discontinued.

The Chairmen and members of such reconstituted committees

shall serve for one year and until their successors in the discretion of the President are named. Any or all of these committees may be discontinued at any time by vote of the Chamber.

These committees shall keep regular minutes of their meetings and proceedings. They shall make reports upon such subjects as may be referred to them by the Chamber or they may originate and report to the Chamber such views as they may deem proper for its consideration.

ARTICLE XI

The Committee on the Charity Fund

This Committee shall take charge of the moneys and securities known as the JOHN C. GREEN Fund and those received from any other source, for benevolent purposes, and invest and re-invest the same from time to time, and shall have power to make distribution of the income thereof among those intended to be benefited. The Committee shall have power to fill any vacancies that may occur in their number by death, resignation or otherwise.

ARTICLE XII

Of Election of Special Officers Under the Laws of the State

The Chamber shall elect, in conformity with the laws of the State, the following named officers:

Commissioners of Pilots.—There shall be elected by ballot, to serve for two years, at a special meeting called for the purpose, three members of the Chamber to act as Commissioners of Pilots. Whenever any vacancy shall occur by death, resignation or otherwise, of either of such Commissioners so elected, the vacancy shall be filled at a special meeting of the Chamber, and the term of service of the member so elected shall date from the day of such election (*as required by the law of the State of New York, passed June 28, 1853, and amendments*).

Commissioner for Licensing Sailors' Boarding Houses or Hotels.—There shall be elected by ballot, to serve for one year, at the Annual Meeting of the Chamber in May, a member of the Chamber to act as Commissioner for Licensing Sailors' Boarding Houses or Hotels in the City of New York (*as required by the law of the State of New York, passed March 21, 1866.*)

Whenever any vacancy shall occur in the above named offices by death, resignation or otherwise, except in that of the Commissioners of Pilots, the same shall be filled at the regular meeting of the Chamber next following.

ARTICLE XIII

Quorum and Adjournment

Twenty-five members of the Chamber, of which number the President or one of the twelve Vice-Presidents must always be one, shall be necessary to form a quorum for the transaction of business, or to ballot for members.

In case a quorum shall not be present at the time fixed for any regular or special meeting of the Chamber, the President, or, in his absence, the senior Vice-President present, may adjourn the meeting to such other day in the same month as he may judge proper.

If there fail to be a quorum from the absence of the prescribed officers, it shall be the duty of the Secretary to declare the meeting adjourned *sine die*.

ARTICLE XIV

Rules of Order

At all regular meetings of the Chamber, the order of business shall be:

1. Reading of the minutes.
2. Report of the Executive Committee on nominations for membership.
3. Ballot for members.
4. Report of the Executive Committee.
5. Reports of Standing Committees, in their order.
6. Report of Trustees of Real Estate.
7. Reports of Special Committees.
8. Unfinished business.
9. New business.

Members having any motion or remarks to make shall rise and address the Chair. All resolutions or propositions, of whatever nature, must be reduced to writing before they can be entertained. The Chairman of any special or standing committee submitting a report shall be permitted five minutes, in addition to the time necessary to read the report, for explanatory remarks in reference thereto. Members participating in the debate shall be heard only once and shall be permitted not exceeding ten minutes each, unless by unanimous consent the time of any member may be extended. The Chairman of the Committee whose report is under discussion, or any member of the Committee who may be designated by the Chairman, shall be permitted ten minutes' argument in conclusion. The usual parliamentary rules as laid down by Robert shall be followed.

At special meetings called by the Chamber no business other than that named in the requisition and call for the special meeting shall be entertained, even though unanimous consent be had.

If any resolution or report (other than reports or resolutions from standing or special committees of the Chamber) which calls for an immediate expression of the Chamber's opinion or for action by the Chamber is proposed and is objected to by any member present, it shall be the duty of the President to state the objection, and to call upon those who sustain the same to rise. If one-fourth of the members voting rise in support of such objection, then such resolution shall be referred to a Standing or Special Committee, who shall report thereon at the next meeting of the Chamber; and upon the presentation of such report, the same, and the original resolution, and the subject referred to, may then be acted upon as provided in this article.

ARTICLE XV

Privileges of Strangers

Members may, by ticket, introduce any person to the Rooms of the Chamber and the use of the Library or other facilities of the building subject to such rules as the Executive Committee may from time to time adopt.

ARTICLE XVI

Interim Reports

Whenever it appears that immediate expression of the Chamber's views on any given subject is sought, or when such expression is deemed advisable, and when by reason of the summer recess or when for any other reason it is deemed impracticable to secure action by the Chamber as a body, any standing or special committee may present to public officials at hearings or otherwise, reports or recommendations of the Committee, provided: that such report is concurred in by a majority of the Committee and by the President of the Chamber or the Chairman of the Executive Committee; that it is made plain in the presentation or publication that the report represents the opinion of the Committee only; that such report be presented to the Chamber at its next meeting with a statement of the action of the Committee; that the action then taken by the Chamber be transmitted to all those previously advised of the Committee's recommendations.

ARTICLE XVII

Powers of Delegations

Delegations or Committees, which may be appointed by this Chamber at any time to represent it at any meeting of Chambers of Commerce or Boards of Trade, or at any other Convention, meeting or Assembly whatever, shall have no authority, by virtue

of such appointment, to bind this Corporation to concur in the action of any such body, except that when the Chamber has taken definite action upon the subject or subjects under consideration, such delegate may speak for and represent this Chamber with whatever powers have been delegated to him, but no other; but such Delegations or Committees shall subsequently report their action to the Executive Committee.

ARTICLE XVIII

Amendments to By-Laws

All proposed amendments to the By-Laws shall be submitted in writing, at a regular meeting of the Chamber; but no such amendments shall be acted upon before the next regular meeting.

HOWARD C. SMITH.—Mr. President, is it pertinent to speak on this subject at present, sir?

THE VICE-PRESIDENT PRESIDING.—I think, in view of the closing sentence of Mr. MARLING's remarks, the Chair would rule that the members would be well advised if requested to submit to the Committee their suggestions in writing.

The Chair will recognize Mr. WILLIAMS to offer a resolution.

LEGISLATURE AND EXECUTIVE COMMENDED FOR INCOME TAX REDUCTION

WILLIAM H. WILLIAMS.—Mr. Chairman, I move the adoption of the following:

Resolved, That the Chamber of Commerce of the State of New York heartily commends the non-partisan manner in which the legislative bodies and officials of this State have approached the question of income tax reduction, the result of which has been of substantial benefit to the tax payers of the State.

The motion was seconded.

THE VICE-PRESIDENT PRESIDING.—Is there any discussion of this motion?

ABRAHAM G. MILLS.—Mr. President, I would suggest amending the resolution by substituting "the Executive" in place of "officials," in order to give adequate recognition of the co-operation of the Governor.

Mr. WILLIAMS.—I am very glad to accept the suggestion.

The resolution was then unanimously adopted as amended.

LOUIS STROOCK SCHOLARSHIPS

THE VICE-PRESIDENT PRESIDING.—The Chair has the great pleasure of advising the Chamber that Mr. LOUIS S. STROOCK, a member of the Chamber, has announced his intention of presenting two scholarship funds of \$250 each to be used for any deserving student, in order to enable him to complete his studies for the school year beginning in September of this year. This generous gift of Mr. STROOCK has been accepted by the Executive Committee and the selection of the students and the disposition of the funds left to the Secretary of the Chamber, and Dr. R. C. MCCREA, in charge of the Chamber's Commercial Examinations, with a view to having such funds applied to the education of the young men taking the Chamber's Examinations. (Applause)

WELCOME TO SIR WILLIAM PRIESTLEY

THE VICE-PRESIDENT PRESIDING.—We have present with us today two guests who will address us, Sir WILLIAM PRIESTLEY, the Vice-President of the Bradford Chamber of Commerce of England, and formerly Mayor of Bradford, who will speak to us particularly regarding the matter of arbitration as affecting international relations, and Mr. ALPHEUS GEER, who will speak to us also.

I always feel that when we have visitors from England we ought to take advantage of the opportunity to impress upon them the peculiarly intimate relations we all feel exist between that country and our own. Last summer I placed in one of the great private schools of England a young grandson, and the catalogue of the school rather emphasized the fact that no foreigners were admitted. Some one glancing over the catalogue at my hotel room said, "Why, you can't send the boy there, they do not take foreigners." I said, "Why, I talked with the Head Master, and he said the last thing an Englishman ever thought of was to consider an American a foreigner." (Applause)

In this connection and as coming from another Englishman, I am privileged to read the concluding paragraph of a letter from Mr. MCKENNA, the President of the Great Midland Bank of London: "I hope the work of the Reparation Committee is now drawing to a close. Perhaps we are over-sanguine, but we are generally of the opinion that our labors will help towards a settlement." (Applause)

It gives me great pleasure to introduce to you Sir WILLIAM PRIESTLEY. (Applause, all rising)

ADDRESS OF SIR WILLIAM PRIESTLEY

Bradford Chamber Awards Present to Mr. Bernheimer in Recognition of His Arbitration Work

Mr. CHAIRMAN AND GENTLEMEN.—I am not here today to address you upon subjects in your commercial life or your duties as citizens of this great country to my own country. I have a very pleasant duty to perform. It is a small duty, but it is a very serious one; because it shows you how we, in England, appreciate the good work and real work which has been carried on by the Arbitration Committee of your Chamber.

In 1920 there was a crisis that came over the commercial world, a great "slump," and it put many people, not only in the United States, but especially in England and upon the Continent, into a very difficult position. It was such a crisis that many firms and many individuals did not know how they would get through it and ruin was brought to many.

There were two sides to this great question; there were those who had made contracts and those who had accepted them, the debtors and the creditors, and we knew quite well that if the debtors could not pay, the creditors might themselves be ruined. So it was carefully considered what was the best way to meet the situation, and the unanimous opinion was that it could only be dealt with through arbitration. We felt that if these cases, a great many of them, got into the courts they would probably be there for years, and at the end the people themselves would be practically ruined. In my own city we had some twenty-five to thirty cases with the City of New York, and we came to the conclusion that the true policy and the wise thing to do was at once to begin arbitration with respect to those cases. We did so, and I am here today to recognize the Chairman of your Arbitration Committee, Mr. BERNHEIMER. Out of those twenty-five or thirty cases, I am glad to tell you, through his good offices, I believe up to date twenty-four of them have been settled. (Applause)

I think that ought to gratify Mr. BERNHEIMER, and I think it ought to justify you in carrying out what the late speaker said with respect to his being Chairman of your Arbitration Committee. (Applause)

In Bradford, we felt this to be a great success, and we realized all the way through what we owed to Mr. BERNHEIMER. Therefore, my Chamber, knowing that I was coming to America, asked me if I would perform a very pleasant duty. That duty is to ask Mr. BERNHEIMER to accept from the Bradford Chamber of Commerce a little present from them in recognition of the mag-

nanimous and wonderful way he has carried out all those arbitrations.

So with your permission, gentlemen, I will give Mr. BERNHEIMER the presents I have here, recognizing the great work that he has done. (Applause)

(NOTE.—There were two gifts awarded. One was a very beautiful silver cigar humidor, with the seal of the Bradford Chamber and the following inscription engraved thereon, "Presented to CHARLES L. BERNHEIMER, Esquire, by the members of the Bradford Chamber of Commerce as a token of their appreciation, February, 1924." The additional present was a handsome pocket cigar case, of alligator skin, bearing Mr. BERNHEIMER'S initials in gold.)

CHARLES L. BERNHEIMER.—Mr. President, may I be permitted to answer and say a few words?

THE VICE-PRESIDENT PRESIDING.—I think Mr. BERNHEIMER might be indulged.

Remarks of Charles L. Bernheimer in Accepting Gifts from Bradford Chamber of Commerce

Mr. President and Honored Guests, particularly Sir WILLIAM PRIESTLEY.—You will understand I can hardly find words adequate to express my feelings under these circumstances. The secret has been well kept. I am staggered and I fail in saying just what I feel—though I feel strongly, as you can imagine.

The work that Sir WILLIAM PRIESTLEY referred to, of course, was not the Chairman's work alone; the Chairman had the help of the members of this Chamber, not only the members of the Committee, but of those whom he drafted, in order to obtain speed, from the entire membership, men who he thought could serve in that calamitous period of 1921 following the slump of 1920. He also had the services of the members of the Arbitration Committee, of the staff of the Chamber and of his own personal office staff. He drafted them all.

It is to them that recognition is equally due. In accepting the compliment that Sir WILLIAM PRIESTLEY has so graciously transmitted, I venture this slight reservation.

I feel that in the remarks made by Sir WILLIAM PRIESTLEY some reference might have been made to another party, or other parties. Our efforts to render service would have been in vain but for three men in particular of the Bradford Chamber of Commerce, those three staunch fighters for the right, hard workers, fair and keen men, namely, Sir HENRY WHITEHEAD, the President of the Bradford Chamber of Commerce, Mr. J. H. C.

HODGSON and Mr. H. T. TULLOCH. No hour, no time, no effort was too much for them. They stood up for what was right. I wonder whether the Bradford Chamber of Commerce will give recognition to them as they deserve it? I hope it will.

In addition to this, let me ask, gentlemen, what, in the final analysis, could men have done if it were not for a cause backed up by an institution? On the one hand we had the Bradford Chamber of Commerce, on the other hand we had the New York State Chamber of Commerce. These institutions stood by us. As individuals none of us could do anything; but under the flag of these institutions known for their high standing and reputation, we could fight. They gave us the morale without which the successful fight is impossible. The men on the firing line had something to fight for, namely, their institutions. To me that means we had a flag, and a man should have a flag to fight under, and only one flag, symbolical of the meaning of our own *E Pluribus Unum*.

I beg to ask Sir WILLIAM PRIESTLEY to express to the Bradford Chamber my sincere thanks and appreciation for what they have deemed wise to do. I shall ever treasure and cherish the impressions of this moment. (Applause)

THE VICE-PRESIDENT PRESIDING.—At the request of a considerable number of the members of the Chamber, Mr. ALPHEUS GEER appeared before the Executive Committee to explain to them the work undertaken by The Marshall Stillman Movement. At the suggestion of the Committee he is appearing before the Chamber today to make that explanation to the Chamber itself. It gives me pleasure to introduce Mr. GEER. (Applause)

THE MARSHALL STILLMAN MOVEMENT

Address of Mr. Alpheus Geer

Mr. Chairman and Members of the Chamber of Commerce.—It is a very high honor, of course, as you all realize, for me to stand here and talk to you and explain to you a certain movement which is very young, still in its infancy. The principle of this movement with which I have been working for the last twenty-five years I know is sound and effective.

Five years ago it was decided to found a movement and organization, and we had gotten together a band of workers that I believe will answer this question of crime among other things now pestering the city. The police authorities of New York are at their wits' ends, they are employing certain methods because the public demands action. Now, the police are doing, to my mind, the best that they know how and that they possibly can do under the system under which they are laboring. Commissioner ENRIGHT I believe to be a man thoroughly honest and, as far as

his lights go, that is along the old conventional lines of repressive measures and punishment, he is doing as well as anybody could possibly do. We must have patience with the police. If we nag them they will employ ignorant methods, more than they are doing now. There are two or three things that the police are doing that are merely solidifying the underworld in a feeling that fills them full of hate and full of venom and full of malice, so that they love to "get" a cop.

The other day on First Avenue a detective was shot. This did not come out in the paper. He was shot from an alley or a side door and he did not know who shot him. But it was one of the guerrillas in that section that shot him, and the detective grabbed a lamppost and held himself up. He held up his hand and hailed a cab. The cab came over and he said to the driver, "Take me to the hospital, I am shot." The cab driver looked at him and said, "Yes, take you to the hospital, eh? You are the S. B. that beat me up in the station house, now die, you bastard, die"—and then he rode on. I say this sort of thing is bad for the police force of this city. We, the public, are really accountable for that sort of thing, because we are pounding the police and we are forcing them into measures that are really not the right ones to use.

Now, the Marshall Stillman Movement started, as I say, five years ago, and the first question that came up was this question of crime. We have got together a band of workers who can go into the dens of vice and crime of the underworld, and there they are not only welcomed but they are eagerly sought for. We are the complement of the police force. The police on the outside with their repressive measures and punishment, which are absolutely essential at this period of civilization, and we on the inside who are working for the same object and the same end, the object of lessening crime and upholding law and order. The police catch the bandits, the criminals, and they incarcerate them or kill them. We on the inside kill the mind of the bandit, we kill it with kindness administered with common sense. If you are kind without common sense you are liable to slip over into mushy human sentimentality, pink teas, roses, patting on the back, and all that sort of thing, and the criminal goes to prison with the feeling that he is injured, that society has done something for which he will get even with them afterwards. I say, gentlemen, that every criminal that goes to prison should go there satisfied that he has received his just desserts.

We take a criminal in the Marshall Stillman Movement and, as I say, we kill the mind of the criminal with kindness administered with common sense. I want to illustrate. I heard of a boy last June down in the Tombs, and they said he was a wonderful Italian boy. I went down there and saw this upstanding lad, this Italian, taller than I was, who looked to me stronger and who could put up a better fight than I could put up, with a

square jaw, with eyes far apart, cupid bow mouth, who would look you right in the eye and talk with you—the most dangerous bandit, so it was reported to me, in Little Italy. I told Warden HANDLY that I wanted to see this man face to face in the room, that I did not want any bars or any wires between us, that I wanted to see if I could read his mind and see whether he was the tough bandit that he claimed to me. When he came we sat down together and talked in a common sense manner for half an hour. I knew what that man was. I read him from the top of his head to the soles of his feet. The next time we met he looked at me and threw his arm around my neck and said, "My God, Mr. GEER, why didn't I meet you before I pulled off this last job? We could have done a wonderful work in Little Italy." He saying "we" could have done a wonderful work in Little Italy—he and the movement. That is a wonderful thing. He went to Sing Sing for ten years, and he is up there now. I want to get that boy. I want him back as our agent. I have three other men that I want to get as agents as soon as possible.

One we got three years ago. We went into his den and saw boys coming in with bundles under their arms, newspaper bundles, and I asked my assistant afterwards what was in those bundles. He found out that a jewelry robbery had just been pulled off and these bundles contained the jewelry. That man had twenty-five thieves working under him. We have that man now, we have him on the advisory board, and he is consumed with the ardor of the crusader, the will to go out and fight for the right, to fight for law and order, to fight for humanity. This man has always been a fighter. If he were standing here beside me you would see a great big fellow with a square jaw and red hair—he is a Jewish boy—with a scar across his face, probably where a knife had been drawn. This man was always in trouble. He was kicked around from corner to corner when he was a kid. If he were standing with me you would note the guerrilla type. He has always been a fighter for the right as he has seen it and he has lived up to the right as he knew it.

The Marshall Stillman Movement has shown that man a different light. We have not preached to him or criticized him or censured him or condemned him; we merely put our arm within his arm, and said, "Come on, Sam, let's go out and fight for the right as we see it; if you can show us where it is best and more profitable and more pleasurable to take a blackjack and a gun and go out and get it, we will go with you, Sam, we will go with you. We believe to get anything you have to give it. If you want love you have to give love, and if you want kindness you have to give kindness, or if you want friends you have to be a friend." I said, "Sam, let's see, you start on your problem and I start on mine, we will get together and if you convert me then I am a bandit and I am with you, because I have always fought for the right as I have seen it, and so have you."

Sam is now with us, and he is consumed with the ardor of the Crusader, as I said. He talks tomorrow night in Luchow's, where we are going to give a dinner to the newspaper world, and Mr. ADOLPH S. OCHS will sit on my right hand. He is the proprietor and the publisher of *The Times*. And I hope Sir WILLIAM PRIESTLEY, who is an old friend of mine of forty years' standing, will grace our board. I want Sir WILLIAM PRIESTLEY to take a message over to one of our friends in England, Lady ASTOR. She is deeply interested in this work. She has written me a number of times and I have written her. We want this work to go on because it is founded on common sense—to go to England, to go all over this country, and perform a mission which we know it will perform.

I have to talk very rapidly and I am not talking at all connectedly, I am just hitting the high spots as I go along, because I was warned when I got up here to speak that if I spoke after one o'clock I would promptly be shot. I am used to that sort of thing, so it does not frighten me. The other night I was in a den of the underworld and there was a big crowd of gunmen all around, and I thought I would talk a little altruism. The fellow who was with me told me, "If you talk religion they will kill you, sure as fate." I replied, "All right, but I will take a chance on altruism." I have faced real guns, but mental guns are more to be feared. So I will be careful.

As I say, I am merely touching the high spots as I go by. I have a talk here that would consume an hour, at least, and if at any time the Chamber of Commerce would give me half an hour I could tell of this movement more in particular. Judge CROPSEY the other day came out and said, "It is a red-blooded job." Now, gentlemen, you undoubtedly read that call to red-blooded men by Justice CROPSEY of Brooklyn, when he condemned to electrocution those four men who had killed the bank messengers. It is really a red-blooded man's job. There are 350,000 boys between the ages of ten and twenty-one who are now growing up in New York City. Most of those are of the under-privileged classes. There are only 50,000 of those boys who are provided for by such organizations as the Boy Scouts and the various other movements.

Judge CROPSEY said that he could give the reason for these boys of sixteen and seventeen and up to twenty-two committing the criminal acts of the City. He stated that it was on account of education and environment and example and hero worship, and all that sort of thing. He is right, but who is to take the criminal, the hardened criminal, who is to take the boy who has a blackjack in one hand and a gun in the other, and who has no more idea of submitting himself to ethical, moral or religious influence than the wild man of the desert, who is to take that boy as he stands in the mental attitude similar to that when we were freshmen in college, when we did not give a damn for any damn

man that did not give a damn for us, by gad. I remember that is the song we used to sing. And that is the way we are. We are all human. You call these boys morons. They are not morons. If you come up to our advisory board meetings, you will find clever young men from the underworld. The next meeting will be Friday, the 18th of April. All are welcome, including women. You will see that which will open your eyes to the naturalness, the humanness of these boys.

I see it is one o'clock. I want to say this, that we are now in close touch with FRANKLIN D. ROOSEVELT, of the Boy Scouts. FRANKLIN D. ROOSEVELT told me last summer they took 15,000 boys up to Bear Mountain. I said, "Mr. ROOSEVELT, have you any way of putting your companies of the Boy Scouts in the congested districts of New York, where they might catch the boy from 12 to 18 of the unprivileged classes?" He said, "No, we cannot, Mr. GEER, because we have not the scout masters to do it." Just imagine a high collared scout master going into this district that BUTCH inhabits and where KID DROPPER was killed the other day. When we establish our service clubs in these congested districts we will get the scout masters. We put it up to one of our gang, and he said, "We will stand back of you, we will get you the scout masters." So with the Boy Scouts we will catch the boy of 12 to 18 years of age, and the hardened criminal from 18 years of age up, the one that nobody has touched and nobody has ever attempted to touch before the Marshall Stillman Movement attacked the question. (Applause)

THE VICE-PRESIDENT PRESIDING.—The meeting will stand adjourned.

Regular Meeting, Thursday, April 3, 1924

A regular monthly meeting of the Chamber of Commerce was held in the Hall of the Chamber on Thursday, April 3, 1924, at 12 o'clock noon.

Present

IRVING T. BUSH, President

WELDING RING }
JESSE ISIDOR STRAUS } *Vice-Presidents*

CHARLES T. GWYNNE, *Secretary*

and two hundred and twenty-six other members of the Chamber.

Minutes

The minutes of the monthly meeting of March 6th were read and approved.

NOMINATIONS FOR MEMBERSHIP

FREDERICK H. ECKER, Chairman of the Executive Committee, reported the following named candidates for membership and recommended their election:

For Resident Members

<i>Candidates</i>	<i>Nominated by</i>	<i>Seconded by</i>
ELMER G. DIEFENBACH	CHARLES D. ROBBINS	BERNARD J. LARKIN
GEORGE E. DYKE	HAROLD A. HERRICK	ROB'T. E. CHRISTIE, JR.
GUY DU VAL	GEO. E. MOLLESON	ACOSTA NICHOLS
IRA D. HYSKELL	ROB'T. E. CHRISTIE, JR.	HARRY H. EGLY
WILLIAM C. KAESCHE	WM. P. MALBURN	WALTER H. BENNETT
ALBERT C. LORD	DERBY FARRINGTON	CHAS. E. GARDNER
LLOYD A. MUNGER	WARREN J. HOYSRADT	AMBROSE BENKERT
EDWARD E. POOR	REUBEN E. KIPP	CORNELIUS N. BLISS
FRANK C. POUCHER	WM. H. PORTER	SAMUEL S. BLOOD
WILLIAM J. STITT	EDWARD E. HALL	DAVID S. WALTON
THEODORE STOUT WATSON	CHARLES D. ROBBINS	DEAN MATHEY
E. LAURENCE WHITE	J. HENRY LANCASHIRE	WM. H. PORTER

The President appointed Messrs. GEORGE E. MOLLESON and CHARLES H. STOUT as tellers and a vote was taken resulting in the election of the above named candidates.

DELEGATES TO FOREIGN TRADE CONVENTION

Mr. ECKER, for the Executive Committee, offered the following resolution, which was unanimously approved:

Resolved, That the President be, and he is hereby, authorized to appoint delegates to represent the Chamber at the Eleventh National Foreign Trade Convention, to be held in Boston, June 4th, 5th and 6th next.

NOMINATING COMMITTEE

Mr. ECKER, on behalf of the Executive Committee, reported the names of the following members as a Committee to nominate officers and members of standing committees for election at the Annual Meeting of the Chamber, to be held May 1st next:

DARWIN P. KINGSLEY, *Chairman*
JOSEPH P. DAY
MICHAEL FRIEDSAM
FRANK C. MUNSON
ROBERT OLYPHANT
ALBERT STRAUSS
FREDERICK D. UNDERWOOD

On motion, the Chamber unanimously elected the above named Committee.

MUNICIPAL COURT COMMISSION

Mr. ECKER, on behalf of the Executive Committee, also presented the following preamble and resolution, which were adopted unanimously:

To the Chamber of Commerce:

Whereas, The Municipal Court Commission appointed by the Governor of the State has pointed out glaring defects in the administration of justice in this City; and

Whereas, The very foundation of orderly government is based upon the prompt and equitable administration of justice; be it, therefore

Resolved, That the Chamber of Commerce of the State of New York urges upon the Legislature of the State to give immediate consideration to the report of the Municipal Court Commission, at a sufficiently early date, to permit the passage of remedial legislation during the present session of the Legislature.

THE PRESIDENT.—Gentlemen, at this point, ordinarily, the Committee on Finance and Currency would be called upon for report. There is a joint report of the Committee on Finance and Currency and the Committee on Public Service in the Metropolitan District, in respect to the proposed exemption of transit construction bonds from the city debt limit, which, in the absence of Mr. LAMONT, Mr. McCARROLL will present. It was impossible to get it printed and mailed to the members before this meeting. However, it has been printed and is on the chairs, and I have seen a great many members reading it.

With your permission, and if I hear no objection, I will not call for this joint report at this time, but will pass it until after the other reports of the committees have been acted upon, so that the members may have an opportunity to read it, thereby making it unnecessary to have Mr. McCARROLL read it to the Chamber. If any member present thinks that the report should be read before it is acted upon, of course we will have that done. Unless I hear an objection, we will adopt the course that I have suggested.

ENFORCEMENT OF SECTION 28 OF MERCHANT MARINE ACT

DAVID T. WARDEN presented the following report on behalf of the Committee on Foreign Commerce and the Revenue Laws and the Committee on the Harbor and Shipping:

To the Chamber of Commerce:

On February 27, 1924, the United States Shipping Board certified to the Interstate Commerce Commission that adequate shipping facilities to handle the transportation of all commodities other than grain between ports of the United States and ports of Great Britain and northern Ireland and the Irish Free State, the ports of continental Europe north of and including Bordeaux and the east coast of Asia, the islands of the Pacific Ocean, Australia and the East India Islands and the ports of Central and South America are now afforded by vessels documented under the laws of the United States. This certificate had reference to Section 28 of the Merchant Marine Act, 1920, which reads as follows:

"That no common carriers shall charge, collect or receive, for transportation subject to the Interstate Commerce Act of persons or property, under any joint rate, fare or charge, or under any export, import or other proportional rate, fare, or charge, which is based in whole or in part on the fact that the persons or property affected thereby is to be transported to, or has been transported from, any port in a possession or dependency of the

United States, or in a foreign country, by a carrier by water in foreign commerce, any lower rate, fare or charge than that charged, collected or received by it for the transportation of persons, or of a like kind of property, for the same distance, in the same direction, and over the same route, in connection with commerce wholly within the United States, unless the vessel so transporting such persons or property is, or unless it was at the time of such transportation by water, documented under the laws of the United States.

"Whenever the Board is of the opinion, however, that adequate shipping facilities to or from any port in a possession or dependency of the United States or a foreign country are not afforded by vessels so documented, it shall certify this fact to the Interstate Commerce Commission, and the commission may, by order, suspend the operation of the provisions of this section with respect to the rates, fares, and charges for the transportation by rail of persons and property transported from, or to be transported, to such ports, for such length of time and under such terms and conditions as it may prescribe in such order, or in any order supplemental thereto. Such suspension of operation of the provisions of this section may be terminated by order of the commission whenever the board is of the opinion that adequate shipping facilities by such vessels to such ports are afforded and shall so certify to the commission."

By Presidential proclamation, on June 14, 1920, the above quoted section was suspended, but because of the certification above quoted from the Shipping Board, the Interstate Commerce Commission, on March 11, 1924, terminated the suspension of said section and made its provisions effective as of May 20, 1924, to the extent certified to it by the Shipping Board, the action of the Interstate Commerce Commission in this connection being mandatory. According to the public press, the Chairman of the Interstate Commerce Commission, Mr. HALL, has written the Chairman of the Senate Interstate Commerce Commission that the Commission had previously sought legislation on Section 28, "to obviate unnecessary conflict with the needs and usages of inland transportation." Chairman HALL apparently does not favor the provisions of Section 28. He stated in his letter that certain industries would be handicapped by the enforcement and that the rights and interests of foreign countries are unfavorably affected; "and there is always the possibility of retaliatory measures on the part of such countries."

This subject has been considered jointly by the Committee on Foreign Commerce and the Revenue Laws and the Committee on the Harbor and Shipping, both of which are of the opinion that the putting into effect of Section 28 will, in fact, not be of any real assistance in the upbuilding of the American Merchant Marine, but, on the contrary, will lead to a degree of chaos in the export and import trade of the United States that will be deplorable, besides leading undoubtedly to reprisals from

other nations. The mere fact that there are eight or nine hundred Shipping Board steamers laid up is not a conclusive indication that adequate shipping facilities are or can be afforded by American vessels, and certainly the Shipping Board vessels now in commission, together with those privately owned, are not sufficient to give adequate service to the countries named in the Shipping Board certificate. A mere supply of the given amount of tonnage is only one of the factors necessary in furnishing the exporters of this country with an adequate service.

Your Committees are fully alive to the necessity for the up-building of an adequate American Merchant Marine, and would view with favor anything that would be likely to attain that end, but they are confident that the operation of Section 28 could have no other results than those above mentioned. They therefore submit the following:

Resolved, That the Chamber of Commerce of the State of New York places itself on record as opposed to the putting into effect of Section 28 of the Merchant Marine Act, 1920, and strongly urges upon the Shipping Board that they rescind their action of February 27, 1924, and in addition thereto the Chamber further strongly urges upon the Congress of the United States the advisability of repealing Section 28 of the above named Act; and, be it further

Resolved, That the officers of the Chamber and its appropriate Committees be and they are hereby authorized to take such steps as they may deem expedient to put the above views of the Chamber before the Congress and the United States Shipping Board and to take such other steps as they may deem necessary.

Respectfully submitted,

WILLIAM E. PECK, *Chairman*
HOWARD AYRES
MAX EISMAN
SAMUEL T. HUBBARD
THOMAS W. SLOCUM
EUSTIS L. HOPKINS
PERCY H. JENNINGS

*Committee on
Foreign Commerce
and the
Revenue Laws*

DAVID T. WARDEN, *Chairman*
CLIFFORD D. MALLORY
LOWELL L. RICHARDS
WILLIAM E. HALM
HERBERT B. WALKER

*Of the
Committee on the
Harbor and
Shipping*

NEW YORK, *March 28, 1924.*

Mr. WARDEN.—I move its adoption.

The motion was seconded.

THE PRESIDENT.—You have heard the motion, gentlemen. It has been moved and seconded. Is there any debate?

P. H. W. ROSS.—Mr. President, I wish to speak to the question. I would respectfully submit the following objections to the joint report of the Committee on Foreign Commerce and the Revenue Laws and the Committee on the Harbor and Shipping, on the enforcement of Section 28 of the Merchant Marine Act.

The subject to be considered is based upon a Governmental policy which embraces not only the questions of marketing the products of industry on old and established lines, but the broader field of national defense, because American merchant ships are necessary to support the American Navy.

Furthermore, the character and direction of our foreign trade has changed so greatly since the World War that more than ever before in our commercial history is it necessary that American ships should be commissioned to carry American products to new markets that American products are penetrating.

It will be recalled that President COOLIDGE had to dispense with the services of one of his Counsellors because he felt that it was humanly impossible to expect unbiased advice on a question wherein the fortunes of the Counsellor himself were involved.

The Chamber of Commerce has many hundreds of divergent interests in its charge, and in taking a stand upon a broad national policy cannot properly base its stand upon the opinions of any one section of its constituent membership.

It is equally impossible for any body of men engaged in similar occupations and daily immersed in the worries and complications of that particular occupation to arrive at a conclusion on a given subject without the intrusion of personal bias resulting from their own personal experiences. It is no reflection, and certainly no reproach upon men engaged in the export and import commission business to affirm that they are opportunists. They have to be. Their business is to take immediate advantage of existing facilities without break or change in the order of those facilities.

Opportunism is the foe of carefully considered aforethought on national policy. It is a serious impediment and almost invariably results in serious loss to the opportunists themselves. How could it be expected that such a body of men as constitute the first Committee could fail to view with alarm any impending change of serious import that might result in financial loss and certainly temporary disruption of their business? It could not be expected, therefore, that the Committee on Foreign Commerce and the Revenue Laws could arrive at any other conclusion than that which they have announced in their report.

Nevertheless, it must be remembered that such men do not,

themselves, make or produce anything at all. They neither mine, nor farm, nor manufacture, although they are an inestimable help in procuring a market for the products of others, albeit along old and conservative methods of procedure.

For over a hundred years New York commission merchants and exporters have been selling the products of a debtor nation to a creditor market. The World War has changed all that. We are now a creditor nation and we have to push the sale of our products more and more in new markets and, if we are wise, in much the same manner that Holland, Britain and Germany pushed their markets, *always linking the venture of the moment with stability of national policy*—which is by depending chiefly upon their own vessels to carry their own goods and their own nationals into all ports of the world.

But you will see, gentlemen, that the recommendations of the said Committee are not in line with the necessities of the vast body of producers throughout the interior of the country, and that it would not be fair to put the imprimatur and influence of the Chamber of Commerce of the State of New York behind the findings of quite a minor section of the whole body of industrial activity.

I would, therefore, submit that their report be acknowledged with appreciation and thanks and laid upon the table.

With regard to the Committee on the Harbor and Shipping, since the report is in opposition to the operation of American laws, I submit that it is not seemly for any gentleman who operates foreign-owned ships to participate in the deliberations of such a committee, even if he be the most patriotic and sincere of American citizens. It is inconceivable that a gentleman can be true to his British owner and also to his American country at one and the same time, *should any conflict or difference of opinion arise between his British employer and the United States of America*. Hence it follows that every member of a committee passing upon a report touching on American laws should be as single hearted in his business affiliations as he is in his citizenship.

Section 28 (in conjunction with the rulings of the Interstate Commerce Commission) grants a longer term for the "turn-around" of an American ship than for a foreign vessel. It has always been the chief reproach against New York Harbor that vessels, as a rule, cannot enter, discharge their cargoes, reload and sail away again as quickly and cheaply in the Harbor of New York as they can in other harbors in the United States. Section 28 provides for a difference in time allowance to American and foreign-owned ships. Owners of American ships will be benefited by this time allowance. Owners of foreign ships believe they will be injured by the new law. It follows, therefore, that the status of the owner and operator of American ships will be very different from that of foreign ships, and hence

it follows that representatives of both lines should not be on the committee that supposedly outlines, and to that extent is responsible for the stand the Chamber will take on proposed legislation.

I am, therefore, of the opinion that the report, in so far as the Committee on the Harbor and Shipping is concerned, should also be considered in like manner as that submitted by the other Committee.

I am not blind, Mr. President, at all to the necessity of the Chamber taking some action in the direction of requesting the Government to suspend the operation of Section 28 for at least another six months; *but I am decidedly opposed to this Chamber going on record for a total suspension of that section of the Act.* There are many very important things to be considered. For instance, Tokio is torn to pieces by an earthquake; there are many thousands of tons of American steel that have been contracted to be shipped to Japan, but the proviso was that this steel should be shipped in Japanese ships. It is obvious that, if like a thunderbolt the new regulation should come into effect on May 20th, great injury will be inflicted on all people who made those contracts.

Again, going to the other extreme, from steel to trifles, the 10 cent stores, the Woolworth stores, and such people buy millions and millions of dollars' worth of Japanese stuff. To my knowledge there is at the present moment some thirteen million dollars' worth of little trifling knickknacks arranged for and contracted for, to be brought from Japan, again in Japanese vessels, and the price fixed upon that fact.

On the other hand, Mr. BRUSH, the President of the American International Corporation, is quoted in this morning's paper as follows:

"Regarding the Pacific Mail Steamship Company, in which the American International Corporation owns 31 per cent. of the stock, Mr. BRUSH said that the outlook for that company is favorable, and that if the spirit of the Jones Bill is carried out there is no question of the continuity of the Pacific Mail service."

And so this question, gentlemen, ramifies into a thousand lanes of great importance.

I wish, if possible, to impress upon the members that the great fault of ours in America, in regard to our commerce, is that we have been confirmed opportunists, waiting for a market, and that we have *never followed up the commercial transactions of the moment with a proper regard for a permanent national policy.* The Germans have, the Dutch did in the old days, the Japanese do vigorously now; the English also do. And it is wise for us here, in this Chamber, not to fly off the handle and immediately adopt this report as it stands, but allow the proper time for reconsideration of the subject. I thank you.

THE PRESIDENT.—Is there a motion covered by your remarks, Mr. ROSS?

Mr. ROSS.—My motion is as expressed in my remarks, sir.

ARTHUR S. LELAND.—Mr. President, I move that the remarks of Mr. ROSS be referred to the Committees and the original motion be put over to the next meeting.

THE PRESIDENT.—I beg your pardon, I think there is a motion to lay upon the table.

Mr. ROSS.—I will withdraw my motion in favor of the motion just made by Mr. LELAND. I do not wish to be insistent at all, and if the gentleman will allow me, I will second his motion.

THE PRESIDENT.—The motion is that the report with the remarks of Mr. ROSS be referred to the Committees and action on the report be laid over until the next meeting; is that correct?

Mr. LELAND.—Yes, Mr. President.

The motion was seconded.

A rising vote was taken and Mr. LELAND'S motion was adopted by a majority.

EXCLUSIVE GOVERNMENT PLANTS TO MANUFACTURE ARMY AND NAVY SUPPLIES OPPOSED

DAVID T. WARDEN, Chairman of the Committee on the Harbor and Shipping, presented the following report and moved its adoption:

To the Chamber of Commerce:

A bill is now in Congress, known as H. R. 2702, introduced by Representative HULL which is designed according to the preamble "to relieve unemployment among civil workers of the government, to remove the financial incentives of war, to stabilize production in Federal industrial plants, to promote the economical and efficient operation of these plants, and for other purposes."

This measure in short proposes to make it obligatory that all vessels and all materials for the government-owned mercantile marine and for the Navy, as well as all materials for the Army and other military forces of the United States be

repaired, and manufactured exclusively in government-owned and operated establishments, provided such plants are equipped to do the work. The fact that a government establishment has previously performed work similar to that required, qualifies it to undertake the work in question.

Your Committee on the Harbor and Shipping is interested in this measure because its enactment will exclude private shipbuilding yards from building, repairing and reconditioning merchant marine vessels under the control of the Shipping Board as well as Navy vessels. Your Committee feels that a government monopoly would work to the detriment of an efficient shipbuilding and ship repairing industry. A monopoly is a mistake particularly at a time when an effort is being made to establish an American Merchant Marine. Work can also frequently be done more cheaply and more expeditiously in private yards than in navy yards, and in such cases the government should use the private yards. Furthermore, national preparedness demands that private yards have experience in navy work. It was demonstrated during the Great War that it was a serious misfortune to follow the lead of those who desired the nation to ignore all the first principles of national preparedness. Also there is no evidence that financial profits are among the causes of war as intimated by this bill. War for the financier, merchant, shipper or manufacturer is a rash speculation, the risks of which no sensible man cares to assume. It does not seem reasonable to justify a government monopoly on such grounds.

Government operation of industrial undertakings may furnish more employment to civilian workers, but this occurs owing to the greater inefficiency of a business which is carried on under government jurisdiction. The taxpayer, however, pays for this inefficiency, and the community as a whole is not benefited.

At present, private shipyards and manufacturers make definite bids on government business, while the navy yards only make estimates of the cost, which may very well be exceeded without penalty except to the taxpayer. In these estimates no overhead or administration expenses are included.

On every hand there are those who would change the early ideals of our government and establish a policy of Federal operation of industrial undertakings. Sometimes it is proposed to establish by law an exclusive government monopoly, or in other cases to put the government into a business which is to be built by tax exempt government funds and carried on by tax exempt properties, all in competition with private industry. Government competition results in preventing additional private investments in the business and leads to the withdrawal of existing investments where possible. This Chamber has on a number of occasions expressed its opposition to proposals of this kind.

Your Committee therefore offers the following resolution:

Resolved. That the Chamber of Commerce of the State of New York opposes the Hull Bill, H. R. 2702, or any similar legislation which shall have the effect of excluding privately operated ship yards or manufacturers of naval or army materials, etc., from entering into competitive bidding and from securing thereby contracts and government business as in the past.

Respectfully submitted,

DAVID T. WARDEN, *Chairman*

NEW YORK, *March 28, 1924.*

The report and resolution were adopted unanimously.

INVASION OF CENTRAL PARK OPPOSED

WILLIAM MCCARROLL, Chairman of the Committee on Public Service in the Metropolitan District, offered the following report and resolutions, which were adopted unanimously:

To the Chamber of Commerce:

Your Committee on Public Service in the Metropolitan District last year presented two reports, which the Chamber adopted, in opposition to the use of Central Park for any other purpose than the one for which the original founders intended it. As a bill has been introduced in the Legislature, known in the Senate as 1284 and in the Assembly as 1258, "to amend Chapter 364 for the laws of 1922 by authorizing the use of a portion of Central Park for the erection and use thereon of buildings for the advancement of education in music, drama, and other art," your Committee feels this Chamber should reaffirm its previous actions and adopt a resolution specifically opposing any use of Central Park for an art center or similar project.

In the report adopted November 2, 1922, it was pointed out that Central Park, which was planned in 1851 and created by law enacted July 21, 1853, was intended to provide a place where the beauties of woodland scenery and nature can be enjoyed by the public, where a breathing space can be found, with a bit of natural color. In carrying out this object, it has been sought to have the few structures in the park concealed. This is even true of the bridges, of which there are 46. All of these are in a large measure concealed deliberately because it is a part of the scheme of the park. This Chamber therefore opposed the erection of a war memorial and swimming pool in the park, or any other use of the park inconsistent with its original purpose.

In line with this conclusion another report was adopted November 1, 1923, opposing a plan to build a subway through the park by the open-cut method. It was stated that the Borough of Manhattan has only one acre of park area for every 1,456 people. The population of Manhattan is steadily growing, yet it is not possible to increase the park area owing to the built-up condition and high land values. As a park area of an acre for every 250 inhabitants is not considered excessive in many cities, it is obvious the existing park should be carefully conserved.

In the case of the present proposal for an art center, many sites could be obtained which are suitable without infringing on the park. When our park space is already insufficient and can hardly be increased in Manhattan, it does not seem reasonable to use any of Central Park for purposes which can be just as well attained through the purchase of land elsewhere. In fact, it has been shown that other sites would be much more desirable and more accessible to the inhabitants of the several boroughs of the city.

It is believed that the location of an industrial art school and music center in the park would be an encroachment which could be prevented by legal action. It certainly would destroy the integrity of the park and would be an opening wedge for future encroachments.

The *New York Times* on Sunday, March 16, 1924, published an article entitled "Central Park Again in Danger" and gives an account of the 80-year battle to invade the park which has gone on despite consistent repulses. In this article a diagram is reprinted from the *Times* of March 31, 1918, to show what Central Park would look like if the various proposals had been carried through. Not all the proposed invasions are included in the diagram, because the Park itself could not hold them. The thirteen "sample" enterprises which are actually shown are as follows: (1) Outdoor theatre to seat 100,000; (2) Stadium project on reservoir; (3) Marionette theatre for children; (4) a street railway; (5) steamboat and full-rigged ship on lake; (6) proposed site for Grant's Tomb; (7) place of worship for every denomination; (8) special exposition building; (9) building for exhibiting merchandise; (10) permanent circus grounds; (11) a grand cathedral; (12) academy of design; (13) playground for noisy sports.

Since 1918, when the diagram was prepared, some of the other enterprises suggested have been: Music and Art Center—Seventh Avenue and Fifty-ninth Street; War Memorial Monument—Lower Reservoir; Fifty-ninth Street Boulevard; Subway (open cut)—Fifty-ninth Street to 107th Street; Sculpture Exhibit (Garden); Garage for 30,000 Automobiles—Fifty-ninth Street; Police Automobile Garage—Sheepfold; Mitchell Memorial—Belvedere; Drive from Fifth Avenue at Seventy-ninth Street, passing over wall of Reservoir and out Seventy-seventh

Street West; Institute for Safety Devices—Arsenal Building; Reproduction of Trenches in North Meadow; Stadium on Site of North Reservoir; Landing Field for Airplanes—Reservoir; Automobile Sign—west side of Metropolitan Museum; Car Track—inside west wall.

Your Committee offers the following resolution:

Resolved, That the Chamber of Commerce of the State of New York is opposed to bills S. 1284 and A. 1258 introduced in the Legislature authorizing an art center in Central Park, and is opposed to any similar measure authorizing an art center or any other project which shall be inconsistent with the idea upon which the park was founded, or which shall detract from its present condition and natural character; and, be it further

Resolved, That the Committee on Public Service in the Metropolitan District or other delegates from the Chamber shall be authorized to appear at hearings and take other action deemed desirable to carry out the conclusions of this report and resolution.

FULL POWER TO ENFORCE ZONING REGULATIONS FAVORED

Mr. MCCARROLL, on behalf of the Committee on Public Service in the Metropolitan District, also presented the following report, which was adopted unanimously:

To the Chamber of Commerce:

The City of New York, like most of our larger cities, has zoning regulations. New York's zoning ordinance was passed on July 5, 1916. Preceding this ordinance an extensive study had been made of the subject and laws enacted at Albany granting the police power of the State to the City for the purpose of dividing the City into districts according to height, bulk and use of buildings, with power to make appropriate regulations for each district, and with a provision that the regulations might differ in the different districts.

The fundamental principles upon which zoning is established is plain common sense, and property owners generally have ap-

proved. The purpose is to prevent the landowner from putting up a building to any height, in any place, of any size, and use it for any purpose, regardless of how much it hurts his neighbors. In a broader sense, zoning regulations are to promote the public safety, health, morals and general welfare of our citizens. In practice it stabilizes buildings and values. It can be used to lessen congestion in the streets, and is instrumental in reducing the cost of living. Your Committee on Public Service in the Metropolitan District believes that the members of this Chamber are in sympathy with the general purposes of zoning.

A bill is now in the Assembly, No. 776, "to amend the Greater New York Charter, in relation to the enforcement of the building district regulations of the Board of Estimate and Apportionment." The purpose of this amendment is to give the city officials more power in enforcing the zoning laws. Owing to the lack of penalties, there has been much difficulty in making our zoning ordinance effective. The proposed amendment provides for enforcement by injunction, fines and other penalties of a minor nature, and designates the city departments which shall enforce the law. The relief afforded is considered of great importance in the preservation of the business and the residential districts. It will be possible to prevent the occupancy of a building in excess of the legal proportion of floor space, or the use, contrary to zoning regulations, of an office building for loft or business purposes. The bill specifically provides that in addition to other remedies "the City of New York by the corporation counsel may maintain an action for an injunction to restrain any violation of the said building zone resolution."

Your Committee on Public Service in the Metropolitan District believes that the enforcement of the zoning regulations in this city is essential to the general welfare, and that the city officials should have proper authority to this end.

The following resolution is therefore offered:

Resolved, That the Chamber of Commerce of the State of New York endorses in principle Bill No. 776 in the Assembly to amend the Greater New York Charter to give proper power to the City of New York to enforce the building district regulations.

Respectfully submitted,

WILLIAM MCCARROLL, *Chairman*

NEW YORK, March 25, 1924.

CONFERENCE ON TRAFFIC PROBLEMS IN NEW YORK AND ITS ENVIRONS

Mr. McCARROLL.—Mr. President, with your permission and that of the Chamber, I desire to offer a motion on behalf of the Committee:

The Committee on Plan of New York and its Environs has written to the Chamber inviting it, together with a number of other commercial organizations, to co-operate in calling a conference on Traffic Problems in New York and its Environs, to be held at the Town Hall on May 20th next. Representatives of state and municipal authorities, city planning commissions and commercial and civic organizations are to be invited to the conference in order to secure expressions of opinion on the serious problems connected with traffic in New York and surrounding communities.

This communication was referred by the Secretary to your Committee on Public Service in the Metropolitan District, and the Committee decided to request that authority be granted to the Committee on Plan of New York and its Environs to use the name of the Chamber as one of the signatories to the invitation calling the conference, and I move that such authority be given.

The motion was seconded and approved unanimously.

THE PRESIDENT.—At the beginning of the meeting I explained to those members who were present that we would postpone action upon the joint report brought in by the Committee on Finance and Currency and Mr. McCARROLL's Committee until after the other reports had been acted upon, in order to give time to the members to read this report, which had not been mailed to them. I then stated that if there was no objection we would act upon the report without a formal reading, as it is rather long. I will, however, ask Mr. McCARROLL to make a very brief summary of the points covered by the report. If there is no objection, we will take that course.

**PROPOSED CONSTITUTIONAL AMENDMENT EXEMPTING
TRANSIT CONSTRUCTION BONDS FROM DEBT
LIMIT OPPOSED**

Mr. McCARROLL.—Mr. President and gentlemen, this of course is a very important subject. We are all aware of the financial status of the City and its needs. We are also all aware of the great need for rapid transit expansion in the City, and

these two together make this subject a very important one at the present time.

I do not know that I can well summarize or need to detail the various points taken up in this report, but I would call your attention to the reference in it to the comparison of the issue of water bonds—bonds for the water supply—with the proposed issue of bonds and the extension of the debt limit accordingly for rapid transit construction. That was provided to apply as of July, 1926, when it is expected it would be needed.

Since this report was drawn there has been a change in the legislative situation. The bill referred to in the early part of the report is a bill introduced by Senator TWOMEY in the Senate and by Mr. TAYLOR in the Assembly, and provided for an extension of the debt limitation to permit an issue of bonds of the City, to an unlimited amount, for rapid transit, as might be needed. No limit at all is contemplated in the bill. Since that time the same Senator has introduced another bill, and it seems to be uncertain and I have been unable yet to ascertain whether that succeeding bill was intended to take the place of the first to which I referred, or is intended to be a supplementary one to be acted upon also. But this second bill has now been introduced, as stated, and is understood, as reported generally in the papers, to be at the instance of Comptroller CRAIG. This second bill does provide that the issue of bonds, approximately \$275,000,000, be provided, upon the basis of the water supply bonds that were issued and which are exempt from the debt limitation. In other words, that the exemption and the issue of transit bonds should be to the equivalent of the amount of those water bonds that are exempt from the debt limitation.

With that statement, Mr. President, I do not know that I have anything to add unless some questions are asked. I have now a copy of that new bill, which just reached me yesterday, and if the Chamber desires to know any detail of its provisions, it is here. That is the sum and substance of the legislation as it now stands.

I move the adoption of the report in behalf of the two Committees.

Report on Proposed Constitutional Amendment Exempting Transit Construction Bonds From Debt Limit

To the Chamber of Commerce:

1. A number of bills are pending in the Legislature, some already passed in the Senate, providing in general for the transfer of State regulation and municipal operation of its public utilities to the city authorities and for the abolition of the Transit Commission. Upon all such measures the Chamber has ex-

pressed its disapproval both last year when they were presented and this. There have now been introduced in both Senate and Assembly, concurrent resolutions providing for a Constitutional amendment designed to remove entirely from the city debt limitation bonds to be issued for transit facilities; the clause in the Senate Bill No. 1416 reading as follows: *The limitation upon the power of a city to become indebted shall not apply to indebtedness hereafter incurred by the City of New York for the acquisition, construction or equipment of properties to be used for rapid transit subway railways.* This measure proposes no limitation to a permissible total in amount. Another proposal places a limit to the possible amount of 275 millions of dollars. The Executive Committee of the Chamber referred this whole subject for joint consideration by the Committees on Finance and Currency and on Public Service in the Metropolitan District.

2. As a result of their deliberations, your Committees have now to report as their unanimous judgment that all these measures should be strongly condemned and opposed. The proposition to overstep the constitutional debt limitation is but an indication of the all too general tendency in the direction of municipal usurpation of business activities outside of proper Governmental function and of unwarranted if not extravagant expenditures. In the present proposals the removal of debt limitations is urged on the plausible ground that only by such means can funds for rapid transit purposes be provided by the city and by the assumption that under existing conditions none can be obtained from private sources. If this latter case be true, as it well may be, it cannot be overlooked that ample reason for this situation is to be found in the attitude of the city's authorities and in consequent apprehension by the public as to the safety of private investment in rapid transit. By the same token, the stability of the city's finances, if the existing debt limit were to be removed, would be endangered.

3. It can scarcely be denied that, had a sound business policy been permitted and exercised during recent years, putting the operation of the transit facilities in a position to receive a fair compensation for services rendered, the result would have been an income affording a reasonable return upon capital but—a point particularly to be noted—would have yielded to the city its fair share upon its investment in the lines, with a result of releasing, *ipso facto*, the amount of the city's investments of about 275 million dollars from its existing debt limit, and of thus making a like sum now available for the further construction of new lines so imperatively needed. Under such a favorable outcome, which was quite within the probabilities, no proposal like the present one to remove the existing debt limitations,

which so safeguards the city's expenditures and likewise its credit, would, for a moment, have been considered.

4. The city's net funded debt, i. e., deducting the amount of the sinking fund, now stands at \$1,093,342,632, to which is to be added the general fund debt of \$414,000,000, and revenue bonds of \$59,000,000. The interest charge against same amounts to \$55,302,516. While the city's credit is deservedly high, it is not without significance that the obligations of some other cities of the State, such as Rochester and elsewhere, command a more favorable market basis. The serious question cannot be avoided as to what would be the market effect upon its obligations should the city issue—beyond its present debt limit—say 275 or more millions of dollars for rapid transit construction and particularly so under the city administration's declared policy for so-called independent lines—that is, disconnected from and not co-ordinated with the present system. With no desire whatsoever to argue a brief for the present operating companies, it is axiomatic that the construction of fresh lines without relations to existing systems and entirely independent in management and co-operation of the present lines would—from an engineering and operating point of view—be wasteful and extravagant and of limited service to the public. Such unsound policies would inevitably leave their early reaction upon the city's public credit. It should be borne in mind that to the extent that such credit has been impaired, or, to put it another way, to the extent that it is necessary to increase the rate of interest upon the city's obligations in order to secure the necessary funds for the city, it results not alone in added cost for the subways, but it requires that the additional interest rate be paid for the money to be borrowed for all other purposes, schools, sewers, etc.

5. The present proposal has been defended as being comparable with the plan adopted in the case of the water supply, but neither the conditions nor the history of that creditable undertaking would appear to be parallel except in a minor degree, nor are they applicable to the transit situation. Your Committees in no way question the good faith of the authors of the present proposals which, however, they believe to be unworkable. The main question, in considering these proposals, is this: Would the removal of the constitutional debt limitation result in the early construction and effective operation of the new subways which New York's growing population so sorely needs? To this question the answer to which your Committees, after due survey, are driven is, No.

6. The pending legislative proposals for an amendment looking to a removal of the City's Constitutional debt limitation for

rapid transit purposes are calculated, if they finally become law, to result in little if any relief. Moreover, the proposed debt limitation removal would be a heavy blow at the credit of the City of New York. Under such legislation, New York City's obligations would, in certain States of the Union, become illegal for investment by savings banks and other fiduciary institutions. This narrowing of the markets for New York City's obligations, while of some moment, would, in the judgment of your Committees, be even less serious than the general discredit cast upon New York City and the vicious example the City, in thus lowering her credit restrictions, would be setting to other cities of the first class. New York City has been looked up to throughout the whole country as an example of civic good faith, careful fiscal management and honest credit. Such legislation would not only reflect upon the reputation which New York City has built up, but would prove an unfortunate example for all the other great cities of the country.

7. Finally, the best constructive policy, as it would appear to your Committees, designed to resolve the present unfortunate *impasse*, and to furnish genuine rapid transit to New York City's citizens, is for the City authorities to make a careful survey into the proposals heretofore presented by the Rapid Transit Commission and, in a spirit of progress and co-operation rather than one of obstruction, endeavor to work out the plan of advance based upon sound business principles and upon a realization that rapid transit is a public utility which, granting a reasonable overhead and efficient management, should year in and year out carry itself.

It may be added that the progress already made in the direction of the Unification Plan embodied in the Transit Commission Law indicates final accomplishment of the successful and permanent establishment of the transit facilities of the City on an adequate and satisfactory basis. Without traversing that subject, which has been previously considered and acted upon by the Chamber, it seems manifest that in the uncertain, incomplete and more or less confused state of the proposed legislation, the present is no time to consider seriously, much less project any proposal for authorization by constitutional amendment of an immense increase in the city's debt.

Your Committees therefore join in offering the following resolution:

Resolved, That the Chamber of Commerce of the State of New York approves the joint report of the Committee on Finance and Currency and the Committee on Public Service in the Metropolitan District as above set forth, and the Committees

are hereby authorized to take such steps as they may deem necessary to carry the above recommendations into effect.

NEW YORK, *April 3, 1924.*

The report was unanimously adopted.

REVISION OF THE BY-LAWS OF THE CHAMBER

DARWIN P. KINGSLEY.—Mr. President and Members of the Chamber, you have before you the final draft of the proposed changes in the By-Laws. This draft differs as much from the draft first submitted by your Committee as it does from the original text of the By-Laws themselves. The present form of this report has been arrived at by further discussion in the Committee, and by suggestions made by members of the Chamber, all of which have been given very careful consideration. It is now presented as the unanimous report of the Special Committee appointed to Survey the Organization and By-Laws of the Chamber.

Mr. President, is it your wish that I shall go over each of these paragraphs briefly, or do you want to put the whole question on the theory that all the members have had this text for some time and that they are ready for it now?

THE PRESIDENT.—This has been before the Chamber for some time, and unless some member has a contrary view I think we would be ready to act upon it without a longer time taken than is necessary.

Mr. KINGSLEY.—Mr. President, I move the adoption of the proposed revised By-Laws of the Chamber.

The motion was seconded.

REVISED BY-LAWS OF THE CHAMBER**ARTICLE I****Officers and Their Election**

THE officers of the Chamber shall be a President, twelve Vice-Presidents, an Executive Vice-President, a Treasurer and a Secretary, all of whom shall be chosen by ballot, a majority of the votes cast at each election being necessary in each instance to elect.

The terms of office of officers now in service shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, and annually thereafter, all officers as defined in this article shall be elected to hold office for one year, except that the twelve Vice-Presidents elected at the Annual Meeting in May, 1924, shall be chosen, three to hold office for one year, three for two years, three for three years, and three for four years, their respective terms of service being designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, three Vice-Presidents shall be chosen to serve for four years to take the place of those whose terms of office then expire. After the expiration of a Vice-President's term of office he shall be ineligible for re-election until one year has intervened. The Executive Vice-President shall not be subject to the limitation of this paragraph, but may be re-elected to office annually without limitation.

No member shall hold the office of President for more than two consecutive years, but a member who has been President may be elected to serve again, provided another member has served as President in the intervening time, and provided that no member shall serve in all more than four years.

All persons elected to office shall take the oath or affirmation required by the Charter, and shall continue in office as above provided, or until their successors shall have become duly qualified according to the Charter.

Should any elective office become vacant through any cause whatsoever, such vacancy shall be filled by election at the next regular meeting or any subsequent meeting of the Chamber after such vacancy has been reported to the Chamber.

ARTICLE II**Meetings**

The regular meetings of the Chamber for the transaction of business shall be held in the Hall of the Chamber on the first Thursday in each month (the summer vacation only excepted) at twelve o'clock noon. When the first Thursday in any month shall fall on a legal holiday, the regular monthly meeting shall be held on the Thursday following, unless otherwise ordered by a vote of the Chamber.

Special meetings may be held at such other places, and at such other times as the President, or, in his absence, one of the twelve Vice-Presidents, according to seniority, may designate, upon the written requisition of ten members; provided, that one day's notice of the time, place and object of the meeting shall have been publicly given; and also provided, that no other business except that designated in such call and notice shall be acted upon.

ARTICLE III

Members and Their Election

No person shall be admitted a member of this Chamber except merchants or others engaged in trade or commerce or in pursuits directly connected therewith.

The membership of the Chamber shall consist of two classes: resident, those who reside in or do business in the City of New York; non-resident, those who neither reside in nor do business in the City of New York.

All nominations for membership of the Chamber must be made in writing, signed by one member, seconded by another member, together with a statement of the occupation and qualification of the candidate and be addressed to the Executive Committee for consideration.

If the Executive Committee approve the nomination, they shall report the same to the Chamber at the first regular meeting thereafter. The candidate shall be then balloted for; and if five or more negative ballots are cast, he shall not be admitted a member, nor be again proposed until after the expiration of one year from the time of such rejection.

For dishonorable conduct or dealings the Executive Committee, after a hearing, may recommend to the Chamber that any member charged with such conduct be expelled, suspended or disciplined. The Chamber may by a two-thirds vote at a regular meeting expel, suspend or discipline such member, provided due notice has been given by the Secretary of the Chamber both to the accused and to the membership at large of the day and hour when the recommendation of the Executive Committee shall be acted on, and provided further, that if the accused member does not appear for such hearing in person or by proxy action may be taken by the Chamber in his absence.

When the resident membership shall number 2,000 (exclusive of honorary members), no more members shall be admitted to that class, except to fill vacancies that may thereafter occur; and when the non-resident membership shall have reached 250, no more members shall be admitted to that class, except to fill vacancies that may thereafter occur.

The Secretary of the Chamber shall furnish to each member in good standing who may apply therefor, an engraved certificate of membership, duly signed and authenticated.

ARTICLE IV**Honorary Members**

Honorary members may be elected at any regular meeting of the Chamber, or at a special meeting called for that purpose, on the nomination of the Executive Committee, and without ballot, unless called for. They shall be entitled to all the privileges of regular members, and shall pay neither initiation fee nor annual dues.

The Secretary shall furnish each honorary member, thus elected, with a certificate of membership, duly signed and authenticated.

ARTICLE V**Dues**

After candidates have been duly elected by the Chamber they shall become members upon payment within thirty days of an initiation fee of fifty dollars. The annual dues of resident members shall be one hundred dollars per year, payable on the first day of January of each year, but the annual dues of any member elected after the January meeting shall be for the unexpired portion of that year, payable in advance at the time of election.

For non-resident members the initiation fee shall be fifty dollars and the annual dues of twenty-five dollars payable in like manner.

The Executive Committee may, in its discretion, for reasons satisfactory to itself, remit the annual dues of any member; and it may accept the resignation of any member, at any time, if the annual dues of such member, to the date of such resignation, shall have been paid or remitted.

If the annual dues of any member remain unpaid for one year his name may, after due notice to the said member, be stricken from the rolls of the Chamber by order of the Executive Committee.

ARTICLE VI**Duties of Officers**

Of the President.—The President shall exercise a general supervision of the affairs and interests of the Chamber. He shall preside at all meetings of the Chamber, regular and special, and all motions of business and adjournment shall be addressed to him. He shall appoint all Special Committees, except where the Chamber shall otherwise order. He shall sign all official documents of the Chamber. He shall countersign the annual accounts of the Treasurer when duly audited. He shall call special meetings of the Chamber, on the written requisition of

not less than ten members, stating the object thereof, and shall designate the time and place at which such special meeting may be held, and direct the due notification thereof.

Of the Executive Vice-President.—The Executive Vice-President shall devote himself entirely to the affairs of the Chamber. He shall have charge of the administrative work of the Chamber, supervising the duties of the Secretary and of all the salaried staff of the Chamber, and of those employed by the Board of Trustees of the Real Estate. He shall, under the direction of the President and the Executive Committee, conduct the correspondence of the Chamber, especially with reference to its external affairs. He shall be, *ex-officio* without vote, a member of all Committees, regular or special, and shall attend as far as possible all meetings of the Chamber and of its Committees. He shall, under the guidance of the President and the Executive Committee, supervise all publications of the Chamber. He shall be the custodian on behalf of the Chamber of the Great Hall and other rooms of the Chamber, and shall have the care of its Library, portraits, and other property not otherwise provided for, except its real estate. He shall keep such property insured against fire. He shall relieve the President in every way possible of all routine or ordinary details of the work of the organization. He shall assist the Committees of the Chamber so far as is in his power. In the absence of the Executive Vice-President the Secretary shall act in his place.

Of the Vice-Presidents.—The twelve Vice-Presidents, in the order of seniority, shall, in the absence of the President, have the same power and authority as the President.

Of the Treasurer.—The Treasurer shall have the charge of all moneys collected or received for the use of the Chamber, except money arising from or in any way connected with its real estate, or appropriated for, or received to acquire or improve the same. He shall disburse the same whenever not otherwise provided for by these by-laws, only upon the written warrants of the Executive Committee. He shall keep books of account of all receipts and disbursements, and the vouchers therefor, in the usual form, and shall produce a copy of the same, fairly stated, for the inspection of the members, at each Annual Meeting. Such a copy of accounts shall be duly audited by auditors appointed for the purpose by the Chamber, and be signed by them and countersigned by the President, on or before the Tuesday next preceding the Annual Meeting. The Treasurer shall deliver over to his successor the cash remaining in his hands, and also any certificates of stock or other securities, the property of this Chamber, together with the books of account, chest and key, and may require a receipt therefor. In the absence of the

Treasurer-elect, the same shall be delivered to the President. In the absence of the Treasurer, the Chairman of the Executive Committee shall perform the duties assigned to the Treasurer.

Of the Secretary.—The Secretary shall, under the supervision of the Executive Vice-President, devote himself entirely to the affairs of the Chamber. He shall have the general care of all documents and correspondence belonging to the Corporation. He shall attend all meetings, and keep a fair and correct register of all proceedings, rules and regulations of the Chamber, which shall be regularly entered in the minute book. He shall also attend upon and keep minutes of the proceedings of the Executive and other Standing Committees, and shall assist the Special Committees as far as is in his power. He shall duly notify members of their election, sign all documents jointly with the President, and have the custody of the seal of the Chamber for their proper authentication. He shall give due notice of all meetings, both regular and special. When neither the President, nor any of the twelve Vice-Presidents is present at any meeting regularly called, the Secretary shall, after reasonable delay, adjourn the meeting *sine die*.

He shall see to the collection of all dues from members, and regularly turn over and pay the same to the Treasurer, and shall render him all required assistance in the clerical part of his duties.

An Assistant Secretary may be appointed by the Executive Committee. He shall assist the Secretary in the performance of his duties, and in the Secretary's absence act in his place. He shall hold office during the pleasure of the Committee.

ARTICLE VII

Board of Trustees of the Real Estate

Membership.—The Board of Trustees of the Real Estate shall consist of the President of the Chamber, *ex-officio*, as Chairman, and six members to be elected as hereinafter provided.

Election.—At each Annual Meeting of the Chamber there shall be elected from among the members two trustees for a term of three years, to fill the vacancies of those whose term of office will then expire. Any vacancies in said Board otherwise occurring shall be filled at the next regular or any subsequent meeting of the Chamber.

Powers and Duties.—The President of the Chamber shall be the Chairman of the Board of Trustees *ex-officio*, and the Secretary of the Chamber shall be Secretary *ex-officio*, without vote, and said Board may elect a Treasurer, and appoint such other assistants as it may require. The Board of Trustees shall have

the custody, control and management of all real estate of the Chamber, and of all funds and other property appropriated or received for the purchase, improvement, or any other purpose affecting real estate, and shall have full power in the name of the Chamber to contract for and acquire such real estate as it may deem wise, and to improve the same by demolition, alteration or erection of buildings or otherwise, adopt plans, modify the same from time to time, and make all appropriate contracts therefor and for the management of said real estate. The Board may provide for such compensation to its appointees and assistants as it may deem wise, and pay the same from any funds in its control. No sale or mortgage of the real estate shall be made except by authority of the Chamber by resolution adopted at a regular meeting or special meeting called for that purpose. All conveyances, mortgages, leases or contracts of, or affecting the real estate of the Chamber, shall be authorized by said Board and the President, or a majority thereof, and shall, when so authorized, be executed under the seal of the Chamber, attested by the signatures of the President and Secretary of the Chamber.

The Great Hall of the Chamber shall be used exclusively for meetings of the Chamber, unless consent for other temporary use be given by a two-thirds vote of the Board of Trustees of the Real Estate and the President of the Chamber at a regular meeting or special meeting called for that purpose, or in writing.

The Board shall from time to time as it deems wise, make reports to the Chamber.

The Board is authorized and empowered to receive from the Treasurer of the Chamber all gifts and bequests of money or securities given to the Chamber in trust in the way of endowment or otherwise, for any object connected with the operations of the Chamber, except the Charity Fund, and to invest, control, manage and disburse the same as provided by the donors thereof.

Duties of Officers.—The President shall preside at the meetings of the Board of Trustees when present, and shall perform the usual duties of that office. The Secretary shall keep true and careful minutes of the meetings, and perform such other duties as shall be assigned to him by the Board. The Treasurer of the Board shall be the custodian of all funds under its control, shall collect and receive all money arising from rents or otherwise, make such disbursements and payments as the Board shall direct, and keep accurate books of account therefor. All cheques against said funds shall be signed by the Treasurer and President (or, in his absence, the senior member of the Board), and appropriate vouchers shall be taken for all disbursements. The Treasurer shall, under the direction of the Board, be the general manager of the real estate.

ARTICLE VIII**Standing Committees**

The Standing Committees of the Chamber shall be:

An Executive Committee.

A Committee on Finance and Currency.

A Committee on Foreign Commerce and the Revenue Laws.

A Committee on Internal Trade and Improvements.

A Committee on the Harbor and Shipping.

A Committee on Insurance.

A Committee on Taxation.

A Committee on Arbitration.

A Committee on Commercial Education.

A Committee on Public Service in the Metropolitan District.

The Executive Committee shall consist of a Chairman to be elected by the Chamber at the regular Annual Meeting in May of each year, and, *ex-officio*, the Chairman of the Committee on Finance and Currency, the Chairman of the Committee on Foreign Commerce and the Revenue Laws, the Chairman of the Committee on Internal Trade and Improvements, the Chairman of the Committee on the Harbor and Shipping, the Chairman of the Committee on Insurance, the Chairman of the Committee on Taxation, the Chairman of the Committee on Arbitration, the Chairman of the Committee on Commercial Education, the Chairman of the Committee on Public Service in the Metropolitan District, the President of the Chamber, the Executive Vice-President, the senior Vice-President, the Treasurer, and the ex-Presidents of the Chamber, with three members of the Chamber at large. The terms of office of the members at large shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, three members at large shall be elected, one for one year, one for two years, and one for three years, their terms of service to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a member at large shall be elected to serve for three years to take the place of the one whose term of office then expires.

Each of the Standing Committees, except the Executive Committee, shall consist of a chairman and six members. The terms of office of the chairmen and of all members of standing committees shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen.

At the Annual Meeting in May, 1924, chairmen of all standing committees shall be elected, and six members constituting each standing committee shall also be elected, two for one year, two for two years, two for three years, the chairman and the terms of office of the other members to be designated on the

ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a chairman, and two members of each standing committee to serve for three years, shall be elected to take the place of those whose terms of office then expire. The chairmen of the standing committees shall be elected for a period of one year, but they may be re-elected once, and one year after the end of their service they may be elected to serve again, provided, the Chairman of the Arbitration Committee may be re-elected at the will of the Chamber. No member of a standing committee, except the chairman, shall be eligible for re-election to the same committee until one year after the expiration of his term. Vacancies occurring in any committee may be filled at any regular meeting of the Chamber upon nomination of the Executive Committee.

Three members of any committee shall constitute a quorum for the transaction of business.

ARTICLE IX

Duties of Standing Committees

Of the Executive Committee.—The Executive Committee shall, under the direction of the Chamber, have a general control of the property and affairs of the Chamber. It shall supervise the work of the Executive Vice-President, and direct the preparation of the Annual Report of the Chamber.

Excepting bills for salaries and rent which shall be approved by the President and paid upon his order or in his absence upon the order of one of the twelve Vice-Presidents, and excepting bills connected with the Real Estate owned by the Chamber and bills affecting the funds under the control of the Board of Trustees of the Real Estate, the Executive Committee shall audit all bills and claims against the Chamber and direct their payment if approved. It shall fix the amount of compensation received by the Executive Vice-President and by the Secretary. It shall have authority to employ such clerical and other help as in its judgment may be necessary. It shall fix the amount of all salaries and compensation for such service. The Executive Committee shall submit at the regular meeting preceding the annual election the names of seven members for appointment by the Chamber to nominate Officers and Standing Committees for election at the Annual Meeting to serve for the ensuing year, or for such periods as these By-Laws prescribe.

Of the Committee on Arbitration.—This Committee shall have complete supervision of all matters of arbitration referred to the Chamber and shall make rules and regulations for the conduct and disposition of all matters submitted in arbitration; it

shall provide a form of agreement not inconsistent with existing provisions of law by which, so far as practicable the decision of the arbitrator or arbitrators shall become as effective as a judgment of the Supreme Court.

It shall compile and from time to time revise and keep a list of qualified persons, not less than fifty, willing to act as arbitrators under these rules, who shall be members of the Chamber. This list shall be known as—"THE LIST OF OFFICIAL ARBITRATORS" of the Chamber of Commerce.

Any matter in controversy may be referred by the disputants signing the form of agreement provided by the Committee, together with a stipulation to the effect that they will abide by the decision of the arbitrator or arbitrators, by them selected, and waiving any and all right to withdraw from such submission after the acceptance of their appointment by the arbitrator or arbitrators selected, and designating at their option either

(a) One of the persons named in said "List of Official Arbitrators," who shall act as sole arbitrator; or

(b) Any two persons to act as arbitrators, who in turn shall designate from said "List of Official Arbitrators," a third person to be associated with them as arbitrators; or

(c) The Committee on Arbitration of the Chamber of Commerce or a quorum thereof.

In any case the Committee on Arbitration may, in its discretion, decline to entertain a matter submitted for arbitration, in which event the selection of special Arbitrator or Arbitrators shall be void.

The Committee on Arbitration shall, from time to time, establish a schedule of moderate fees to be paid in all matters submitted, which fees shall be chargeable as decided by the arbitrators.

The Secretary of the Chamber of Commerce shall be the Clerk of the Committee on Arbitration.

The Committee shall from time to time as it deems wise make reports to the Chamber.

Of Other Standing Committees.—Their duties shall be to examine into and make report upon such subjects as may be referred to them by the Chamber, or they may originate and report to the Chamber such views as they may deem proper for its consideration.

They shall, respectively, keep regular minutes of their meetings and proceedings, in which the Secretary shall give them all required assistance, and they shall make reports to the Chamber as provided above, from time to time as they may deem advisable.

ARTICLE X

Special Committees

In addition to the standing committees of the Chamber, the Board of Trustees of the Real Estate, and the Committee on the Charity Fund, Commissioners of Pilots, and the Commissioner for Licensing Sailors' Boarding Houses or Hotels hereinafter provided for, there may be, on authorization of the Chamber, special committees, the members of which, including the chairmen, shall be appointed by the President or by the Chamber. The tenure of office of the membership of all existing special committees shall cease on the day of the Annual Meeting of the Chamber in May, 1924, or as soon thereafter as their successors may be appointed. The President elected at the Annual Meeting of each year shall then, or as soon thereafter as may be convenient, reconstitute these committees and report the membership of all these committees, including their chairmen, to the Chamber for its information. He shall at the same time indicate whether in his judgment any of these committees should thereafter be discontinued.

The Chairmen and members of such reconstituted committees shall serve for one year and until their successors in the discretion of the President are named. Any or all of these committees may be discontinued at any time by vote of the Chamber.

These committees shall keep regular minutes of their meetings and proceedings. They shall make reports upon such subjects as may be referred to them by the Chamber or they may originate and report to the Chamber such views as they may deem proper for its consideration.

ARTICLE XI

The Committee on the Charity Fund

This Committee shall take charge of the moneys and securities known as the JOHN C. GREEN Fund and those received from any other source, for benevolent purposes, and invest and re-invest the same from time to time, and shall have power to make distribution of the income thereof among those intended to be benefited. The Committee shall have power to fill any vacancies that may occur in their number by death, resignation or otherwise.

ARTICLE XII

Of Election of Special Officers Under the Laws of the State

The Chamber shall elect, in conformity with the laws of the State, the following named officers:

Commissioners of Pilots.—There shall be elected by ballot, to serve for two years, at a special meeting called for the purpose,

three members of the Chamber to act as Commissioners of Pilots. Whenever any vacancy shall occur by death, resignation or otherwise, of either of such Commissioners so elected, the vacancy shall be filled at a special meeting of the Chamber, and the term of service of the member so elected shall date from the day of such election (*as required by the law of the State of New York, passed June 28, 1853, and amendments*).

Commissioner for Licensing Sailors' Boarding Houses or Hotels.—There shall be elected by ballot, to serve for one year, at the Annual Meeting of the Chamber in May, a member of the Chamber to act as Commissioner for Licensing Sailors' Boarding Houses or Hotels in the City of New York (*as required by the law of the State of New York, passed March 21, 1866*).

Whenever any vacancy shall occur in the above named offices by death, resignation or otherwise, except in that of the Commissioners of Pilots, the same shall be filled at the regular meeting of the Chamber next following.

ARTICLE XIII

Quorum and Adjournment

Twenty-five members of the Chamber, of which number the President or one of the twelve Vice-Presidents must always be one, shall be necessary to form a quorum for the transaction of business, or to ballot for members.

In case a quorum shall not be present at the time fixed for any regular or special meeting of the Chamber, the President, or, in his absence, the senior Vice-President present, may adjourn the meeting to such other day in the same month as he may judge proper.

If there fail to be a quorum from the absence of the prescribed officers, it shall be the duty of the Secretary to declare the meeting adjourned *sine die*.

ARTICLE XIV

Rules of Order

At all regular meetings of the Chamber, the order of business shall be:

1. Reading of the minutes.
2. Report of the Executive Committee on nominations for membership.
3. Ballot for members.
4. Report of the Executive Committee.
5. Reports of Standing Committees, in their order.
6. Report of Trustees of Real Estate.
7. Reports of Special Committees.
8. Unfinished business.
9. New business.

Members having any motion or remarks to make shall rise and address the Chair. All resolutions or propositions, of whatever nature, must be reduced to writing before they can be entertained. The Chairman of any special or standing committee submitting a report shall be permitted five minutes, in addition to the time necessary to read the report, for explanatory remarks in reference thereto. Members participating in the debate shall be heard only once and shall be permitted not exceeding ten minutes each, unless by unanimous consent the time of any member may be extended. The Chairman of the Committee whose report is under discussion, or any member of the Committee who may be designated by the Chairman, shall be permitted ten minutes' argument in conclusion. The usual parliamentary rules as laid down by Robert shall be followed.

At special meetings called by the Chamber no business other than that named in the requisition and call for the special meeting shall be entertained, even though unanimous consent be had.

If any resolution or report (other than reports or resolutions from standing or special committees of the Chamber) which calls for an immediate expression of the Chamber's opinion or for action by the Chamber is proposed and is objected to by any member present, it shall be the duty of the President to state the objection, and to call upon those who sustain the same to rise. If one-fourth of the members voting rise in support of such objection, then such resolution shall be referred to a Standing or Special Committee, who shall report thereon at the next meeting of the Chamber; and upon the presentation of such report, the same, and the original resolution, and the subject referred to, may then be acted upon as provided in this article.

ARTICLE XV

Privileges of Strangers

Members may, by ticket, introduce any person to the Rooms of the Chamber and the use of the Library or other facilities of the building subject to such rules as the Executive Committee may from time to time adopt.

ARTICLE XVI

Interim Reports

Whenever it appears that immediate expression of the Chamber's views on any given subject is sought, or when such expression is deemed advisable, and when by reason of the summer recess or when for any other reason it is deemed impracticable to secure action by the Chamber as a body, any standing or special committee may present to public officials at hearings or otherwise, reports or recommendations of the Committee, provided: that such report is concurred in by a majority of the Committee and

by the President of the Chamber or the Chairman of the Executive Committee; that it is made plain in the presentation or publication that the report represents the opinion of the Committee only; that such report be presented to the Chamber at its next meeting with a statement of the action of the Committee; that the action then taken by the Chamber be transmitted to all those previously advised of the Committee's recommendations.

XVII

Powers of Delegations

Delegations or Committees, which may be appointed by this Chamber at any time to represent it at any meeting of Chambers of Commerce or Boards of Trade, or at any other Convention, meeting or Assembly whatever, shall have no authority, by virtue of such appointment, to bind this Chamber to concur in the action of any such body, except that when the Chamber has taken definite action upon the subject or subjects under consideration, such delegate may speak for and represent this Chamber with whatever powers have been delegated to him, but no other; but such Delegations or Committees shall subsequently report their action to the Executive Committee.

ARTICLE XVIII

Amendments to By-Laws

All proposed amendments to the By-Laws shall be submitted in writing, at a regular meeting of the Chamber; but no such amendments shall be acted upon before the next regular meeting.

THE PRESIDENT.—The proposed revised By-Laws are before the Chamber for action. Are there any questions?

HOWARD C. SMITH.—I realize that it takes a little temerity to raise any question on the work of three ex-Presidents, because of their knowledge of the functions and the details of this Chamber. However, in the first paragraph, it is made a by-law that no President shall serve over two years. That has been a custom of the Chamber ever since Mr. HEPBURN'S incumbency, and the custom has so far seemed to prove a wise one. I would not question the custom, but I cannot see the necessity for adopting it as a by-law. Occasion may arise at some time in the future, and we cannot tell yet, when you will want to elect a President for a longer period than two years. It may be greatly to the interest of the Chamber to do so. If that is the case, I cannot see why a custom could not then be corrected, whereas there would be great difficulty in changing a by-law.

Mr. KINGSLEY.—Col. SMITH, you have two points, so suppose I answer that one now before you present your second?

Col. SMITH.—All right, sir.

Mr. KINGSLEY.—We all understand the wisdom of that custom and we know why, without openly discussing it here, we have all agreed that such limitation is desirable and wise. Still, it is only a custom and there is quite as much danger, as we see it, that with the door really open and only being guarded by custom, that the Chamber may at the same time be embarrassed on the question of electing a man for a third year; whereas in this program if it is made a by-law there can be no question about it. The President must retire at the end of the second year if the Chamber sees fit to elect him at the end of his first year of service. After three years, dating from his first election, a member can be elected again. This is to give the Chamber the benefit of a man of outstanding ability if the Chamber should want him again; and the Chamber is not going to collapse because some one particular man is ineligible for a year. This provision in the By-Laws relieves everybody from embarrassment and everybody knows what the limit is. It was the unanimous opinion of your Revision Committee that on the whole it was altogether the wisest program.

Col. SMITH.—I had one other point that I want to raise, Mr. President. In the 8th paragraph a similar provision is made for rotation in office of all the chairmen of all standing committees. This is a distinct experiment and it is establishing in a by-law what is an experiment. You do not know as yet what would be the result of such work. You have for a great many years continued the chairmen of your standing committees for a longer period, and they have been able by that method to keep a continuity of policy in the committees and a sort of conservatism in the Chamber. If you adopt as a fixed by-law the custom of changing the chairmen of your committees every two years, necessarily you run the risk of a material change in policy with a change of the chairmen, because those who have worked on the committees know that the chairman has got to guide the work of that committee, because the other members are changed every three years now. Furthermore, I believe that it would require materially increased labor and employees in the clerical force of this Chamber. When a chairmanship is changing repeatedly the chairman cannot carry the back history in his head to the same extent that he can when he has served a long while.

If it is the wish of the Chamber that the experiment should be made of changing the committee chairmen every two years, I would make no serious objection, but establishing it as a

by-law without having made the test is in my opinion a danger, and I think it should be at least postponed until it has been carefully tried. Although I am frankly not in favor even of that change, but I would be quite willing to submit to the general wish in that respect without opposition. But to make a by-law of a material change without an experiment I think is a mistake.

I should like to move, therefore, an amendment striking out that particular clause of Article VIII, which begins with the words, "They may be re-elected once, and one year after the end of their service."

THE PRESIDENT.—Will that amendment cover only the chairmen of committees?

Col. SMITH.—The chairmen of standing committees, sir.

THE PRESIDENT.—That does not cover the President?

Col. SMITH.—It does not cover the President. The article under the President would be in the third paragraph of Article I, simply striking out the third paragraph of Article I in regard to the President. I think the two amendments ought to be considered separately, sir.

THE PRESIDENT.—Is that amendment seconded?

A VOICE.—I second it.

THE PRESIDENT.—Is there any debate upon the amendment?

Mr. KINGSLEY.—Mr. President, if I may be allowed to say it, we have been making an experiment. Col. SMITH says that this is an experiment. We have experimented a good while the other way, and the Committee decided that we perhaps had enough of that. There is a general feeling, you know—I say general feeling, but I do not think that is correct—there is a feeling that the Chamber needs to be a little more democratic, and this is a move in that direction, first, by voting all the chairmen and members of committees (but one) out of office and then providing for rotation in office. We believe the rotation in office is not only a good but a wise thing. We have plenty of good men in the Chamber, and the absence as chairman for a year of no one man would destroy the efficient work of any committee. Two years' service, it seems to us, is enough normally. Then let somebody else have a chance to represent the Chamber as chairman. He may have another point of view, and if it happens in any case, as in the case of the President, that we have

an outstanding man, and he is necessary to that committee, he is only out a year and you can put him back again.

As chairman of the Committee I have to oppose Col. SMITH's motion.

THE PRESIDENT.—Is there any further debate on the amendment?

ABRAHAM G. MILLS.—Well, Mr. President, I think the Chairman of the Committee is not quite consistent, because in these very By-Laws, as proposed, there is an exception in the case of the chairman of one of the standing committees. It is a very common thing in organizations unlike this to have a provision for rotation—in debating societies, not in business organizations. It is a very usual thing to provide for this rotation so as to test out the members for their fitness in various offices. But in business organizations like this I think the universal practice is that where a man is found to be efficient, especially in the case of the chairmanship of a standing committee, to keep him as long as you can. That is the practice in corporations, that is the practice with respect to the Chairman's own company, to keep a man who is found to be technically fit for a chairmanship in that position; and this Chamber is exceedingly fortunate. I think, in that it is able to command the services of such men as Mr. BERNHEIMER, who is especially excepted; but as an old member of the Chamber I want to say I think there are other chairmen of other committees equally in their particular places as competent and as valuable to the Chamber as Mr. BERNHEIMER. I do not think that this Chamber should tie its hands and make it impossible to have the services of such members as chairmen for a third year. Therefore I favor Col. SMITH's proposition.

THE PRESIDENT.—Is there any further debate on the amendment?

Col. SMITH.—Mr. President, might I say that if it will satisfy the By-Laws Committee, and in compliance with Mr. KINGSLEY's wish, if the amendment I have offered is adopted, I should be very glad to offer a new motion to the effect that it is the sense of the Chamber that the chairmen of standing committees be changed every two years, but, as previously stated, I do not favor the inclusion of this idea in a by-law.

ALFRED E. MARLING.—Mr. President, might I add a word as a member of the Committee. Those of you who have served as members of the Nominating Committee I think will support me

in the statement that you have sometimes been embarrassed, as I have, with respect to the chairmanship of the standing committees, and, as our Chairman has said a moment ago, it was largely to relieve the embarrassment of the Nominating Committee year by year that we suggested this. In addition to that there were other reasons that might be named. There should be nothing of the star chamber or the clique business in the management of the affairs of the Chamber, and it seemed to us that if we placed a limitation of service upon the President, as we have in these recommendations, it was not inconsistent that we place also a similar restriction as to the time of service of the chairmen of the standing committees. I think Colonel SMITH intimated, with that remarkable temerity of which he has given us such a beautiful example this morning, that the complexion of the Executive Committee would be changed by this repeated change in the chairmanship of the committees. Quite true, and that is one of the objects that we have in mind; but to show you there is no very great danger by that infiltration of new members, let me remind the Colonel and my fellow members, that there is a great safety belt alongside of that proposition, in view of the fact that all these solemn, conservative ex-Presidents are members of the Executive Committee for life. (Applause)

I claim that this is in the interest of a forward look, of getting things done, educating our own membership in larger things and yet at the same time doing it in a conservative manner. I address these friendly remarks to my dear friend Colonel SMITH—for I am really talking to him prior to the movement of the steam roller—and I expect that this will act as a sort of friendly opiate, so that when the vote is taken he will feel that he has had his way and the Chairman of this Committee will feel that the action that was taken was absolutely right and that everybody will be happy.

If anybody wants a job that is cheerful, helpful, inspiring, magnetic sort of service, I suggest that the President appoint another committee of four or five to serve on revision of the By-Laws. I think we are entitled at least to a vote "Aye" on our job. We do not want to do it again, and I thank Colonel SMITH—he has been so nice in this matter, he has extended to us great courtesy, he has done a great deal more than many of you have, he has taken notice of the Committee, and he has sent us letters and we have adopted nearly all of his suggestions. But he has been—shall I say recalcitrant in this one matter of the service of the chairmen. We have attempted to convert him, we have used all the arts of persuasion and cajolery, but he still stands solid. Now, it is just a rigidity of mind that he is suffering from, and we hope that rigidity will relax. And that is the only object that I have in speaking today. (Applause)

THE PRESIDENT.—The action is upon the amendment to the original motion. The amendment is to strike out the words which would limit the term of service of the chairmen of the standing committees. All those in favor of the adoption of the amendment will please so signify by saying "Aye." To the contrary, "No."

The amendment is lost.

Revised By-Laws Adopted

THE PRESIDENT.—Is there any further debate upon the original motion? If not, all those in favor of the motion to adopt the revised By-Laws as recommended by the Special Committee will please so signify by saying "Aye." To the contrary, "No."

The motion is adopted unanimously.

Mr. KINGSLEY.—As the Chairman of the Nominating Committee, I ask the Secretary that he arrange for a meeting as soon as possible, because this Committee, perhaps more than in almost any other year, has a good deal of work to do.

ANNOUNCEMENTS

Auditing Committee Appointed

THE PRESIDENT.—It is the custom at this time for the President to appoint a committee of two to audit the accounts of the Chamber and report thereon at the Annual Meeting in May. I therefore appoint Mr. HOWARD AYRES and Mr. FREDERICK H. HURDMAN as that Committee.

Appointment of Members to Co-operate with the Lower Taxes-Less Legislation League

THE PRESIDENT.—I would also like to announce that in accordance with action taken at the last meeting, I have appointed Mr. JOHN T. PRATT, Chairman, Mr. FRANK PRESBREY, Mr. JOHN HENRY HAMMOND and Mr. J. BARSTOW SMULL to co-operate with the Lower Taxes-Less Legislation League.

Committee on Revision of Storage and Labor Rates Appointed

THE PRESIDENT.—In accordance with a custom that has extended over many years, the President has been requested to appoint a committee to co-operate with the Collector of the Port

and the representatives of other commercial organizations in the revision of rates of storage, cartage and labor in connection with the general order merchandise, and I appoint as that committee Mr. LEE KOHNS, Mr. WILLIAM E. HALM and Colonel GUSTAV PORGES.

Citizens Training Camp at Plattsburg

THE PRESIDENT.—I should like also to call your attention to the Citizens' Training Camp which is conducted each year at Plattsburg, New York. It is a camp, as you all know, for the purpose of developing material for officers in the army. Last year the Chamber circularized its members at the request of the army authorities and a very excellent response was secured. But the action last year was a little too late to be really effective. If there is no objection on the part of the Chamber, the officers of the Chamber will have the Secretary pursue the same course this year, and he will notify the members as to the training camp and suggest their co-operation. It is believed that these training camps, aside from the fact that they do train men to become officers in the army in case of future emergency, will send men back, if taken from your firms for a temporary period, not only greatly benefitted physically and mentally, but they will come back better citizens and better men in your organizations.

I also have one final announcement to make, and that is that a sum of money was found in the lunch room. At first we thought it might be a modest tribute from some modest man to the charms of the young lady who presided over his table, but the amount was rather large, and it was in gold, and indicated it might be a director's fee. So if the gentleman who has missed this director's fee or whose wife has missed it, will call upon the Secretary, the amount will be refunded.

Is there any further business?

A VOICE.—I move we adjourn.

THE PRESIDENT.—There is no further business, so the meeting stands adjourned.

REVIEW OF THE SUGAR TRADE FOR THE YEAR 1923

In some of its aspects the course of events in the sugar market during the year of 1923 was without precedent in the history of the industry, at least prior to the World War, the effect of which produced conditions without parallel in domestic and international business affairs. Price changes were more numerous and at times more violent than in any similar period as the result of outside influences of a most unusual and disturbing character. At the beginning of the year the price of raw sugar was based on 3 $\frac{7}{8}$ c. Cuba, actuated by the highly profitable returns from its 1921-22 crop, had forced the new production and indications pointed to an outturn in excess of the record of 3,996,000 tons made in the preceding crop year. In pre-war years refiners had pursued a buying policy, almost invariably justified by the result, which kept them out of the market at the beginning of the season until such time as the pressure of accumulating stocks in Cuba and the necessity of obtaining funds with which to finance later grinding operations, should oblige producers to resort to their usual practice of stimulating demand by making low prices. In the present instance, however, the logic of events was not as anticipated.

At the beginning of the year the stocks of raw sugars in refiners' warehouses were virtually exhausted, and having bought little for January arrival they were entirely unprepared for a heavy demand for refined sugar, which they had attracted by reducing their selling basis to 6.50c from 7.10c., the price prevailing at the end of 1922. Refiners were forced into the market for raws, and their consequent competitive buying caused a rapid rise which was assisted by a speculative demand from independent importers, or, as they are generally named, trade operators. The upward swing continued for a full month, or, to be exact, from January 22nd to February 21st. The sharpest advance during that period occurred about the middle of the last named month on the publication of a routine report by the United States Department of Commerce, which, owing to an unfortunately worded introductory paragraph, was generally interpreted as predicting a very considerable shortage in the world's supply for 1923 as compared with a world's consumption equal to that of the preceding year. At about the same time the crop estimate of a high Cuban authority was reduced, the two influences combining to create wild speculative activity in sugar futures on the New York Coffee and Sugar Exchange as well as in the market for actual sugar, and over night the market advanced a full cent. A supplementary report issued by the Department of Commerce pointed out that an apparent discrepancy between supply and demand was shown by a comparison of the early estimates of the Cuban crop and the anticipated requirements of consumption for the year, provided the carry-over from 1922 amounting to 1,200,000 tons were not taken into account.

Heavy buying of Cuban raw sugars by Europe for a time, however, offset the reaction of speculative sentiment here to the bearish effect of the Government's explanation.

In the meanwhile the price of refined sugar had kept pace with the advance in raws, until a basis of 9.00c. was established late in February, to be followed by an unsettled and declining market caused by similar conditions in the market for raw sugar. Until the end of March prices fluctuated frequently with the general trend downward. Then came another hectic period during which raws advanced from 53½c. to 65½c. cost and freight, which proved to be the high for the year, refined at the same time advancing from 8.60c. to 10c. This upward swing was caused by renewed speculative buying of raw sugar on rumors of a short crop, which compelled refiners to constantly bid up for needed supplies.

Newspaper comment on the phenomenal rise of an essential food commodity increased the resentment of a public already greatly aroused by mounting retail costs that in no small degree were due to profiteering by retail dealers, who, catching the speculative fever, sought to stretch their margin between the wholesale price and what they charged consumers as far as possible. The implication that the advance was due entirely to speculation and therefore unwarranted induced the Department of Justice, through the Federal District Attorney at New York to seek a court injunction on trading in sugar on the New York Coffee and Sugar Exchange, and at the same time nation-wide propaganda in favor of a boycott of sugar was started, backed in many instances by the authority of municipal governments. Among these was the New York City administration, which through its Department of Markets instituted a searching investigation. Neither the Federal Government injunction suit, nor the City investigation was successful. The former was dismissed by the Court as without basis for action, and the latter disclosed nothing more than that the price of sugar had responded to the working of the law of supply and demand. Both attempts to show a conspiracy in restraint of trade were for a time highly disturbing market influences, but were thrust into the background when early in May advices from Cuba, indicating serious effects upon production of prolonged dry weather, were verified by reduced crop estimates, issued by Messrs. Guma-Mejer and Mr. H. A. Himely, the two chief experts in Cuban sugar statistics. The denial of the injunction against trading in futures, in connection with the reduced crop estimates, brought out renewed buying by speculative operators and refiners, which carried the price of raw sugar from 53½c to 6½c., or within an eighth of a cent of the peak.

From this point wholesalers and manufacturing consumers began to show nervousness over the possible effect upon consumption of the high price. The frequency with which declines had succeeded advances was unsettling, and, having already over-bought, they feared to add to holdings which ultimately might have to be liquidated at a loss. In fact, it appeared that in some cases sugar bought on a rising market had to be resold without a profit, if not at an actual loss, when wholesale prices receded. During the summer, until the middle of August, except for a few brief spurts, the market for refined sugars was inactive, while trading in actual raws and in sugar futures languished. The European demand, which had been heavy in the spring, was checked by the high prices and the depreciation of foreign money exchange, and it was beginning to appear, as later proved to be the case, that exports of raw sugars from Cuba and of refined from the United States to British and Continental ports would fall very far short of estimates based on figures for 1922, as well as on expectations of a short European beet crop, due to the exhausted condition of the soil because money was lacking with which to buy fertilizers in required quantity. Political and industrial conditions abroad were growing worse, and even with a shorter crop in Cuba and Louisiana, an estimated increase in domestic beet sugar of approximately 150,000 tons, and larger

crops in other cane producing countries made it appear that there might be more sugar available for this country than it could absorb. For a brief period in July the market under temporary speculative influences advanced from 4¾c. to 5½c., it being the thirteenth time since the beginning of the year that it had touched the latter point. Almost immediately a downward movement started, since a demand necessary to sustain the advance was not forthcoming. The confidence of the consuming trade seemed to be badly shaken. The price of raws fell to 4c. cost and freight and that of refined to 7½. before the decline was checked. Stocks had backed up in refiners' warehouses and at consignment points in the interior to the extent of approximately 500,000 tons, some estimates being still higher. Reselling by manufacturers and wholesale dealers was freely resorted to, while the announcement that the Government had carried its case against the Coffee and Sugar Exchange to the Supreme Court induced an almost complete cessation of trading in sugar futures by outside investors, although it was confidently believed in trade circles that a decision adverse to the Exchange would not be handed down. The point at issue would involve the legality of trading in cotton and grain future, among others, and that had been upheld by other high court decisions. This confidence was rewarded by the ultimate decision upholding the legality of trading in sugar futures.

From the middle of August the demand from the wholesale distributing and manufacturing trades picked up, stocks in hand having been absorbed by summer consumption, always the heaviest for the year, and before the end of September the unwieldy surplus that had long been carried by refiners not only had disappeared, but the latter found themselves oversold. The raw sugar market, stimulated by better reports from the United Kingdom, where the summer demand for granulated had been much above expectations, advanced gradually to 6c. It had another setback early in October on the publication of preliminary estimates of the European beet crop, that were greater than anticipated, but a month later again turned upward on revised estimates of European production, and on later revisions, each lower than the preceding forecast, the advance was carried further. In the meantime the Cuban output, which on account of an unprecedented drouth in the island, was reduced to approximately 3,750,000 tons, was nearing the point of exhaustion, and American refiners had recourse to South American and other full duty sugars to make up an expected deficiency, despite a curtailment of domestic consumption and a large production of Western beet sugars, the pushing of which into markets much closer to the Atlantic seaboard than normally naturally resulted in a greatly reduced territory to be supplied by cane refined. For the remainder of the year the price held close to the 6c. cost and freight basis. Refined sugar during this period declined from 9.25c. to 8.90c., largely because of the competition of domestic beets.

For the producer and wholesale grocer the year was eminently satisfactory. The former obtained an average of 5¼c. on his crop, disposing of practically all of it before December 31st. The grocer realized a good profit, notwithstanding had losses at times because of a decline following immediately the making of contracts running for thirty days or longer. Speculators in refined sugar did not do so well. Their number has increased greatly in late years, and they became one of the most disturbing elements in the market by making "second hand" offerings in times of depression when the regular trade could not meet their competition without loss. The refiners had a trying time throughout, but whether they made or lost money is an open question.

Willett & Gray's estimates of world production in 1923-24 makes the total 19,208,790 long tons, which is an increase of 361,575 tons over that of the previous year, and 914,658 tons more than was produced in 1921-22. The decrease in Cuba was overbalanced by increases elsewhere, notably the Hawaiian Islands, San Domingo and South America. In all of the latter with the exception of Peru, the output of sugar has largely increased

since the war. The outturn of cane sugar by all producing countries in the world was last year, according to the above mentioned authorities, 13,432,850 tons, the largest on record, exceeding that of 1922-23 by 488,250 tons, yet on December 31st there appeared to be no surplus anywhere. The refiners of the United States, by far the largest consuming country, were bare of stocks, and there was scarcely enough to last a month in the United Kingdom. It is thus evident that if consumption did not meet expectations based on the phenomenal figures for 1922, it showed at least a normal growth.

The prospects for the coming year are perhaps less rosy than at the end of 1922, but there is promise of continued prosperity in the sugar industry with less violent price fluctuations than in the recent past. There is reason in the high average price last year to expect that every effort will be put forth by producers the world over to make the largest possible crops, and if weather conditions for the harvest are at all favorable a total yield in excess of that of 1922-23 may with confidence be expected.

Many factors, however, must be considered in estimating the probable consumption. The United States, with abounding prosperity and full employment at high wages, may be counted on to consume its share, if it is not attempted to force prices above the peak of last year, although it may grumble over having to pay so much for a commodity that in pre-war days cost but half and not infrequently much less. Economic conditions elsewhere, while precluding expectations of larger consumption in the coming year, tend to stimulate production, the hope in each country being that good markets will be found abroad. Great Britain and Ireland, producing no sugar, would normally afford such a market, but the prospect is not encouraging that their consumption will increase sufficiently to absorb any large part of surplus production, unless there should occur a vast improvement in the financial and industrial affairs of those countries, of which there is at present no better indication than is presented by the situation on the Continent. It may be that producers will have to be satisfied with a lower average price than they obtained last year.

REVIEW OF THE COCOA MARKET IN 1923

Although of large and increasing consumption throughout the world, cocoa is hardly as yet classed with the essential foodstuffs, and for that reason the effect of the war on the industry of producing cocoa beans and converting them into the several products for ultimate consumption was more demoralizing, perhaps, than in any other department of trade of like magnitude. With the ending of the war, preparations were made by American importers and manufacturers for a heavy demand from Europe, where up to 1917 the consumption of cocoa was on a scale far greater than that of any part of the world except the United States, and the commodity was considered little less than a necessity both for eating and as a beverage, being regarded as next to coffee in the latter form. The virtual blockade of Germany and Austria and the hazards of shipping to the ports of Eastern Europe due to the German submarine warfare, cut off their supplies of both raw material and the finished products. At the end of the war the whole of Europe was chocolate hungry, and it appeared to be a question of who could get there first with supplies to profit enormously by the potential demand. Encouraged by the active competitive bidding for chocolate and cocoa powder by speculative buyers—many of whom were new to the business but were prepared to take a risk in what seemed a most inviting field—American manufacturers made heavy purchases of cocoa beans for forward shipments from countries of origin, causing a rapid advance of prices in the primary markets, which naturally was reflected by a corresponding rise in the products. The upward movement continued for months, prices being carried to heights never before dreamed of. From an average of $9\frac{1}{2}$ c. to $12\frac{1}{2}$ c. a pound, the price of cocoa beans rose to from 16c. to 22c. for the grades most largely consumed, with a corresponding increase in prices for the products. With the best of will to buy, Europe had neither the money nor the credit necessary to gratify her desires. The boom collapsed, leaving the manufacturers with a large number of lawsuits on their hands over contracts repudiated by speculators, and warehouses filled to capacity with goods for which there was no market.

At the beginning of 1923 the market was well on the road to recovery from the disastrous results of over-confidence. The outlook for export trade with Europe was brightening because of the prospect of an early settlement of political and economic conditions. The consequent benefit to general business throughout the world was confidently expected to extend to the cocoa industry. Prices for cocoa beans at that time were at about pre-war levels, the most favored descriptions selling at $7\frac{1}{4}$ c. for fair fermented Accra, $7\frac{1}{2}$ c. for superior Bahia, $9\frac{1}{2}$ c. for Trinidad Caracas, and 7c. for Sanchez. Although the prices for cocoa powder, chocolate and cocoa butter were still much below the average of normal years, that fact had stimulated domestic consumption to an extent that placed it far ahead of the pre-war average, enabling the manufacturers to clear their warehouses of the vast accumulations of goods and start the year under fairly normal conditions as to supplies of manufactured stocks. For a time the general trend of prices was upward, but although Europe had become a better customer her consumption fell far short of what had been expected. Disappointed in finding an adequate market there, producers of cocoa beans were compelled to seek elsewhere, having greatly increased their output in anticipation of European demand. No other outlet being open, shipments were diverted to the United States, the imports for the year consequently mounting to the highest on record. Increased stocks caused declining prices, and much short selling, but toward the end of the year the covering of these short sales brought about some recovery, which, however, left the prices on December 31st below those prevailing at the beginning of the year. Figures compiled by the recognized trade authori-

ties, Messrs. Frank J. Barrett & Co., show the total consumption of cocoa beans for the world in 1923 to have been 6,332,810 bags, of an average weight each of 150 lbs., which was but little more than in the preceding year, but 2,559,045 bags larger than in 1913, the last pre-war year, when the consumption amounted to but 3,773,810 bags. The consumption of the United States, always by far the largest of any of the countries of the world, was 2,654,445 bags in 1923, as against 1,013,925 bags in 1913, while Germany, in spite of her distressed condition, is credited with a consumption of 761,235 bags, which was within 5,060 bags of the quantity she consumed in 1913. Holland, whose consumption in the latter year was 450,245 bags, in 1923 consumed 586,245 bags. The consumption of France also increased from 411,790 bags in 1913 to 575,175 bags in 1923, whereas Switzerland which consumed 153,720 bags ten years ago used but 79,875 bags last year. The increase in Belgium was from 91,965 bags to 135,000 bags. Of the smaller consuming countries Canada shows the most remarkable increase in her consumption figures, those for 1923 being 135,000 bags, as compared with 26,250 bags ten years ago.

The world's production of cocoa beans, which in 1913 was 3,295,949 bags, increased in the following ten years over one hundred per cent., that for 1923 being placed at 6,607,150 bags. Of this latter quantity the Gold Coast of Africa contributed 2,958,510 bags, Brazil through the port of Bahia furnishing the next largest quantity, or 1,075,409 bags. Equador is the only one of the more important countries showing a decreased production, supplying but 379,795 bags, as against 513,617 bags ten years ago. A very notable increase was in the Lagos grade from Africa, the crop in 1923 being 410,004 bags, and but 51,506 bags in 1913. The world's visible supply at the end of 1923 was, according to the statisticians above quoted, 1,802,988 bags, against 1,438,584 bags in 1922. Of the four principal countries, the United States carried the least, its visible supply on December 31st last being 199,513 bags, England being first on the list with 566,725 bags, and Germany next with 531,325 bags, perhaps the major part of which was in the hands of speculators. France was third with 215,695 bags. The American market at this time was the cheapest in the world, fair fermented Accra being quoted on December 1st at 6¼c, Arriba at 13c., Sanchez at 6¾c., Superior Bahia at 7c., ordinary Trinidad at 8¾c., and Caracas at 9¼c., these being the grades most largely used by American manufacturers.

REVIEW OF THE COFFEE TRADE FOR THE YEAR 1923

The world's consumption of coffee in 1923, measured by the deliveries, was the heaviest on record, amounting to approximately 21,000,000 bags. Of this quantity, 10,582,000 bags were delivered for consumption in the United States, the heaviest monthly deliveries being made in the last quarter of the year, or at an average rate per month of 1,000,000 bags, against a normal monthly average of less than 800,000 bags. Since actual consumption could not have increased to such a remarkable extent in that period, it must be assumed that invisible stocks in the interior were being built up for reasons which will appear later. Allowing for a certain amount of hoarding, there is evidence that actual consumption of coffee has gained greatly in recent years, and notably so in 1923, a fact that can be but partially accounted for by natural increase in population. The only other apparent reason is that coffee drinking in this country has largely replaced the consumption of alcoholic beverages since the ratification of the eighteenth amendment enforced nationwide prohibition.

In Europe, notwithstanding industrial depression and depreciated currency, especially in Germany, which prior to the war ranked as the heaviest coffee-consuming nation next to the United States, importations rose to an extent that would have been deemed an impossible accomplishment when the year opened. It has been explained by some observers as probably due to purchases by speculators, who through investment in a commodity that would not deteriorate by long keeping, expected to make large profits as soon as the European tangle straightened. It has been pointed out by others, however, that as carrying charges for a long period would offset any possible profits, no shrewd operator would embark in such an enterprise. Rather, it is probable that with coffee again readily obtainable, even though at a price many times higher than in the years antedating the war, European consumers have indulged their desire for the beverage at the cost of much self-denial in other things. The latter view is rendered more reasonable by consideration of the fact that the larger part of the coffee imported into Europe was, as it still is, of the cheapest obtainable grade, such as Rios, Victorias, Bahias, and the lower grades of Santos.

On January 1, 1923, the world's visible supply was 7,877,000 bags, and there was in prospect a Brazilian crop of 18,000,000 to 20,000,000 bags of Santos and 4,000,000 to 5,000,000 bags of Rio grades, to which was to be added approximately 1,000,000 more from Victoria, Bahia, and Pernambuco. Following the small crops of 1923-24, and the skillful handling in that year of the valorization through the bankers committee appointed under the terms of an international loan of £9,000,000, secured by 4,535,000 bags of coffee, Brazil was holding control of the world markets, since fully two-thirds of the supply in sight remained in that country. At the beginning of 1923 coffee was quoted in New York at 15½c. for Santos 4s, 11c. for Rio No. 7, and at 18c. to 22c. for Columbian grades of so-called mild coffees. From that point there was a steady advance, as Brazil maintained its strong control and Central American countries producing the mild grades held back their crops, which were turning out much smaller than had been anticipated owing to excessive rains during the harvest. It was necessary for roasters and jobbers to replenish stocks that had been depleted during the winter—the season of heaviest consumption—but on account of advancing prices they were disposed to follow even more closely the "hand to mouth" policy adopted after their experience of drastic deflation two years before. The advance continued, until in late February Rio 7s had reached 13½c. and Santos 4s were commanding 18c. The prospect for a heavy crop had continued good to this time, and speculative operators in anticipation of low prices after the harvest began, made heavy short sales for future shipment, forcing importers to put out low cost and freight firm offers to the consuming markets. Spot prices were depressed

by this movement, with the result that during the spring and early summer they declined steadily. The low for the year, of 10¼c. for Rio 7s and 14c. for Santos 4s, was reached in July, a gradual advance starting at that time in response to advices from Santos that the crop was being adversely affected by successive rains. Reduced crop estimates followed, and during the last quarter of the year sensational reports of prolonged down-pours causing excessive damage greatly accentuated speculative activities. The berries were washed from the trees, while the harvest was interrupted, and experts are still at variance as to the quantity destroyed, as of the fruit not washed away by the rains the quality of a very large percentage of what was recovered was badly damaged, leaving a relatively small amount of well described or even passably good coffee. Speculative operators and exporters found it more and more difficult to secure coffees of desirable quality with which to fulfill contracts, the resulting competition among them forcing prices higher and higher. By the end of the year the advance had carried Rio 7s to 11½c. and Santos 4s to 15¼c., the tendency then being strongly upward. From the beginning of this upward movement the demand for coffee on the spot and for shipment from Brazil was increasingly active, and to this may no doubt be attributed the building up of invisible supplies to which reference was made above. Estimates of the size of the Santos crop, while greatly reduced, were widely apart at the end of 1923, the most conservative making it about 13,500,000 bags. The Rio crop was variously estimated at 3,750,000 to 4,000,000 bags. Up to the end of December 5,020,000 bags of Santos and 2,181,000 bags of the Rio crop had been received at the shipping ports in Brazil. Having disposed of two-thirds of its last valorization stock through the agency of the international bankers committee without undue disturbance of the world's markets, the Sao Paulo Government, after mature consideration, decided to substitute for a fourth valorization another plan of control which promised even better results. This resulted in what was designated as an "Institute for the Permanent Defense of Coffee," to comprise, not only the coffee growers of Sao Paulo, but those of all other states of the Brazilian Federation. Its purpose is to finance the coffee producers, make if necessary occasional purchases for retention from the market and furnish propaganda to aid in stimulating consumption. Under the plan the quantity to be released for daily shipment from the interior to the ports is fixed at 35,000 bags for Santos and 15,000 bags for Rio, thus distributing the crop evenly over the year. The funds to finance the project are to be raised by a special tax on each bag of coffee produced, supplemented by a possible loan. Of this plan the only provision thus far put into effect has been the limitation of receipts, which has proved most efficacious in maintaining prices.

The outlook for the coming year is for continued high prices. The figures of available supplies on January 1, 1924, as compared with those on that date a year earlier, showed practically no difference in the relative size of visibles for consuming countries and the stocks controlled by Brazil. The control still rests with her and she is in a position to dictate prices as she has thus far shown her ability to do. The 1924-25 crop is undoubtedly small owing to the virtual failure of September and October blossoming—the highest estimate placing it at 8,000,000 bags for Santos and 3,000,000 bags for Rio. The crop of milds is also short because of unfavorable weather conditions. The world's visible supply on December 31, according to the figures compiled by the New York Sugar and Coffee Exchange was 4,410,000 bags, the smallest on record. Of the 1923-24 crop there was estimated to remain in Brazil at the beginning of 1924 about 4,300,000 bags. With a world consumption of approximately 19,000,000 bags, even with a normal production of mild coffees a tight statistical situation is clearly indicated until the 1925-26 crops become available. The only counter influence would be a drastic contraction of consumption by attempts to carry prices to the point beyond which a large percentage of the consuming public could not or would not go.

REVIEW OF THE TEA TRADE FOR THE YEAR 1923

Imports of tea into the United States increased more than 10,000,000 pounds in 1923 over those of the preceeding year, amounting to a total of 107,148,344 pounds valued at \$29,928,722. Based on the import figures the per capita consumption was eight per cent. greater than in 1922, and this gain is the more remarkable because the average price was 3c. a pound higher than that of the year before. Owing to the very wide range of quotations due to the number of varieties and grades imported into this country, an even greater advance would no doubt be shown by comparison for the two years of the prices for those that are most popular with American consumers. The import figures show that the practice of buying direct from the countries of origin is increasing, the quantity from London having been 727,123 pounds less than in 1922. On the other hand, consumption in Great Britain and Ireland decreased approximately 8,000,000 pounds having been, according to estimates based on duty payments, about 405,000,000 pounds.

The highly profitable prices realized in 1922 together with shortage of supplies of Indian teas in that year, were a powerful incentive to growers of fermented teas in British India as well as in Ceylon and Java to increase production, the total for these countries having been approximately 652,000,000 pounds or 68,500,000 pounds more than was produced in the preceding season. Production of Chinese and Japanese teas was similarly stimulated, especially that of the former which in round numbers rose from 51,000,000 pounds in 1922 to 75,000,000 in 1923. The total tea production including that of Formosa, French Indo-China and South Africa was estimated at 769,000,000 pounds, which exceeded the total for 1922 by approximately 92,000,000 lbs.

The upward trend of prices, with which the year opened was held somewhat in check as the natural tendency of buyers was to hold back in the expectation of the usual corollary of declining prices and mounting production. However, the course of prices, though disturbed at times by labor troubles in Ceylon and in London, temporarily affecting distribution, was toward higher levels in the main, and in the latter part of the year impetus was given to the upward trend by heavy speculative purchases made by Holland. That movement which occurred in late September was started by a Government proposal to increase the duty on teas imported into the Netherlands from 12½ to 50 Dutch cents per half kilo, or the equivalent of 20c. United States gold. The object of the Dutch speculators was to accumulate a large supply of teas entered at the then prevailing rate of duty, on which immense profits would be made after the high import tariff went into effect. The result was to send prices up sharply in New York and London as well as in Amsterdam. An influence tending to largely offset decreased consumption outside of the United States and more particularly in the British Isles was apparent as the crops approached their end. It was discovered that producers, especially in India, in their endeavor to make the most of prevailing prices by speeding up production had in a very considerable measure sacrificed quality to quantity. Too little care was exercised in the plucking, the result being a maximum of stalky and otherwise inferior teas, the effect of which upon average prices at the later public sales in Calcutta and London was pronounced. Teas of desirable quality, nevertheless further advanced, notably orange pekoes which were relatively scarce. Taking the year as a whole, however, there was a remarkable uniformity of prices, the difference between the high and the low for common Ceylon and Indian teas at the London sales being but 4c. a pound measured in American money. Formosa teas, which were long the standard of quality, in the United States at least, have in late years fallen from their high estate. In a measure this has been due to the increasing competition of Ceylon and Indian growths, though it

may be open to question whether these might not have found it more difficult to capture the market but for the depreciation in the quality of Formosas. The tendency of producers to subordinate quality to quantity was having such an injurious effect upon the industry that the Formosa Government has found it necessary to issue regulations controlling all export of Formosa oolongs from the island. None is permitted to be shipped to foreign markets that does not meet a fixed standard, the obvious purpose being to restore the popularity that was based on the quality and flavor essential to those teas. To the same end an advertising campaign, supported by the Government, has been and still is being conducted in this country, the effect of which is said to be eminently satisfactory. The organization known as The British-Indian Tea Growers, likewise, has instituted a campaign of education with a view to expanding the market for their product in the United States. A fund of \$250,000 has been appropriated for advertising the merits of Indian teas to the American public and the spending of this large sum has been entrusted to one of England's foremost advertising men, Sir CHARLES HIGHAM. The idea back of the venture is that prohibition will result in the drinking of more tea in this country, and the British-India growers intend to have their full share of it. Coincident with the inauguration of this publicity campaign the growers of Indian teas have taken steps to improve quality by introducing more careful methods of plucking. The American market also is making a stronger appeal to Chinese merchants, who are sparing no effort to expand their market here. Java teas are being steadily advertised in the United States, and whereas before the war there was but a small demand for them in this country, their consumption has since grown immensely, a point in their favor being their relatively low price compared with Ceylons and Indian. Japan alone of the principal tea growing countries seems to be using no organized propaganda to further its trade here. Our imports of teas from Japan in 1923, amounting to 20,539,735 lbs., were 1,921,931 lbs. less than in the preceding year, though that may be attributable more to a small crop, and concurrently high prices, than to an actual decrease in consumption. Fortunately for the Japanese tea producers their gardens were too far removed from the area visited by the earthquake in September last to have been directly affected by that terrible catastrophe, although it caused a temporary sharp advance in prices in Japan. That our market did not respond to this advance is due no doubt to the fact that the crop was ended and no further importations from the primary market were probable.

Supply and demand for teas in general promise to be very evenly balanced during the coming year, and therefore there is little probability of much, if any, recession from present price levels, which are around 40c. for orange pekoes of good cup quality. Total production for the 1923-24 season may exceed that of 1922-23 by 100,000,000 lbs., but should economic conditions in European countries take the shape now indicated and consumption in the United States increase moderately that would not provide a supply too great to be readily absorbed. Even with political and industrial conditions in Europe in a chaotic state her consumption of tea, if still very far below normal, is increasing. The great tea consuming population of Russia is showing signs of again becoming a potential factor in the tea market. Under the present regime it is impossible to obtain even approximate figures of the quantity going into that country, but from what is known it is certain that in 1923 her consumption was at least 5,000,000 lbs. greater than in any year since the downfall of the Czar.

COTTON CROP OF THE UNITED STATES

FOR THE YEAR ENDING JULY 31, 1923

(Compiled and condensed from report of the *Commercial and Financial Chronicle*, New York)

COTTON MOVEMENT AND CROP OF 1922-23

Our statement of the cotton crop of the United States for the year ended July 31, 1923, will be found below. It will be seen that the total commercial crop reaches 11,248,224 bales, while the exports are 4,867,831 bales and the spinners' takings are 7,065,466 bales, leaving a stock on hand at the ports at the close of the year of 187,730 bales. The whole movement for the twelve months is given in the following pages, with such suggestions and explanations as the peculiar features of the year appear to require. The first table indicates the stock at each port July 31, 1923, and 1922, the receipts at the ports for each of the past two years and the export movement for the past year (1922-23) in detail, and the totals for 1921-22 and 1920-21.

Ports of	RECEIPTS YEAR ENDING		EXPORTS YEAR ENDING JULY 31, 1923				STOCKS	
	July 31, 1923	July 31, 1922	Great Britain	France	Other	Total	July 31, 1923	July 31, 1922

Previous year.	6,748,418	1,751,784	584,390	3,180,151	5,806,325	1,372,053

*These figures are only the portion of the receipts at these ports which arrived by rail overland from Tennessee, etc. †Includes exports from San Diego and San Pedro. §This is an estimate and we have been unable to obtain any details as to what countries it was exported. ‡Shipments by rail to Canada.

The foregoing shows that the total receipts at the Atlantic and Gulf shipping ports the past year have been 5,819,096 bales, against 6,121,467 bales last year, and that the exports have been 4,867,831 bales, against 6,337,769 bales last season, Great Britain getting out of this crop 1,285,926 bales. If now we add the shipments from Tennessee and elsewhere direct to manufacturers, and Southern consumption, we have the following as the crop statement for the three years:

	1922-23 Bales	1921-22 Bales	1920-21 Bales
Year Ending July 31			
Receipts at ports	5,819,096	6,121,467	6,748,418
Shipments from Tennessee, etc., direct to mills....	912,501	1,354,930	1,438,657
Total	6,761,597	7,476,397	8,187,075
Manufactured South, not included above.....	4,486,627	4,018,323	3,168,105
Total cotton crop for the year.....	11,248,224	11,494,720	11,355,180

The result of these figures is a total crop of 11,248,224 bales (weighing 5,741,884,193 pounds) for the year ended July 31, 1923, against a crop of 11,494,720 bales (weighing 5,831,095,010 pounds) for the year ended July 31, 1922.

Northern and Southern spinners' takings in 1922-23 have been given as follows:

	<i>Bales</i>	
Total crop of the United States as before stated.....	11,248,224	
Stock on hand at commencement of year (Aug. 1, 1922):		
At Northern ports	112,168	
At Southern ports	295,681—	437,849
Total supply during the year ending Aug. 1, 1923.....		11,656,073
Of this supply there has been exported to foreign ports during the year	4,668,778	
Less foreign cotton imported†	469,954—	4,198,824
Sent to Canada direct from West		199,953
Burnt North and South‡		35,000
Stock on hand end of year (Aug. 1, 1923):		
At Northern ports	53,079	
At Southern ports	134,651—	187,730—
Total takings by spinners in the United States for year ending July 31, 1923		7,065,466
Taken by Southern spinners (included in above total).....		4,486,627
Total taken by Northern spinners		2,578,839

*Not including Canada by rail. †Figures are given in 500-lb. bales and include 329,335 bales from Egypt, 21,185 bales from Peru, 50,210 bales from China, 45,679 bales from Mexico, 22,163 bales from British India and 1,352 bales from other countries. ‡Burnt includes not only what has been thus destroyed at the Northern and Southern outports, but also all burnt on Northern railroads and in Northern factories. The figure we use is that of the U. S. Census.

These figures show that the total takings by spinners North and South during 1922-23 reached 7,065,466 bales, of which the Northern mills took 2,578,839 bales, and the Southern mills consumed 4,486,627 bales.

Distribution of the above three crops has been as follows:

<i>Takings for Consumption</i>	1922-23 <i>Bales</i>	1921-22 <i>Bales</i>	1920-21 <i>Bales</i>
North	2,578,839	2,366,297	2,012,531
South	4,486,627	4,018,323	3,168,105
Total takings for consumption	7,065,466	6,384,620	5,180,636
<i>Exports—</i>			
Total, except by Canada by rail	4,668,778	6,136,042	5,652,600
To Canada by rail	199,033	201,727	153,725
Total exports	4,867,831	6,337,769	5,806,325
Burnt during year	35,000	70,000	4,938
Total distributed	11,965,297	12,792,389	10,991,899
Add—Stock increase or decrease, together with cotton imported	*720,073	*1,297,669	†363,281
Total crop	11,248,224	11,494,720	11,355,180

*Deductions. †Additions.

In the above are given the takings for consumption. The actual consumption for two years has been:

	1922-23	1921-22
Northern mills' stocks August 1	731,723	765,426
Takings*	7,065,466	6,384,620
Total	7,797,189	7,150,046
Consumption*—North	2,750,000}	2,400,000}
South	4,486,627}	4,018,323}
Northern mills' stocks August 1	731,723	765,426
Northern mills' stock end of year	560,562	731,723

*Takings and consumption include 469,954 equivalent bales foreign cotton (Egyptian, Peruvian, etc.), and American returned in 1922-23 and 363,465 bales foreign cotton in 1921-22.

COTTON CONSUMPTION IN THE UNITED STATES AND EUROPE

United States.—Speaking in a broad way the distinctive feature of conditions in the cotton season which came to a close on July 31, 1923, was the same as that which characterized the previous season, namely, another increase in consumption of the staple at a time when the crop was of small dimensions. In remarking, however, that the crop was of small dimensions we do not mean to be understood as saying that the yield of cotton either in the United States or in the world at large was less than that in the year preceding. Erroneous impressions prevail in that respect. Talk has been so incessant in the United States regarding a short yield in this country that the notion prevails very widely except among those whose business it is to make a close study of the subject, that the past season's production of cotton in the South was no larger than that of the previous season, which everyone knows to have been of very diminutive size—the smallest in over a score of years. Over and over again comment in the newspapers and in other public prints has been to the effect that the United States had suffered a crop failure for the second or the third or the fourth time (according to the lack of information of the writer), that it seems important at the outset of this review to correct the popular mistake in that respect. In size the past year's crop was unquestionably a disappointment—and in more senses than one. It failed to fulfill early promise, it did not turn out as large as it should have been under normal conditions considering the extent of the area under cultivation at the beginning of the season, and it fell far short of world requirements, having regard to the revival of manufacturing activity in the textile trades of Europe as well as the United States after the war and having regard also to the drawing down of the accumulated supplies of the staple, invisible and visible, following the great contraction in the production of cotton in the previous season. Nevertheless, the aggregate production in the United States in the season of 1922-23 which we are reviewing, and which, of course, covers the planting of 1922, ran substantially above the extraordinarily short production of the season of 1921-22, based on the planting of 1921, notwithstanding all mishaps and adverse developments. It is not strange that this should have been so.

Indeed, it would be surprising had there not been a very substantial addition in 1922-23 to the sharply curtailed outturn of 1921-22. In using here the word "curtailed" in alluding to the 1921-22 out-turn we speak advisedly, for the crop of that season was reduced by design—that is, by the deliberate action of the planters themselves. When the planting for that crop began in the spring of 1921 the position of the Southern planter was a deplorable one. In the industrial collapse in the United States which came in the second half of 1920 in the after-the-war period of inflation the Southern planter suffered beyond all others. We think it correct to say, indeed, that the shrinkage in the price of the staple in the markets of the world exceeded that in any other leading commodity. Taking the spot price for cotton in the New York market as a basis the phenomenal extent of the depreciation will appear when we say that middling upland cotton on July 31, 1920 (the end of the 1919-20 season) still commanded 40c. a pound. Obviously the planter was then in clover. The following spring, when planting for 1921 began, it was down in the neighborhood of 11c. per pound, and in June, 1921, dropped as low as 10.85c., with the close for that season on July 31, 1921 at 12.15c. This shrinkage of over two-thirds in price (for the average of prevailing price in the New York spot market for the season of 1919-20 had been no less than 38¼c.) brought the planter to the verge of ruin and poverty. As it happened, too, the crop of 1920-21 had been a very good one, the best in six years, leaving a heavy carry-over with little likelihood of its being wanted in view of the extreme trade prostration prevailing in the United States in 1921, with manufacturing activity at a low ebb and several millions of

the laboring population out of employment. Dismal, indeed, appeared the outlook for the planter at that time, and he was perforce governed accordingly. He was advised to reduce his acreage and he did. As usually happens on such occasions, he did not live up to the full measure of his promise. At numerous meetings and conferences of planters the consensus of opinion was that the acreage should be cut down at least one-third, and at some conventions resolutions were adopted definitely pledging those in attendance to some such radical reduction. Actually the decrease in acreage did not go to any such extreme, every planter relying upon his neighbor for specific performance up to the agreed limit while he sought advantage for himself by keeping a little below it; nevertheless, real and very noteworthy reduction in acreage ensued, and as a matter of fact it was out of the question that it should be otherwise, for at 10@12c. a pound, cotton raising could not be carried on at a profit, and whatever planting was done was with the idea that with a reduction in acreage and a corresponding reduction in the size of the new crop an improvement in price would come—which actually happened before the beginning of the following season. According to the revised figures of the Department of Agriculture at Washington, the area planted to cotton in 1921 was only 31,678,000 acres, as against 37,043,000 acres in the spring of 1920, showing a reduction of 5,365,000 acres, or somewhat over 15%. Some of this acreage was subsequently abandoned, as always happens, and the area remaining to be picked at the end of the season was only 30,509,000 acres, as against 35,878,000 acres the previous year, the ratio of decrease here also being somewhat over 15%. With the area in cotton thus so substantially curtailed nature came in and aided the Southern planter in his purpose not to have an over-abundant or even an abundant yield. The poverty of the planter had made it impossible for him to buy fertilizers to the usual extent, and even where he possessed the means there was no inducement to spend much money in that way at the low price for cotton then prevailing. With this artificial aid to productivity lacking to a great extent, there was the certainty of a diminished yield in any event, and, as it happened, the boll weevil came in and did the rest. Under weather conditions favorable to their growth, these parasites increased with great rapidity; and as the planter opposed them in only a half-hearted way and in some of the States really lacked the experience for dealing with them, their depredations reached extreme proportions. Over large areas they literally devoured the bolls, stripping the plant of all fruit. The ginning returns of the United States Census tell the story of what happened. These returns show that for the season of 1921-22 the quantity of cotton ginned (measured in 500-pound bales) was no more than 7,953,641 bales, whereas in the previous season the aggregate of the ginnings had been 13,439,603 bales. Thus there was an actual shrinkage in the size of this previous crop of 5,485,962 bales, or over 40%, so that the purpose which the planters had in mind at the opening of that season of cutting down production at least one-third was fully achieved, and more, too.

We have said that it would have been surprising if the crop for the season of 1922-23 which we are now reviewing had not proved substantially larger than this drastically curtailed crop of the previous season. Certain circumstances insured a large increase in any event, notwithstanding the untoward happenings and developments encountered in the later season. By the time that planting started in 1922 there had been a marked recovery in price. There was, to be sure, no return to the quotation of 40c. a pound, but as against the 10@12c. a pound, the price ruling for spot cotton in the New York market in the spring of 1921, the quotation in the spring of 1922 ranged between 18c. and 22c. Under the lower costs there was now a profit in raising the staple. What is more, there was a good prospect of a further advance in prices as the season progressed. Because of the great shrinkage in the 1921-22 production coincident with a noteworthy increase in cotton consumption both in the United States and

abroad, the carry-over of accumulated supplies of cotton had been heavily reduced and moreover all the indications pointed to a still further increase in the manufacturing demand for cotton. There was now, therefore, every inducement to add to acreage, to use fertilizers once more, and to give close attention to the cultivation of the plant and to promote its fruitage during the growing season, and to pick every pound of cotton that could be gathered. The planters accordingly set to work and increased their acreage. The final revised figures of the Department of Agriculture show that 34,016,000 acres were planted to cotton in the spring of 1922, against 31,678,000 acres in the spring of 1921, as already mentioned, and, after allowing for acreage abandoned, 33,036,000 acres remained to be picked in the autumn of 1922, against 30,509,000 acres harvested in the autumn of 1921. It looked at one time as if from this enlarged area a crop of 11,500,000 to 12,000,000 bales could be counted upon. The boll weevil, however, did enormous damage in this season, as they had done in the previous season, and hence the expectation referred to was not realized, and that circumstance doubtless accounts for the mistaken popular impression that the production for the season of 1922-23 was close to a complete failure, the same as that for the previous season. The truth is, not only was the area picked 2,527,000 acres larger, but the yield per acre was also larger, in spite of the depredation of the boll weevil, this following from the increased use of artificial aids to fruitage in the shape of fertilizing material and the greater attention paid to cultivating methods to insure full production, the improvement in price being an inducement to that end. All this proved so successful that it now appears that the average yield per acre turned out to be about 12% better than the diminutive yield of the previous season, the average for 1922-23 having been 141.3 pounds per acre, against 124.5 pounds in 1921-22. With the acreage larger by 8% and the yield per acre by 12%, a very substantial addition to the size of the crop followed as a matter of course, and it would obviously have been strange, as already said, if it had been otherwise. The ginning returns of the Census must of course be accepted as absolutely conclusive as to the size of the crop, and they lend corroboration to the point we wish to emphasize above everything else, in view of the popular impression to the contrary, that the crop the past season was materially larger than that of the previous year. The Census returns in their complete form were announced in a report issued under date of April 14, 1923, and they show that the aggregate number of bales ginned of 500-pound weight was 9,762,069, as against the 7,953,641 bales ginned in the previous season. This is an increase, it will be seen, of 1,808,428 bales, which is plainly an important addition, even though it does not fully measure up to early promise and expectations, nor fully meet current requirements and needs.

There is a further misconception that deserves to be pointed out at this stage of the discussion. The quantity of cotton ginned does not constitute the whole of the new supplies available for the season. There is, besides, the production of linters. This is a portion of the yearly crop which is commonly ignored. We have seen most elaborate statistical analyses made with a view to showing the carry-over from season to season in which no account whatever was taken of the item. Yet these linters figure in the exports and home consumption, also in reports of receipts and shipments and in various other statistical data, often without any distinction being made between them and the ordinary lint cotton. Linters are the small portion of the fibre left adhering to the seed when the cotton passes through the gin and which is saved when the seed is crushed and pressed in the process of making cottonseed oil. Linters obviously would not answer for the purpose of making the inner grades of cotton, but can be used for many other purposes. Plainly they must be taken into consideration and they also form part of the statistical tabulations presented by the Census in its elaborate report on cotton production and distribution. It happens, too, that increase in the production of linters the past season

has been relatively greater than the increase in the quantity of cotton actually ginned. The amount of linters cannot be known until the end of the crop season on July 31, as the crushing of the seed continues throughout the different months and the figures have just become available in the monthly cotton-seed oil return issued under date of August 18. From this it appears that in the process of cleaning and crushing the seed 608,708 bales of cotton fibre were obtained, as against only 400,371 bales similarly derived the previous season. Including the linters, therefore, the crop for 1922-23 was 10,370,777 bales, as against 8,354,012 bales the previous season, showing an improvement in the real extent of the production of over 2,000,000 bales. Owing to the general disposition to ignore the linters altogether in figuring available supplies and the importance of including the item we introduce here the following table showing the production of cotton (per the ginnery returns) and of linters separately and combined for each year from 1899 to 1922 (season of 1922-23), inclusive.

YEARLY PRODUCTION OF COTTON IN THE UNITED STATES

<i>Growth Year</i>	<i>Running Bales, Counting Round as Half Bales</i>	<i>Equivalent 500-Pound Bales</i>	<i>Linters, Equivalent 500-Pound Bales</i>	<i>Total All, Equivalent 500-Pound Bales</i>

1903	9,819,969	9,851,129	194,486	10,045,615
1902	10,588,250	10,630,945	196,223	10,827,168
1901	9,582,520	9,509,745	166,026	9,675,771
1900	10,102,102	10,123,027	143,500	10,266,527
1899	9,393,242	9,345,391	114,544	9,459,935

All this is preliminary to a discussion and consideration of our own report and tabulation, as summarized at the beginning of this review and detailed more at length on subsequent pages. Our compilations deal not with the actual production or yield or size of the crop, but with what is known as the commercial crop—that is, the cotton actually coming forward, not the crop raised from the acreage planted the previous season. This has been our practice ever since we started the compilations over half a century ago, and, indeed, is the practice of all similar compilations. It is important to bear this distinction in mind, for the gulf between the actual product and the amount coming to market is often a wide one. For instance, in the previous season, when the actual production, as shown above, was the smallest of all the years included in the table, our compilation of the commercial crop for 1921-22 showed no evidence of a shortened yield. As a matter of fact, the commercial crop for 1921-22 was found to have been somewhat larger than that of the previous season, being 11,494,720 bales, against 11,355,181 bales in 1920-21, and we then noted as a quite remarkable fact that the commercial crop had shown no considerable variation from year to year for a term of years past. The compilation which we now present for 1922-23 brings this point out in still stronger relief, and gives additional emphasis to the evenness of the commercial crop in a comparison extending back for a series of years. This past

season's actual production, according to the table immediately above, was actually 2,016,765 bales larger than the actual yield for the previous season. Yet our figures of the commercial crop show that this latter were smaller than for the previous season, being 11,248,224 bales, against 11,494,720 bales, repeating the experience of the previous year, when the commercial crop turned out somewhat larger, notwithstanding that the actual production fell off in the very considerable amount of 5,500,000 bales. The explanation, of course, is very simple, as was pointed out in our previous review. Inequalities of yield from season to season are equalized through market movements. When the product in any season runs in excess of current demands, or when these demands are themselves restricted by some nation-wide or world-wide occurrence, such as unfortunately happened upon the outbreak of the World War in 1914, market movements immediately accommodate themselves to the new situation and a considerable portion of the crop remains on the plantations or is in some other way withheld and does not come into sight until the situation again changes through shortened yield or augmented demand. Both these last two mentioned factors came into play in the season of 1921-22, when production was so heavily reduced, while consumption increased both at home and abroad, with the result that accumulated supplies of the "carry-over" were drawn upon to make up the difference. The past season the process was much the same. Consumption in the United States still further increased under the influence of the great revival of trade and business, and there was, hence, need for larger new supplies. These came in the shape of an actual increase in production of over 2,000,000 bales and, in addition, the "carry-over" was further encroached upon. This carry-over might have been trenched upon still more except that it had been drawn down so low by the previous season's draft upon it.

It did appear at one time as if supplies, both from the past and the present, would be completely exhausted by the end of the season and an actual cotton famine ensue. Very elaborate computations by highly competent authorities were presented, all going to show that a highly critical stage in the cotton goods situation was approaching, with no feasible way to meet it. All these computations proceeded on the assumption that if current takings and consumption were maintained for the rest of the season it would be impossible to avert the impending crisis and the inevitable would happen. The big "if" proved the stumbling block and rendered the computations so skillfully constructed and prepared valueless. Consumption in the United States on the augmented basis was well maintained to the end of the season, but foreign consumers politely declined to run up the price on themselves any further. They did this by refraining to purchase except in very meagre fashion and to supply absolute needs in fulfillment of past orders. In Great Britain spinners curtailed the output in the American department fully 50%, as shown by our competent European correspondent in his review of the cotton goods industry abroad, as given on subsequent pages. The result was that our exports of cotton, which at one period of the season were almost on a parity with those of the preceding year, at the end of the season show a falling off of no less than 1,469,938 bales. This contraction in the foreign purchases of cotton is what served to restore the equilibrium between supplies and demand. The same circumstance served to avert the threatened and dreaded crisis predicted as in prospect with such an assurance of confidence.

It is worth noting, too, that Europe, while buying less cotton here, bought more cotton elsewhere. They bought more from other countries because they could buy to greater advantage in those countries. And, fortunately for themselves, these other countries had the cotton. Any analysis of the situation would be incomplete that did not make mention of the very important fact that as supplies from the United States kept diminishing the supplies from other countries came in to fill the gap. Exports from Egypt the past season to the various consuming countries of the world were no

less than 963,221 bales, against 749,181 bales the previous season and only 428,470 bales the year preceding. And the Egyptian bale, it should not be forgotten, weighs 750 pounds, or half again as much as the American bale. On the basis of 500-pound bales the comparison of the exports stands at 1,444,831 bales for 1922-23 against 1,123,771 bales in 1921-22 and 642,705 bales in 1920-21. Similarly, cotton exports from India the last two seasons have prodigiously increased, reaching the past season 3,491,115 bales, as against 3,250,539 bales the previous season and only 2,149,839 bales the season before that. From these two countries alone the increase has been sufficient to counterbalance the diminution in the exports from the United States. In the following table we furnish details as to the Egyptian exports.

ANNUAL STATEMENT OF THE EGYPTIAN COTTON CROP

	1922-1923 <i>Season,</i>	1921-1922 <i>Season,</i>	1920-1921 <i>Season,</i>
Total receipts (Interior gross weight)	6,681,001	5,188,025	4,876,500
<i>Exports—</i>	<i>Bales</i>	<i>Bales</i>	<i>Bales</i>
To Liverpool	236,136	179,819	124,279
To Manchester	181,437	159,403	95,659
To other United Kingdom ports	100	30	285
Total to Great Britain	417,673	339,252	220,223
To France	111,191	83,033	39,001
To Spain	29,115	18,972	13,802
To Portugal	685	640	960
To Italy	51,578	30,272	24,770
To Switzerland	37,613	40,943	34,032
To Austria	2,270	2,719	3,827
To Czechoslovakia	8,545	10,900	3,183
To Poland	3,285	2,354	1,576
To Germany	41,761	28,169	11,622
To Holland	3,603	995	2,318
To Belgium	6,629	906	2,600
To Greece	965	594	528
To Turkey and other countries	2,368	316	210
Total to Continent	299,608	220,813	138,429
To United States of America	209,224	168,843	49,722
To India	775	835	1,110
To Japan and China	35,941	19,438	18,986
Total to all parts	963,221	749,181	428,470
Equal to cantars	7,320,479	5,696,997	3,271,000

We also furnish the following 3-year comparison of the India movement:
EXPORTS FROM ALL INDIA TO

<i>Season</i>	<i>Great Britain</i>	<i>Continent</i>	<i>Japan and China</i>	<i>Total</i>
1922-23	241,109	1,049,692	2,200,314	3,491,115
1921-22	70,629	899,222	2,280,688	3,250,539
1920-21	46,237	727,786	1,375,816	2,149,839

And there is a lesson in all this that we should not fail to heed. The Southern planter is often told that he can fix the price as high as he pleases and European consumers will nevertheless be compelled to buy, since the bulk of their supplies must always come from the United States, since not enough cotton can be raised elsewhere to meet the growing requirements of the world for cotton fibre. This advice is even now being dinned into his head by some rather poor counselors. Everyone likes to see the Southern farmer obtain a good price for his chief money crop, but let him not be deceived by talk that the foreign consumer will have to pay any price the American producer or speculator may choose to fix. The experience of the past three or four months when all current indications seemed to point to famine prices, but when the price sharply declined

whenever it got a little above 30c., should disillusion him on that point, and the figures we have given regarding exports from India and Egypt (besides which it is proper to say, importations into Europe from Brazil, Smyrna, West Africa, the West Indies, etc., have also increased) should convince him that the price cannot, at least at the present stage, be carried to undue heights without the risk of inviting a serious setback. Nearly all chief cotton consuming countries of Europe are at present engaged in developing cotton culture in their different colonial possessions and making special appropriations of money for the purpose. Great Britain is very active in that respect, as our European correspondent sets out at length on subsequent pages. Anyway, it is the inevitable working of economic law that an undue advance in price, other things being the same, check consumption, and when consumption over a given period of time falls off the price goes down until an equilibrium is once more found at a lower range of values. So the Southern cotton planter should not be misled by bad advice. Let him produce all the cotton he can at the lowest possible cost to himself. Therein lies his only safety and his only sure protection. Thereby he can keep the foreign consumer in never-ending subjection to him and defeat the effort to build up outside sources.

One of the striking developments resulting from the growth in consumption coincident with a lack of a corresponding increase in production is that there has been an enormous reduction in the carry-over into the next season. The U. S. Census on August 18 gave out a statement saying that the carry-over of cotton in the United States on July 31, 1923, was only 2,087,919 bales, against 2,831,553 bales in 1922 and 6,534,360 bales on July 31, 1921. With these figures as a basis we undertake to indicate in the following table the entire world's carry-over of American cotton, so far as figures are now available, at the close of each of the last three seasons, as follows:

<i>Lint</i>	1923 <i>Bales</i>	1922 <i>Bales</i>	1921 <i>Bales</i>
In U. S. consuming establishments	1,089,230	1,218,388	1,625,646
In U. S. public storage, etc.	938,689	1,488,165	3,633,254
At Liverpool	153,000	473,000	685,000
At Manchester	24,000	45,000	75,000
At Continental ports	111,000	442,000	506,000
Afloat for Europe	109,000	171,000	386,720
Mills other than in U. S.	*750,000	*1,200,000	1,124,000
Japan and China ports and afloat	*250,000	*300,000	250,000
Elsewhere in U. S.	†60,000	†123,000	1,650,000
Total lint cotton	3,484,919	5,462,553	9,335,620
<i>Linters</i>			
In U. S. consuming establishments	127,418	138,523	201,233
In U. S. public storage, etc.	35,876	54,587	231,926
Elsewhere in U. S.	150,000	*150,000	250,000
Total linters	313,294	343,110	686,179
Grand Total	3,798,213	5,805,663	10,021,799

*Estimated. †As estimated by U. S. Census.

From the foregoing it appears that the carry-over of American cotton throughout the world on July 31, 1923 (including linters) was down to 3,798,213 bales, as against 5,805,663 bales on July 31, 1922, and 10,021,799 bales on July 31, 1921. In addition there was, of course a considerable carry-over of East Indian, Egyptian and other varieties of cotton, but this in the absence of definite information we do not undertake to estimate for any of the seasons.

Southern cotton consumption again shows a substantial increase, and while New England manufacturers the latter part of the season had to contend with more or less idleness, particularly at Fall River, Southern mills, many of them, were running much of the time night and day. We have made no investigations of our own the present season, but have

adapted the Census return to our requirements, and in this way find that aggregate consumption by the mills in the South reached 4,486,627 bales. This is a maximum figure in the history of the Southern cotton goods industry. It compares, according to our figures, with 4,018,323 bales in the previous season and with only 3,168,105 bales in 1920-21, but with 4,378,298 bales back in 1916-17. In the following we furnish comparisons on a few leading items:

	NUMBER OF SPINDLES		
	<i>Alive</i>	<i>Running in July</i>	<i>Consumption, Bales</i>
<i>Southern States</i>			
Alabama	1,330,162	1,248,062	422,036
Georgia	2,686,047	2,597,248	1,007,720
North Carolina	5,508,913	5,361,462	1,341,574
South Carolina	5,129,761	4,933,844	1,035,319
Tennessee	438,696	434,544	140,434
All other cotton-growing States	1,353,176	1,296,645	539,544
Totals 1922-23	16,446,758	15,871,805	4,486,627
1921-22	16,191,315	15,800,933	4,018,323
1920-21	15,380,693	15,130,755	3,168,105
1919-20	14,990,736	14,792,436	3,724,222
1918-19	14,639,688	14,243,813	3,504,191
1917-18	14,369,599	14,111,621	4,323,826
1916-17	14,040,676	13,937,167	4,378,298
1914-15	13,017,969	12,737,498	3,164,896
1907-08	10,451,910	9,864,198	2,234,395
1902-03	7,039,633	6,714,589	2,049,902
1897-98	3,670,290	3,574,754	1,227,939

Figures for years prior to 1913-14 cover period from September 1 to August 31.

A fact brought out by the foregoing is that there has been a further increase in spindle capacity. The following shows the aggregate number of spindles both in the North and the South. We leave our estimate for the North unchanged:

<i>Spindles</i>	1922-23	1921-22	1920-21	1919-20
North	20,000,000	20,000,000	20,000,000	19,900,000
South	16,446,758	16,191,315	15,380,693	14,990,736
Total	36,446,758	36,191,315	35,380,693	34,890,736

Europe.—Since a year ago the cotton industry in the several countries of Europe has not progressed any toward better times. The absence of improvement has been largely due to the strained political situation, and the position has become worse since the French Government decided to enter the Ruhr—last January. This action has also had an unfavorable effect upon trade developments in England. Owing to the uncertain outlook and the wide fluctuations in foreign exchanges, merchants have limited their commitments, and the general conditions have been most unsatisfactory. It is possible that the future action of the British Government may result in things being worse, but opinion is gaining ground that a peaceful solution of the difficult situation cannot be reached without other methods being adopted in the relations of the Allies toward Germany.

Great Britain.—A year ago spinners and manufacturers were rather more favorably situated than for several months previously. The improved position, however, was not maintained and in all departments ground was lost in the autumn of 1922. Demand continued very poor and spinners of American yarn decided to organize short time working in the mills. Looms began to stand idle for want of orders, and there was increased anxiety with regard to financial matters. In January last there was a revival of demand, and extensive buying took place in yard and piece goods for three or four weeks, most of the contracts being for India. Since then, however, business has been fitful, and not of any weight. It is true that foreign trade in cloth has been of larger dimensions than in the previous year, but it has not been possible for producers to secure remunerative

prices. Heavy losses have been entailed by the owners of weaving sheds and spinning companies. It has been necessary for numerous firms to come to some arrangement with their creditors and now and again the forced sales of bankrupts' stock have had a vital effect upon prices. The home trade has been adversely affected by the general industrial depression throughout the country; and owing to the large amount of unemployment in the chief trades the spending power of the working classes has been reduced. The chief reasons for the continued depression have been the high prices of raw cotton and the disturbed political situation throughout Europe. There are now indications of raw material being rather cheaper, and with regard to the German reparations question the decision of the British Government to abandon its passive attitude will probably result in more satisfactory conditions existing in the near future. It is recognized, however, that a breach between France and England would be serious for the peace of Europe, and there is still danger of a financial collapse in Germany.

Manufacturers of piece goods have had a very disappointing twelve months. A year ago it was estimated that 90% of the looms in Lancashire were working. Since the beginning of 1923 it is doubtful whether more than 60% of the weaving machinery has turned out goods. Buyers' attitude has been to purchase from hand to mouth, and on very few occasions have there been contracts of any importance arranged. The operatives have felt the depression very seriously, and it has been hard work for employers to prevent big losses. An irregular business has been done for India, the chief foreign outlet. Numerous dealers in the bazaars abroad have not yet recovered from the severe depreciation in the value of stocks, and Manchester merchants have experienced much difficulty in getting firms abroad to complete old contracts. The political situation in India, however, has improved, and last season there was a favorable monsoon. The rain this year began rather badly, but recently there has been a recovery, and there is every promise of encouraging grain crops. There has been a tendency for stocks of cloth on the other side to be reduced, and it is a sign of the times that demand for many months has been for quick delivery, showing very clearly that now and again it has been necessary for dealers to replenish supplies of certain makes. With regard to the various classes of goods sent to India, there has been a most dragging demand for gray staples, such as shirtings, and many Lancashire makers have endeavored to turn their machinery on to other styles. Business if anything has broadened in fancies and specialties, and recently there has been an increased turnover in printed and dyed sorts. On the whole, trade has been fairly well maintained in light bleaching descriptions, such as dhooties, mulls, and jaconets, and on certain occasions substantial contracts have been put through. There now seems to be less likelihood of political disturbances in India, but the Government has adopted a policy of protection, and there are fears in Lancashire that sooner or later the excise duty on cotton cloths will be abandoned. It is plainer than ever that Lancashire is steadily losing her trade with India in plain and common goods, but if the purchasing power of the natives is increased the desire for higher class materials will be stimulated, and it is expected that in this way Lancashire will maintain her trade. The chief drawback to a revival of demand for China has been the disorganized condition of the Government, and, owing to civil war and a large amount of brigandage, it has been quite impossible to conduct business on ordinary lines. Stocks, however, in Shanghai and Hong Kong have been steadily reduced during the past twelve months, and now and again buyers have been compelled to replenish supplies. Since the beginning of this year there has been increased activity in fancies, and a considerable trade has been done in warp satins, poplins, and other printed and dyed materials. On the other hand, gray shirtings have not attracted much attention, and rather irregular operations have taken place in white shirtings and sheetings. There are immense trade possibilities in China,

but developments are being held back at the moment by the fact that the political situation is in a state of chaos. There has not been any general flow of orders for the outlets of the Near East, and the unsettled political position in that part of the world has damped trade developments. Owing to the signing of peace terms with Turkey, there are now more hopes of business on a freer scale, but money is not plentiful, and at the moment selling prices in Turkey are said to be below Manchester rates. On the whole, a fair amount of trade has been done for Egypt in a variety of goods, and the minor outlets of the Levant have given moderate support. Business with the markets of South America has been hampered by the irregularities in exchange rates, and buying of piece goods has been very patchy. A feature of interest during the year has been the active demand in fine cloths and specialties for the United States. During the last few months a big business has been done, but in certain directions some firms seem to have over-bought, and instances are being mentioned of attempts being made to cancel contracts. Action of this kind is much criticized and makes against the stabilization of trading relations between this country and America.

Buying for European countries has tended to fall off. Last year, of course, large quantities of cloth were sent to the Continent for finishing processes, but this kind of business has declined. At this point it may be mentioned that during the six months ended with June, shipments to Germany showed a decline of over 28,000,000 square yards, compared with 1922, and exports to Switzerland during the same period declined to the extent of 22,000,000 square yards. Larger cloth shipments continue to be recorded in India, and so far this year compared with last customers in Bengal and Bombay have taken 250,000,000 square yards more than in 1922. The position of manufacturers became so unsatisfactory last January that an attempt was made to organize curtailment of production on a definite scale. Several meetings were held, but no feasible scheme was put forward, and ultimately the proposal was dropped. Irregular restriction of output, however, has been of substantial dimensions, and the annual holidays in weaving towns which are now taking place are in many cases being extended. Charges for calico printing, bleaching and dyeing have tended to decline, and it is held in many directions that prices for this class of work are altogether too dear. There has not been sufficient work to keep all the calico printers, bleachers and dyers on full time, but in these branches of the industry profitable prices have been obtained, and the leading firms have been able to publish healthy balance sheets. Numerous cases of financial difficulties have had to be dealt with. Quite a number of small manufacturers have had to consult their creditors. The most notable event has been the winding up of the large merchant house of Reiss Brothers, Ltd. It is understood that their losses, especially in China, have been tremendous. The firm is being reorganized and it is expected that in course of time they will be able to recover some of their serious losses of the past.

The following table gives particulars of British foreign trade in yarn and cloth for the twelve months ended June 30:

<i>British Exports—</i>		1922-23	1921-22	1920-21	1919-20
Yarn	lbs.	165,137,400	3,542,497,300	3,250,781,200	4,447,609,700
Cloth	square yards	4,437,184,900	201,575,900	119,567,000	163,163,200

It has been a deplorable year for spinners of yarn made from American cotton. In the middle of 1922 the prospects were rather brighter, but the better state of affairs was soon lost and in September it was decided by the Masters' Federation to restrict output on an organized scale by closing the mills on Saturdays and Mondays, thus reducing the weekly hours from 48 to 35. In November it was urged that the restriction of production was not sufficient and it was proposed that working hours should be reduced to 24 per week. On a ballot being taken, however, the result did not show a sufficient majority to put the suggestion into force. In January 1923 busi-

ness showed a revival and at the end of that month it was decided to abandon the organized short time working in the mills. The improvement in the trade position was short lived, and at the end of February the Masters' Federation recommended spinners to limit output during March by 50%. This big curtailment of production has continued up to the present time. The foregoing remarks indicate very clearly that the trade demand throughout the twelve months has been exceedingly poor and on many occasions the reduced output of the mills has been more than sufficient to meet the requirements of users. Consumption, of course, has been vitally affected by the large number of looms standing idle in Lancashire and also the falling off in export trade.

On the other hand, a steady improvement has taken place in the position of spinners of Egyptian cotton and especially since the beginning of 1923 producers have booked orders on a freer scale. For nearly six months all the spindles in this section have been working full time. Many concerns have now fair engagements and fresh contracts are only being accepted at prices which show a profit. The shipping demand for yarns has been very patchy. On the whole the most active market has been India, and from time to time fair contracts have been arranged. The bulk of the buying has been in fine counts from 80's to 120's and very little business has been done in such descriptions as 40's mule. There has been a limited offtake for the Continent and prices are understood to be higher than those prevailing in Belgium and France.

A feature of the year in the spinning section of the industry has been the activity of the Provisional Emergency Committee of employers. This new organization has been under the leadership of Sir Charles Macara and no efforts have been spared to find a solution for the severe trade depression. It has been urged that a Control Board should be set up consisting of representatives of spinners, manufacturers and trade union officials for the purpose of controlling production according to the state of demand. The promoters have evidently had in mind a similar body to that which existed during the latter part of the war, when there were fears of a distinct scarcity of raw material if individual firms were not controlled as to their consumption. Many representations have been made to the Master Spinners' Federation from time to time, and after consultations with the Provisional Emergency Committee it was decided from the beginning of June to publish basic prices for American yarns, and spinners were urged not to sell at below the official rates. The scheme, however, was not a success and in the middle of July the official rates were withdrawn. On the question of the formation of a Control Board the Masters' Federation, owing to pressure, decided a week or two ago to take a ballot of the members as to their opinion on this matter. The scheme, however, has been rejected by the employers.

Throughout the year no important question has arisen with regard to labor matters. According to the wages agreement arranged in April 1922 there was a further reduction of 10% on list rates last November. The agreement provided for no further alteration before May this year. A few weeks before that time the trade union officials suggested to the employers that the agreement should be extended for twelve months without any change in list rates. Several joint conferences took place, and on the 10th of May the following terms were arranged: "That the present rates of wages shall continue in operation until Jan. 25, 1924. After that date the employers will be at liberty to take whatever action they think fit on giving one month's notice. The operatives' organizations further agree not to make any application for a general advance in wages until the end of a further period of eight months from Jan. 25, 1924. After Sept. 25, 1924 both sides shall be at liberty to take whatever action they think fit on giving one month's notice." This agreement applies to all employers and operatives throughout the cotton industry.

More attention than ever has been paid during the past twelve months to the advancement of cotton growing in different parts of the British Empire. The event of importance has been the Act of Parliament which provides

for a levy of 6d. a bale upon all cotton entering the United Kingdom. The fund created will go to the Empire Cotton Growing Corporation. Important pioneer work is now being done by the corporation, especially in certain parts of Africa, and it is expected that good results will follow in the years to come. In Lancashire great interest has been taken in the cotton growing projects in Australia. The Cotton Growers' Association there is expending £250,000 on additional plant for dealing with the raw material when grown. Samples which have recently been received from Australia are satisfactory. More English spinners are turning their machinery on to what are known as outside growths, and the buying in Liverpool of these qualities during the last few months has caused much comment. Particular attention has been centred on Peruvian cotton. Important developments are now taking place in Brazil and it is estimated that the crop there for the next twelve months will be 1,000,000 bales. Considerable progress has also been made during the year by the British Cotton Industry Research Association. Grants of various kinds have been made to universities for the purpose of encouraging research work relating to the growth of raw cotton and its manufacture into goods.

A couple of months ago the committee of the International Federation of Master Cotton Spinners and Manufacturers associations decided to send the Secretary, Mr. Arno Pearse, on a tour of investigation in the United States and South America. Mr. Pearse is now sending important cables to this country giving his views relating to probable supplies of raw cotton and the condition of the yarn and cloth trade in countries abroad.

The number of spinning spindles in Great Britain is now estimated at 56,000,000.

The consumption of American cotton during the coming season is estimated at 2,500,000 bales.

European Continent.—It has been a disappointing twelve months for the industry throughout Europe. A year ago it was not imagined that so little progress would have been made toward more settled conditions. The decision of France to enter the Ruhr has had a vital effect upon industrial developments, and at the moment the political situation is very serious. It is believed, however, that the British Government will find some way out of the difficulty. In the meantime international trade is in a state of chaos.

In Germany trade during the past year has been very irregular. Difficulties, however, with regard to securing adequate supplies of raw cotton have been overcome. According to a reliable report, nearly 90% of the spindles were running in February last, the working hours in the mills being about 42 per week. Numerous concerns have been handicapped by the limited amount of capital available. There has been a tendency for the smaller concerns to combine. The general demand in yarn and cloth has been healthy, and the output of the spinning mills and weaving sheds has been well absorbed. The disorganization of the currency has led to numerous difficulties and the situation in this respect tends to become worse rather than better. The number of spinning spindles is estimated at 9,500,000.

It has been an unsatisfactory year for spinners and manufacturers in France. Political matters have had a very disturbing effect upon the industry. The violent changes in exchange rates have upset foreign trade. During the last few months the position has become worse. Production has kept up fairly well, but isolated cases have been mentioned of machinery being stopped owing to a shortage of operatives. Spinning spindles are estimated at 9,600,000.

Trade in Holland has experienced a distinct setback. There has been a marked falling off in business, and spinners have been adversely affected by severe competition from firms in Germany. A large amount of yarn has been sold at a loss. Fewer orders have been available in piece goods, and manufacturers have lost ground. Owing to the unsatisfactory state of affairs, a good deal of short time has been worked during the last few months. The spinning spindles are estimated at 640,000.

Unfavorable reports have come to hand from spinners and manufacturers in Denmark. For many months most of the mills have been closed on Saturdays and Mondays. The purchasing power of the public appears to be reduced. Spinning spindles are estimated at 95,000.

In Czechoslovakia very irregular conditions have prevailed. Most spinners and manufacturers have been severely hit by high prices and the home consumption of cotton goods has been restricted. Latterly a little improvement has shown itself, but it has not been possible to keep all the mills running full time. Stocks of manufactured goods are comparatively low; on the other hand, the purchasing power of the people is limited. The spinning spindles are estimated at 3,500,000.

The experience of employers in Belgium has not been at all favorable. Numerous firms have been adversely affected by the important advance in raw material rates. In the weaving section cloth sales have been checked by high prices. A good deal of short time has been in evidence. The spinning spindles are estimated at 1,675,000.

On the whole, trade in Austria has passed through a crisis, but there are indications of a rather better state of affairs in the near future. Demand has been very irregular and the industry until latterly was upset by the many alterations in exchange rates, making it quite impossible to fix a price basis on which business could be done. The spinning spindles are estimated at 1,025,000.

It will be realized from the above reports that the cotton industry throughout Europe is in a very disorganized condition. In a sense things can scarcely become worse, and it is hoped that as a result of political action better reports will be available next year.

The Editors of "The Chronicle" are indebted to a special and well-informed European correspondent for the foregoing review of the spinning industry in Great Britain and on the Continent in 1922-23. Taken in conjunction with our remarks on the situation in the United States, presented further above, it covers quite fully the countries of the world that take chief important rank in cotton manufacturing.

We add the following table to show the price of middling upland cotton in Liverpool for each day of the season:

DAILY CLOSING PRICE OF MIDDLING UPLAND IN LIVERPOOL

There are several other countries of lesser, though steadily increasing, importance which must be included to complete the narrative of the world's progress in cotton production and manufacture. In the table below official data are used in those cases so far and for as late periods as they can be obtained, but it is only proper to say that in many cases the figures are only estimates, based on the best information obtainable, it being too soon after the close of the season to have official and authentic figures. The compilation appended embraces substantially the entire distribution or consumption (expressed in bales of 500 pounds net weight each) of the commercial cotton crops of the world, and the portion taken by each country.

THE WORLD'S ANNUAL COTTON CONSUMPTION

<i>Countries</i>	1922-23 <i>Bales</i>	1921-22 <i>Bales</i>	1920-21 <i>Bales</i>	1919-20 <i>Bales</i>
Great Britain	2,700,000	2,700,000	3,000,000	3,200,000
Continent	4,500,000	4,400,000	3,000,000	3,800,000
Total Europe	7,200,000	7,100,000	6,300,000	7,000,000
United States—North	2,667,500	2,400,000	2,079,473	2,935,162
South	4,350,820	4,018,323	3,093,944	3,626,873
Total United States	7,018,320	6,418,323	5,173,417	6,562,035
East Indies	1,750,000	1,900,000	1,500,000	1,530,400
Japan	2,500,000	2,364,997	1,704,633	1,762,692
Canada	211,454	219,656	160,080	221,235
Mexico	100,000	70,000	70,000	1,390
Total, India, etc.	4,591,454	4,554,653	3,435,413	3,515,627
Other countries, etc.	1,500,000	1,500,000	900,000	700,000
Total world	20,309,774	19,572,976	15,808,830	17,777,662
Average weekly	392,111	376,400	304,016	341,870

From the foregoing table it would appear that the world's total consumption for 1922-23 shows an increase from the aggregate for a year ago of 736,798 bales. The sources from which cotton has been drawn in each of the last five years are stated in the subjoined table of the world's commercial crops, in bales of 500 pounds net each:

WORLD'S COMMERCIAL CROPS OF COTTON

<i>Countries</i> (<i>Amt. Coming Forward</i>)	1922-23 <i>Bales</i>	1921-22 <i>Bales</i>	1920-21 <i>Bales</i>	1919-20 <i>Bales</i>	1918-19 <i>Bales</i>
United States	10,910,777	11,494,720	11,218,918	11,814,453	11,410,192
East Indies*	4,100,000	5,000,000	3,650,000	4,274,400	3,865,000
Egypt	1,600,000	1,200,000	800,000	1,072,519	906,767
Brazil, etc.†	1,700,000	2,000,000	1,350,000	1,050,000	680,000
Total	18,310,777	19,694,720	17,018,918	18,211,372	16,861,959
Consumption 52 weeks ..	20,309,774	19,572,976	15,808,830	17,777,662	15,689,107
Surp. from year's crop...—	1,998,997	121,744	1,210,098	433,710	1,172,852
Visible and invisible stock:					
Aug. 1 beginning year ..	7,101,792	6,980,048	5,770,040	5,336,330	4,163,478
Aug. 1 ending year ..	5,102,795	7,101,792	6,980,048	5,770,040	5,336,330

*Includes India's exports to Europe, America and Japan and mill consumption in India, increased or decreased by excess or loss of stock at Bombay.

†Receipts into Europe, etc., from Brazil, Smyrna, Peru, West Indies, etc., and Japan and China cotton used in Japanese and Chinese mills.

‡Deficiency in the year's new supply.

The above statement indicates, in compact form, the world's supply of cotton (exclusive of that raised in Russia) in each of the five years, the amount consumed and also the extent to which visible and invisible stocks were augmented or diminished.

The augmentation of the spinning capacity of the mills of the world has been very moderate outside of China, India and Japan the past season. Our compilation for the world is as follows:

NUMBER OF SPINDLES IN THE WORLD

	1923	1922	1921	1920	1919
Great Britain	56,500,000	56,500,000	56,500,000	56,500,000	57,000,000
Continent	43,900,000	43,900,000	43,900,000	43,900,000	43,200,000
Total Europe	100,400,000	100,400,000	100,400,000	100,400,000	100,200,000
United States—North ...	20,000,000	20,000,000	20,000,000	19,900,000	19,600,000
South ...	16,446,758	16,191,351	15,380,693	14,990,736	14,639,688

China, Egypt, etc.....	2,700,000	2,200,000	1,725,000	1,700,000	1,540,000
Total India, etc.....	14,750,000	13,483,000	12,338,680	12,100,000	11,535,741
Canada	1,200,000	1,375,000	1,375,000	1,375,000	1,375,000
Mexico, So. America, etc.	2,750,000	2,500,000	2,500,000	2,500,000	2,062,149
Total other	3,950,000	3,875,000	3,875,000	3,875,000	3,437,149
Total world	155,546,758	153,949,351	151,994,373	151,265,736	49,112,578

In the above we have revised the figures to accord with those compiled by the International Federation of Master Cotton Spinners and Manufacturers' Association.

We now give a compilation which covers the figures of consumption in detail for each of the principal countries embraced in the statement of the world's annual consumption already presented, and the total of all. These figures are not the takings of the mills, but the actual consumption, and are in all cases expressed in bales of 500 pounds. The figures in the table cover the years from 1908-09 to 1922-23, inclusive, and are given in thousands of bales. The figures for 1913-14 to 1921-22, inclusive, cover the twelve months ended July 31; all earlier years are for the period September 1 to August 31:

500-lb. bales 000s omitted	EUROPE			UNITED STATES			East Indies	Japan	All Others	
	Great Britain	Conti- nent	Total	North	South	Total			Total	
1908-09	3,720	5,720	9,440	2,448	2,464	4,912	1,653	881	278	17,164

*Figures for 1919-20 and 1920-21 are subject to correction.

Another general table which we have compiled of late years is needed in connection with the foregoing to furnish a comprehensive idea of the extent and the expansion of this industry. It discloses the world's cotton supply and the sources of it. The special points we have sought to illustrate by the statements are, first, the relative contribution to the world's raw material by the United States and by other sources, and, second, to follow its distribution. Figures for 1908-09 to 1912-13 are for the year ending August 31:

WORLD'S SUPPLY AND DISTRIBUTION OF COTTON

500-lb Bales	<i>Visible and Invisible Supply Beginning of Year</i>	COMMERCIAL CROPS			<i>Total Actual Consumption</i>	BALANCE OF SUPPLY END OF YEAR	
		<i>United States</i>	<i>All Others</i>	<i>Total</i>		<i>Visible</i>	<i>Invisible</i>
1908-09	4,855,093	13,496,751	4,489,169	17,985,920	17,164,487	1,875,140	3,801,386

1916-17	5,379,082	12,670,099	5,353,238	18,023,337	18,924,923	2,585,490	1,892,006
1917-18	4,477,496	11,547,650	5,238,010	16,785,660	17,099,678	2,795,980	1,367,498
1918-19	4,163,478	11,410,192	5,551,767	16,961,959	15,689,107	4,277,017	1,049,313
1919-20	5,336,330	11,814,453	6,396,919	18,211,372	17,777,662	4,530,450	1,239,590
Av. 6 years	12,473,804	5,348,271	17,822,075	18,096,965
1920-21	5,770,040	11,218,918	5,800,000	17,018,918	15,808,830	5,795,209	1,184,839
1921-22	6,980,048	11,494,720	8,200,000	19,694,720	19,572,976	5,651,000	1,450,792
1922-23	7,101,792	10,910,777	7,400,000	18,310,777	20,309,774	3,630,000	1,472,795

To illustrate the preceding, take the last season, 1922-23, and the results would be as follows:

<i>Supply</i> —Visible and invisible stock beginning of year	<i>Bales</i> 7,101,792
Total crop during year	18,310,777
Total supply—bales of 500 lbs.	25,412,569
<i>Distribution</i> —Total consumption, etc.	20,309,774
Leaving visible stock	3,630,000
Leaving invisible stock	1,472,795
Total visible and invisible stock at end of year.....	5,102,795

OVERLAND CROP MOVEMENT

Overland.—The movement of cotton overland in 1922-23 showed a striking falling off. To indicate the relation the gross overland bears to the total yield in each of the last 12 years, we append the following:

<i>Crop of</i>	<i>Total Yield Bales</i>	<i>Gross Overland Bales</i>	INCREASE OR DECREASE	
			<i>In Size of Crop, Per Cent.</i>	<i>In Overland Per Cent.</i>
1922-23	11,248,224	1,527,373	Decrease 2.14	Decrease 25.23
1921-22	11,494,720	2,042,570	Increase 1.25	Increase 2.44
1920-21	11,355,180	1,993,876	Decrease 7.05	Decrease 16.74
1919-20	12,217,552	2,394,645	Increase 5.30	Decrease 1.11
1918-19	11,602,634	2,421,283	Decrease 2.59	Decrease 17.34
1917-18	11,911,896	2,929,052	Decrease 8.20	Increase 7.37
1916-17	12,975,569	2,728,469	Increase 0.17	Increase 9.13
1915-16	12,953,450	2,499,150	Decrease 14.03	Increase 16.45
1914-15	15,067,247	2,146,152	Increase 1.02	Increase 22.06
1913-14	14,884,801	1,758,069	Increase 5.35	Increase 4.78

With these explanations, nothing further is needed to make plain the following statement of the movement overland for the year ending July 31, 1922, as compared with the figures for the two preceding seasons:

<i>Amount Shipped</i>	1922-23 <i>Bales</i>	1921-22 <i>Bales</i>	1920-21 <i>Bales</i>
Via St. Louis	741,839	827,234	843,198
Via Mounds, etc.	244,575	392,097	253,920
Via Rock Island	7,906	8,052	36,248
Via Louisville	66,582	88,679	75,959
Via Cincinnati	10,286	15,136	13,154
Via Virginia points	97,513	317,351	178,521
Via other routes East	94,070	77,932	70,009
Via other routes West	261,602	316,089	522,872
Total gross overland	1,527,373	2,042,570	1,993,876

Deduct Shipments

Overland to New York, Boston, etc.	112,294	169,510	145,555
Between interior towns	42,820	50,334	64,039
Galveston inland and local mills	88,089	31,015	49,740
New Orleans inland and local mills	250,725	281,369	235,362
Mobile inland and local mills	6,884	6,568	5,389
Savannah inland and local mills	31,923	28,080	5,241
Charleston inland and local mills	36,450	89,483	34,497
North Carolina ports inland and local mills.....	6,811	11,396	3,400
Virginia ports inland and local mills	6,125	15,619	11,996
Jacksonville inland and local consumption	2,751	1,266
Total to be deducted	584,872	687,640	555,219
Leaving total net overland*	942,501	1,354,930	1,438,657

*This total includes shipments to Canada by rail, which during 1922-23 amounted to 199,053 bales.

Crop Details.—We now proceed to give the details of the entire crop for two years:

TEXAS

	1922-23		1921-22	
Exported from Houston (port):				
To Mexico	
Other foreign ports	719,942		478,141	
Coastwise and inland ports	3,680		3,749	
Exported from Galveston:				
To Mexico	4,270		2,494,504	
Other foreign ports	1,924,841		2,494,504	
Coastwise and inland ports	519,832		278,424	
Exported from Texas City:				
To Mexico	
Other foreign ports	3,765		5,242	
Coastwise and inland ports	67,393		43,700	
Exported from Laredo, Eagle Pass, etc.:				
To Mexico	8,716		1,087	
Inland, from other ports	29,113		19,306	
Stock at close of year:				
At Galveston and Texas City	18,675—	3,300,227	64,736—	3,388,890
Deduct—				
Received at Houston from other ports.....	810		2,201	
Received at Galveston from other ports.....	57,205		43,042	
Received at Texas City	244		425	
Received at Laredo, etc.	500		
Stock at beginning of year:				
At Galveston and Texas City.....	64,736—	123,495	257,932—	303,600
Movement for year	bales 3,176,732		3,085,290	

*Includes 77,102 bales shipped inland for consumption, etc., at Galveston and 10,987 bales at Texas City deducted in overland movement.

LOUISIANA

	1922-23		1921-22	
Exported from New Orleans:				
To foreign ports	814,017		1,320,016	
To coastwise ports	312,446		92,070	
Inland by rail*	312,093		236,796	
Manufactured*	43,632		44,573	
Stock at close of year	47,595—	1,529,783	76,166—	1,769,621
Deduct—				
Received from Mobile	11,786		33,280	
Received from Galveston, etc.	58,944		24,336	
Received from New York, etc.	†17,505		3,892	
Stock beginning of year	76,166—	164,401	430,311—	491,819
Movement for year	bales 1,365,382		1,277,802	

*In overland we have deducted these two items.

†Includes American cotton returned from abroad as follows: From Liverpool, 9,179 bales; from Manchester, 326 bales; from Mexico, 2,206 bales; from Antwerp, 75 bales; and from Rotterdam, 179 bales, or a total of 11,965 bales.

GEORGIA

	1922-23		1921-22	
Exported from Savannah:				
To foreign ports—Upland	293,496		692,375	
To foreign ports—Sea Island	
To coastwise ports:				
Upland*	193,366		155,145	
Sea Island*	1,112		1,389	
Exported from Brunswick:				
To foreign ports	28,477		29,403	
To coastwise ports		147	
Stock at close of year:				
At Brunswick	161		1,015	
At Savannah—Upland	11,137		45,406	
Sea Island	603—	528,652	581—	925,461
Deduct—				
Received from Charleston, etc.	800		710	
Stock beginning of year:				
At Brunswick	1,015		758	
At Savannah—Upland	45,406		131,687	
Sea Island	581—	47,802	528—	133,683
Movement for year	480,850		791,778	

*The amounts shipped inland and taken from consumption (31,923 bales) are deducted in overland.

ALABAMA

	1922-23		1921-22	
Exported from Mobile:				
To foreign ports	59,099		122,619	
To coastwise ports	33,718		54,149	
Stock at close of year	850—	93,667	2,901—	179,669
Deduct—				
Stock beginning of year	2,901—	3,105	12,987—	13,352
Receipts from New Orleans, etc.	204		365	
Movement for year	90,562		166,317	

*Under the head of coastwise shipments from Mobile are included 2,103 bales shipped inland by rail for consumption, etc., which with local consumption (4,781 bales), are deducted in the overland movement.

FLORIDA*

	1922-23		1921-22	
Exported from Pensacola, etc.:				
To foreign ports	5,840		3,998	
To coastwise ports	9,233		4,308	
Stock at close of year	2,622—	17,695	1,433—	9,739
Deduct—				
Received from New Orleans, etc.	
Stock beginning of year	1,433—	1,433	1,634—	1,634
Movement for year	16,262		8,105	

*These figures represent this year, as heretofore, only the shipments from the Florida outports. Florida cotton has also gone inland to Savannah, etc., but we have followed our usual custom of counting that cotton at the outports where it first appears.

MISSISSIPPI

	1922-23		1921-22	
Exported from Gulfport:				
To foreign ports	4,279		8,123	
Stock close of year	4,279	8,123
Deduct—				
Stock beginning of year	
Movement for year	4,279		8,123	

SOUTH CAROLINA

	1922-23		1921-22	
Exported from Charleston, etc.:				
To foreign ports—Upland	91,132		
Sea Island	
To coastwise ports:*				
Upland	76,126		126,968	
Sea Island	7		116	
Stock at close of year:				
Upland	23,703		53,056	
Sea Island	167—	191,135	115—	356,276
Deduct—				
Received from Georgetown	
Stock beginning of year:				
Upland	53,056		202,228	
Sea Island	115—	53,171	186—	202,414
Movement for year	137,964		153,362	

*Included in these items are 36,450 bales, the amount taken by local mills and shipped to interior, all of which is deducted in overland.

NORTH CAROLINA

	1922-23		1921-22	
Exported from Wilmington:				
To foreign ports	98,900		109,375	
To coastwise ports*	15,411		11,496	
Coastwise from Washington, etc.	32,570		72,576	
Stock at close of year	5,180—	172,061	12,374—	208,821
Deduct—				
Stock at beginning of year	12,371—	12,374	28,226—	28,226
Movement for year		159,687		180,595

*Of these shipments, 6,811 bales, covering shipments inland by rail from Wilmington and local consumption, are deducted in overland.

VIRGINIA

	1922-23		1921-22	
Exported from Norfolk:				
To foreign ports	174,320		238,027	
To coastwise ports*	129,211		170,399	
Exported from Newport News, etc.:				
To foreign ports	
Taken for manufacture	1,148		1,226	
Burnt		252	
Stock end of year, Norfolk	21,000—	325,679	31,000—	443,904
Deduct—				
Received from Wilmington, etc.	4,025		4,878	
Received from other North Carolina	12,570		67,887	
Stock beginning of year	34,000—	50,595	91,054—	163,819
Movement for year		275,084		280,085

*Includes 4,977 bales shipped to the interior, which, with 1,148 bales, taken for manufacture, are deducted in overland.

TENNESSEE, Etc.

	1922-23		1921-22	
Shipments—				
To manufacturers—direct—net overland	942,501		1,354,930	
To New York, Boston, etc., by rail	112,294		159,510	
Total marketed from Tennessee, etc.,		1,054,795		1,524,440
Total product detailed in the foregoing by States for the year ended July 31, 1923				6,761,597
Consumed in the South, not included				4,496,627

Total crop of the United States for the year ended July 31, 1923.....bales 11,248,224

Below we give the total crop each year since 1886-87. All years prior to 1913-14 cover the period September 1 to August 31. The year 1912-13 consequently includes August, 1913, which is also a part of 1913-14:

Years	Bales	Years	Bales	Years	Bales
1922-23.....	11,248,224	1909-10.....	10,650,961	1896-97.....	8,714,011
1921-22.....	11,494,720	1908-09.....	13,828,846	1895-96.....	7,162,473
1920-21.....	11,355,180	1907-08.....	11,581,829	1894-95.....	9,892,766
1919-20.....	12,217,552	1906-07.....	13,550,760	1893-94.....	7,527,211
1918-19.....	11,602,634	1905-06.....	11,319,860	1892-93.....	6,717,142
1917-18.....	11,911,896	1904-05.....	13,556,841	1891-92.....	9,038,707
1916-17.....	12,975,569	1903-04.....	10,123,686	1890-91.....	8,655,518
1915-16.....	12,953,450	1902-03.....	10,758,326	1889-90.....	7,313,726
1914-15.....	15,067,247	1901-02.....	10,701,453	1888-89.....	6,935,082

1912-13.....	14,128,902	1899-00.....	9,439,559	1886-87.....	6,513,623
1911-12.....	16,043,316	1898-99.....	11,235,383		
1910-11.....	12,132,332	1897-98.....	11,180,960		

WEIGHT OF BALES

The average weight of bales and the gross weight of the crop we have made up as follows for this year, and give last year for comparison:

	YEAR ENDING JULY 31, 1923			YEAR ENDING JULY 31, 1922		
Movement	Number of Bales	Weight in Pounds	Aver. Weight	Number of Bales	Weight in Pounds	Aver. Weight
Through						
Texas	3,176,732	1,689,894,355	531.96	3,085,290	1,628,385,209	527.79
Louisiana	1,365,382	701,765,387	513.97	1,277,802	648,254,511	507.32
Alabama*	94,811	49,688,148	523.91	174,440	89,051,620	510.50
Georgia	†497,112	248,004,206	418.89	799,883	397,589,844	497.06
South Carolina	137,961	68,144,559	493.93	153,862	75,700,104	492.00
Virginia	275,084	134,791,160	490.00	280,085	137,241,650	490.00
North Carolina	159,687	78,885,378	494.00	180,585	89,033,335	493.00
Tennessee, etc.	5,511,422	2,770,711,000	500.00	5,542,763	2,765,838,737	499.00
Total crop	11,248,224	5,741,884,193	510.47	11,194,720	5,831,095,010	507.28

*Including Mississippi. †Including Florida.

According to the foregoing, the average gross weight per bale this season was 510.47 pounds, against 507.28 pounds in 1921-22, or 3.19 pounds more than last year. The relation of the gross weights this year to previous years may be seen from the following comparison:

Season of—	CROP		Average Weight Per Bale
	No. of Bales	Weight, Pounds	
1922-23	11,248,224	5,741,884,193	510.47
1921-22	11,494,720	5,831,095,010	507.28
1920-21	11,355,180	5,836,947,956	514.08
1919-20	12,217,552	6,210,271,326	508.33
1918-19	11,602,634	5,925,386,182	510.69
1917-18	11,911,896	6,073,419,502	509.86
1916-17	12,975,569	6,654,058,545	512.82
1915-16	12,953,450	6,640,472,269	512.64
1914-15	15,067,247	7,771,592,191	515.79
1913-14	14,884,801	7,660,449,245	514.65
1912-13	14,128,902	7,327,100,905	518.59

Note.—All prior to years 1913-14 are for the period September 1 to August 31.

MOVEMENT OF COTTON AT INTERIOR TOWNS

Towns—	YEAR ENDING JULY 31, 1923			YEAR ENDING JULY 31, 1922

COTTON AND COTTON GOODS PRICES AND CONDITIONS

The increase in cotton consumption in the United States followed as the direct result of the revival of business activity in this country. In 1920-21 extreme business depression had served enormously to curtail both the production and consumption of cotton goods. As was pointed out by us in our last year's annual review, the cotton goods trade and the woolen

goods trade were the worst sufferers from the sudden collapse in business which came in the summer of 1920. From that extreme depression there was very decided recovery in 1921-22, which recovery was reflected in an increase in the consumption of raw cotton. Doubtless the increase in consumption would have been still more pronounced had it not been for the labor troubles with which the New England cotton mills had to contend. New England cotton manufacturers found the price of cotton ruling high, while the consumer was unwilling to pay corresponding prices for cotton goods. At the same time the competition of the Southern mills—with their nearness to the source of supply of raw materials, and enjoying as they do the further advantage of cheap labor working longer hours—grew steadily more intense. The New England mills accordingly sought to diminish labor costs, which had been enormously increased through repeated advances in wages and the shortening of the hours of work. The general proposition of the mill owners was to reduce wages 20% and to increase the hours of labor from 48 per week to 54. The operatives would not submit and quit work in whole or in part. The trouble began in Rhode Island back in February, 1922, and by the end of that crop season, on July 31, 1922, it seemed as if victory rested with the manufacturers, inasmuch as by degrees the operatives had in large numbers drifted back to work. But in the new season, that which we are now reviewing, the whole situation changed. A complete transformation occurred and the operatives once more gained the upper hand. The transformation began at the very outset of the season. The restricted output of the New England mills, owing to the labor troubles referred to, had left goods in short supply. At the same time the general trade revival was assuming larger and still larger dimensions. The demand for goods now became active, indeed urgent, forcing the mill owners to come to terms with the workers or fall behind in the race with their Southern competitors. The demand for goods, according to all current indications, was evidently to continue for many months, while the trend of goods prices was also now upward, rendering it possible for the manufacturers to grant more liberal terms and make greater concessions to the employees than before. They found they could now waive the 20% cut in the pay of the operatives and to restore the old wage schedules. They insisted, however, on the 54-hour week as against the previous 48 hours. And on that basis settlements were pretty generally effected throughout the whole of New England within the first two or three months of the new crop season—only to be followed early in 1923 by another wage advance, as presently to be related.

Each succeeding month as the season progressed furnished evidence going to show how complete the adjustment of labor troubles was becoming in the effort to increase the output of goods and thereby satisfy the demand for them which brought with it also a rise in the price of the finished goods. In August (1922) a most important development was the announcement on August 17 by the Pacific Mills at Lawrence, Mass., that they were prepared to reopen their mills on October 1 on the old wage basis retroactive to September 5 for operatives who returned to work at once. This meant that the 20% cut in wages had been rescinded and the United Textile Workers accordingly voted to accept the offer. It was then understood that the guarantee of the old wages was not to extend beyond December 1, but the further advance in trade prosperity made the limitation unnecessary. Other mills in Massachusetts made the same proposition to the strikers, resumption at the wage scale in effect before March 27 generally taking place on September 5. The Amoskeag Mills at Manchester, N. H., also rescinded the 20% wage cut. In some other parts of New England, however, the disposition at this time still was to adhere to the wage cut, and reports then had it that nearly all the operatives had drifted back and had accepted the cut. By degrees, however, thereafter the old wages were restored, this being a natural and logical outgrowth of the situation, which promised a new era of prosperity all around. Proof that the adjustment of the labor difficulties was now complete came on November 26,

when the protracted strike in the Amoskeag Mills at Manchester, N. H., comprising the largest textile plant in the world, was declared off, following the tabulation of the votes of 22 local unions of the United Textile Workers of America on the recommendation of the international organization representatives that the operatives return to the mills under protest on the 54-hour week. The strike had been called the previous February 13 and the company had in September rescinded the wage cut, as already stated.

In December, however, the question of wages and hours of work for the operatives in New England again began to obtrude itself. The Rhode Island Textile Council, affiliated with the United Textile Workers, adopted resolutions demanding rescission of the 22½% wage cut made in December, 1920, so as to put wages back to the wra-time schedule. The Lancaster Mills (Mass.) offered 5 hours additional work to adult male operatives at straight time pay, but the union refused, demanding time and a half. The Great Falls Manufacturing Co. of Somersworth, N. H., posted notices that January 2, 1923, the mills would be operated on the basis of 54 hours per week, as before the strike the previous February. The mills had been working on a compromise basis of 52½ hours per week to last until January 1. The operatives decided to accept the new basis, pending further developments. All these, however, were minor matters alongside the important fact that the tendency of prices in the textile industries continued strongly upward. The American Woolen Co. on January 23 opened its principal overcoating and suiting lines for fall and also its line of woolen and worsted fabrics for women's wear and both showed substantial advances. In muslins the B. B. & R. Knight Cotton Mills advanced "Fruit of Loom" ½c. per yard to 20c. per yard. The new price, it was stated, represented 166% advance over the 1914 price, then 7½c. per yard. On February 26 prices on fall lines of 32-inch gingham and kindred fabrics of the Amoskeag Manufacturing Co. for delivery from May to December were announced through the company's selling agents in this city. The four principal fabrics—utility dress gingham, A. F. C. gingham, 19,000 Range chambray and Hampshire fine gingham—were not advanced over the opening levels of the spring season. Nor was Granite State cloth, which was offered to the trade for the first time the previous spring. Other fabrics showed advances over the spring quotations ranging from 1c. to 1½c. per yard. In March print cloth at Fall River attained the maximum price of the season at 8¾c. per yard (28-inch, 64 squares), as against 6¾c. the previous August, the opening month of the season, and wage advances again became the order of the day.

But while these wage advances were to add very substantially to the cost of producing goods, the course of prices was now unfortunately to be reversed, at least in the case of the coarser goods. The recession in prices at first was very gradual, but in the later months of the season rapidly gained momentum and by the end of the season on July 31 print cloths at Fall River were again down to 6¾c. Manufacturers accordingly now were face to face with the twin combination of rising costs, because of advances in wages, and of declining prices for their products, inasmuch as the demand for these products at the high level of values could not be maintained. Action by the American Woolen Co. in March in raising wages played a prominent part in the wage increases that now overwhelmed the whole of the textile trades of New England. On March 21 this company announced wage advances to 12½% to 36,000 employees, effective April 30. Other woolen and worsted mills had to follow this action of the leading producer. Not only that, but the course of the woolen mills influenced the action of the cotton mills and wage increases of 10@12½% became very common. Manufacturers at Fall River, Mass., undertook to resist any increase. The Fall River mill owners had made no cut in wages in the spring of the previous year, when in other parts of New England the movement to reduce became so widely prevalent, leading to the labor

troubles related further above, and hence there had been no interruption during 1922 in the operation of the mills at that point, but with operatives elsewhere in New England now so generally getting increases the Fall River workers likewise insisted on additions to their wage schedules. The Textile Council at Fall River, representing the bulk of the operatives, had some months before put in a request for a wage increase, but without success. They now formally asked for an increase of 15%. This demand was considered March 23 at a conference of members of the Cotton Manufacturers' Association representing the manufacturers and was then flatly turned down, though with a request that the operatives defer action on the question of the strike pending the outcome of another conference between the manufacturers and the Council to be held on April 20. This proposal was assented to, a strike being averted when on Sunday, March 25, four of the six local unions affiliated with the Fall River Textile Council voted to accede to the request of the Fall River Cotton Manufacturers' Association that the Textile Council defer action on the point in question.

The manufacturers in refusing the request for the 15% increase at their conference on March 23 had presented a very lengthy statement showing that circumstances were such that the mill owners could not afford the increase. But things began to move very fast, and with the mill owners elsewhere throughout New England granting wage increases and even mill owners in the South adopting a similar course, the Fall River manufacturers were forced to reconsider their decision and they accordingly arranged a conference with the Textile Council for April 2 instead of April 20, the date originally fixed. At this conference an offer of 12½% advance in wages, effective April 30, was made to the operatives through the Textile Council representing six of the large textile unions. The Textile Council called special meetings of these unions for Thursday evening, April 5, at which time the proposition was accepted. The manufacturers in their statement offering a 12½% increase said it was made to follow the example of other New England cotton mills and asked for co-operation of employees for the welfare of the city. The statement pointed out that a large number of cotton mills throughout New England had agreed to increase wages to take effect on Monday, April 30, and that the Fall River manufacturers realized that if they wished to run their mills after that date they would have to follow the example thus set, no matter what business conditions in Fall River might be, and they adhered to their original statement that the Fall River mills were in no condition to make any increase at all. Following the action of the Fall River mill owners, the New Bedford Cotton Manufacturers' Association and the textile mills at Lowell likewise posted notices granting an increase of 12½%.

Unfortunately, conditions were quickly to take a turn for the worse. The demand for goods fell off with surprising rapidity and by the end of May the situation in New England was that not a few mills had suspended for a week or even two weeks while the mills at Fall River were running on a schedule of only four days a week. During July things got still worse. On July 2 dispatches from Boston stated that about half of Fall River's 35,000 cotton textile workers would be idle that week, due to the unsatisfactory conditions in the textile market, these dispatches adding: "The first general readjustment in cotton goods prices since cotton started to decline in March is now under way, but so far has not attracted new business. New prices bring many lines of goods down to price levels prevailing last fall, when cotton was selling around 19 cents. The price of cotton then, it should be stated, here in New York was about 28c. Thus far only a desultory plan of curtailment had been followed. On July 13, however, the Cotton Manufacturers' Association at Fall River announced a definite program of curtailment involving a reduction of from 50% to 75% in the output of the plain goods mills of that city. It was pointed out by the newspapers that curtailment had been as high as 80% the last two days of each week for some time and that the only new phase of the mat-

ter was that all plain goods mills were now to be affected, they closing down about three days each week. The production at Fall River under normal conditions was put at 275,000 pieces, and it was averred that weekly sales in the print cloth market at Fall River had reached over 50,000 pieces only twice in several months and there had been times when the sales were as low as 20,000 pieces. The fine goods mills were not affected and did not curtail. The woolen goods trade also appeared to continue in satisfactory shape, as was made evident by the reception accorded the price schedules announced by the American Woolen Co. on July 23 in opening its principal lines of piece goods for consumption in the men's clothing trade in the spring season of 1924 and on July 31 in announcing the prices on women's wear woolen and worsted fabrics for the 1924 spring season.

It is pleasing to be able to record that the drastic policy of curtailment pursued by the New England cotton manufacturers had its intended effect and that accordingly the new season has opened in a very propitious way. The first month of the new season (August) is about to close, and the distinguishing feature of the month has been the active demand that has sprung up for printing cloths under which prices have advanced $\frac{1}{2}$ c. a yard from the low figure of $6\frac{7}{8}$ c. reached at the end of July. In the following table we show the price of print cloths for each day of the past season:

DAILY PRICES OF PRINTING CLOTHS (28-INCH, 64 SQUARES) AT FALL RIVER

We also subjoin the following compilation to show the range of prices of printing cloths for a series of years. Like the table above it sets out the highest and lowest quotations for 64 squares 28-inch printing cloths at Fall River in each of the last twenty-nine seasons—1894-95 to 1922-23, inclusive. Data for earlier years will be found in previous issues of this report.

REVIEW OF THE COAL TRADE, 1923

Another year has passed by and it is found that 1923 was not lacking in unusual features, for every year develops special points of interest. Sometimes these are at variance with the expectations at the beginning of the year, and in this respect 1923 was not exceptional.

The year began with a heavy demand for coal, the anthracite market being extremely strong and tonnage seemingly in scant supply because of the long continued strike in the preceding year. The bituminous market profited by the scarcity of anthracite and also by the fact that the long strike in the soft coal fields had reduced the stocks on hand.

In soft coal, however, the beneficial results were but transitory. The decline in market strength and activity which commenced in 1921, following a commercial reaction which it was thought was to mark a general liquidation of business affairs, was merely halted, it would appear, by the strike of 1922 and the strengthening of the market that thereby developed. As soon as the year was well started and the special and unusual demands for coal arising from the anthracite difficulties had passed away, the market began to ease off and there was notable softness to conditions during the spring.

Then it was a general expectation that soon after the Fourth of July, when fall requirements would be given consideration, there would be an improvement in the demand for coal, but such did not prove to be the case. In fact, conditions went from bad to worse, with an almost continual decline during the summer and fall.

BIG INCREASE IN TONNAGE

The year witnessed a remarkable change in tonnage as compared with 1922 and the year before. The final figures showed 545,300,000 tons of bituminous coal produced, and it is lamentable that so large an amount of business was done with so little profit to those engaged therein. Of course, there are several hundred, possibly a couple of thousand, concerns that go ahead mining and shipping coal year in and year out to good advantage, neither making so much in good times as certain speculative factors nor falling behind so much as certain interests do in times of depression. But aside from these substantial concerns, well rooted in a good trade position, the majority of the houses in this line of business became distressed to a degree verging upon panic and some have said and done many foolish things indicative of alleged poverty. True enough, there may have been a few cases, but we surmise that their assertions have not always been meant for taking at their face value.

Probably a small reduction in the output at any particular time would have put a much different aspect on matters, for despite all the competition that has been encountered, it is a fact that a great amount of coal was used. The actual facts are much at variance with assertions heard from time to time that "Nobody's buying anything; no coal is being used." The increase of stock on hand did not exceed 40,000,000 tons, comparing the end of the year with the beginning. In fact 30,000,000 tons might be nearer the mark. Consequently, therefore, the actual use of tonnage was no less than 520,000,000 tons in 1923, and that is a large business any way one may look at it.

There would have been more money made than there was had there not been a great degree of competition, resulting in constant shipping of surplus coal to market. Tonnage produced by concerns more or less new in the business and offered by agencies without well-established connections was often sacrificed, with resulting market conditions affecting the trade of the older and larger houses. This condition was due in part to the fact that there was practically no substantial growth in the bituminous coal business in the last ten years, for 1918 still holds the record with regard to tonnage mined and shipped.

The year 1923, as a whole, has been one of large tonnages and small profits for the bituminous trade. The heavy production is a matter of record. No such publicity is given to financial returns, but it is common knowledge that they were not in keeping with the volume of business.

In past years over-development in the mining industry was counteracted to some extent by under-development of transportation. The mines could turn out more coal than the country needed, but the railroads at times were unable to handle it as fast as required. This resulted in a shortage at points of consumption, with buyers bidding against each other for available supplies. They were really competing for transportation, but the coal men reaped the benefit in the form of higher prices.

In 1923 the railroads rose to the occasion; for months car shortage was but a memory. As a result markets were over-supplied most of the time with tonnage actually mined and on wheels, while at all times the mines were in a position to increase their output if the demand broadened. With such conditions prevailing buyers had it pretty much their own way. Prices were forced down to cost of production or below except in the case of the very best grades. Only the fact that a good-sized tonnage was contracted for in the spring, at figures above the levels subsequently reached, prevented the year's results being even more disastrous.

December, 1922, was a month of advancing prices in the eastern bituminous trade, the anthracite shortage being the impelling force behind the movement. The rise culminated about January 1, 1923, when Pool 9 coal was selling at \$6.00-\$6.50 at the mines in central Pennsylvania and from \$9.00 to \$9.25 at the New York Harbor piers. The rule requiring dealers to deliver a proportion of substitutes along with anthracite domestic sizes had resulted in active buying of bituminous by the retail trade, but when this demand subsided around the first of the year the market broke sharply.

By the first of April, Pool 9 coal was down to \$3.25-\$3.75 f. o. b. mines and \$6.50 to \$7.00 at the New York piers. By the end of the month mine prices had reached the \$2.75-\$3.25 level, where they held until about July 1st. Then the downward movement was resumed, but at short pace compared with the slump early in the year.

The middle of August quotations on Pool 9 stood at \$2.25-\$2.75. During that month consumers were accumulating stocks against a threatened strike of anthracite miners on September 1st. Their operations were carried on quietly, so that the market showed no signs of developing runaway tendencies, but there was a moderate firming up all around. With the passing of the strike scare, however, the situation became worse than ever. Heavy stocks were in evidence on all hands. Buyers did not seem to want any more coal at any price, and September and October witnessed acute depression in the New York market.

By November 1st Pool 9 coal dropped to \$2.10-\$2.50 at the mines, while at tidewater the demoralization was still more pronounced. Operators shipping some of their surplus tonnage to the piers until the accumulation stood at 2,600 cars at a time when there was only a limited demand. This practice resulted in such staggering losses that it was finally abandoned for a time. Then the tidewater market gradually righted itself.

During the year bituminous trade became concentrated into fewer hands at the producing end. Producers of inferior grades were forced out of the running to a large extent by the low prices at which better coal was being offered. Those who contracted in the spring came out better than those who elected to take their chances in the open market, for they had a certain amount of regular business at prices above those prevailing later in the year. The year closed with the usual holiday lull in evidence, but with prices reasonably steady owing to output having been sharply curtailed by the mine shutdowns incidental to the season.

The outstanding features of the year's business were the increases in bituminous exports and the heavy lake trade. The foreign movement for 1923 (largely to Canada, of course) amounted to 19,154,000 tons, prac-

tically the same as in 1921 and nearly twice as much as in 1922. This compares with 34,269,000 tons in 1920, the best year on record. The lake movement established a new high record, partly, some said, because there was no other place to put the coal during a portion of the season. Yet this must be accepted with reservations, for the movement kept up to the actual closing of navigation, which indicated that there was still a demand for coal at the end of the season. This came about largely because of the great depletion of stocks at the opening of navigation, following the limited shipments of 1922 and a strong demand throughout the winter.

WONDERFUL YEAR FOR ANTHRACITE

During 1923 the anthracite trade enjoyed unusual prosperity. The winter season, while not exceptionally severe, was protracted, and even though much was accomplished in the introduction of substitutes, the demand for coal for current use remained strong well up into April, and no sooner had the winter demand ceased than there came a call for orders for the ensuing season.

The demands of the miners with regard to new wage rates had been widely exploited, and as usual the U. M. W. seemed to fare well with regard to publicity. The public, generally, throughout the anthracite consuming districts were definitely impressed with the thought that there would be a strike as scheduled for September 1st, and throughout the summer there were unusual demands upon the dealers. There was particular concentration upon stove coal, and throughout the season the scarcity of that size became proverbial in trade circles.

If one were to chart the course of independent anthracite prices during the year he would begin by drawing a horizontal line for January. Then the line would slant irregularly downward until April 1st. Next an upward turn, reaching its apex when the miners struck on September 1st. With the resumption of work on the 19th a quick drop would have to be noted, followed by another horizontal line until about December 1st. The line from then until the end of the year inclined toward a lower level. Company prices remained unchanged throughout the year except for a 50-cent reduction on the steam sizes (smaller than pea) on April 1st and an advance ranging from 70 to 90 cents on domestic sizes following the granting of a ten per cent. wage increase in September.

January 1st found the country in the grip of an acute shortage of domestic sizes as a result of the 23 weeks' strike of 1922. The line companies were allotting their output among their regular customers; the large independent operators were doing the same, but getting a somewhat higher price than the companies, while the small independents were auctioning their tonnage off to the highest bidder.

As the production was entirely inadequate to meet the needs of the public, they had no difficulty in maintaining their quotations on the basis of \$14 to \$14.50 throughout January. During that month No. 1 buckwheat sold from \$5.50 to \$6.25 f. o. b. mines. Fuel administrators in different places had ruled that retailers must deliver a percentage of substitutes along with domestic sizes, and to a large extent this accounted for the strength of buckwheat.

Independent prices dropped off about a dollar a ton during the first half of February, but recovered most of the loss toward the end of the month under the stimulus of colder weather. In March a second slump ensued, which carried still further. Many dealers were hopeful that after April 1st company coal would be in better supply, so they held down their purchases of premium coal. As a result, independent prices for egg, stove and nut got down to the \$9.00-\$10.00 level for a week or two around the beginning of the new coal year.

But when April was well under way and it was found that company coal was as scarce as ever, there was another rush to get tonnage from the small producers. By the end of the month the price was up to about

\$10.50. The upward tendency continued throughout May and June. By July 1st the quotation stood at \$11.50 to \$12.00. It held around that level until the approach of September 1st, when the miners were due to go on strike, and by the time the strike actually began the market was at the \$14.00-\$15.00 level.

Following the shut-down, which lasted less than three weeks, prices sank back to the \$12.00-\$12.50 level and stayed there until December, when a further decline carried them down to the range of \$9.50-\$10.50.

During the greater part of the year the steam sizes, with the exception of barley, were in over-supply.

Altogether 1923 was an excellent year for producers, wholesalers and retailers. With a continuing strong demand for domestic coal, it was possible to get a high enough price to more than offset losses involved in the production or marketing of the steam sizes.

As usual the large producers pursued a very conservative business policy throughout the year, and following resumption of mining made increases closely calculated on extra cost. Although there is no longer a uniform price, as there was in the days when the Reading established a dominant circular figure, the company prices were all close to the minimum rate.

The strike having gone into effect despite many official and unofficial efforts to forestall it, there was an immediate effort to settle on the part of officials who realized the unfortunate results that would follow a protracted struggle. For, after all, despite various suggestions as to how a strike can be contended with, the fact remains that an anthracite strike, definitely engaged upon, is sure to be a long one.

Governor Pinchot, as the chief executive of the great anthracite producing state, indicated particular interest in the settlement thereof, and President Coolidge, giving another illustration of his great native Yankee shrewdness, passed the proposition on to him. It proved to be a "hot one," as the boys say. The Governor brought about a settlement by giving an advance of ten per cent. to the miners, accompanied by pleasant thoughts as to producers, transporters and retailers absorbing the increased expense and giving the public their coal at the same price as before.

As the large producers, controlling more than 80 per cent. of the tonnage, had been working on a narrow margin; as the larger and more reputable retailers have, in like manner, made close calculations, and as the coal freight rates of the railroads are established under the authority of the Interstate Commerce Commission, no change resulted in the way of absorption of difference in the wholesale price of coal, and instead of the Governor gaining largely in popular favor by his move, he was the subject of considerable criticism, particularly when endeavoring by supplemental statements to explain his position.

TRouble WITH STEAM SIZES

While the record demand for prepared coal and the activity in supplying same constitutes a chapter in trade history, there was, on the other hand, considerable difficulty nearly all the year with regard to the movement of the steam sizes. This was accentuated by the low price of bituminous coal, which made it particularly difficult to move the buckwheat size at its circular price of \$3.50.

The situation was further complicated as a result of the arrangements entered into by means of which dealers received an enhanced tonnage of the domestic sizes if they bought liberally of the steam sizes. Many of them, having no real market for the steam sizes, turned back this coal to the middlemen, who sold it below circular price and further disturbed the market for buckwheat and the smaller sizes.

Rice and barley can be sold at their low schedule price because, for one thing, the tonnage thereof is decidedly less than the tonnage of buckwheat, which is naturally produced in the making of the anthracite output. But with a large tonnage of buckwheat to be disposed of (something like nine

per cent., as a general thing) and a high price, relatively speaking, there was considerable difficulty encountered throughout the year.

AN ACTIVE FALL SEASON

With the loss of about three weeks' time because of the strike in the industry, where every day means something in the way of useful production, the fall season opened with the anthracite market in very strong condition. The continuance of high premiums on the part of a small percentage of independent coal, subject to sale at the market, was beyond expectations. It was freely asserted that by the end of October the steady maintenance of large daily output would cause the demand to ease off in view of the large amount of coal placed with the consumers during the summer.

But not until the end of November was there a notable relaxation in the demand, and this was probably brought about as largely by the mild weather conditions as by any other feature appertaining to the trade. Normal conditions prevailed during October and the early part of November, but in the latter part of November and in December there was an unusual succession of mild days, the Weather Bureau at New York reporting 21 days in succession that were above the seasonal average. This served to enable dealers to meet requirements nicely, and premiums on all but the best sort of coal declined steadily as the year drew to a close.

Altogether it was a very successful year for anthracite that compared with a most unfortunate season in bituminous.

Freight rate on anthracite domestic sizes from mines to New York Harbor lower ports for first half of 1922 was \$2.61; from July 1, 1922, when reduction was made the rate has been \$2.34 per gross ton. On other sizes, pea and smaller, the freight rate up to June 30, 1922, was \$2.47; from July 1, 1922, \$2.22 per gross ton. Rate to upper ports five cents higher.

*Prices after suspension.

REVIEW OF THE TOBACCO TRADE OF NEW YORK

FOR THE YEAR 1923

The year 1923 closed with no great outstanding feature to either its credit or its discredit. Discussed in terms of the manufacturing division, it was only a unit in a procession of years through which the trade seems to be passing from the old to the new order of things. It would seem that the day has passed when 25,000 manufacturers of tobacco products could be busily operating in a small way with modest but self-supporting returns of profit, and in as many years the operating units have been reduced to half that number.

Manufacturing.—The general trend may be described, after a fashion, in the words of the rimester, "the big are getting bigger and the small are getting smaller." Consolidation appears to be the order of the day. Acquisition of the great by the great, comparatively dormant for a long time following the historic suit prosecuted and dissolution ordered under the Sherman law some fifteen years ago, has shown new signs of life.

Excessive taxation, and under-production of good raw material, the past year rendered manufacturing costs extremely high and made the manufacture of tobacco products on a profitable basis a difficult proposition. The very largest operators and the very smallest operators have been more successful in "getting by" than the manufacturer in between the two. The big fellow had quantity production in his favor, while the very little fellow had the advantage of easy overhead, small investment and low carrying expenses. The manufacturer having the hardest fight was the one operating on a somewhat pretentious scale, but with an output of limited volume.

When Mr. Marshall, then Vice-President of the United States, said that what the country needed most was a good five cent cigar, he might truly have added that what the cigar trade needs most is a good five cent cigar that can be turned out at a profit to the producer, for if it were possible to make an old-time nickle cigar, even at a very slender margin of profit, such merchandise would serve as a solid backbone to encourage cigar smoking and to give producers greater leeway in developing higher priced merchandise.

It is true that present conditions are hardest upon the medium sized manufacturer, and that the trend toward the survival of the greatest is clearly apparent. But the chief causes of this trend are excessive taxation and unprecedentedly high prices for leaf tobacco. When and if tobacco taxes shall be materially reduced, and when and if the cost of raw material takes a sag, there still may be entertained a hope for the return of the medium and smaller operator to something like his oldtime prevalence and prosperity.

It is certainly gratifying that in spite of everything, production in all chief classes, except raw and smoking tobacco, is increasing in quantity.

The following table shows the production of cigars, cigarettes, tobacco, etc., through the calendar year 1923, with corresponding figures for 1922.

	Total	17,260,313	19,360,780	+	2,100,467	+ 12.16%
Snuff, lbs.		38,162,198	39,449,850	+	1,287,652	+ 3.37%
Tobacco, U. S.		382,070,312	372,650,296	—	9,420,016	— 2.46%
Manufactured, lbs., U. S.		4,010	1,116	—	2,924	— 72.37%
Total		382,074,352	372,651,412	—	9,422,940	— 2.46%

The foregoing figures reveal that the production of Class A cigars in 1923 was smaller by 33 per cent. than in 1922; while the production of Class B cigars was 1.18 per cent. greater, the production of Class C cigars was 5.62 per cent. greater, Class D cigars 7.25 per cent. greater, and Class E cigars 1.79 per cent. greater than in the previous year.

In other words, while Class A cigars are declining very distinctly in output, each of the other four classes is on the increase.

Also, that in spite of the 33 per cent. loss in Class A goods, there was an increase in the total cigar production for the year of 2.26 per cent.

This increase in cigar production, small, indeed, though it is, should offer much encouragement to cigar manufacturers, first, because it at least establishes that more instead of fewer cigars are being consumed in this country and, second, because it eventuated in the face of a 20 per cent. increase in the output of cigarettes.

Of course, the cigarette industry will get a bigger "kick" out of the revenue figures than any other division of the trade, because of that self-same 20 per cent. increase, and because the cigarette output was by far the largest ever achieved.

No doubt members of the industry, excepting manufacturers themselves, will be mildly surprised to observe the upward trend of the output of snuff, which was 3.37 per cent. greater than in 1922. Owing to the fact that the chief consumption of snuff is confined to certain few parts of the country, there is a tendency to believe that snuff is a declining industry. The Government figures established that it is more of a going business than the cigar industry.

Manufactured tobacco (smoking and chewing) suffered a decline of 2.46 per cent.; the only general division of production showing a loss.

LEAF MARKET AND CROPS

Wisconsin.—Unexpected developments in the Wisconsin tobacco industry during 1923 have marked the year as one out of the ordinary. It also left conditions in a state of uncertainty both as regards the farmer and the dealer.

First came the sampling season, which revealed a larger amount of black rot in the packing of 1922 than has been the case for several years, thereby cutting down the margin of profit to the packer. Then came the frosts of September 13 and 14, the first severe blow of its kind of a statewide nature, in the experience of most Wisconsin tobacco growers and left the 1923 crop in a way that makes the amount of good binder available to the trade still an uncertainty.

According to reliable estimates, Wisconsin will go into 1924 with an available supply of 40,000 to 45,000 cases of 1923 binder, compared to 75,000 cases packed last year, some 7,000 cases of 1923 remaining unsold of the Northern Wisconsin pool's holdings and scattered remnants of packings held over from as far back as 1919 and 1918, mostly in the hands of the State Society of Equity. Most of the local packers, including Jensen, Eckhart, Hubbell, Green, McIntosh Bros., Harker, Haskins, Nels Nelson, Carle, the Jefferson Leaf Tobacco Co., and others have disposed, for the most part, of their 1922 holdings, though the last named may have possibly half of its packing still on hand.

Uncertainty as to the amount of binder the 1923 crop will yield lies in the variety of estimates that have been made regarding the amount of tobacco harvested before the frosts. While the State crop reporting service placed the acreage in the shed before the freeze-up at about fifty-seven per cent., the tobacco pool had estimated the amount at forty-three per cent. and private inquiries indicated a possible total of fifty per cent.

What 1924 may bring forth in the matter of tobacco acreage depends largely upon how the 1923 strips out and upon the success the tobacco pool has in disposing of the crop at the asking price quoted to dealers a week ago. The amount of tobacco the organization has disposed of to date has not been revealed. One factor that is known, however, is that where the pool at this writing in 1922 had sold practically all of its northern binder and practically all of its stemming goods, it has not even, as yet, quoted prices on the 1923 stemming. If it is able to sell out the season's deliveries at the prices it has quoted to date, however, it is safe to say that next year will see a full crop if not an increase in acreage.

New England.—If an abundant crop of cigar leaf tobacco is one of the conditions precedent to and necessary for the prosperity of the cigar manufacturing industry, as so many people claim, apparently with good

reason, then it can safely be said that the Connecticut Valley tobacco section has done its full duty toward the industry. For the 1923 crop not only had an exceptionally large acreage, but nature came to the rescue and gave what is on all sides conceded to be an abundant harvest.

Item 1—The crop had enough rain to grow steadily and continuously, with large plants, long leaves and plenty of substance, resulting in an average number of pounds per acre far in excess of any crop of the previous ten years. Item 2—The crop was harvested without any loss from frost, hail or wind—something that has not happened in a number of years. As a result of these two factors, there is the biggest quantity of tobacco in the 1923 crop of the Connecticut Valley that has been seen in a number of years.

There was a big production and this was not whittled down by the vicissitudes of season and weather. Briefly, the average production of the 1923 Havana Seed crop is placed at about 1,800 pounds per acre, though some insist the average is nearer the ton to the acre, and without question many favored sections did produce a ton to the acre. The yield of the new Broadleaf is somewhat less, according to the estimates of well posted men. Shadegrown, which had a production of about 800 pounds to the acre last year, averaged in 1923 around 1,050 pounds, packed weight, to the acre, and there are many who estimate the Shadegrown production at 1,100 pounds to the acre. As far as can be estimated the acreage devoted to the various strains of tobacco grown in the valley are as follows: Shadegrown, 8,300 acres; Broadleaf, 18,000; Havana Seed, 15,000; Round Tip, 500.

The Massachusetts crop is estimated at 16,530,000 pounds compared with 11,925,000 pounds in 1922 and the five year average of 14,467,000 pounds. Connecticut prospects indicate a crop of 48,165,000 pounds compared with 35,000,000 pounds the previous year and the five year average of 40,195,000 pounds. The Connecticut Valley total is 64,695,000 pounds, 38.4 per cent. greater than the 1922 crop and 18.3 per cent. above the five year average.

The various types of tobacco grown in the Connecticut Valley have certain aspects that are applicable to all of them. Among these are the following factors: The 1923 crop of Connecticut tobacco is of larger growth, sounder in leaf and better in weight than has been grown in this section since the 1914 crop was raised. The light wrappers have been somewhat affected on account of the dry curing season. However, there is every indication of making serviceable tobacco for the manufacturers' use. The crop contains scarcely any pole sweat. Consequently, there is a much lower percentage of low grades than usual. The yield per acre, of course, is above the average.

The crop is conceded to be a desirable crop of tobacco. The description given in the preceding paragraph, while general, is agreed upon by manufacturers as well as leaf merchants who have seen this tobacco to be accurate. Some go a little more into detail. The crop, however, is just such a crop as could be predicated upon a knowledge of the conditions under which it was grown. It was grown in a dry weather season—not a season of drought, of course, but without the amount of rain that is generally considered necessary for producing tobacco under the finest conditions. Old farmers will tell you that drenching, smashing rains that soak into the ground, along with plenty of hot weather, constitutes the ideal condition for growing tobacco. This crop did not get the drenching rains. Frequent showers fell that kept the tobacco continuously and steadily in process of growth, but the gum did not get washed off the leaves, and the result is that not only are the plants extraordinarily large, with broad, spready leaves, but the texture of the leaves is heavy. When one takes a leaf of this tobacco between his fingers he is conscious that there is substance there. The leaves are tough and stretchy; there is little or no indication of damage of any sort, and the tobacco will undoubtedly, if present indications count for anything, stand indefinitely in

the bales or cases without damaging. Likewise, there being little or no broken tobacco, the quantity sorted into the low grade will be small. The proportion of binder and wrapper grades produced in the Sungrown Havana Seed and Broadleaf will be exceptionally large. It is estimated that on an average four and one-half cases of the upper grades will be packed per acre, in the 1923 crop, against two and one-half cases produced in the 1922 crop. Low grades run twelve to fifteen per cent.

The crop, however, has the defects of its qualities. Being heavy in texture and of a fleshy type, it cannot be expected that the fine finish and polish that is characteristic of the finest grades of tobacco will be so much in evidence as in crops which produce a smaller poundage per acre. Furthermore, it must be remembered that this crop, having had not the most favorable growing conditions, had very poor weather for the curing season. A long dry spell, which would have been absolutely disastrous if it had occurred a month earlier, prevailed while the tobacco was hanging in the sheds, and this, of course, was not favorable for the best development. The tobacco, for a considerable period, dried out, rather than cured. Advantage was taken of the first damps to take the tobacco down, and the farmers, realizing that they had a crop on their hands of good possibilities, apparently have given it the best possible attention. But there is considerable talk of the danger, or rather the presence of white veins. White veins are present in a greater or lesser degree in almost every crop that is grown. It is possible that the unfavorable curing season, given tobacco of the character of this crop, may have developed them in this crop to a greater degree than usual, but so far as a close examination can reveal they are not general, and considering the huge quantity of tobacco contained in this crop, there will be plenty of tobacco that is not suffering from this defect.

The question of burn has also been raised. One manufacturer who, in testing some leaves, found some in which the burn would not cross the veins of the leaf, expressed fears as to the combustibility of the crop, but it may be stated with emphasis that critical buyers—men who represent the buying end entirely—are absolutely certain that there is nothing to be feared from this aspect of the matter. In fact, the combustibility of the crop is declared to be fully up to the average, and this is a point concerning which the manufacturers need not alarm themselves in any way.

In one other phase the crop has a great deal to recommend it. In quality, taste and aroma it has not been surpassed by any crop grown in recent years. This, of course, would naturally follow from the general characteristics of the crop given above. It burns all right, it has body and gum, with the consequence that the fine aroma and flavor that account for ninety-eight per cent. of the characteristics embraced in the term "quality" are present in a delightful degree. The 1923 Connecticut crop will certainly improve the flavor and quality of the cigars upon which it is used. This is true of every type grown in New England.

Eagerness of the packers to have some tobacco to offer their customers was responsible for most of the tobacco grown by independent farmers being snapped up at extremely high prices. As high as fifty cents for Havana Seed was paid, while Broadleaf in the bundle brought fifty-six and Broadleaf assorted as high as seventy-five. The packers who did the buying admit that the prices paid were higher than is justified by the situation, and they appear to realize the seriousness of the proposition for the manufacturers, but say they must have tobacco if they are to continue in business. It is estimated that 30,000 cases of Havana Seed and Broadleaf will be handled by independent packers this year, while the pool's holdings will of course be enormous.

Pennsylvania.—Pennsylvania shared with New England the satisfactory experience of having large acreage of leaf tobacco brought to a most successful harvest, unchafed by storms, frost, or insect pests. The growing

season was in general satisfactory, though in sections there was too little rain. The new crop is said to be very satisfactory from the standpoint of sound, mild filler tobacco, and this appears to have been the view of the leading cigar manufacturers and packers, as the crop, despite its size, has been rapidly absorbed at prices considerably above those paid in 1922.

The bulk of the 1922 crop has long ago gone into the hands of the cigar manufacturers. A few thousand cases, a very small proportion of the crop, still remains in the Lancaster market, and this quantity, it is said, includes a quantity of very fanciest packings of last year's crop.

The 1923 tobacco will unquestionably cost the manufacturers more money than the 1922 did. Pennsylvania is the basis of the filler combination of literally billions of cigars every year, and it is questionable if any other tobacco affects the general cigar manufacturing industry of the country more broadly than this one does. For this reason the generosity of nature and the activities of the farmers in producing this year a large and abundant crop will have far-reaching effects upon the industry.

The large profits afforded them by 1923 prices will inevitably stimulate the farmers to plant heavily this year. Thus far there is no pool in Pennsylvania, and at present there does not appear a great likelihood that there will be one, though the matter has been tentatively discussed.

Ohio.—Ohio shared with Wisconsin the calamity of having a very large portion of its crop killed by frost within two weeks of the end of the harvesting season. There was an abundant acreage, the crop had had good growing conditions, and without doubt would have produced an abundant quantity of sorely needed tobacco, except for the unfortunate experience with the weather.

When the frosts came, fifty per cent. of the Dutch, forty-five per cent. of the Spanish and thirty per cent. of the Gebhardt had been harvested. According to the best estimates, had there been no frosts the crop would have produced 70,000 cases of Gebhardt, 50,000 cases of Spanish and 30,000 cases of Dutch. This would have afforded a plentiful supply of tobaccos of these types for the market. In view of the fact that the frost caught fifty per cent. of the Dutch out in the fields, it is hardly possible that there will be more than 16,000 case all told, which, with the deduction for fillers and the loss that is occasioned by the curing process, will leave scarcely more than 12,000 cases. Spanish, by a similar process of reasoning, will produce not much more than 13,000 or 14,000 cases after the fillers, etc., have been sorted out, and Gebhardt only about 15,000 or 16,000 cases of the sound wrapper grades. This will mean only about 40,000 to 45,000 cases of the sound wrapper grades of Spanish, Seed and Dutch, which is less than half of the amount produced from the small acreage of 1922.

Those who have followed the course of the Ohio market for the past few years, and especially for last year, need not be told that the quantity of Ohio tobacco available for the general market is at a minimum. In fact, ever since 1917 the quantity produced in this State has grown smaller year by year. The 1917 production, according to governmental estimates, was 61 million pounds. This dropped to 53 million the following year, 41 million pounds in 1919, 37 million pounds in 1920, and 27 million pounds in 1921. This is the smallest quantity that has been grown in many years. The spicy Ohio tobaccos, with their distinctive aroma and quality, are permanently a constituent part of the American cigar leaf tobacco market, and owing to the demand the farmers planted more heavily in 1922, producing an estimated yield of forty-eight million pounds. This tobacco, it will be remembered, was eagerly snapped up by the large cigar manufacturers and packers, comparatively little reaching the general market. This scarcity induced the farmers to plant liberally this year, and the tobacco grew to substantial proportions. The crop, as previously stated, was counted upon to produce 150,000 cases of all grades, or at least 100,000 cases of the wrapper grades, and this has been cut down considerably.

Owing to the small quantity of the crop left by the frost, it was thought that no pool would be formed by the farmers to market the crop. Considerable headway, however, has been made, and while the pool organization has not been finished, there is a great likelihood that the 1923 tobacco will be handled in this way.

Porto Rico.—The crop is now bought up, and from figures available, although not entirely authentic, but perhaps nearly correct, the crop yielded about 30,000,000 pounds. A spell of bad weather lasting over several weeks seems to have been responsible for this decreased yield, but Porto Rico in 1923 has no doubt produced the best all around crop raised there since its tobacco has become such a staple with our northern manufacturers.

It is indeed fortunate that such is the case, especially with the conditions existing in Cuba, where prices for Remedios have gone almost out of reach, due to a short crop.

The abnormal prices in Cuba were reflected in Porto Rico and the growers in Porto Rico were not slow to avail themselves of the advantage to be obtained and prices for the 1923 crop were by no means as low as the buyers figured on buying a big crop at.

By unanimous verdict the quality of the 1923 crop is good as a crop throughout, and this means much, since tobacco is raised in many districts, all having their own characteristics.

Each year one finds certain features peculiar to the crop, and in the 1923 crop, the top grades run leafy and also sound in leaf, whereas the lower grades, from which the commercial 3's are produced, are small and show the usual quantity of flea bitten tobacco.

A number of manufacturers whom I have the pleasure of serving, said to me early in the season that it seems that all packers joined together to make the 3's as small as possible, because the top grades seemed so superior and they could not understand why it should be so, but it is a fact, as above mentioned, that this condition is a feature of the crop, and it is apparent in the packing of all our best houses.

The growers received for the 1923 crop a very good price, in fact an average of perhaps seven cents per pound more than was paid for the 1922. These higher prices were caused to some extent by conditions in Cuba and also by competitive buying early in the season, which upon calmer reflection may not have been necessary in a crop as large as this one proved to be. Also several other elements entered into the situation which may not appear to any extent in the next crop.

As a packing proposition, the 1923 is yielding from regular crops about sixty-five per cent. of top grades and thirty-five per cent. of shorter tobaccos. Had this crop been bought at prices about what were paid for the 1921 and 1922 crops, these yields would prove a satisfactory business for the packers and give them all an opportunity for a decent return on the large investments called for, especially in view of the fact that the largest percentage of buyers of Porto Rico stripped fillers are today making over sixty per cent. of ten cent sizes and they seek fillers at such a price as fits into their cost calculations for ten cent sizes. With a crop running about thirty-five per cent. of the grade usually used for ten cent cigars, and a demand that will prove fully sixty per cent., a condition is at hand that will develop some troublesome angles to adjust to the satisfaction of packer and manufacturer.

Sumatra and Java.—The 1922 crop of Sumatra, while it produced a large quantity of bales suitable for the American market, did not come up to expectations, especially as the tobacco was poorly packed, which made these wrappers very costly. It is estimated that about 42,000 to 44,000 bales out of the 1922 crop were imported into the United States.

The stocks on hand, with both dealers and manufacturers, are not large, and with the reported yield of 35,000 bales fit for the United States in the

1923 crop, and with normal conditions prevailing in the cigar business, there will be no over-supply of Sumatra, as we figure an annual consumption in the United States and Canada about 40,000 bales.

The 1922 Java crop was unsatisfactory, as it yielded only a small percentage of good tobacco. Very little good Java tobacco is in the New York market today, and the reports about the 1923 crop are only fair, and as the consumption of Java wrapped cigars is very large, we predict quite a scarcity of Java tobacco during the coming year, especially Java tobacco of the better class.

Havana.—The new year is going to determine to a great extent the development of the leaf tobacco business of Cuba. When the new crop is put on the market with its high price, the entire commercial structure involved in the Cuban tobacco business is going to be tested as never before. The question of price is becoming more and more acute with each passing year. The almost incredible rise which the crop experienced last year, culminating a series of abnormal and upsetting experiences that have been gone through with in preceding years, made the selling period of the last crop the most trying experience in the careers of many veteran merchants.

Just where the blame for the situation lies is not clear. Everybody has his own idea, and the ideas and theories propounded are as many and various as the stars. Some credit these conditions to one of the various factors that are decisive of business conditions, and some to another, and so on. For that reason, even among experienced and able merchants, there is a diversity of opinion as to why the price of Cuban leaf tobacco went up so high as to imperil its consumption by the foreign importers of our leaf—even by our own local producers of cigars.

The 1923 crop promises to be unusually large, and with a goodly proportion of fine grades.

The volume of supplies can be more fully appreciated when the receipts are expressed in pounds. The Government in compiling the receipts of butter uses an average of 63 lbs. to the package, and on that basis the 3,339,216 packages give a total weight of 210,370,608 lbs. This included 3,530,909 lbs. of Canadian that came here mainly in the fall months. In addition to this we imported 16,349,354 lbs. from other dairy countries, chiefly Denmark, New Zealand and Argentine, although Siberia and the Baltic countries sent about 1,500,000 lbs. to the United States. In view of the favorable industrial conditions here the increased supplies were not more than the larger needs of the trade required. An important growth in city and urban population has increased the consumptive demand even more than most operators realized. This is clearly indicated by the fact that the year's receipts ran 16,770 packages ahead of the previous year, and the imports were 161,400 packages heavier. Few seasons have passed wherein there were so many interesting features. The higher level of values tempered most of the operations with caution, and yet there was a constant optimistic element that stepped in when declines occurred, buying up the surplus and doing much to stabilize the market. There was not the wide sweep of prices that had been seen in other years. For a short period in late June and early July extra fresh creamery sold down to 37¼@38c., which was the low point of the year, and the extreme top was 56c. in early December. The average of 46.79c. was 6.20c. above the average of 1922. Taking the country as a whole, a little more butter was produced than during the previous year. There was undoubtedly a good deal more milk, but the demand from the condensed and evaporated milk factories was large and constant, and the growth of the ice cream trade has been remarkable. Not only is this true of the large cities throughout the country, but interior towns and villages have used at least 25 per cent. more than ever before; and the ice cream industry has become an all year around business which is absorbing immense quantities of cream that would

otherwise go into the manufacture of butter. The reason for so large an increase in the importations is found in the fact that New York was 8@10c. a pound above the world's markets during most of the year, when the difference in exchange was taken into consideration. This made it profitable to bring the foreign butter to this country, notwithstanding the 8c. a pound duty.

A somewhat more detailed report of the course of the market during the year follows. There was barely fifty per cent. of the usual stock of butter in the warehouses of the country when the year 1923 opened, and this had decided influence on the early January market. Extra fresh creamery was current at 52½c.; firsts at 46½@51½c.; cars of 90 score fresh centralized at 49½@50c.; good to choice storage creamery at 47@49c.; finest fresh Danish at 51½@52c., duty paid; fresh California boxes at 49@51c.; selected lots of New York State dairy at 50@52c.; standard city made ladles at 35½@36c.; average current receipts of packing stock at 34c. After the little quietness that immediately follows the holidays, trade became quite active, local needs being supplemented by large out of town orders, and during the second week of the month best table grades advanced 2c. bringing the quotation of extra creamery up to 54½c., which was the high peak of the winter. But the upturn was carried too far; it checked the buying, attracted much larger receipts of domestic, and opened the way for important shipments of foreign to come this way. The trade soon found that supplies were excessive and the pressure to clear the surplus forced a decline of 7c. a pound by February 1st. From that point it took a few days to steady the position, but a number of operators began to think well of the market and considerable speculative buying followed, which caused a gradual recovery until the standard grade of extra creamery had worked back to 52½c. The decline had been so sharp that it checked further important buying and threw the trade more on the domestic stock. Fluctuating values marked the trading during both March and April, but after each slump the market did not come back to so high a point as previously. Early in March a direct steamer from New Zealand brought 52,531 boxes of butter, the largest cargo ever received from that country. It was a weight on the market, and while 15,000 boxes were sent to London and a quantity to Canada, it was a hard struggle to dispose of the butter without loss. Fortunately but little stock was then coming from other countries. With the early exhaustion of the storage stocks, buyers gave attention to the under grades of fresh, and as these cleared so promptly the range of values narrowed to an unusual extent. It was no uncommon thing to find seconds of creamery selling within 1@1½c. of extras.

The new trade year began May 1, but the production season was late and the very moderate arrivals were promptly taken for current use, on the basis of 42@44½c. for good seconds to high scoring creameries. Several cars of fresh were attracted from Canada, and the sharp breaks in the British markets made it possible to draw some supplies from Denmark. During the month the Danes gave us 7,525 casks, and 2,000 boxes of New Zealand were reshipped here from London. But the trade took this foreign butter in good shape, and it did not make any dent in our market because the unusually cold weather in this country kept the make back, and it was past the middle of the month before the domestic receipts assumed anything like the proportions commonly expected in the late spring. We finally ran into full supplies all at once, and values tumbled rapidly, fancy fresh creamery dropping 5c. in two weeks, or to 38¾@39c., which was nearly the low point of the season. Practically no grass was shown in the domestic receipts until about the third week in May, and this delayed the storage season, less than 860,000 lbs. having been placed in the warehouses up to June 1st. The month of June was a perplexing period. In addition to almost record breaking receipts—426,912 packages—foreign countries gave us 2,732,576 lbs., Denmark coming in with 20,793 casks. This tempered the speculative buying and a very considerable part of the stock that went into the freezers was stored by dealers, mainly because they could not

break even on their contracts. During most of the month the price of extra fresh creamery, which was the standard grade traded in, held around $38\frac{1}{2} @ 39c.$, but the last week there was a drop to $37\frac{1}{4} @ 37\frac{1}{2}c.$, which proved to be the real turning point to the market. The average for the month was $38.87c.$, or about $2.50c.$ above the same month in 1922. At times complaint of quality was heard to some extent, but the average was fine and the relatively small proportion of under grades made a narrow range of quotations, seconds to best firsts selling at $35 @ 37c.$ A few cars of fresh centralized were taken during the month at fairly good prices in relation to the whole milk butter, but the high cost of this stock at primary points compelled the storing of quite a number of cars to save loss. The finest of the Danish product sold up even with the fanciest of our creameries, and a good deal of Argentine was moved at $36 @ 37c.$ New York State dairy figured to a less extent than ever before, most of the milk in the Eastern States going to the large cities in liquid form, or to condenseries, creameries or cheese factories. Considerable packing stock came forward and the price of average fresh receipts kept around $30c.$ The early July market was active, local speculative operations being supplemented by heavy out-of-town buying. Besides this, the quality ran off as a result of the hot weather in June, and the closer discrimination on the part of buyers widened the range of values, top grades pulling farther away from the defective stock. The last week in the month brought advices of shrinkage in production, a still smaller proportion of fine stock, and values started upward, extras reaching $42c.$ before August 1. There was no check to the upward trend of prices during the first three weeks in August, and a further advance of $3c.$ was established. This checked the buying for storage, and a nervous feeling crept into the situation which prevented quite so close a clearance of the daily arrivals and caused a slight reaction.

Early in September we felt the homecoming of so many of the summer vacationists, and the enlarged consumptive demand drew quite heavily on what are known as "street stocks," as well as taking the fresh arrivals. And when the Government figures showing a shortage of 9,379,000 lbs. of butter in the warehouses of the country on September 1 were published quite a bullish feeling developed. This report indicated clearly that the large use of butter was not confined to the Eastern seaboard, but all over the country the consumption was heavy. Nowhere did substitutes figure to an important extent. We were already pulling quite strongly on our reserve stocks in storage, and the imports were considerably lighter during September than in the summer months. October started in pretty well, but there was a little backset before the close of the first week, extra creamery dropping back to $46c.$, a point which was never again reached during the fall and winter. This was only a momentary situation, however, as fresh supplies shortened, trade was good and the general statistical position favorable. As there was good profit in the summer product in storage, holders of this stock sold freely and its large use displaced enough fresh butter to prevent as rapid an advance as was looked for, and it was the very last of the month when the standard fine grade of fresh creamery reached $50c.$ From that point there was an almost steady, though gradual, advance during November and December, with all the features of the market substantially the same as in the fall months. There were periods of hesitation, but these did not last long, most operators realizing the under current of strength. It was clearly demonstrated that without considerable importations there would be so marked a shortage in this country that very extreme prices would prevail. Hence buyers turned their attention to Canada, Europe, Argentine and Australia, and during November and December 5,693,024 lbs. of foreign butter were unloaded at the port of New York. The importance of this source of supply is seen in the fact that the total imports for the year were nearly 20,000,000 lbs., and that in the face of an $8c.$ a pound duty.

Totals for 1923	49,410,253	3,726,102	19½ @ 28½	22½ @ 29¼

There were further important changes in the New York cheese trade during the year 1923. Some of the large chain store buyers discontinued or reduced their purchases on this market, going directly to the producing sections for their supplies. There was a further material expansion in the business of the prepared loaf cheese manufacturers, and this also very materially curtailed the wholesale business in bulk American cheese in New York City. Total receipts for the year showed practically no decrease compared with 1922, but a larger proportion of our receipts went directly to the prepared cheese manufacturers and the actual quantity handled by regular dealers was probably lighter.

Taking the year as a whole, the opportunities for profits, especially to those carrying the bulk of the 1923 storage reserve, were not up to the average. The storage stock was put away at a very high cost, unusually high in relation to butter values. This stimulated a very heavy production and caused a large surplus of storage stocks during the closing months of the year, the bulk of which could only be marketed at a loss to the original owners.

Foreign trade in Cheddar type cheese was not heavy. There was some export movement during March, the bulk of this cheese going to the English markets, but a part of these March exports were returned to the United States later in the year, due to unfavorable developments abroad. At times during 1923 we imported some Canadian Cheddar cheese, most of these going to the grinders, and a few thousand crates of New Zealands were also brought in, most of these arriving during June, when old sharp cheese were scarce.

The year opened with moderate stocks of storage cheese in the warehouses of the country, the Government report indicating holdings on January first of 33,659,356 lbs. Better grades of held State Flats were selling at 27@28¾c. and fresh at 27@27½c. As the month advanced prices on held cheese moved up a little until January 25th, when sales ranged from 28@29¼c., and there was very little change from this range during the balance of the winter. The quantity of held cheese carried over into 1923 proved adequate to all trade needs up to June; in fact, the reserve was not completely cleared until quite late in June. Probably the bulk of the held stock of fine quality was cleared at prices ranging from 28@29¼c., and the New Zealands which came in in June to take the place of the old domestic cheese sold at prices ranging 27½@28¾c.

Severe winter weather curtailed the manufacture of fresh cheese during January and February. The few lots of fine fresh State Flats that arrived here during February sold at 25½@26½c., but production increased early

in March, and prices both East and West declined. This decline attracted export buying and a good many thousand boxes of Wisconsin fresh were taken by British operators at prices ranging from 26½¢ down to 24¢, delivered in New York. But export business dropped off the latter part of March and as the make increased prices declined. By March 31st fresh flats were selling down to 23½¢@24½¢., fresh Wisconsin Daisies taking about the same range.

April brought very favorable conditions to cheese production and the make continued to increase rapidly, prices steadily falling until April 23rd, when fresh State Flats were selling down to 20½¢@22¢. and fresh Wisconsin Daisies 22¢.

The latter part of April trading improved and prices gradually advanced. By May 23rd fresh State Flats had moved up to 23¼¢@24½¢. and storing started on that basis. Speculative demand proved very active for New York State Flats and prices on these were pushed far above a parity with Wisconsin cheese, which are becoming a more and more important factor in the Eastern cheese trade each year. A good many of the New York State June Flats went into storage at a cost of 25¢@26½¢., while Wisconsin Daisies were put away at a cost here ranging from 23¢@24¼¢., a few higher. Butter prices during June did not advance to a parity with the cheese market and a very heavy make of cheese was the result. However, the consumptive demand was good and on July 1st stocks of cheese in the entire country were only about 3,000,000 lbs. heavier than on the same date the previous year, the stock being normal for the season.

The demand for storage continued very active during early July with State cheese selling far above a parity with Wisconsin goods. On July 25th the best fresh State Flats were quoted as high as 26½¢., while the best of the Wisconsin Daisies, a more expensive style to manufacture, were freely selling here at 23½¢.

As July advanced it became evident that the high prices were curtailing consumption, were stimulating a heavy production, and were piling up a big reserve of cheese in the warehouses. When the August 1st report of stocks was made public, showing that the excess over the previous year's holdings had increased to 9,000,000 lbs., there was a check to the demand and prices made some decline. Fresh State Flats on August 1st were selling from 22¾¢@25½¢. and the market was weak at that, but weather conditions during August proved less favorable to production and a new crop of speculative operators appeared to take the surplus late summer cheese. Their orders forced prices steadily upward, and by the close of August fresh State Flats had reached a range of 25¼¢@27¢., though Wisconsin Daisies were still selling down to 25¢@25½¢. The speculative interest continued right through September and the high point was reached on September 28th, when fresh State Flats were quoted 26½¢@28½¢. and Wisconsin Daisies 26¢@26½¢.

On October 1st the full effect of the exceptionally high cheese prices throughout the entire producing season became more apparent. The Government report showed an excess over October 1, 1922, of 13,000,000 lbs. in the storage stocks. This information when published cooled off the demand and prices gradually declined during October. By November 1st fresh State Flats were down to 24¢@26¢., and though there was a temporary advance of about ½¢. the second week in November, there was no adequate buying to support prices during the balance of the year, and by December 31st fresh Flats had fallen to a range of 19½¢@22¢.

An interesting feature of the December decline lay in the fact that while the Eastern fresh cheese prices broke sharply, Wisconsin values made no corresponding decline, and though State cheese had sold at a substantial premium over the Wisconsin goods throughout the summer, Western fresh cheese were bringing the higher prices at the close of the year.

The year closed with total storage stocks in the entire country of 49,560,000 lbs., an excess of more than 12,000,000 lbs. compared to the previous year, and there seemed to be no prospect that this heavy reserve could be cleared without loss to owners.

*The prices given cover the range for Western firsts to extra firsts.

The year 1923 was characterized by the largest egg production ever recorded in the United States, and it proved another year of large average losses to holders of cold storage reserve.

The year opened with an unusually heavy reserve carried from the previous season—1,310,000 cases in the United States, including 852,087 cases in the four leading markets, New York, Chicago, Boston and Philadelphia. Favorable weather up to early February led to liberal production, and with only one temporary reaction prices for Western firsts to extra firsts at New York declined from a range of 45@51c. at the opening of the year to 33@36c. very early in February; and the better grades of refrigerator eggs fell from 28@33c. to 26@28c. in the same period, the average being below the cost of the goods the previous spring.

There had, however, been a very free movement of storage reserve during January, New York's trade output was averaging about 140,000 cases a week, and her fresh receipts were averaging only about 87,000 cases. Early in February severe cold weather covered producing territory, checking or much retarding the previous increase in production, and as reserve had been reduced to comparatively small figures—213,000 cases in the United States and less than 60,000 cases at New York—there arose a prospective probable shortage to supply consumptive needs on the scale enjoyed in January. Prices then took a sharp upward movement, fresh firsts to extra firsts advancing to 39@43c. by February 20th, and the remaining refrigerator eggs reacting to a high point of 32@34c. for the few left after mid-January, in which range the supply was practically exhausted before the close of the month.

As a whole February receipts made considerable gain, but not enough to maintain the large trade output of January, New York's weekly absorption falling below 130,000 cases. But late in February and during March fresh production came forward with a rush and prices declined rapidly toward the spring storage basis, firsts to extra firsts falling to 24@28c. by the close of March.

The unfavorable results of storage in the spring of 1922 gave general expectation of a considerably lower level for the storage season of 1923. But while the March movement was of very large volume, reaching 2,023,000 cases at the four leading markets, against a previous high record of 2,073,000, accumulations in cold storage up to April 1st were much lighter than in the previous year. And with a cold, backward spring the April movement was comparatively light. At the close of April storage

accumulations at Chicago, New York, Boston and Philadelphia were only 1,411,000 cases, against 2,216,000 the previous year and in the United States the shortage was over 900,000 cases. The realization of this lighter rate of accumulation during April led to a maintenance of prices in that month above all early expectations—even above those of April, 1922, which had resulted in average losses. But in spite of the falling off in the April movement, the later production proved excessive. Receipts in the leading markets in May reached the great total of 2,765,000 cases, and they continued very large in June, so that by the beginning of July total storage accumulations in the United States exceeded by some 400,000 cases those of July 1, 1922, the quantity being 10,208,000 cases—a greater reserve than had been stored at the height of the 1922 season. Prices receded slightly in May, but not enough to give any safety in storage operations, the average for storage packings of Western being 29.46c. In June, however, the average was about 3c. lower and these summer stored eggs made some profit on the whole though the margin was small.

Very hot weather in June curtailed the movement somewhat in July, when storage accumulations fell a little behind those of the previous year, but about August 1st at the high mark of these accumulations, there was still a surplus of 342,000 cases over the unprecedented holdings of August 1, 1922, the total storage reserve then standing at 10,503,000 cases.

FRESH EGG MARKETS IN THE FALL

A good deal of short held stock was forwarded from interior points during August and later months, and receipts at leading consumption markets from August 1st to the close of the year, partly due to increased production, showed an increase of about 604,000 cases or 18½ per cent. Many held eggs were forwarded as fresh gathered or were mixed with fresh, and all such met a most unsatisfactory market. For the higher qualities of fresh, while the late summer and fall advance did not hold pace with that of the previous year, it was gradually constant up to November 12th, when the high point was reached for Western fresh at a range of 52@64c. for firsts to extra firsts at New York; and white eggs reached their maximum shortly later at a range of 67@82c., a few extra fancy nearby lots reaching 84@86c. But during this period heavy accumulations of under grade mixed quality eggs burdened the market and had finally to be forced out at low and often heavily losing prices.

The break that usually comes in fresh egg prices late in November or early December occurred earlier than usual. Receipts were larger than in the previous year, particularly from Pacific Coast and Atlantic Coast white egg sections, and after November 19th fresh Western dropped 6@9c. to a range of 46@55c. And while there was a later temporary reaction, the December movement of prices was gradually downward, the month and year closing after some fluctuations at 42@47c. for firsts to extra firsts and 50@55c. generally for the better grades of whites.

The year's receipts at New York contained a large increase in the supply of white eggs from the specialized poultry farms of the Pacific Coast and Middle Atlantic States, a class of stock that is coming more and more into favor with the larger distributors, especially during the late fall and winter (when they form a growing percentage of the supply) because of their more uniform quality and better standardization than general Western receipts.

UNLOADING THE RESERVE

While the statistical position of the market at the close of the period of accumulation was unfavorable, there was not the pressure in August and September to sell at a loss that characterized that period of 1922. But up to October there was not much open market trading in New York, the withdrawals being chiefly from dealers' own stocks. Total reduction in August and September was much below the previous year's figures, and

by October 1st the excess of holdings in the United States had risen to 824,000 cases. Prices in August and September for good to finest refrigerators had ranged 29@35c., but the relatively slow output led to a decline in October to 30@33c. with much of the business being in cheaper summer goods at 27@29c. In November with increased trading as the supply of fresh eggs fell to a minimum there was a recovery to 31@35c. for the higher grades, but later in the month the market fell to 29@32c. with summer eggs offering generally at 25@28c.; and in December, with mild weather, reports of increased production and a certainty that the carry-over into January would be beyond all precedent, the best refrigerators fell to 26½@29c. by December 18th, recovering slightly to 27½@30c. at the close of the month and year.

The year closed with a remaining cold stored reserve in the United States of 1,926,000 cases, of which 1,122,792 cases were in the warehouses of New York, Chicago, Boston and Philadelphia. The total reserve was 616,000 cases in excess of the previous year's holdings and 384,000 cases more than ever before carried into January. It was generally felt that nothing but an unusually severe winter in producing sections after January 1st could save holders from further disastrous losses.

REVIEW OF THE PETROLEUM TRADE OF THE UNITED STATES FOR THE YEAR 1923

General Conditions.—In the oil industry, few years are normal. Those who study it most closely are always on the watch for some unexpected development. Nearly every year has its surprise. And there have been few, if any, years more abnormal than 1923. It opened with a situation that clearly needed a stimulating of crude production. It seemed apparent that a serious shortage was imminent unless new sources of supply were found. And so, for three months, there was an advancing market. At the same time stocks of products were accumulated to meet an expected record demand. Then came amazing gushers in Southern California, and a surprising rush of oil in Central Texas. The Pacific Coast, which had always imported gasoline from the East, now had not only crude oil in great quantities to ship away, but actually an over-supply of gasoline, and both crude oil and gasoline were sent out to foreign countries and to the refiners and marketers on the Atlantic Coast. The Panama Canal, and the immense fleet of tank steamers built during the war, offered ready waterway and ship transportation. The California offerings were so cheap that they soon displaced Pennsylvania and Mid-Continent crudes and the products made from them, and the whole industry faced demoralization. Those who were storing their crude and gasoline in the East and middle West, were forced to market them at any price or face bankruptcy. The oil industry had again guessed wrong. However, as is always the case with petroleum, the crisis was soon past, and before the end of the year somewhat normal conditions again began to prevail, and the prospects were reassuring for the future.

On the whole the American industry has shown great vitality and splendid progress. It took 40 years, ending with 1896, to produce the first 1,000,000,000 barrels of crude oil. The next 7 years, up to 1903, showed 2,000,000,000 barrels. The next 10 years, up to 1913, 3,000,000,000 barrels, and in the last 10 years, ending 1923, 5,000,000,000 barrels were produced. That is, out of a total of 11,000,000,000 barrels produced during 65 years or more, nearly one-half were the product of the last 10 years.

Production.—A notable example of the uncertainty of the oil industry is found in the number of wells drilled during the past two years. Our table shows for 1923, 24,387 wells, as compared with 24,628 wells in 1922. In any other mining industry nothing but an increased activity can bring about an increase in output. But it will be seen, with oil, the same number of wells drilled resulted in an immense gain in production. There was an increase in output of over 168,000,000 barrels, or more than 30%; and that, too, although there was about the same number of dry holes. Usually, one-third of the number of wells put down are dry. In 1923 there were 8,500 such wells, costing over \$90,000,000. We might remark that the cost of drilling and producing varies greatly in the different fields; there even being a wide range in cost from year to year, and often from month to month. The depth varies from 350 feet for the shallow wells in Kentucky, to a mile in depth for wells in California. There are corresponding variations in cost, from \$1,000 per well in Kentucky, \$3,000 to \$5,000 in Ohio, \$10,000 and \$15,000 in Pennsylvania and West Virginia, \$20,000 to \$75,000 in Texas, \$30,000 to \$40,000 in Oklahoma, and \$75,000 to \$100,000 in California.

In 1923 California again outranked Kansas, and Pennsylvania fell behind both Wyoming and Arkansas, but passed Louisiana, as did also both Wyoming and Arkansas. Kansas showed a gain of 6,500,000 barrels, or 3.6%, but California showed an increase of 90%, with over 125,000,000 more barrels. The Texas gain was nearly 10,000,000 barrels, while Louisiana fell behind about that amount. Arkansas jumped ahead over 171%, and moved from the 7th to 5th place in our table. Wyoming also advanced to 4th place, with an increase of 17,000,000 barrels, or 64%. Pennsylvania still

shows, after these many years of producing, a very creditable output of 28,000,000 barrels, which, however, was a decline of 1,274,000 barrels.

The year's production reached 725,702,000 barrels, or 2,000,000 barrels per day. This was over twice the production of five years ago, 1918 showing 356,000,000 barrels. Each year since 1918 shows substantial increases, the greatest being in 1923, with 168,000,000 barrels gain.

Prices.—While the price of crude oil did not vary much at the end of the year, as compared with the beginning (Pennsylvania crude at the wells was \$3.00 December 31st, and \$3.25 per barrel January 1st), there were wide and violent fluctuations during the year. \$4.00 in March was the top price, \$2.35 the lowest, which came in November. The average for the year, \$3.10 per barrel, was about the same as 1922, and 23 cents per barrel less than the average for 1921. Export oil ruled lower in price than it has for six years.

Exports.—Exports of petroleum from New York in 1923 show a gain of 10% over 1922. Because of heavy exports of crude oil, San Francisco out-ranked New York, and took first place. More than one-half the California shipments were crude, but both refined oil and gasoline show fine quantities. All ports kept up their shipments to the large outputs of the preceding year, and the total deliveries from the United States passed the 2,000,000,000-gallon mark, with the notable increase of 36%.

CRUDE OIL PRODUCTION IN UNITED STATES

(Barrels of 42 Gallons)

	Barrels 1923	Barrels 1922	Barrels 1921	Barrels 1920	Barrels 1919
California	263,729,000	138,468,000	114,709,000	105,668,000	101,564,000
Kansas and Oklahoma	187,839,000	181,337,000	150,210,000	144,226,000	115,897,000
Texas	128,415,000	118,684,000	103,322,000	96,000,000	80,290,557

REVIEW OF THE IRON AND STEEL TRADE FOR THE YEAR 1923

Nineteen-twenty-three was one of the most spectacular years the steel trade has known. As the year opened the indications were that iron and steel plants would be well employed through the first half of the year. What came was surprisingly beyond the common prophecy. There were two broad swings in production, in buying and in prices—one up, the other down. The upward sweep attained its peak soon after the end of the first quarter. The downward trend was in progress, with here and there a jog or unevenness, through the last eight or nine months.

The most remarkable thing about the year was that demand should have risen so rapidly in the first two or three months as to cause fears of a runaway market, and that in less than 60 days after high tide, or before the end of May, there should have been signs of reaction. Seemingly, buyers of iron and steel carried on their business throughout the year with one eye on the disastrous reaction of 1920 and the other on the reign of catastrophe that was bringing central Europe to the verge of destruction. The heavy losses on swollen inventories in 1920 were fresh enough in mind to cause a quick response to the cautions sounded in March and April. At the same time the possibilities of harm to business in the United States from the demoralization of Europe held the average manufacturer to a conservative course.

It seems strange in retrospect that there should have been any serious thought that activity would long keep up at the pace reached early in the spring, involving the production of ingots at the rate of 49,000,000 tons a year. Many failed to appreciate that the steel industry was still feeling the rebound from the coal and railroad strikes of 1922. The low prices of early 1922 led consumers to begin replenishing their stocks, after having worked from hand to mouth through the depressed months of 1921. The coal and railroad strikes stopped the restocking; but it was resumed late in 1922 and carried over into the early months of 1923. When the building expansion of that spring was added, and the heavy buying of the railroads, it appeared to some consumers that they were not going to get deliveries as needed. That fear proved groundless. The railroads never functioned so well. In the first eight months of 1923 deliveries of steel were on a level never equaled.

Construction on a scale greater than the country had ever seen was a large factor in the year's demand for steel, probably the chief factor, if railroad and other bridges and the various forms of concrete construction be added to the remarkable volume of building work. Railroad track and equipment steel was called for also on a large scale. Rail mills were busier than in 1922 and there was good buying of track supplies. Carworks were well employed throughout the year, though new car orders placed in 1923 were not so many as in 1922—a total of some 94,000, against some 170,000 in the previous year.

Automobile production went beyond all records and the pressure upon the rolling mills from this source was especially strong in the spring and early summer months. Some motor car plants surprised steel makers with the amount of material they called for in the last quarter, when a considerable falling off had been looked for.

The oil industry, suffering in a marked degree from over-production, did not make as great demand on the pipe mills as in 1922, but the building trades fairly compensated for the falling off. In tin plate the year was exceptional, both in the large volume of business from the canning industry and in the expansion of package and other manufacturing uses of tin plate.

Agricultural implement works operated for some months on a 65 per cent. basis and for a time promised to be better buyers of steel than in 1922; but while prices of agricultural products showed some improvement, farmer buying did not increase to an appreciable extent.

The widely ramifying minor uses of steel, representing consumption by the individual buyer—those uses which bring tonnage to wire mills, strip

mills and hoop and band mills—made good demands upon producers in 1923.

Foundry operations were on a scale showing a good advance upon 1922. Makers of water and gas pipe had a busy year. Municipal work was plentiful and prices went to levels on which efficient plants made good profits. Foundries supplying automobile castings and those making heating and plumbing equipment had fuller operations than others. Steel foundries, with the active buying by railroads, had the best year since the war. Jobbing foundries had varying fortunes. For many of them the average for the year was between 60 and 70 per cent. of capacity.

Production.—Nineteen-twenty-three ranks second in steel production, with 43,250,000 gross tons of ingots, 25 per cent. more than the 34,568,000 tons of 1922. The 1917 record was 43,619,000 tons. If capacity be put at 54,000,000 tons, 1923 was an 80 per cent. year. In pig iron 1923 made a new record at about 40,361,000 tons, a 48 per cent. increase upon the 27,220,000 tons of 1922. The best previous year in pig iron was 1916, with 39,435,000 tons.

The rate of output reached in the peak months of April and May was beyond the expectations of the most sanguine among producers of steel. The year was the only one of the five since the war in which there were at the same time an unusually heavy demand for steel and an operation of the mills unhampered by strikes or other interruption of the inflow of raw materials or the shipment of finished product.

There was recognized, it is true, in the first half of the year, an insufficient supply of common labor, because of the remarkable activity in outdoor work and the higher wages paid by the latter. But due to the well-directed efforts of works managers in the rearrangement of forces and in some cases to the co-operation of the workers, increased output was secured at steel plants. At one time in the first half of the year, when the Steel Corporation as a whole was running at 92 per cent. of capacity, it was stated that 25,000 fewer men were employed than in 1920 when a like output was being made.

The records of production for eight years are given in the accompanying table:

		<i>Pig Iron, Gross Tons</i>	<i>Steel Ingots and Castings, Gross Tons</i>
1916	39,134,797	42,773,680
1917	38,621,216	45,060,607
1918	39,051,611	44,462,432
1919	31,015,364	34,671,232
1920	36,925,987	42,132,931
1921	16,688,126	19,783,797
1922	27,219,904	35,602,926
1923	40,361,146	44,650,000

The variations in pig iron production appear in the table of the number and daily capacity of the furnaces in blast at the beginning of each month.

		<i>No. in Blast</i>	<i>Daily Capacity Gross Tons</i>			<i>No. in Blast</i>	<i>Daily Capacity Gross Tons</i>
1923				1923			
Jan. 1	253	101,400	July 1	323	122,555
Feb. 1	262	105,125	Aug. 1	298	114,200
Mar. 1	278	110,055	Sept. 1	270	106,590
April 1	293	115,800	Oct. 1	255	102,100
May 1	310	119,500	Nov. 1	245	99,030
June 1	321	125,100	Dec. 1	231	91,345

The variations in the average daily rate of steel ingot output from month to month are here shown:

<i>Months</i>	<i>Daily Production, Gross Tons</i>	<i>Months</i>	<i>Daily Production, Gross Tons</i>
1923		1923	
January 141,569	July 140,570
February 143,955	August 136,214
March 149,883	September 132,647
April 157,776	October 131,406
May 155,400	November 119,762
June 144,188	December 113,751

No additions to pig iron making capacity were made in 1923, the first instance in many years. Five, however, were projected or were under construction at the end of the year with an estimated capacity of 900,000 tons. Open-hearth steel capacity to the amount of 875,000 tons was added, all by the independent steel companies, so called. The ingot capacity of the country, according to the *Iron Age*, was 54,000,000 tons per annum at the end of the year.

Ore shipped from the mines in 1923 is put at 70,433,000 tons, an increase of 39 per cent. in quantity and of 55 per cent. in value compared with the figures for 1922. The average value of the ore per gross ton at the mines in 1923 is estimated at \$3.47, against \$3.12 in 1922. The Lake Superior district supplied about 85 per cent. of the total, the proportion obtaining in recent years.

A new record in the output of by-product coke was made in 1923, and the total production of both beehive and by-product coke has been exceeded but twice—in the war years 1917 and 1918. The make of the by-product ovens was much the largest yet realized. It was 37,527,000 tons, or 68 per cent. of the total of 55,500,000 tons, while in 1918, for example, it was only 26,000,000 tons out of 56,500,000 tons.

Prices.—The accompanying table gives prices of eleven products at the close of 1923 and a comparison with those on December 31, 1916, and subsequent years. All prices are for Pittsburgh delivery, except those for Southern foundry iron, for which Cincinnati delivery is quoted:

FLUCTUATIONS OF PITTSBURGH IRON AND STEEL PRICES IN 1916 TO 1923,

April saw the peak of prices in both iron and steel, as indicated by the composite prices of the *Iron Age*. There was a steady decline in pig iron from \$30.83 in April to \$21.40 in November with a slight rebound to \$21.88 in December. Against this was an almost unchanging price in steel. The steel composite price was 2.814c. in April and 2.775c. for the last five months of the year. In other words, while pig iron decreased \$9.43 or over 30 per cent., steel was less than 1½ per cent. lower. In terms of the 10-year pre-war average, the average price of pig iron in 1923 was 167, against 100 for the pre-war basis and of steel for 1923 it was 162.

In the first three months of the year the policy of consumers of steel was to make sure of all the steel they were likely to need for some months ahead. Naturally under such an impulse prices advanced and premiums were paid, as indicated by 2.75c. and higher for early delivery of plates, shapes and bars, as against a 2c. market at the beginning of the year. There was little duplicate buying of the sort that stood out in the slump of 1920.

Consumption of steel did not fall off between April and December to any such extent as production. The latter declined nearly 25 per cent. from the peak. But in the first part of the year buyers took more steel from

the mills than they currently used and thus there was some building up of stocks in the hands of jobbers and manufacturing consumers. In the second half there was evidence that manufacturing consumers and jobbers drew on their stocks. Thus at the end of the year there were no large stocks in intermediate or final hands.

Some products showed more variation than was apparent in plates, shapes and bars. There was weakness in sheets, in cold-finished steel bars, in hoops, bands and strip steel, as also in bolts, nuts and rivets. But concessions in wire products, pipe and tin plate were exceptional and without effect on the general market.

Labor.—The year was made epochal in American steel-making annals by the abolition of the 12-hour day at the plants of the leading steel companies. Various lesser companies were still working their plants on two shifts, but the number of men employed 12 hours a day was relatively small at the end of the year.

The actual elimination of the two-shift day dates back to a conference which the late President HARDING had on May 18, 1922, with 40 representative steel manufacturers. At the President's request the conference appointed a committee to consider the subject and to report to the American Iron and Steel Institute. The report was read by Judge E. H. GARY at the Institute meeting of May 25, 1923. Its conclusion was that while the committee could not at that time report in favor of the total abolition of the 12-hour day, it might do so later if labor supply were sufficient and if consumers of steel and industry at large favored the change.

On June 18, President HARDING wrote Judge GARY, the committee's chairman, asking if the steel companies would agree that in case of any recession in demand they would change so far as possible from two shifts to three shifts. The directors of the American Iron and Steel Institute then met and the 15 present joined in a letter to the President promising to make every effort to eliminate the 12-hour day as fast as a surplus of labor became available.

The first move on a large scale was made by the Carnegie Steel Co., which on August 16 put its coke ovens, blast furnaces, and steel plants on the 8-hour basis. In the same week and the week following most of the plants in the Youngstown district, also those of the Bethlehem Steel Corporation, changed from the 12-hour to the 8-hour day.

The wage basis was the difficult problem. The 12-hour men who had been receiving 40c. an hour were given 50c. an hour when they went to 8-hours. This was a 25 per cent. increase in the hourly rate, but the day's wage became \$4.00 as against \$4.80 previously. At first the wages of the 10-hour men were not changed, but on September 7 Chairman GARY of the Steel Corporation and President GRACE of the Bethlehem Steel Co. made announcements of an increase of 10 per cent. in the hourly rate of the 10-hour men, giving them \$4.40 for a day's pay. Other companies made a like advance.

Apart from the advances made in connection with the 8-hour day, iron and steel works labor received one increase in 1923. On April 9 the Steel Corporation announced an 11 per cent. advance in wages in the manufacturing plants of its subsidiaries, bringing common labor up from 36 cents an hour to 40 cents an hour. Similar advances were made by other steel companies.

Exports.—The volume of American steel exports in 1923 was substantially a duplicate of that of 1922, the total for each being within a few thousand tons of 2,000,000. Early in the year there was an expectation of some business with Europe due to the French invasion of the Ruhr and the cutting off of shipments from the occupied section of Germany. But such hopes had no real foundation. It became plainer, as conditions in Central and Southeastern Europe grew worse, that the promise of export

trade for this country in iron and steel products lies largely in other directions—with Canada, South America, Japan and China.

Tin plate exports last year were 125,000 tons, a two-thirds increase over 1922. Sheet exports fell off in a marked degree, until Japan began buying here to repair the wreckage of the great earthquake of early September. In the last months of the year Japan's purchases, in this country, chiefly sheets, wire products and rails, were about 70,000 tons. Throughout the year Japan had been a buyer of American steel rails, and the year's shipments of rails to Japan amounted to about 92,000 tons.

In all the rolled steel products the export movement of the year probably represented about 7 per cent. of the domestic production of steel, whereas in the years 1912-20, inclusive, about 8 to 12 per cent. of our steel production was sent abroad.

Machinery exports ran 20 per cent. more in 1923 than in 1922, and the total for the year was not far from \$288,000,000.

Earnings.—Net earnings of the steel companies in 1923 made a favorable comparison with those of 1922, but then the year showed 25 per cent. expansion in tonnage and a 37½ per cent. expansion in values. The United States Steel Corporation did a volume of business amounting to \$992,900,000. For every dollar of this, 11 cents was available for dividends, against 5½ cents of every dollar in 1922, although in that year 7 cents was paid in dividends by cutting in on the surplus. The dividends paid in 1923 amounted to 5½ cents per dollar of goods. Labor's share of the Steel Corporation's dollar of gross receipts has risen from 30.5 cents in the period of 1902-7 to 43.4 cents in the period 1920-22. For 1923 it was 47.5 cents.

The Bethlehem Steel Corporation had a gross income of \$275,213,000, as compared with \$131,866,000 in 1922. The net income available for dividends was \$14,374,000, against \$4,605,000 in 1922. In the one case it was 5¼ per cent. of sales and in the other 3½ per cent. The total volume of business done by the Republic Iron & Steel Co. in 1923, \$59,043,000, was 50 per cent. more than in 1922, while the amount available for dividends in 1923, \$6,252,000, was nearly 15 times as much as was available in 1922.

REVIEW OF THE DRY GOODS TRADE OF NEW YORK FOR THE YEAR 1923

In most lines of textiles, 1923 opened auspiciously. Demand was broad and active. Prices were firm and showed an upward tendency in many instances. Manufacturers, selling agents and dry goods merchants generally were in an optimistic frame of mind, for the situation and outlook were considered distinctly encouraging. Conditions continued satisfactory during the early months. In practically all directions the volume of business was large in the first quarter, and in some lines was well maintained throughout the spring months.

The second half of the year, however, was characterized by a great deal of irregularity and unsettlement. Excepting occasional periods of rather brisk buying, trade slackened decidedly. Purchasers showed a growing disposition to operate in piece-meal fashion for current or nearby requirements. Buying for future or distant shipments was confined almost entirely to seasonal fabrics offered from time to time, which had to be ordered well in advance to insure deliveries. Mixed and confusing price movements, particularly in cotton goods, and uncertainty felt as to possible future trends, together with doubt regarding consumptive demand, apparently accounted in large measure for the hand-to-mouth trading.

Among the outstanding features of the year was the greatly increased cost of production, due to higher wages and advancing raw materials, notably cotton. As a result of widespread resistance on the part of buyers to price advances, goods often moved at values far below actual replacement costs. The year was also notable for the further marked expansion of the textile industry in the South; the phenomenal increase in domestic production and consumption of artificial silk, and the development of many new mill processes whereby wider uses than ever before were found for jute yarns and knitted fabrics. Frequent style changes proved a great handicap to merchants and manufacturers alike. There was a veritable craze all over the country for fancies and novelties, which seriously curtailed distribution of standard staple goods. More new fabrics were created, and in wider variety, than in any previous year.

Imports.—One of the most noteworthy developments of the year was the heavy increase in the value of imports. The total, including all textiles and raw textile materials, amounted to \$1,007,837,674, as against \$857,330,623 for 1922. Of last year's total, goods to the value of \$509,711,734 came in free of duty, compared with \$520,937,572 in the preceding year, while dutiable goods were valued at \$498,125,940, as against the 1922 total of \$36,393,051. Imports of cotton manufactures contributed \$100,154,179 to the aggregate value, whereas in 1922 they accounted for \$87,069,809. Cotton cloths brought in from foreign countries reached a value of \$47,188,033, against \$39,073,450 in the previous twelve months. The cotton cloth imports consisted of unbleached cloths valued at \$18,287,386, as compared with \$7,933,985 in 1922, and of unbleached cloths having a total value of \$3,696,394, against \$6,068,135. Colored, dyed, printed and woven-figured cottons were imported to the value of \$25,204,253, comparing with \$25,071,330 the year before, while laces and embroideries aggregated \$17,014,228, as against \$14,451,585. Imports of burlaps totaled 589,472,553 pounds, compared with 520,510,085 pounds in 1922, the values being \$66,971,479 and \$49,172,086, respectively. Notwithstanding the marked growth in the domestic production of artificial silk, imports of yarns, threads and filaments of that description amounted to 3,906,037 pounds valued at \$6,738,031, as compared with 2,087,775 pounds with a total value of \$3,908,710 in 1922. Raw wools of all kinds came in to the extent of 394,250,395 pounds, having a value of \$129,710,711, whereas in 1922 the total of such imports was 375,672,938 pounds valued at \$86,545,907. The total importation of raw silk last year was slightly less in volume than during 1922,

amounting to 49,505,581 pounds as compared with 50,711,826 pounds, but, owing to the higher prices prevailing in 1923, the total value was \$391,942,417, against \$365,787,406 in the preceding year. The value of silk manufactures also increased from \$37,377,445 in 1922 to \$44,345,758 in 1923. Imports of all kinds of broad silks, excepting pile fabrics, totaled 2,762,939 pounds valued at \$17,930,443, as compared with 2,649,965 pounds having a value of \$17,923,401 entered from January 1 to September 21 of 1922; it should be noted, however, that the latest figures of the Department of Commerce, available at the time of preparing this article, do not give complete returns for 1923, while some of the totals given for 1922 cover periods only up to September 21 of that year, or beginning September 22, so that no accurate comparison can be made. Imports of broad silks increased from all countries last year, as compared with 1922, both in volume and value, with the exception of Japan, which shipped to the United States a total of 1,741,563 pounds, against 1,873,672, in 1922, valued at \$12,026,765 and \$13,522,550, in the respective years. In view of the earthquake catastrophe in Japan last autumn, it is somewhat surprising to find such a small decrease in the amount of broad silks imported from that country last year, as compared with 1922.

Exports.—As in the case of imports, there was a marked gain last year over 1922, in the value of textiles and textile materials exported. The total value was \$1,002,041,446, against \$863,679,758 for the preceding year. Practically all of the increase was due to the higher prices obtained for raw cotton, since exports of nearly all textile fabrics showed decreases, either in quantity or value, while in numerous instances both volume and value fell off considerably. Exports of cotton manufactures, for example, totaled \$138,000,106 in value, against \$138,701,617 in 1922. Shipments of cotton cloths amounted to 464,293,759 square yards valued at \$79,312,802, while in the previous year the total exported, reached 587,492,532 and the value \$85,232,112. Exports of cotton duck, unbleached, bleached and colored, totaled 8,929,817 square yards with a value of \$4,064,770, as compared with 10,939,685 square yards valued at \$4,360,753 in 1922. There was a heavy drop in exports of unbleached cotton cloths, the total last year amounting to 103,286,881 square yards, against 177,172,182 in 1922, the aggregate value being \$13,731,328, compared with \$19,296,926 in the previous year. Shipments of unbleached cottons to various countries showed very striking decreases. In 1922 Turkey in Europe took 15,714,607 square yards valued at \$1,691,166, but last year exports to that country totaled only 3,929,582 square yards having a value of \$559,927. The falling off was much more pronounced in the case of China, which purchased only 910,445 square yards of unbleached cotton cloths here last year, valued at \$159,523, whereas in 1922 her imports of such goods from the United States totaled 12,422,944 square yards valued at \$1,483,118. Exports to Argentina fell from 12,219,299 square yards in 1922 to 4,906,878 in 1923, and total value from \$1,640,757 to \$773,863: there were substantial decreases also in shipments to other South American countries. Egypt's takings of unbleached cottons shrank from 3,837,691 square yards in 1922 to 111,332 last year, the total value falling from \$446,542 to \$21,497. Exports to the Philippines aggregated 3,974,760 square yards valued at \$580,374, against 10,085,528 square yards, with a value of \$1,141,269 in 1922. Shipments to British India fell from 2,023,094 to 881,985 square yards. There were a few increases, notably in exports to Cuba, which reached 4,753,698 square yards, against 2,365,540 in the preceding year. Total exports of bleached cottons amounted to 77,635,357 square yards valued at \$12,287,691, against 90,681,739 square yards, with a value of \$13,871,473 in the preceding twelve months. Printed cotton exports totaled 102,202,243 square yards, compared with 113,319,448 in 1922, the respective values being \$15,196,072 and \$14,802,468. The loss was pretty evenly distributed among our foreign customers but a few countries took a larger amount of such fabrics than in 1922. Exports to Cuba, the largest customer, for instance, amounting to 27,577,193 square yards and valued

at \$3,837,219, compared with 21,166,670 square yards at \$2,420,566 in the previous year. Argentina also took a somewhat larger volume of printed cottons than in 1922. Yarn or stock dyed cotton goods were exported to the extent of 72,662,000 square yards showing a value of \$14,353,149, as against 84,911,809 square yards and \$14,789,205 for the previous period. Hosiery exports increased materially, the total reaching 5,159,750 dozen pairs, against 4,792,604 in 1922, and the aggregate value amounting to \$10,525,183, compared with \$9,221,834. The heaviest decline occurred in shipments to the United Kingdom, while the principal gain was in exports to Cuba. Exports of underwear decreased from 1,698,053 dozens in 1922 to 1,238,195 last year. Shipments of broad silks to foreign countries fell from 3,033,120 yards in 1922 to 1,836,935 in 1923, the total value of such exports decreasing from \$3,869,618 to \$1,836,935. The value of wool manufactures exported last year was \$7,877,536 against \$6,067,400 in 1922.

Cotton Goods.—During the first three months of the year, primary markets for finished cotton goods were characterized by increasing demand and steadily rising prices. Trade then began to slacken and became extremely light in volume by the end of June. In the last half of the year there were occasional, though brief, periods of activity, but merchants, as a rule, covered only current or nearby needs, adopting a hand-to-mouth policy in buying, from which they seldom departed. An exception was found in the case of various seasonal lines which were offered and had to be purchased in advance in order to be assured of deliveries in time to meet requirements in distributive channels. The upward trend of prices, underway in the closing months of 1922, continued through the first quarter of last year. In the second quarter, the rising tendency was checked, and during the summer months sharp reductions were made to stimulate business, but owing to the rapidly mounting cost of raw cotton, manufacturers were later compelled to ask much higher prices for finished goods generally and encountered stubborn resistance from buyers.

Early in January, mills found it necessary to make further upward revisions in line with the higher prices of the staple and gray cloths. Prints were advanced to the basis of $10\frac{1}{4}$ cents a yard, net, for standards. Percales were priced at $14\frac{1}{2}$ cents for 4-4 64x60s light grounds and $15\frac{1}{4}$ cents for dark colored wide goods, representing increases of 1 cent and $\frac{3}{4}$ of a cent a yard, respectively. One well-known line of denims was raised to 23 cents for 2.20 white backs, and to 21 cents for double and twist, for March-May shipment; other 2.20 denims were marked up to $23\frac{1}{2}$ and $25\frac{1}{2}$ cents, and active buying developed for the overall and working-suit trades. Higher prices were named also on ticketed lines of 4-4 bleached goods. Cotton flannels were offered for autumn at prices much lower than had been expected, one of the leading lines of domets showing an increase of only $17\frac{1}{2}$ per cent. over prices named for the previous autumn; there was an active response from buyers of flannels, and some lines were quickly sold up and withdrawn. Demand for the latter, as well as for blankets and napped goods generally continued brisk during February. Corporation printers again advanced percales about $\frac{1}{2}$ a cent a yard, and the goods moved well on the higher basis. Merchants visited this center in large numbers to attend the International Silk Exposition and the annual convention of the National Retail Dry Goods Association, and operated freely on staple and fancy cottons and other textiles. Gingham for fall trade, especially, were taken in substantial volume, the continued rise in the staple impressing buyers, apparently, with the wisdom of providing for their probable needs, at least for a few months ahead. Sellers, however, became conservative in making commitments beyond June or July, except in the case of strictly fall goods. During March, additional lines of Southern gingham were opened for autumn at advances of 2 to 3 cents over prices that had been named for the spring of 1923. The Amoskeag Manufacturing Company, however, named prices for fall on the same basis as for spring and granted to jobbers seasonal (fall) dating, instead of the 2-10-60 terms, as

previously. Other Eastern gingham manufacturers opened fall lines at 1 cent advance over spring levels, but did not adopt the seasonal dating policy. In the latter part of March several large cotton goods mills withdrew their products from the market owing to sold-up conditions, and to a desire to check any tendency of customers to over-purchase at high levels; such lines included, among others, muslins, jeans, bleached shakers, staple cotton blankets, outing flannels, some sheetings and shirtings, and also brown cottons and colored goods. Further advances were announced on many lines, and additional goods were placed "at value." In both primary and secondary markets, demand for finished cottons continued broad and active until, toward the end of March, there began a seasonal falling off in the volume of purchases. A noteworthy development at that time was the action of various New England cotton mills in finally acceding to demands of their union workers by granting an increase of $12\frac{1}{2}$ per cent. in wages, affecting some 25,000 operatives, while a number of Southern mills raised wages about 10 per cent. It is quite probable that Eastern cotton goods mills would not have taken this step had it not been for the precedent set by the American Woolen Company in granting a similar advance in wages a short time before while cotton goods manufacturers were endeavoring to hold out against the demands of their union labor. During April, trade slowed up considerably, spring business with distributors being very backward owing to unseasonable weather. Demand became merely of a filling-in character.

May witnessed the naming of slightly lower prices on finished 4-4 bleached goods, reflecting an easier tendency of gray cloths. Having received only a limited amount of forward business, Fall River mills began to curtail. Due to poor retail business and to the approach of the inventory period, the volume of orders placed in primary markets steadily diminished, and activity in finishing plants slackened materially. June brought further curtailment by New England mills, and some Southern, as a result of lessened demand and narrow margins of profit, and in order to conserve supplies of raw cotton on hand. Primary merchants held prices firmly, but second-hands offered concessions on many lines that had moved slowly owing to unfavorable weather conditions. Late in June, leading selling agents, in an effort, apparently, to quicken trade, announced new price lists showing drastic cuts on numerous lines of branded bleached goods, wide sheetings and other cotton fabrics. A certain popular brand of 4-4 bleached muslin, for instance, was priced for delivery during July and August at $18\frac{1}{2}$ cents a yard, as against $20\frac{1}{2}$ cents named in March, while one line of bleached wide sheetings was offered at 65 cents for 10-4 goods, as compared with 72 cents previously.

In July, the Government's cotton crop forecast was not regarded by the goods trade as bullish, and the wide disparity between prices of spot and future cotton seemed to shake buyers' confidence in goods values, or at least to raise doubts in their minds as to what prices might prevail later on. Accordingly, they held off for further concessions, despite the fact that prices then current on many lines of goods were below existing replacement costs. Trade generally became decidedly inactive, virtually stagnant, and cotton goods markets in mid-summer were greatly unsettled by another reduction in bleached goods to the basis of $10\frac{1}{2}$ cents for 4-4 64x60s, unbranded. This development quite naturally made buyers hesitate and caused doubt as to the stability of prices then prevailing for percales, gingham and other cotton fabrics. Expectations of lower prices were soon realized, in some directions. Leading printers named new percale and print prices on the basis of $9\frac{1}{4}$ cents net for standard indigo prints and $12\frac{1}{2}$ cents net for standard white ground 4-4 64x60 percales, the latter representing a reduction of about $2\frac{1}{2}$ cents a yard from the previous open market levels. The new list was equivalent to a base price of 17 or 18 cent cotton, and at least 1 cent below the cost to printers at that time. The trade had not looked for such a heavy cut, which was evidently made in the hope of stabilizing the market. August showed a little improvement in trade, due

in a measure, to a sharp rise in raw cotton, but individual orders were small. Some bleached cottons were lifted $\frac{1}{4}$ cent a yard to bring them more in line with gray cloths. During September one of the leading manufacturers offered denims for October-November deliveries at prices unchanged from the basis of 23 cents for 2.20 white backs. Cotton goods generally began to show a recovery, although the largest gingham producer opened lines for the spring, 1924, season unchanged from the fall, 1923, prices, notwithstanding the fact that raw cotton was selling at 5 cents a pound higher and wages, in that company's mills, had been increased about 15 per cent. The response from gingham buyers was unsatisfactory, and subsequently the same producer reduced the price of one of its lines of dress ginghams 2 cents a yard to $15\frac{1}{2}$ cents, net, without much success so far as getting volume business was concerned, for eventually the company announced an indefinite closing of its cotton goods divisions in order not to accumulate stocks at high prices. October and November brought a marked increase in demand for seasonal lines. Orders were small, but fairly large in the aggregate, and quick shipments were invariably requested, the cooler weather stimulating actual consumption. In other cotton goods, especially staples, buying was light in volume and scattered, and confined almost entirely to immediate or nearby needs. Prices generally were advanced sharply, owing to the vigorous upturn in the staple. Some ginghams were advanced $\frac{1}{2}$ cent a yard, and various chambrays $\frac{1}{2}$ cent to $1\frac{1}{2}$ cents, while brown and bleached goods and other cottons were raised $\frac{1}{2}$ to $\frac{3}{4}$ cent a yard. In numerous instances, only stock goods were offered for sale, and many lines were withdrawn or placed "at value." Corporation printers advanced prints and percales to the basis of $14\frac{1}{2}$ cents for light grounds, 4-4 64 x 60s, although even that figure was said to be about 1 cent a yard below manufacturing costs. Conditions showed little, if any, change for the better in the closing months of the year. Mills were confronted with rapidly increasing cost of raw material and endeavored constantly to bring prices of finished cottons closer to parity with the staple; but buyers generally showed strong resistance to advances, and took only limited quantities of goods for well-defined needs.

The following table shows the opening, high, low and closing prices for 1923 on various standard cotton goods, and the final quotations for 1922:

DOMESTIC COTTON GOODS PRICES

	CENTS PER YARD				
	Open	High	Low	Closing	1922 Closing
Otis checks	18½	21	18½	21	18½
Newberry drill, standard	16	20	16	20	16

Unfinished Cottons.—Printcloths and gray goods were strong and active in the first quarter of 1923. Thereafter, primary markets became increasingly dull and reactionary, barring occasional spurts of buying in some lines and a partial recovery from the lowest price levels. The last half of the year was marked by extensive curtailment of production, due to the inability of mills to move goods at a profit. General resistance to price advances, which manufacturers were compelled to ask as raw cotton soared, was an outstanding feature.

Among selling agents and jobbers considerable optimism prevailed during the early months of the year. In January, business was of good volume in practically all descriptions of unfinished cottons, and prices rose steadily, though moderately, reflecting the upturn in the staple. Trade showed further expansion at rising prices during February and March as a result of steady demand from jobbing and manufacturing trades, following clearance sales and active operations on the part of many mills. Numerous contracts were placed calling for deliveries as far ahead as June, and substantial orders for cloths were booked to cover requirements in fall lines of finished cottons which had been purchased quite freely. Wage advances of 10 to 12½ per cent. announced by Northern and Southern mills served as a strengthening factor, and in March prices of both cotton and cotton cloths reached the highest levels of the first quarter. Production of unfinished and finished cotton goods generally reached capacity, and many mills found it necessary to run overtime. April and May, however, brought a rather sudden and decided change for the worse in cloth markets. Declines in raw cotton adversely affected prices and demand for printcloths and gray goods; trade fell off to such an extent that total sales by Fall River mills for the month of April scarcely equaled one week's full production. Buyers seemed to lose confidence in the stability of cloth prices even at lower levels and hesitated to make forward commitments. Owing to the falling off in business many New England manufacturers announced a curtailment program to begin in May, although Southern mills continued to run full or overtime. Continued unsettlement in the speculative cotton markets during May intensified the dullness of the preceding month in primary cloth centers. Unseasonably cold weather retarded distribution of finished light weight fabrics and in turn resulted in a lessened demand for fine-combed yarn cloths. The easier trend of prices was accentuated by offerings from second-hand dealers of certain convertibles, satcens and various constructions of sheetings at concessions amounting to ½ cent a yard or more below mills' prices. In June efforts to stimulate business failed. As orders ran out, curtailment increased in Eastern mills, and began in the South. Prices of printcloths, sheetings and many convertibles dropped to the lowest levels of the half year.

July added another chapter of declining prices and very limited demand, while raw cotton broke sharply. During that month prices of gray cloths showed further cuts ranging from ½ cent to 1 cent a yard. Yarns also were conspicuously weak, declining steadily with the slump in raw cotton. Meanwhile, the movement of finished goods continued slow, particularly staple wash fabrics. Conditions in distributive channels, therefore, furnished little, if any, incentive to purchase additional supplies of cloth. August brought a fairly general demand for printcloths and gray goods, and many gray cloths sold well below replacement costs; but higher levels were restored after surplus stocks had been liquidated. The death of President HARDING came as a great shock to cotton merchants, but retarded trade only temporarily. While there were heavy sales of printcloths, sheetings and fine

convertibles, practically all unfinished cloths in first hands shared in the improvement. Narrow printcloths advanced about $\frac{1}{2}$ cent a yard, and wide cloths 1 cent, although in the case of some constructions that had moved slowly there was hasty liquidation of spot merchandise. Fine-combed yarn fabrics became active for the first time in a number of months, sizable contracts being placed for shirtings, voiles, pongees and silk and cotton specialties in cantons. Drills sold freely; wide cloths were also taken in liberal quantities by automobile manufacturers for rubberizing.

Due largely to the Government's unexpectedly low report on the condition of the cotton crop, trading in cloth markets broadened considerably after Labor Day. Heavy goods, especially, sold in greater volume, and higher prices were obtained for duck, tire fabrics, wide drills and other cloths. Corporation printers bought printcloths cautiously, but converters and bleachers entered the market on a large scale at rising prices, while silk and cotton goods generally displayed increased activity following the Japanese earthquake. Such improvement, however, was short-lived. Although raw cotton had recovered and held well at higher prices in October, cloth traders began to lose confidence in the stability of prices for printcloths and gray goods, owing to the difficulty experienced by merchants in moving finished goods at satisfactory prices. Mills, too, had the same trouble, and rather than sell their output at unprofitable prices, many plants again curtailed production by adopting short-time schedules, or closing down entirely as orders were completed. November trade in cloths was somewhat better, compared with that of October, but, while raw cotton soared, there was no corresponding uplift in cloth prices. Purchasing of printcloths became quite brisk late in the month, though in many instances prices realized were below replacement costs. Fall River mills reduced production to about 40 per cent. of capacity. Some Southern mills stopped overtime work, and others curtailed operations. Generally speaking, Southern cotton goods manufacturers, apparently, had a better year, or at least enjoyed a larger and steadier trade than did Northern mills. During the last half of the year, especially, Southern producers were often able to sell finished and unfinished cottons at prices which Northern mills could not or would not consider. One possible explanation given was that Southern mills, at the beginning of the new cotton season, covered their raw cotton requirements to a large extent while prices for the staple were comparatively low, whereas Northern mills delayed purchases for one reason or another and eventually had to pay much higher prices for such cotton as they required. During November many cotton goods were withdrawn from markets because of unprofitable prices. Trading was extremely quiet in December. Erratic fluctuations of raw cotton were an unsettling factor and cloth prices generally showed a sagging tendency at the close of the year.

Silk Piece Goods.—Taken as a whole, 1923 was a fairly good year in the silk goods trade and industry, although it was probably more satisfactory to retailers and wholesalers than to manufacturers, so far as broad silks are concerned. For the entire year, according to statistics compiled by the Federal Reserve Bank of New York, sales of silk goods in department stores reached a total for the year 5.7 per cent. greater than that of the preceding twelve months, while wholesale trade showed an increase of 24 per cent. The larger retail houses enjoyed an exceptionally active trade in silks, especially during the summer and early autumn, and succeeded in moving substantial stocks. Unless their supplies and those of wholesalers represented to a considerable extent goods carried over from the previous year, it is difficult to explain how they acquired all the merchandise disposed of, because wholesalers did not purchase freely in primary markets, or at least not on a scale commensurate with the volume of goods moved at retail, and broad silk manufacturers, as a rule, did not operate at full capacity. In common with other branches of the textile industry, business with silk piece goods mills was brisk during the first quarter of the year, but thereafter diminished in volume, and from the beginning of September until the close of the year, conditions were greatly unsettled as a result, mainly, of the Japanese earthquake. That catastrophe left silk goods manufacturers in doubt regarding future supplies and prices of raw material, and forced them to withdraw their offerings of goods for a number of weeks, pending the receipt of reliable information upon which they could base future operations. When broad silks were again offered for sale, prices showed advances of 7 to 10 per cent. or more a yard over those that prevailed prior to the earthquake. Although the higher levels were not long maintained, the general impression created by the calamity in Japan seemed to be that silk goods had, in consequence, become so expensive as to be beyond the reach of the average consumer, and this state of mind was perhaps responsible in large measure for the slow trade during the latter part of the year.

Artificial Silk.—Another factor which evidently affected the silk trade and industry was the further marked expansion of the artificial silk business in this country. Some idea of this increase may be gained from the fact that total production of artificial silk yarn in the United States for 1923 approximated 35,380,000 pounds, representing an increase of about 47 per cent. over that of the preceding year. In addition to domestic production, imports of artificial silk yarn, threads and filaments reached about 3,905,000 pounds, of which, it is estimated, some 350,000 pounds were exported in finished products. The total consumption of such yarns in this country last year, therefore, is figured at 38,935,000 pounds, roughly, showing an increase of more than 12,000,000 pounds over 1922.

Raw Silk.—Conditions in the raw silk industry were generally satisfactory during the early part of the year. Trade was active and the outlook bright. Most merchants were optimistic for the future. Consumption of raw material steadily increased, reflecting expansion of mill output to meet the growing demand for silk goods, which received a further stimulus from the second International Silk Exposition held here in February. The absorption of raw silk continued on such a large scale that concern was felt over the matter of adequate supplies. During February, for instance, deliveries to American mills from stocks in New York warehouses exceeded 36,000 bales, an unprecedented monthly total, and predictions were freely made that a serious shortage would develop before the new season's silk crop could reach this market in the latter part of July or early August. Partly as a result of the heavy takings by mills, and partly in anticipation of insufficient supplies, prices of raw silk continued to advance until, by the end of April, Japan Filature Double Extra A reached about

\$9.80 a pound in the New York market, which was the peak of the upturn that began in the latter part of 1922. Finished goods prices, however, failed to keep pace with the rise in raw material. Furthermore, with the slackening of trade and industry in many lines toward the close of the fiscal year and thereafter, demand for silk piece goods began to subside, and trade soon fell to very lean proportions. Purchases of raw silk in turn decreased in volume, and by June fears of any real scarcity had been dissipated.

Prices of raw silks, accordingly, declined and the middle of August found quotations generally \$2.00 a pound, approximately, below the previous top. At the end of that month there was a noticeable change for the better in the situation and the outlook seemed to point to improved conditions during the remainder of the year. But the earthquake catastrophe in Japan on September 1 brought trading in raw silk markets virtually to a standstill for a while. As a result of that disaster, creating, as it did, fears that the silk industry in Japan had sustained tremendous losses from which it would take a long time to recover, prices soared to \$10 and \$12 a pound, although very few transactions actually took place at those levels. Subsequently it was learned that only about 33,000 bales of silk had been lost. Still there was a great deal of confusion and uncertainty as to the future, the belief being widespread that September and October shipments from Japan to this country would be extremely light. The Japanese, however, made every effort to expedite shipments. September arrivals in the United States proved to be much greater than expected, owing to the unusually large amount in transit when the earthquake occurred, and October shipments, instead of being about one-quarter or one-half of normal, actually exceeded the normal monthly receipts. But much of the silk that arrived was not up to the usual standards, especially with respect to grading and sizing—a natural result considering the circumstances under which such shipments had been made, and owing largely to this fact mills became cautious in making purchases. Prices of raw silk began to decline and continued to ease off with scarcely any rally, until by the end of the year the sensational advance, caused by the earthquake, had been entirely wiped out. Nevertheless unsettlement produced by the earthquake continued in evidence, and considerable depression prevailed throughout the trade here as the year closed.

The following statistics, taken from tables compiled by the Bureau of Foreign and Domestic Commerce, show the quantities of raw silk imported into the United States from the countries of origin, together with the foreign invoice values, during 1923 and 1922:

Countries	1923		1922	
	Pounds	Value	Pounds	Value
France	516,080	\$4,564,702	158,614	\$1,201,366

Woolens and Worsteds.—During the first six months primary markets were generally active and buoyant. Trade in both men's wear and women's wear fabrics was extraordinary brisk. New lines opened for the fall season showed less extensive advances than buyers had expected and were well patronized, many of the offerings being quickly sold up to the full extent of available productions. In the last half of the year, business became extremely dull, especially in the autumn months. Owing to various developments, there was a great deal of unsettlement, particularly in the garment and dress goods trades and industries, where adverse conditions materially reduced or cancelled earlier profits of many operators, and left others with actual losses. The largest manufacturers secured a satisfactory amount of business that kept their plants well engaged throughout the year. Numerous smaller producers, however, did not fare as well, and were obliged to curtail operations, in many instances, during the latter part of the year, the curtailment being more extensive in mills producing men's wear lines than in those making fabrics for women's wear. Interest, as usual, centered at different times throughout the year in the American Woolen Company's offerings of fabrics for the fall, 1923, and spring, 1924, seasons. Early in January that company opened men's and women's woolens and worsteds for the autumn trade. As anticipated in view of the higher costs of wool, prices were advanced, but the increases were more moderate than merchants generally had looked for. Compared with the opening in January of the preceding year, staple woolen overcoatings showed an average advance of 16 per cent., while new prices on upward of 50 staple worsted suitings averaged $12\frac{1}{4}$ per cent. higher than the previous year, and $4\frac{3}{4}$ per cent. above the July opening for the spring of 1923. In women's wear, pile fabrics for coatings were priced at levels 1.3 per cent. to $8\frac{1}{3}$ per cent. above those named for spring, 1923. The greatest increase was on one "key" number of Poiret twills, which was offered at \$2.15 a yard, against \$1.90 previously, an advance of $11\frac{3}{5}$ per cent. Men's wear fancy worsteds, piece dyes, mixtures and other fabrics for the fall season were priced at advances of 10 to 15 per cent. over those named a year previously. All of these lines met an active response from buyers, and the entire output of some offerings was quickly disposed of. Fall lines generally moved so well that by March the leading producer had sold up and withdrawn all such offerings, and some other manufacturers of worsted dress goods met with equal success and announced that they were not open for additional business. Overcoatings, especially fancy backs, were taken on a big scale. The American Woolen Company in March advanced wages $12\frac{1}{2}$ per cent. in all of its mills, effective April 30—a development which attracted much attention, and which, as events proved, compelled New England cotton goods mills to grant, in part at least, their operatives' demands for higher pay. A few weeks later the American announced an average advance of 11 per cent. in prices on all repeat orders.

In July and August, the largest producer opened men's wear staples for the spring, 1924, season at an average advance of 6.1 per cent. over the opening levels for the fall of 1923, and about 11 per cent. above those for the spring of 1923. Complete dress goods lines were also offered by the same interest for the spring, 1924, trade, and the new prices showed smaller increases than had been expected, ranging from 1 to about 6 per cent., and averaging approximately $5\frac{1}{2}$ per cent. over the opening for fall 1923, while men's wear fancy worsteds and other goods for the spring, 1924, season were priced 5 to 12 per cent. above the opening for the preceding spring. A few days after the new lines of spring dress goods were offered by the American Woolen Company they were sold up and withdrawn and the company found it necessary to allot production. Men's wear fabrics for spring, however, were relatively sluggish. In the autumn months, as previously stated, trade in dress goods, which had been unsatisfactory during the summer became decidedly unsettled. Among the factors which

brought about unfavorable conditions were apprehension that consumers would not buy freely at the higher levels, limited purchases by retailers, unseasonable weather, changing fashions and uncertainty as to what styles would be popular in the future, and a general disposition on the part of merchants to buy in a piecemeal way. For these reasons, and perhaps because many buyers made initial commitments for goods in excess of their requirements, cancellations of orders became numerous in the later months of the year, especially in dress goods lines, and curtailment of production by various manufacturers steadily increased.

During April, carpet and rug manufacturers generally offered new lines for the fall season. Prices of some descriptions remained unchanged, while others showed advances ranging from 5 to 8 per cent. over previous levels. There was a broad and active response from buyers all over the country and numerous lines were soon withdrawn from the market, having been sold up. Trade, however, slackened considerably during the summer and early autumn, with the result that in October one of the leading producers decided to hold an auction sale here in an effort to stimulate business by giving buyers an opportunity to purchase at their own prices. The sale attracted a large attendance of jobbers and retailers from all sections. Prices realized for rugs showed irregular changes from those previously ruling. The better grades of Carlton and Axminster rugs sold off 5 to 8 per cent. from the spring prices named to jobbers and 15 to 25 per cent. from the spring levels paid by retailers, while Wilton Velvets dropped about 15 per cent. below the 1923 spring quotations to jobbers. Tapestry rugs, on the other hand, showed advances of 3 to 8 per cent. over prices that had been paid by jobbers for such rugs for the spring requirements. Notwithstanding the lower prices which were established generally, the auction sale served to stabilize the market for floor coverings.

Burlaps.—Shipments of burlaps last year from Calcutta to the North American continent established a new high record. The total of 1,032,359,800 yards compared with 985,211,300 yards in 1922 and with the previous record of 1,008,518,000 yards in 1920. Consumption in this country was much larger than in former years, due mainly to the fact that abnormally high prices of cotton created many new outlets for jute goods, especially in the latter part of the year when cotton reached levels that almost prohibited its use in various trades and industries, and resulted in burlaps being substituted for cotton goods in many quarters. Business generally was slow in the early part of 1923, but conditions showed a marked change for the better in subsequent months, and the year as a whole proved to be a fairly prosperous one for most importers and dealers, although it is doubtful if many concerns made big profits in operations covering the full year. As the accompanying table discloses, prices last year moved within a comparatively narrow range.

Shipments of burlaps from Calcutta to the United States and Canada by months were:

	1923	1922
	<i>Yards</i>	<i>Yards</i>

TRANSACTIONS OF THE NEW YORK CLEARING HOUSE

Prepared from statistics furnished by WILLIAM J. GILPIN, *Manager*.

The New York Clearing House has been in operation seventy and a quarter years. Its aggregate transactions during that period ending December 31, 1923, amounted to \$4,535,964,452,942.78.

It was organized on the 11th of October, 1853, and at the present time consists of forty banks and trust companies. The Federal Reserve Bank of New York clears direct and six other banks and trust companies clear through some member institution.

The aggregate transactions since its organization to January 1, 1924, were as follows:

*The Comptroller's abstract of the reports of condition of National Banks from Dec. 31, 1917, to Aug. 31, 1918, inclusive, combined the New York, Brooklyn and nearby country banks; that is, eleven country banks and five Brooklyn banks were included under New York City. On Nov. 1, 1918, the Comptroller placed the eleven country banks in the State of New York classification, excluding them from the New York City figures.

*The Comptroller of the National Banks added eleven country banks and five Brooklyn banks to the New York City classification on Dec. 31, 1917, but with the "call" on November 1, 1918, the eleven country banks were dropped and reclassified. Only the State institutions of Manhattan are included in the above table:

*The Comptroller of the National Banks added eleven country banks and five Brooklyn banks to the New York City classification on December 31, 1917, but with the "call" on November 1, 1918, the eleven country banks were dropped and reclassified. Only the State institutions of Manhattan are included in the above table.

† Savings Banks in New York State have no capital stock.

‡ Includes County of New York and County of Kings.

Building lot association	1	1	24,222	24,286
Land bank of the States of New York....	1	1	2,132,360	3,091,733
Credit unions	101	106	6,837,031	8,506,265
Personal loan companies and brokers....	20	20	1,047,196	1,088,627
Total resources	1,094	1,131	\$8,747,927,645	\$9,604,176,136
Branches in this State	336	432		
Branches without the State	29	25		
Foreign bank agencies	45	45		

Total number of branches and institutions 1,554 1,636

The increase in the number of institutions and branches was from 1,072 in 1915 to 1,114 in 1916, to 1,146 in 1917, to 1,192 in 1918, to 1,335 in 1919, to 1,134 in 1920, and to 1,486 in 1921.

Including the national banks of this State, the combined resources of banking institutions under supervision is over thirteen and one-half billion dollars, not considering the resources of the private bankers and brokers not under supervision, especially those of international reputation.

MONTHLY BANK CLEARINGS

(From *Dun's Review*)

The following tables give the bank clearings for each month of the last three years:

TOTAL ALL

Month—	1923	1922	P. C.	1921	P. C.
Jan.	\$31,945,765,004	\$28,949,406,312	+20.7	\$31,575,737,930	+10.7
Feb.	29,827,365,014	25,999,179,330	+14.8	25,587,063,623	+16.6

July	828	1,218	1,021	409	10,701,300	17,225,857	14,438,577
Aug.	888	1,231	1,085	377	13,124,649	18,345,843	20,474,508
Sept.	863	1,049	1,014	398	11,462,277	16,537,937	19,949,946
Oct.	1,110	1,178	1,175	534	17,412,238	15,329,960	20,416,577
Nov.	1,131	1,230	1,415	667	17,193,748	18,741,023	23,370,389
Dec.	1,254	1,301	1,795	1,007	28,091,919	20,004,976	34,882,504

Analysis of the above statistics shows that 69.8 per cent. of last year's commercial defaults occurred among traders, while 26.5 per cent. represented manufacturers, and 3.7 per cent. agents, brokers, and other similar interests that cannot properly be classified as either manufacturing or trading. The respective percentages in 1922 were 71.5 for traders, 24.0 for manufacturers, and 4.5 for agents, brokers, etc. Hence, the manufacturing insolvencies alone had a higher ratio to the aggregate number last year, and this likewise is true of the liabilities. The proportion of the manufacturing indebtedness to the total involved by all failures was 52.2 per cent., against 24.4 per cent. in 1922, and the actual amount was \$66,000,000 above that of the earlier year. In contrast, the actual liabilities among traders and also among agents, brokers, etc., decreased appreciably, while the ratios likewise were lower, being 38.9 per cent. for traders, as compared with 43.5 per cent. in 1922, and 8.9 per cent. for "other commercial," against 22.1 per cent.

BANKING SUSPENSION IN UNITED STATES

(From *Dun's Review*)

Banking failures during calendar years in the United States are separated so as to show the different classes of banks; "all others" include state and private banks and trust companies.

	TOTAL		NATIONAL		ALL OTHERS	
	No.	Liabilities	No.	Liabilities	No.	Liabilities
1909.....	80	\$24,677,128	11	\$1,109,224	69	\$20,567,904

MONTHLY STOCK AND BOND SALES

(Commercial and Financial Chronicle Compilation)

VOLUME OF BUSINESS ON THE NEW YORK STOCK EXCHANGE

The activity in the security markets on the New York Stock Exchange is indicated by the table below, compiled from figures collected by the *Commercial and Financial Chronicle*. The table gives for each month the number of shares sold, the par value of the same, and the par value of bonds traded in.

(Three ciphers (000) omitted)

BOND SALES (Par Value)

		Number of Shares	Par Value Shares	R. R. and Miscel.	U. S. Govt.	State, Municipal and Foreign	Total Bonds
Jan., 1922	16,472	\$1,494,639	\$17,351	\$66,661	\$10,610	\$124,723

Jan., 1924.....	83.59	68.43	66.12	73.09	72.23

These indices are compiled from the yields of the average prices of the bonds for each day of the month, the average of yields for the ten bonds of each class being capitalized at 4 per cent. to give the index. Comparison of these indices will show the credit relation between the groups.

By dividing the indices shown above into four, the average yields for any month can be arrived at.

In the industrial group beginning with January, 1922, American Smelting & Refining 5s, 1917, International Paper 5s, 1947, and United States Rubber 5s, 1947, have been substituted for Central Leather 5s, 1925, Distillers' Securities 5s, 1927, and Virginia-Carolina Chemical 5s, 1923. These substitutions account for the violent change in the industrial index.

AVERAGE STOCK PRICES BY WEEKS IN 1923

THE WEEKLY MOVEMENT OF PRICES ON THE NEW YORK STOCK EXCHANGE

(Compiled from daily records made by the *Wall Street Journal* of the average price for 20 railroad stocks and for 20 industrial stocks. Weekly sales of stocks are from the *New York Times*)

Total		\$291,525,522
Grand total		\$23,286,636,845
Balance held by the Treasurer of the United States as per daily Treasury statement for December 30, 1922	537,861,121	
Add: Net excess of receipts over disbursements in December reports subsequently received	1,294,206	
		539,155,327
Net debt, including matured interest obligations, etc.¶		\$22,747,481,517

‡Amounts issued of Treasury (War) Savings Certificates of the Series of 1918, 1919, 1920 and 1921 are on basis of reports of sales, taken at issue price; amounts retired are on basis of redemption value. Amounts issued and amounts outstanding of Treasury Savings Certificates, Issue of December 15, 1921, Series of 1921 and 1922 and Issue of September 30, 1922, Series of 1922 and 1923, are on basis of net redemption value, partly estimated, and for the Issue of December 15, 1921, include receipts from Sales of Treasury Savings Stamps. Amounts shown for Series of 1923 represent advance exchanges, as of January 1, 1923, for War Savings Certificates of the Series of 1918.

§The total gross debt December 31, 1922, on the basis of daily Treasury statements was \$22,986,318,018.09, and the net amount of public debt redemptions and receipts in transit, etc., was \$8,793,305.

§Accrued discount calculated on basis of exact accrual at rate of 4 per cent. per annum compounded quarterly, with due allowance for cash redemptions to date.

¶No deduction is made on account of obligations of foreign governments or other investments. Issues of Soldiers' and Sailors' Civil Relief Bonds not included in the above. Total issue to December 31, 1922, was \$195,500, of which \$147,200 has been retired.

¶Includes \$240,418,350 Victory Notes 3¾% and 4¾% called notes shown under "Matured debt on which interest has ceased."

**This amount represents the receipts by the Treasurer of the United States on account of principal of Treasury Bonds of 1947-52 to December 31, 1922.

*The form of circulation statement was revised as of July 1, 1922, so as to exclude from money in circulation all forms of money held by the Federal reserve agents and Federal reserve banks whether as reserve against Federal reserve notes or otherwise. This change did not affect figures for money in circulation prior to the establishment of the Federal reserve system. For the sake of comparability the figures for 1915 to 1922, inclusive, have been compiled on this statement in the same manner as those of July 1, 1922.

The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from these totals before combining them with total money outside of the Treasury to arrive at stock of money in the United States.

CIRCULATION STATEMENT OF UNITED STATES MONEY, JANUARY 1, 1924

Kind of Money	MONEY HELD IN THE TREASURY				MONEY OUTSIDE OF THE TREASURY				Population of Continental United States (estimated)	
	Amount Held in Trust		Reserve Against		Held by Federal Reserve Banks		In Circulation			
	Against Gold and Silver Certificates	United States Notes and Treasury Notes (of 1890)	Notes of 1890	Notes of 1890	Total	Against* Reserve Banks	Amount	Per Capita

*Includes United States paper currency in circulation in foreign countries and the amount held by the Cuban agencies of the Federal Reserve banks.

†Does not include gold bullion or foreign coin outside of vaults of the Treasury. Federal Reserve banks, and Federal Reserve agents.

‡These amounts are not included in the total, since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

§The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.

¶This includes \$18,738,390 of notes in process of redemption, \$186,446,905 of gold deposited for redemption of Federal Reserve notes, \$11,389,261 deposited for redemption of National bank notes, \$13,410 deposited for retirement of additional circulation (Act of May 30, 1908), and \$6,601,936 deposited as a reserve against postal savings deposits.

**Includes money held by the Cuban agencies of the Federal Reserve banks of Boston and Atlanta.

NOTE.—Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of \$152,979,025.63 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars, held in the Treasury. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold or gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act. Federal Reserve banks must maintain a gold reserve of at least 40 per cent, including the gold redemption fund, which must be deposited with the United States Treasurer, against Federal Reserve notes in actual circulation. Federal Reserve bank notes and National bank notes are secured by the United States Government obligations, and a 5 per cent. fund for their redemption is required to be maintained with the Treasurer of the United States in gold or lawful money.

THE STATISTICAL RECORD OF 1923

(From the *Wall Street Journal*, January 1, 1924)

The statistical showing of the year as a whole is summarized in the following figures:

	1923	1922	1921
Railroad, gross†	\$6,396,000,000	\$5,617,252,656	\$5,516,566,455
Railroad, ‡	982,000,000	776,665,960	600,888,351
Revenue tons, 1 mile*	417,000,000	359,730,600	306,736,765

ber 1. †† Individual deposits. ‡‡ Ordinary. ††† Includes sugar farm property. †††† Includes sugar from United States islands. ††††† Production of year immedi-
ately preceding that named. Note—Circulation statements of 1922 are those of new form adopted July 1, 1922, a July 1, 1923.

WHOLESALE PRICES OF PLUMBING FIXTURES

Wholesale prices of standard plumbing fixtures for a six-room house have been collected by the Department of Commerce from reports of twelve representative manufacturers and wholesalers. The average price reported by these firms on six standard fixtures, net to retailer, without freight, are given below for 1913 and for each month of 1923, together with an index number based on 1913 as 100, representing the relation of the aggregate price of the six fixtures for any month to their 1913 prices:

	<i>Bath Tubs</i>	<i>Wash- stands</i>	<i>Water- Closets</i>	<i>Sinks</i>	<i>Laundry Tubs</i>	<i>Range Boilers</i>	<i>Total</i>	<i>Index (relative 1913)</i>
1913 average	\$16.49	\$8.61	\$15.69	\$11.73	\$8.13	\$6.93	\$67.55	100.0

Dec.	217.3	192.6	167.8	251.6	206.9	194.8	167.1	167.2	107.1	86.5
Aver.	216.1	174.5	201.8	251.3	198.4	189.2	181.2	147.4	92.6	88.6

The above index numbers are based on the costs of steel (structural shapes, Pittsburgh base), cement (f. o. b. Chicago, exclusive of bags), lumber (Southern pine, New York base), and the average rates paid common labor in the building industry as obtained from the prevailing rates in 20 representative cities. From 1913 to 1920, inclusive, the rates paid common labor in the steel industry were used. The prices are weighted on the basis of the total production of steel, cement and lumber, and the total supply of common labor as follows: Steel, 37.50 per cent.; lumber, 17.10 per cent.; cement, 7.14 per cent., and labor, 38 per cent.

AMERICAN SHIPPING ON JUNE 30, 1923

(From Report of the Commissioner on Navigation)

On June 30, 1923, the merchant marine of the United States, including all kinds of documented vessels, comprised 27,017 vessels of 18,284,734 gross tons, of which 2,623 seagoing vessels of 12,009,984 gross tons were 1,000 tons or over, compared with 27,358 vessels of 18,162,965 gross tons on June 30, 1922. Following is an analysis of the ownership of seagoing tonnage compared with one year ago:

	PRIVATE OWNERSHIP (500 TONS AND OVER)					
	Steel		Wood		Total	
	Number	Gross Tons	Number	Gross Tons	Number	Gross Tons
1922	1,075	4,640,345	858	1,023,978	1,933	5,664,322
1923	1,202	5,213,639	833	998,908	2,035	6,212,547

	UNITED STATES SHIPPING BOARD (1,000 GROSS TONS AND OVER)					
	Steel		Wood		Total	
	Number	Gross Tons	Number	Gross Tons	Number	Gross Tons
1922	1,165	7,034,296	246	652,677	1,711	7,686,973
1923	1,313	6,370,777	185	490,464	1,498	6,861,241

The decrease of 825,732 in the Shipping Board tonnage is due to the sale to private American owners of 134 steel vessels of 618,210 gross tons, 2 wooden steamers of 5,696 gross tons, and 3 wooden sail vessels of 5,588 gross tons. In addition, 53 wooden steam vessels of 140,334 gross tons were scrapped, 19 vessels of 86,849 gross tons sold to aliens, and 3 of 19,559 transferred to the United States. The apparent discrepancy between the total of these items and the figures in the above table is due to readjustment of tonnage by readmeasurement, there having been up to July 1 last 658 of these readmeasurements.

Of this tonnage on June 30 last 1,958 vessels of 500 gross tons and over of 5,411,892 gross tons were engaged in the foreign trade and 1,575 vessels of 4,661,896 gross tons were in the coasting trade. These trades are itemized as follows:

*It should be noted that the Rochester index numbers, which have been adjusted to the January, 1915, base in order that the figures for a given month may be compared for the three cities. For this purpose it was assumed by the Bureau of Statistics and Information of the New York State Department of Labor that the increase in Rochester from January, 1915, to May, 1916, was 6 per cent.—the same as for the country as a whole or the average increase for New York City and Buffalo.

*This table contains for certain months of 1922 and 1923 the index numbers of production in basic industries which are shown in the chart at the bottom of page 79, together with the series of relatives used in constructing the index. In making the final index the relatives are adjusted to allow for seasonal fluctuations and are weighted. The method of construction was described in detail and all relatives for each series since January, 1913, were published on pages 114-141 of the *Federal Reserve Bulletin* for December, 1922.

†Revised.

‡Industry relatives and general index for February, 1924, given an additional adjustment to allow for 20th day.

§Revised.

*This table contains for certain months of 1922 and 1923 the index numbers of employment, together with group indexes for its important industrial components. The general index is a weighted average of relatives for 33 individual industries. The method of construction was described in detail, and indexes for the above groups since January, 1919, were published on pages 1272-1279 of the *Federal Reserve Bulletin* for December, 1923.

†Revised.

‡Preliminary.

COMPARISON OF EMPLOYMENT IN IDENTICAL ESTABLISHMENTS DURING ONE WEEK EACH IN JANUARY AND FEBRUARY, 1924

(From *Monthly Labor Review* of United States Department of Labor)

Industry	Es- tablish- ments	NUMBER ON PAYROLL		P. C. of Change	AMOUNT OF PAYROLL		P. C. of Change
		Jan., 1924	Feb., 1924		Jan., 1924	Feb., 1924

RETAIL PRICES OF GAS IN LEADING CITIES

(From *Monthly Labor Review*)

The following table shows for 51 cities the net price for the first 1,000 cubic feet of gas used for household purposes. Prices are, in most cases, for manufactured gas, but prices for natural gas have also been quoted for those cities where it is in general use. For Buffalo and Los Angeles prices are given for natural and manufactured gas, mixed. The prices shown do not include any extra charge for service.

NET PRICE FOR THE FIRST 1,000 CUBIC FEET OF GAS, FOR HOUSEHOLD USE, ON APRIL 15 OF EACH YEAR, 1913 TO 1920, AND ON MAY 15, 1921, MARCH 15 AND DECEMBER 15, 1922; MARCH 15, JUNE 15, SEPTEMBER 15 AND DECEMBER 15, 1923, AND MARCH 15, 1924, BY CITIES.

INDEX NUMBERS OF WHOLESALE PRICES BY YEARS

(From Monthly Labor Review)

To meet the demand for index numbers of wholesale prices for years prior to 1913, comparable with the revised figures for years and months since 1913 recently computed by the United States Department of Labor through the Bureau of Labor Statistics, the following table is presented. While the results here shown for earlier years are necessarily based on a smaller number of commodities than the data for recent years, the figures are believed to furnish a reliable barometer of wholesale price changes in general over the period stated.

Revised Index Numbers of Wholesale Prices, by Years, 1890 to 1922

(1913=100)

Year	Farm Products	Foods	Cloths and Clothing	Fuel and Light	Metals and Metal Products	Buildg. and Mat'ls	Chemicals and Drugs	Household Furnishings	Miscellaneous	All Com.
1890.....	70	86	95	62	116	52	91	88	99	81
1891.....	75	85	91	60	102	78	92	89	97	80
1892.....	68	79	91	57	92	74	93	85	91	75
1893.....	71	85	90	58	85	73	91	85	92	77
1894.....	61	75	79	56	72	70	82	80	88	69
1895.....	61	74	77	66	77	68	81	77	93	70
1896.....	55	69	76	65	78	68	81	77	92	67
1897.....	59	71	75	55	72	66	88	75	93	67

PROF. IRVING FISHER'S INDEX NUMBERS

The table below traces, week by week, through 1923, the average movement of prices and of the purchasing power of the dollar, both relatively to the pre-war year 1913 as 100. (Thus, in January, 1923, prices averaged 56 per cent. above the pre-war level, making the dollar worth 61.1 pre-war cents.)

The calculations are based on the prices of 200 representative commodities compiled by *Dun's Weekly Review*. The "weights" used are based on the data of the War Industries Board and the United States Census. A fuller description is given in the Quarterly Publications of the American Statistical Association, September, 1923.

Crump's *London Financial Times* Index for England is for 73 commodities.

July 18.....	151.9

*For May, 1920, the figure is that of the United States Bureau of Labor Statistics.

†For April, 1920.

‡For January, 1922, the figure is that of the United States Bureau of Labor Statistics.

§For September, 1922.

(Each week for the American index number ends Friday noon and is allocated to the month in which most of its days are. Crump's week ends two days earlier—after the fourth week in July, before which it ended one day later. His figure for the fifth week in July is for three days only, July 30 and 31 and August 1).

WHAT THINGS COST

(From Daily Table of *New York Tribune*, June 30, 1924)

Quotations Are Cash Prices in Primary Markets

Commodities and Unit	Monday	Previous Day	Month Ago	Year Ago

RETAIL PRICES OF FOOD

Index Number Showing the Trend in the Retail Cost of Food in the United States, by Years, 1890 to 1922

(From *Monthly Labor Review*, United States Bureau of Labor Statistics)

The following table shows by index numbers the trend in the retail cost of food in the United States from 1890 to 1922. The percentage decrease in the cost from 1920 to 1922 was 25 per cent., while the percentage of increase from 1890 to 1922 was 119 per cent. This percentage means that the cost of food in 1922 was more than twice as much as it was in 1890.

(Average for year 1913=100)

Year	Relative Price	Year	Relative Price	Year	Relative Price	Year	Relative Price
1891.....	71	1899.....	68	1908.....	84	1917.....	146
1890.....	70	1900.....	69	1909.....	89	1918.....	163
1892.....	69	1901.....	72	1910.....	93	1919.....	186
1893.....	71	1902.....	75	1911.....	92	1920.....	203
1894.....	68	1903.....	75	1912.....	98	1921.....	153
1895.....	67	1904.....	76	1913.....	100	1922.....	142
1896.....	65	1905.....	76	1914.....	102	1932.....	146
1897.....	65	1906.....	79	1915.....	101		
1898.....	67	1907.....	82	1916.....	114		

The number of articles included in the index number for each year has not been the same throughout the period, but a sufficient number have been used fairly to represent food as a whole. From 1890 to 1907, 30 articles were used; from 1907 to 1913, 15 articles; from 1913 to 1920, 22 articles and for the years 1921 and 1922, 43 articles. The relatives for the period have been so computed as to be comparable with each other.

RATES OF WAGES IN THE BUILDING TRADES OF NEW YORK CITY

The following daily wage scales in the building trades in New York City were compiled by the Building Trades Employers' Association of the City of New York.

The schedule represents the wages paid during the year 1923 and the dates upon which increases became effective; also the 1924 rates and the increases up to March 24.

	Wage Rates Per Day				Wage Rates Per Day			
	1923				1924			
Art glass workers	\$8.00	\$9.00	July	9	\$9.00			
Asbestos workers and insulators..	9.00	10.00	June	8	10.50	Jan.	1	
Asbestos workers' and insulators' helpers	7.00	8.00	June	8	8.00			
Bricklayers	10.00	12.00	June	21	12.00			
Bricklayers' helpers	7.00	8.00	May	1	8.00			
Carpenters	9.00	10.00	June	1	10.50	Jan.	1	
Dock builders	8.00	9.00	July	15	9.00			
Cement masons	9.00	10.00	June	1	10.50	Jan.	1	
Cement and concrete workers (laborers)	6.50	7.50	July	16	7.50			
Composition roofers and water-proofer	8.00	9.00	June	1	9.50	Feb.	1	
Derrickmen and riggers	8.00	9.00	May	9	9.50			
Electrical workers	9.00	10.00	June	1	10.00; \$10.50	May	1	
Electrical workers' helpers	5.50	6.50	June	1	6.50; 7.00	May	1	
Elevator constructors	9.00	10.00	June	1	10.50	Jan.	1	
Elevator constructors' helpers	7.00	8.00	June	1	8.00			
Glaziers	9.00	10.00	June	25	10.00			
Hoisting engineers	10.00				12.00	Jan.	1	
Housesmiths (structural)	9.00	10.00	May	24	10.50	Feb.	1	
Housesmiths' finishers	9.00	10.00	June	1	10.50	Feb.	1	
Housesmiths' finishers' helpers	7.00	8.00	June	1	8.00			
Housesmiths and sheathpilers	9.00	10.00	July	15	10.00			
Marble cutters and setters	9.00	10.00	May	1	\$10.50	Oct.	22	
Marble carvers	10.00	12.00	May	1	12.00			
Marble polishers, bedrubbers and sawyers	8.50	9.50	May	1	9.50; \$10.00	Mar.	15	
Marble helpers, etc.	7.00	8.00	May	1	8.00			
Mosaic and terrazzo workers.....	9.00	10.00	Oct	1	10.00			
Mosaic and terrazzo workers' helpers	7.00	8.00	Oct.	1	8.00			
Metallic lathers	9.00	10.00	June	1	10.50	Jan.	1	
Painters and Decorators	9.00	10.00	June	1	10.50	Jan.	21	
Plasterers	10.00	12.00	May	1	12.00			
Plasterers' laborers	7.50	8.50	May	1	8.50			
Plumbers and gas-fitters	9.00	10.00	May	1	10.50	Mar.	1	
Roofers and sheet metal workers..	9.00	10.00	June	1	10.50	Jan.	1	
Slate roofers	9.00	10.00	June	1	10.50	Jan.	1	
Steam and hot water fitters.....	9.00	10.00	June	1	10.50	Jan.	1	
Steam and hot water fitters' helpers	7.00	8.00	June	1	8.00			
Stone cutters	9.00	10.00	May	9	10.00			
Stone planermen	8.00	9.00	May	9	9.00			
Stone bed rubbers, large side.....	8.00	9.00	May	9	9.00			
Stone bed rubbers, rear side.....	6.90	8.00	May	9	8.00			
Stone circular, diamond and gang sawyers	6.60	7.45	May	9	7.45			
Stone crane operators	6.25	7.10	May	9	7.10			
Stone handrubbers and helpers.....	6.00	6.80	May	9	6.80			
Stone masons	10.00	12.00	June	21	12.00			
Stone setters	10.00	12.00	April	27	12.00			
Tile layers	9.00	10.00	June	15	10.50	Jan.	1	
Tile layers' helpers	7.00				8.00	Jan.	1	

STATISTICAL STORY OF 1923

(From *Bradstreet's*)

AGRICULTURAL YIELDS

Exports of silver (11 mos.)	\$62,947,706	Inc. 12.6	\$208,426,260	1919
Imports of silver (11 mos.)	\$66,281,229	Inc. 5.3	\$83,434,399	1920

STATISTICAL STORY OF 1923—Continued

FINANCE AND INDUSTRY

(From *Bradstreet's*)

	<i>Yields, 1923</i>	<i>Change from 1922</i>	<i>Past Records</i>	<i>Year</i>
Circulation December 1, total.....	\$4,923,157,751	Inc. 6.6	\$6,363,498,999	1920
Circulation per capita	\$41.01	Inc. 5.2	\$59.41	1920
Gold produced, value	\$51,378,700	Inc. 5.1	\$101,035,700	1915
Silver produced, ounces	72,611,200	Inc. 29.0	71,961,075	1915
New York stock sales, shares	237,276,927	Dec. 9.0	312,875,250	1919
New York bond sales, value.....	\$2,753,506,630	Dec. 32.8	\$1,098,696,027	1922
Municipal bond sales	\$1,075,000,000	Dec. 16.0	\$1,383,368,900	1921
New domestic securities issued	\$3,601,438,300	Inc. 5.2	\$3,123,948,320	1922
Business failures, number	19,163	Dec. 14.5	22,415	1922
Failure liabilities	\$631,291,087	Dec. 2.8	\$755,777,655	1921
Fire losses (estimated)	\$393,000,000	Dec. 4.3	\$410,889,350	1922
Car loadings, (estimated)	49,814,970	Inc. 15.3	45,861,308	1920
Railway gross earnings (estimated)	\$6,396,000,000	Inc. 13.8	\$6,225,417,245	1920
Railway net operating income (estimated)	\$982,000,000	Inc. 26.4	\$1,058,505,501	1916
Price Index (<i>Bradstreet's</i>) annual number	\$13,4028	Inc. 10.5	\$18,8095	1920
Incorporations in Eastern states	\$8,415,105,719	Inc. .2	\$14,999,044,200	1920
Wheat exports (11 mos.)	\$110,980,004	Dec. 42.9	\$535,431,999	1920
Wheat flour exports (11 mos.)	\$79,065,163	Inc. 2.5	\$279,120,060	1919
Wheat (including flour) exports (11 mos.)	\$190,045,167	Dec. 30.0	\$719,737,357	1920
Grains and preparation of exports (11 m.)	\$290,924,108	Dec. 38.0	\$982,832,000	1920
Copper and mfrs. of exports (10 mos.)....	\$105,901,933	Inc. 20.3	\$300,613,617	1917
Cotton, raw exports (11 mos.)	\$658,865,656	Inc. 10.9	\$1,044,023,523	1920
Meat and dairy product exports (11 mos.)	\$302,647,247	Inc. 20.0	\$1,097,411,000	1919
Coal and coke exports (11 mos.)	\$156,429,398	Inc. 93.0	\$332,157,922	1920
Cotton manufactures exports (11 mos.)....	\$127,404,880	Inc. .1	\$378,488,489	1920
Leather and manufactures exports (10 m.)	\$54,113,020	Inc. 6.6	\$254,047,141	1919
Petroleum, ref. & crude, exports (11 mos.)	\$321,441,924	Inc. 5.5	\$186,966,000	1920
Building expenditure 175 cities (estimated)	\$3,100,000,000	Inc. 23.2	\$2,515,000,000	1922
Lumber production, board feet (estimated)	38,000,000,000	Inc. 8.5	45,000,000,000	1907
Iron ore shipments by lake, tons	59,036,704	Inc. 38.5	61,734,198	1916
Freight traffic Soo canals, tons	91,379,658	Inc. 38.3	91,888,219	1916
Unfilled steel orders, tons, Nov. 30.....	4,368,584	Dec. 36.1	12,183,083	1917
Cotton consumption (11 mos.), bales.....	6,051,418	Inc. 8.8	6,314,137	1917
Electric power output, kilowatt hours.....	56,000,000,000	Inc. 17.3	47,716,668,000	1922
Pig iron production, tons	10,059,254	Inc. 49.0	39,039,356	1916
Automobile production, number (estimated)	4,011,000	Inc. 50.9	2,659,065	1922
Cement production, barrels (11 mos.)	126,969,000	Inc. 20.0	105,199,000	1922
Steel ingot production, tons (estimated) ..	43,226,955	Inc. 25.0	43,619,200	1917
Bituminous coal produced, tons (estimated) ..	545,300,000	Inc. 29.1	579,386,000	1918
Anthracite coal produced, tons (estimated) ..	95,441,000	Inc. 74.5	99,612,000	1917
Anthracite coal shipments, tons (estimated) ..	72,700,000	Inc. 78.1	78,156,160	1917
Alien immigrants arrived (fiscal year)....	522,919	Inc. 68.9	1,218,480	1914
Wheat (inc. flour) repts. (prim.) cereal season	533,106,000	Inc. 5.8	507,216,000	1919
Petroleum production, barrels (estimated) ..	735,000,000	Inc. 32.2	556,531,000	1922
Copper, refinery production, pounds.....	2,248,000,000	Inc. 49.3	2,432,000,000	1918
Mail order sales, two houses	\$350,185,047	Inc. 27.7	\$366,928,581	1920
Chain store sales, eight houses	\$433,407,466	Inc. 17.3	\$369,450,881	1922
Total mail orders and chain stores sales..	\$801,633,172	Inc. 21.7	\$658,604,260	1922

*The ordinary business of 6 companies reporting Industrial Insurance and the 11 companies reporting Group Insurance is included in the Ordinary Insurance column.

†The data above includes new business that has been paid for, exclusive of revivals, increases and dividend additions.

The 40 companies whose new business is included in this table had in force 77 per cent. of the total legal reserve life insurance outstanding in the United States as of December 31, 1922.

PRODUCTION OF ELECTRICITY

The annual production of electricity and consumption of fuel by public utility plants in the United States for the period of record is shown in the following table compiled by the Geological Survey:

(Three figures omitted)

	Water Power <i>kwc.-hrs.</i>	Fuel Power <i>kwc.-hrs.</i>	Total <i>kwc.-hrs.</i>	Change from Prev. Yr. Per Ct.
1919	14,606,000	24,315,000	38,921,000
1920	16,545,000	27,459,000	44,004,000	+13.1
1921	14,924,000	26,005,000	40,929,000	-7.0
1922	17,272,538	30,451,598	47,723,956
1923	19,612,070	36,328,237	55,941,207

The following is a table of monthly production of electricity by public utility plants:

	1922			1923		
	Water Power <i>kwc.-hrs.</i>	Fuel Power <i>kwc.-hrs.</i>	Total <i>kwc.-hrs.</i>	Water Power <i>kwc.-hrs.</i>	Fuel Power <i>kwc.-hrs.</i>	Total <i>kwc.-hrs.</i>

SUMMARY OF STATISTICS OF THE COPPER INDUSTRY IN THE UNITED STATES, 1913 AND 1918-1922

(United States Geological Survey)

	1913	1918	1919
Production of copper:			
Smelter output.....lbs.	1,224,484,098	1,908,533,595	1,286,419,329
Mine production.....lbs.	1,233,569,727	1,910,533,595	1,286,419,329
Mine production.....lbs.	1,233,569,727	1,910,022,841	1,212,334,041
Electrolytic.....lbs.	1,022,497,601	1,560,327,422	1,233,994,324
Lake.....lbs.	155,715,286	231,096,158	177,594,135
Casting and pig.....lbs.	58,611,026	91,450,611	21,897,336
Total domestic.....lbs.	1,236,823,913	1,882,874,191	1,433,485,795
Total domestic and foreign.....lbs.	1,615,067,782	2,432,385,290	1,805,306,801
Total new and old copper.....lbs.	1,888,000,000	3,138,000,000	2,380,000,000
Ore produced:			
Copper ore.....short tons	36,336,682	62,289,069	36,121,622
Average yield of copper.....per cent.	1.67	1.51	1.65
Average cost per lb. of copper produced.....cts.	10.24	14.49	15.25
Other ore-yielding copper.....short tons	24,419	15,698	17,632
Average price per lb.....cts.	15.5	24.7	18.6
Imports (unmanufactured).....lbs.	408,778,954	575,805,115	429,387,594
Exports of metallic copper*.....lbs.	926,241,032	744,243,481	515,595,019
Withdrawn from total supply on domestic account:			
Total new copper.....lbs.	812,268,639	1,661,669,576	914,471,572
Total new and old copper.....lbs.	1,085,000,000	2,367,000,000	1,489,000,000
Stocks of refined copper†.....lbs.	90,383,402	180,000,000	631,000,000
Stocks of blister and materials in solution‡.....lbs.	247,789,811	562,600,000	273,000,000
World's production.....lbs.	2,181,253,000	3,148,499,000	2,474,000,000
Value of production in the United States.....lbs.	\$189,793,035	\$171,408,000	\$239,274,000
1920 1921 1922			
Production of copper:			
Smelter output.....lbs.	1,209,061,040	505,586,098	950,285,947
Mine production.....lbs.	1,224,350,151	166,190,833	964,583,894
Refinery production of new copper—			
Electrolytic.....lbs.	1,010,240,867	506,532,984	766,944,836
Lake.....lbs.	153,483,952	100,918,001	122,545,126
Casting and pig.....lbs.	18,698,421	1,963,271	15,180,723
Total domestic.....lbs.	1,182,423,240	609,414,256	904,670,685
Total domestic and foreign.....lbs.	1,634,908,644	1,020,027,096	1,358,659,101
Total new and old copper.....lbs.	2,260,000,000	1,455,000,000	2,030,000,000
Ore produced:			
Copper ore.....short tons	36,765,370	13,396,382	26,893,247
Average yield of copper.....per cent.	1.63	1.70	1.74
Average cost per lb. of copper produced.....cts.	14.91	‡	‡
Other ore-yielding copper.....short tons	26,890	14,248	52,370
Average price per lb.....cts.	18.4	12.9	13.5
Imports (unmanufactured).....lbs.	485,670,691	350,472,611	541,013,220
Exports of metallic copper*.....lbs.	623,158,489	628,415,714	742,755,957
Withdrawn from total supply on domestic account:			
Total new copper.....lbs.	1,053,838,558	610,988,744	896,633,833
Total new and old copper.....lbs.	1,679,000,000	1,046,000,000	1,568,000,000
Stocks of refined copper†.....lbs.	659,000,000	459,000,000	216,000,000
Stocks of blister and materials in solution‡.....lbs.	465,000,000	283,000,000	361,000,000
World's production.....lbs.	‡	‡	‡
Value of production in the United States.....	\$222,467,000	\$65,221,000	\$128,289,000

*Total exports of copper, exclusive of ore, concentrates and composition metal.

†At the end of the year.

CONSUMPTION OF COPPER

(United States Geological Survey)

The refined new copper withdrawn from the total year's supply on domestic account in 1922 was 897,000,000 pounds; in 1921 it was 611,000,000 pounds. The method employed in determining the quantity of copper retained for consumption is shown in the following table, which does not include stocks of copper held by consumers.

NEW REFINED COPPER WITHDRAWN FROM TOTAL YEARS SUPPLY ON DOMESTIC ACCOUNT,* 1913 AND 1918-1922, IN POUNDS

	1913	1918	1919
Total supply of new copper	1,615,067,782	2,432,385,290	1,805,306,801
Stock at beginning of year	105,497,683	114,000,000	180,000,000
Total available supply	1,720,565,465	2,546,385,290	1,985,306,801
Copper exported†	817,911,424	704,715,714	439,835,229
Stock at end of year	90,385,402	180,000,000	631,000,000
Total withdrawn from supply	908,296,826	884,715,714	1,070,835,229
Withdrawn on domestic account	812,268,639	1,661,669,576	914,471,572
	1920	1921	1922
Total supply of new copper	1,634,908,644	1,020,027,096	1,358,659,101
Stock at beginning of year	631,000,000	659,000,000	495,000,000
Total available supply	2,265,908,644	1,679,027,096	1,817,659,101
Copper exported†	553,070,086	609,038,352	705,025,268
Stock at end of year	659,000,000	459,000,000	216,000,000
Total withdrawn from supply	1,212,070,086	1,068,038,352	921,025,268
Withdrawn on domestic account	1,053,838,558	610,988,744	896,633,833

*In reports prior to 1920 called "Apparent domestic consumption."

†Includes unrefined black blister and converter copper (bars, pigs, and other forms) and refined in ingots, bars, rods or other forms.

PRICES OF COPPER

(United States Geological Survey)

The average price received for copper delivered by the producers in 1922 and the price used by the United States Geological Survey in calculating the value of the copper output was 13.5 cents a pound. The average received by selling agencies for 1,913,000,000 pounds, as reported to the Geological Survey by the agencies, was 13.4665 cents a pound.

†Bureau of Railway Economics figures.

YEARLY RAILROAD EARNINGS AS COMPILED BY THE FINANCIAL CHRONICLE

"In the following we show the yearly comparisons as to both gross and net for each year back to 1907. For 1910 and 1909 we take the aggregates of the monthly totals as then published by the Interstate Commerce Commission, but for the preceding years we give the results just as registered by our own tables each year—a portion of the railroad mileage of the country being always unrepresented in the totals, owing to the refusal of some of the roads at that time to furnish monthly figures for publication."

Year	GROSS EARNINGS			NET EARNINGS		
	Year Given	Year Preceding	Inc. (+) or Dec. (—)	Year Given	Year Preceding	Inc. (+) or Dec. (—)
1907	\$2,287,501,605	\$2,090,595,451	+ \$196,906,154	\$860,753,545	\$865,280,191	— \$4,526,646

FOREIGN TRADE INDEX

There are presented below the Federal Reserve Board's series of index numbers designed to reflect relative quantity movements in the foreign trade of the United States. Changes in the level of prices have been allowed for by multiplying the quantities of selected commodities exported or imported each month by fixed 1913 prices.

Year and Month	EXPORTS				IMPORTS			
	Raw Materials (12)	Producers' Goods (10)	Consumers' Goods (7)	Total (29)	Raw Materials (10)	Producers' Goods (12)	Consumers' Goods (5)	Total (27)
1913, year	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
1919, year	88.9	155.1	183.6	115.3	157.5	192.9	147.5	168.4
1920, year	92.2	158.7	133.6	107.5	135.8	227.5	138.9	168.8
1921, year	103.1	116.9	124.1	108.9	113.6	162.8	141.4	135.6

FUNDED DEBT OF THE CITY OF NEW YORK

The following statement exhibits the Funded Debt of the City of New York on December 31, 1923, prepared by direction of the Hon. CHARLES L. CRAIG, Comptroller of the City:

FUNDED DEBT

	Dec. 31, 1923
<i>A—Funded Debt of the City of New York, as now constituted, issued subsequent to January 1, 1898:</i>	
1. Payable from the Sinking Fund of the City of New York, issued under the provisions of Section 206 of the Greater New York Charter.....	\$684,876,299.36
2. Payable from the Water Sinking Fund of the City of New York issued under the provisions of Section 10, Article 8, of the Constitution of the State of New York, and Section 208 of the Greater New York Charter	226,783,938.10
3. Payable from the Rapid Transit Sinking Fund of the City of New York	200,170,563.59
4. Payable from Taxation (Serials), issued under the provisions of Section 169 of the Greater New York Charter	66,650,970.00
5. Payable from the Proceeds of the Sale of Corporate Stock of the City of New York (Notes), issued under the provisions of Section 189 of the Greater New York Charter	107,813,800.00
6. Payable from Assessments	40,132,734.82

Total—Present City of New York, issued since January 1, 1898.....\$1,326,423,305.87

7 General Fund bonds, issued under the provisions of Section 222 of the Greater New York Charter *\$152,423,305.87

B—Funded Debt of the City of New York as constituted prior to January

BOROUGH OF MANHATTAN AND THE BRONX, FORMER CITY OF NEW YORK

1, 1898; issued prior to said date:

1. Payable from the Sinking Fund for the Redemption of the City Debt, No. 1, issued under the provisions of Section 229 of the Greater New York Charter	\$12,753,520.65
2. Payable from the Sinking Fund for the Redemption of the City Debt, No. 1, issued under the provisions of Section 1 of Chapter 79 of the Laws of 1889 and Section 214 of the Greater New York Charter.....	9,823,100.00
3. Payable from Water Sinking Fund of the City of New York.....
4. Payable from the Sinking Fund for the Redemption of the City Debt, No. 1, issued under the provisions of Section 213 of the Greater New York Charter	448,000.00
5. Payable from Taxation	446,180.00
6. Payable from Assessments

Totals—Former City and County of New York.....\$23,470,800.65

*These General Fund bonds represent the total amount of the surplus revenues of the Sinking Fund for the Redemption of the City Debt, No. 1, which, since 1903, have been applied, through the medium of General Fund bonds, to provide part of the current administrative expenses of the City. These General Fund bonds will be cancelled when Sinking Fund No. 1 has fulfilled its functions in 1928 and has therefore ceased and determined. This Sinking Fund has now more assets than the total amount of the bonds outstanding which it has to redeem; consequently, in 1928, when its real debt will have matured, all these General Fund bonds, which are an anomaly and not a real debt, will be "dispatched" in the incinerator.

C—Funded Debts of Municipalities in the Borough of Brooklyn, including Kings County, issued prior to January 1, 1898 (including \$300,000 of bonds of Town of Gravesend issued in 1898 under an order of Court):

CITY OF BROOKLYN, INCLUDING ANNEXED TOWNS

1. Payable from the Sinking Fund of the City of Brooklyn, issued under the provisions of Chapter 488 of the Laws of 1860 and Section 207 of the Greater New York Charter	\$1,092,000.00
2. Payable from the Sinking Fund of the City of Brooklyn, issued under the provisions of Chapter 372 of the Laws of 1880, and Chapter 443 of the Laws of 1881 and Section 207 of the Greater New York Charter..	700,000.00
3. Payable from the Sinking Fund of the City of Brooklyn, issued under the provisions of Chapter 648 of the Laws of 1895 and Section 207 of the Greater New York Charter	5,571,567.41
4. Payable from the Water Sinking Fund of the City of Brooklyn, issued under the provisions of Chapter 396 of the Laws of 1859, and Section 208 of the Greater New York Charter	1,935,000.00
5. Payable from Taxation	5,390,000.00
6. Payable from Assessments	2,496,400.00

Totals—Former City of Brooklyn\$17,184,967.41

COUNTY OF KINGS

7. Payable from Taxation	Dec. 31, 1923 2,900,000.00
Totals—Former City of Brooklyn and County of Kings.....	\$20,084,967.41

D—Funded Debts of Municipalities in the Borough of Queens, including the proportion of the Debt of the County of Queens imposed upon the City of New York, issued prior to January 1, 1898:

MUNICIPALITIES OTHER THAN QUEENS COUNTY

1. Payable from Sinking Fund of Long Island City for the Redemption of Fire Bonds issued under the provisions of Chapter 122 of the Laws of 1894 and Section 207 of the Greater New York Charter.....	35,000.00
2. Payable from Water Revenue	67,500.00
3. Payable from Taxation	2,501,500.00
4. Payable from Assessments	164.59
Totals—Former Long Island City and Towns and Villages Queens County	\$2,604,164.59

COUNTY OF QUEENS

Amount to be borne by the City of New York—

5. Payable from Taxation	\$165,800.10
Totals—Former Municipalities in Borough of Queens	\$2,769,964.69

E—Funded Debts of Municipalities in the Borough of Richmond, issued prior to January 1, 1898:

MUNICIPALITIES OTHER THAN RICHMOND COUNTY

1. Payable from Taxation	\$596,800.00
Totals—Former Municipalities in the Borough of Richmond.....	\$596,800.00
Total Funded Debt	\$1,373,350,838.62
General Fund bonds	*452,500,000.00

*See preceding footnote on page 142.

CLASSIFICATION OF THE CITY DEBT, 1921-1922-1923

New York City's funded debt, together with its corporate stock notes, are classified in the following general groups as of December 31:

GROUP A

	Dec. 31, 1921	Dec. 31, 1922	Dec. 31, 1923
For water supply	\$227,031,439.84	\$236,512,338.10	\$251,114,038.10
For rapid transit	258,609,888.77	264,449,888.77	270,213,688.77
For docks and ferries	141,885,331.62	144,882,658.15	140,202,944.62
Bonds payable from assessments	34,747,703.96	31,768,979.88	42,629,299.41
Total of Group A	\$662,277,364.19	\$677,643,864.90	\$704,159,970.90

GROUP B

For school and sites	\$137,160,823.95	\$149,906,759.15	\$169,313,991.11
For libraries and sites	12,326,538.72	12,320,954.44	12,339,985.07
For city parks, places and driveways	56,705,871.65	57,318,126.16	58,427,593.81
For bridges and approaches thereto	*105,715,124.60	104,909,636.51	104,099,065.36
For public buildings: Hospitals, health, fire, police courts, corrections, etc.	113,409,957.43	115,604,016.65	120,945,622.55
For public enterprises	1,422,354.79	4,101,377.62	7,454,136.73
For streets, highways and trunk sewers.....	156,210,964.54	151,003,069.39	153,010,370.79
For sundry other purposes	7,248,580.03	7,224,665.62	10,650,298.16
For various municipal purposes (unallotted)..	66,403.55	208,015.03	776,355.44
Refunding bonds	11,852,166.36	4,890,316.36	4,691,071.12
To fund deficiencies in taxes	28,576,909.70	28,029,643.64	27,482,377.58
Total of Group B	\$630,695,695.32	\$638,516,520.57	\$669,190,867.72

Group A indicates the amount of debt issued for waterworks and other public utilities which are largely revenue-producing, while Group B indicates the amount for other activities and improvements for and of the City of New York which are non-revenue producing.

*Includes \$18,945,754.70 for 1920 and 1921 in acquirement of property for improving transit facilities of the Manhattan end of the New York and Brooklyn bridge and in the construction of the new Municipal Building thereon.

NEW YORK CITY BUDGETS 1908-1924

(Prepared by Direction of the Comptroller)

The following table furnished by the Finance Department of the City of New York gives the aggregate yearly appropriations for the city and the county government for the years indicated:

	For City purposes	For County purposes	For deficiencies in tax collections of prior years	Totals
1908	\$135,474,403.89	\$5,097,862.28	\$3,000,000.00	\$143,572,266.17
1909	148,446,904.83	5,175,796.23	2,922,417.08	156,545,148.14
1910	153,392,143.34	5,736,127.03	4,000,000.00	163,128,270.37
1911	158,514,029.91	5,453,805.25	10,000,000.00	173,967,835.16
1912	167,585,735.69	*10,217,154.08	3,287,366.74	181,090,256.51
1913	176,229,747.34	*14,181,693.82	2,300,000.00	192,711,441.16
1914	179,289,082.53	*11,206,469.09	2,500,000.00	192,995,551.62
1915	185,813,977.26	7,033,716.82	6,112,092.44	198,959,786.52

STATISTICS OF THE NEW YORK PUBLIC LIBRARY

ACCORDING TO THE RECOMMENDATIONS OF THE AMERICAN LIBRARY ASSOCIATION

Many of the libraries of the United States, the New York Public Library among them, have agreed to the recommendations of a committee of the American Library Association to print in their annual reports a table of statistics, summarized, for purposes of comparison and reference. The table, with the figures for this library, is given herewith. It should be understood clearly that this table applies only to the Circulation Department, and not to the Reference Department of the Library.

Annual report for year ending December 31, 1923.

Name of Library: The New York Public Library (Circulation Department).

City or town: New York. State: New York.

Name of Librarian: Edwin H. Anderson, Director; Franklin F. Hopper, Chief of

Circulation Department.

Population served: 3,205,828* (estimated).

Assessed valuation of city or town: \$7,054,345,112.00.*

Terms of use: Free for lending; free for reference.

Total number of agencies 474

Consisting of:

Branches† (including Extension Division and Library for the Blind) 46
(44 occupy separate buildings.)

Sub-branches 6

Stations 123

Other agencies 299

Consisting of 115 Fire stations; 25 Police stations; 11 Home libraries

41 Public schools (Classes 65); 17 Private schools (Classes 20);

10 Industrial schools (Classes 18); 26 Parochial schools (Classes

44); 54 Summer camps.

Number of days open during year‡ (Central Circulation Branch)..... 365

Hours open each week for lending (Central Circulation Branch)..... 82

Hours open each week for reading (Central Circulation Branch)..... 82

	Adult	Juvenile	Total
Number of volumes at beginning of year	841,604	305,321	1,146,925

Total, 1914	2,002,426	310,188	2,312,614

The circulation of books for home use during 1920 was 9,658,977 and during 1921, 10,226,366. In 1922, 9,929,059. In 1923, 9,513,426. In 1919 it was 9,892,648. The number in 1918 was 9,627,505 volumes, compared with 10,709,095 volumes in 1916 and 10,384,379 in 1915.

Readers to the number of 976,164 are recorded as using books in the Reference Department (Central Building) during 1920. In 1921 the number was 1,157,275 as recorded through signatures on call slips and registers. The number was 892,298 in 1919. In 1922, 1,225,778. In 1923, 1,257,919. The increase in 1920 was 9 per cent.

THE PORT OF NEW YORK—ITS BOUNDARIES
AND PORT CHARGES

The Board of Commissioners of Pilots, H. O. APFLEBY, Secretary, Whitehall Terminal Building, has provided the following information regarding the rates of pilotage for vessels arriving at the Port of New York via Sandy Hook:

TRANSPORTATION NORTH TO EAST RIVER, AND VICE VERSA, \$5

HAULING TO OR FROM WHARF, \$3

DETENTION, \$3 PER DAY

For moving any vessel from the North River, the East River, Atlantic Dock, Erie Basin, Kill von Kull, or any pier or dock in the upper bay of New York Harbor (excepting such places as have a different rate established for them), to an anchorage in the said upper bay, or vice versa, five dollars each way, unless such moving is done on the same calendar day as the vessel enters or leaves the port.

When a pilot is called upon especially to swing a ship for the purpose of adjusting compasses, his compensation shall be ten dollars in addition to the regular pilotage.

Vessels boarded so far south or east that Ambrose Channel light vessel cannot be seen from deck in day time and clear weather, one quarter extra.

PILOTAGE RATES

PILOTAGE FOR TAKING VESSELS FROM UPPER TO LOWER QUARANTINE

For Vessels having had death or sickness to double Outward Pilotage. For Vessels from sickly ports, but having had no sickness on board, Single Outward Pilotage. Pilotage of Vessels from Quarantine to New York, Quarter Pilotage.

INTERMEDIATE PILOTAGE

From New York to Perth Amboy and vice versa, \$2.50 per foot. Pilotage of vessels from the North River or from the East River above and including Eric Basin to Staten Island, Bayonne, Gravesend Bay or Yonkers, or vice versa, \$10.00 each way. Gravesend Bay to Sandy Hook Bay and vice versa, one-half pilotage. New York to Jamaica Bay or vice versa, full pilotage. Adjusting compasses, \$10.00.

WINTER PILOTAGE

From November 1st to April 1st, inclusive, \$4.00 to be added to each Pilotage.

Hellgate Pilotage Law

Hellgate Pilots are under the jurisdiction of the New York State Board of Port Wardens, 44 Whitehall Street, Secretary, MURRAY D. FIRSTMAN, Hellgate pilot laws: "Being Title 2, Chapter XXVIII of Chapter 410, Laws of 1882 as amended by Chapter 581, Laws of 1909, and Chapter 328, Laws of 1919."

Section 2129 pertaining to charges is as follows:

"It shall be lawful for the first pilot who tenders his services to demand and receive from any foreign vessel or vessels under register or from the consignee or owner of said vessel, from the westward of Sand's Point or Execution Rocks, or to take charge of any such vessel at or to the westward of Sand's Point or Execution Rocks, and pilot her to the port of New York, for every vessel, one dollar and seventy-five cents for each and every foot of water such vessel may draw; and for pilotage from the port of New York, they shall be entitled to receive the same compensation as is above provided when the said vessel is bound to the port of New York. And every pilot shall for such service be entitled in addition to the above-mentioned rates or compensation to demand and receive the further sum

of one dollar and twenty-five cents for each and every foot of water which any motor, steamer or square-rigged vessel may draw, which they shall pilot to or from the port of New York; and every such pilot who shall have piloted any ship or vessel into the port of New York shall be entitled to a preference in piloting the said ship or vessel out of the said port on the next outward voyage of said ship or vessel, if the said voyage be by the way of East River, and further, from the first day of November to the first day of April in every year, every such Hellgate pilot shall be entitled to demand and receive for every motor, steamer or square-rigged vessel the sum of four dollars, and for every schooner, sloop or barge the sum of two dollars in addition to the rates of compensation for pilotage hereby established. And for every day which any Hellgate pilot shall be detained by any ship or vessel, over twenty-four hours, he may demand and receive from the vessel, owner or consignee of said vessel four dollars for each and every day he shall be so detained. But no pilotage shall be charged to any vessel under a coastwise license unless such vessel actually employs a pilot. And every master or commander of any vessel who shall give to such Hellgate pilot an untrue account of the draught of water or tonnage of his vessel shall forfeit and pay the sum of twenty-five dollars to be sued for and recovered by the said Board of Port Wardens, known as Commissioners of East River or Hellgate Pilots."

From the above provisions the following table is constructed:

HELLGATE

<i>Sloops, Schooners and Barges Outside Pilotage Sands Point</i>		<i>Barks, Ships and Steamers Outside Pilotage Sands Point</i>		<i>Sloops, Schooners and Barges Outside Pilotage Sands Point</i>		<i>Barks, Ships and Steamers Outside Pilotage Sands Point</i>

14	24.50	42.00	25	43.75	75.00		
15	26.25	45.00					

It shall be lawful to demand from every ship, bark or brig the sum of Four Dollars, and from every schooner and sloop Two Dollars from the first day of November to the first day of April in every year, in addition to the rate of pilotage established, as winter pilotage.

PORT WARDEN CHARGES.—The following are the rates of charges to be collected by the Port Wardens, as established by Act of the Legislature:

"The said Board of Wardens shall be allowed for each and every survey held on board of any vessel, on hatches, stowage or cargo, or damaged goods, or at any warehouse, store or dwelling, or in the public street, or on the wharf, within the limits of the Port of New York, on goods said to be damaged, the sum of two dollars, and for each and every certificate given in consequence thereof, the sum of one dollar, and for each and every survey on the hull, sails, spars or rigging of any vessel damaged, or arriving at said port in distress, the sum of five dollars, and for each and every certificate given in consequence thereof, the sum of two dollars and fifty cents, and for each valuation or measurement of any vessel, the sum of ten dollars."

HEALTH OFFICER'S FEES.—Quarantine and Fumigation fees are payable at Custom House after bills have been rendered by the Public Health Service.

Health Officer's fees, each vessel under 500 gross tons	\$5.00
Each vessel 500 gross tons and over	10.00
Each vessel touching at Porto Rican ports exclusively	3.00

Fumigation fees additional.

DUTY ON TONNAGE.—Section thirty-six of the Tariff Act approved August 5, 1909; Section four, Par. eight, Act of October 3, 1913; Article one hundred and fourteen of Customs Regulations of 1915, and Treasury Decision 36266 provides that "A tonnage duty of 2 cents per ton, not to exceed in the aggregate 10 cents per ton in any one year, is imposed at each entry on all vessels which shall be entered in any port of the United States from any foreign port or place in North America, Central America, the West India Islands, the Bahama Islands, the Bermuda Islands, Newfoundland, or the coast of South America bordering on the Caribbean Sea, above and including the mouth of the Orinoco River, and vessels of Sweden and Norway from ports in Sweden and Norway, and vessels of the United States from any port in Sweden and Norway, and in such other cases as by treaty may be provided, and a duty of 6 cents per ton, not to exceed 30 cents per ton per annum, is imposed at each entry on all vessels which shall be entered in any port of the United States from any other foreign port, not, however, to include vessels in distress or not engaged in trade."

THE DISTRICT OF NEW YORK.—The Customs Collection District of New York, as defined by Executive Order March 3, 1913, authorized by Act of Congress approved August 24, 1912:

"The District of New York, to include all that part of the State of New York not expressly in the Districts of St. Lawrence, Rochester and Buffalo and also to include the counties of Sussex, Passaic, Hudson, Bergen, Essex, Union, Middlesex, and Monmouth, in the State of New Jersey, with district headquarters at the port of New York, in which New York, Newark, Perth Amboy and Albany, shall be ports of entry."

By Executive Order of January 23, 1922, effective February 1, 1922, the Ports of Greenport and Patchogue were abolished.

The following information is furnished by H. C. STUART, Assistant Collector of Customs at New York:

"There is no statute which defines the limits or boundaries of the Port of New York, and it is not co-terminus with the 'district of New York.'

"Under the date of July 20, 1910, the Treasury Department advised that the limits of the Port of New York so far as the Customs laws and regulations are concerned, 'should be considered as including all the territory lying within the corporate limits of the cities of Greater New York and Yonkers, N. Y., and of Jersey City, N. J., and in addition thereto all the waters and shores of the Hudson River and Kill von Kull in the State of New Jersey from a point opposite Fort Washington to Bergen Point Light and all the waters and shores of Newark Bay and the Hackensack River lying within Hudson County, N. J., from Bergen Point Light to the city limits of Jersey City.'

As stated above, Patchogue and Greenport are no longer ports of entry in the District of New York.

"Patchogue was constituted a port of delivery by the Act of January 29, 1875, and the Act of February 28, 1879, entitled an act extending the limits of the port of New York, provides 'That the collection district of the port of New York shall hereafter include, in addition to the other territory embraced therein, all that part of the County of Hudson, in the State of New Jersey, and the waters adjacent, now within the collection district of Newark, New Jersey, east of Newark Bay and the Hackensack River.' The Act of May 7, 1894, extended the limits of the port of New York so as to include the City of Yonkers in Westchester County.

The following named places are not ports in the sense of the statute and are not named therein as such, but are places especially designated by the Secretary of the Treasury under the provisions of Section 29 of the Act of June 26, 1884, where vessels laden with coal, salt, railroad iron and other like articles in bulk, may proceed to discharge, under supervision of Customs officers, after due entry of vessel and cargo at this port of entry, and at the expense of the parties interested:

Saugerties, Dodges Yard, Port Eaton (Eaton's Neck), Hall's Yard (Hackensack River), Rondout, New Windsor, Newburgh, Poughkeepsie, Esopus, Kinderhook, Hudson, Troy, Rhineback Landing, Cold Spring, Port Jefferson, Jones' Point, Manhasset Bay, Port Chester, New Rochelle, Elizabethport, Bayway, Grasselle, Tremley Point, Cartaret, Chrome, Port Reading and New Brunswick.

NEW YORK HARBOR.—For the enforcement of the Seamen's Act of March 4, 1915, and other purposes, the limits of New York Harbor are defined as follows:

"An imaginary line drawn from Navesink Lighthouse to the life-saving station at Rockaway Beach," and "an imaginary line drawn from Eaton's Point Lighthouse on the north shore of Long Island, through the Lighthouse on Peeks Ledge, to the Connecticut shore east of the Naugatuck River."

LEGAL WHARFAGE RATE—CITY OF NEW YORK

RATES OF WHARFAGE IN FORCE.—The following are the rates of wharfrage chargeable within the City of New York, as established by Act of the Legislature and Commissioner of Docks, as authorized under Section 825 of the Charter:

NEW YORK CITY.—REGULAR WHARFAGE, two cents per ton up to two hundred tons, and one-half cent per ton for any excess over two hundred tons. If vessel occupies an outside berth, and is not working cargo or ballast, one-half of this rate.

UNSHEDDED PIERS

FLOATING GRAIN ELEVATORS, half rates.

FLOATING STRUCTURES not otherwise provided for, double rates.

STATE TRAFFIC.—NORTH RIVER BARGES, MARKET BOATS AND BARGES, SLOOPs employed upon the rivers and waters of the State, and SCHOONERS employed exclusively upon the rivers and waters of the State, as follows:

PAYMENT OF WHARFAGE

Dock Masters must collect in cash any and all wharfrage daily, except in cases where a credit account has been opened by consent of the Commissioner. Payment for wharfrage by those having credit accounts must be made direct to the Cashier of the Department within ten days after receipt of bill.

Wharfrage at shedded piers, 3½ cents per net ton (full registered tonnage), but not less than \$100.00 per day, or part of a day.

Vessels not using pier, layed up, loading or unloading over side, Statutory Rates, same as open pier.

Under 50 tons	\$.50	300 tons and under 350	\$1.25
50 tons and under 100	.62½	350 " " " 400	1.37½
100 " " " 150	.75	400 " " " 450	1.50
150 " " " 200	.87½	450 " " " 500	1.62½
200 " " " 250	1.00	500 " " " 550	1.75
250 " " " 300	1.12½	550 " " " 600	1.87½

For six hundred tons and upwards, twelve and a half cents per fifty tons in excess of last rate.

CANAL BOATS, per diem, 50 cents loaded; 30 cents unloaded. (It is understood that a "canal boat" is a vessel built for navigating the canals of the State, measuring not more than 98 feet in length, nor more than 18 feet in width, and whose registered net tonnage does not exceed 150 tons.)

Vessels freighting brick upon the Hudson River, same rate. Scows or barges freighting gravel, broken stone, cement or sand upon the rivers and waters of the State, fifty cents per day.

CLAM AND OYSTER VESSELS, under two hundred tons, one and a half cents per ton for an inside berth and one cent per ton for an outside berth, but no vessel to pay less than twenty-five cents per day, nor for less than one day.

LIGHTERS AND BARGES engaged in lightering freight in Harbor of New York one cent per running foot.

COAL HOISTS ON SCOWS OR FLOATS, WITH COAL HOPPER, ETC., one dollar per day.

CANAL BOATS (as described above) engaged in transporting coal in the harbor, 50 cents per diem, loaded; 30 cents unloaded; all other boats transporting coal, 1 cent per running foot loaded or unloaded.

Twenty-four hours from the time of day or night when a boat reaches a pier or slip constitute a day for all vessels. A fraction of a day counts as one day, and vessels remaining any fraction over twenty-four hours pay for another day.

TOP WHARFAGE on merchandise 5 cents per ton. (Accrues after the expiration of twenty-four hours from the time of landing.)

WATER FRONT OF NEW YORK

Length of waterfront of New York Harbor, including parts of New Jersey, compiled from statistics furnished by the Hon. JOHN H. DELANEY, Commissioner of Docks, corrected to January 1, 1924.

DIRECT WATER FRONT

Borough of Manhattan	228,000 lineal feet or 43.2 miles
Borough of The Bronx	421,300 lineal feet or 79.8 miles
Borough of Brooklyn	1,063,800 lineal feet or 201.5 miles
Borough of Queens	1,039,300 lineal feet or 196.8 miles
Borough of Richmond	301,500 lineal feet or 57.1 miles

Total for Greater New York	3,053,900 lineal feet or 192.93 miles
New Jersey, extending from Sandy Hook to a point on the Hudson River opposite New York City line, including river shores within this area	1,018,700 lineal feet or 192.93 miles

Grand total 4,072,600 lineal feet or 771.33 miles

Length of present developed waterfront. (Measured around piers and along the heads of the slips):

Borough of Manhattan	405,100 lineal feet or 76.72 miles
Borough of The Bronx	105,604 lineal feet or 20.00 miles
Borough of Brooklyn	556,861 lineal feet or 105.47 miles
Borough of Queens	214,760 lineal feet or 40.67 miles
Borough of Richmond	201,075 lineal feet or 38.08 miles

Total for Greater New York	1,483,400 lineal feet or 280.95 miles
New Jersey, as described above	348,480 lineal feet or 66.0 miles

Grand total 1,821,880 lineal feet or 346.95 miles

Length of waterfront measured around piers and shore line:

Borough of Manhattan	508,527 lineal feet or 96.31 miles
Borough of The Bronx	105,604 lineal feet or 20.00 miles
Borough of Brooklyn	1,381,886 lineal feet or 261.72 miles
Borough of Queens	1,167,673 lineal feet or 221.15 miles
Borough of Richmond	461,913 lineal feet or 87.48 miles

Total for Greater New York	3,990,275 lineal feet or 755.73 miles
New Jersey, extending from Sandy Hook to a point on the Hud-on River opposite New York City line, including river shores within this area lineal feet or miles

Grand total lineal feet or miles

PIERS

Owned by U. S. Government	27	
Owned by State of New York	8½	
Owned by private interest	417	Number of lin. ft. (around piers) 2,347,300
Owned by City	275½	Number of lin. ft. (around piers) 685,106

KIND OF PIERS

Concrete	2
Stone	2
Wood	724
Rental for use of piers and bulkheads	\$6,877,149.45
Wharfage collected	229,084.03
Repairs and maintenance and payrolls, exclusive of ferries	1,082,936.97

All ferries placed July 1, 1918, under jurisdiction of Department of Plant and Structures. The city's jurisdiction extends in general to the pier head line established by the United States Government.

The ship channels are dredged to a depth of 40 feet from the city line on the North River to the ocean.

Width of entrance to channel, 2,000 feet.

The developed waterfront of the City of New York is increasing at about the same rate as the tonnage of the port; and the large undeveloped areas indicate the capacity of the city to maintain this rate of progress for many years to come. The additional possible wharfage by improvements under consideration amounts to two miles.

LIGHTERAGE AND FLOATAGE LIMITS

(From information supplied by the Commissioner of Docks)

The free lighterage and floatage limits in New York harbor as agreed upon by the various railroad companies are as follows:

NORTH RIVER

New York Side—Battery to One Hundred and Thirty-fifth Street.
New Jersey Side—National Storage Docks, Communipaw, to and including Fort Lee, N. J.

EAST RIVER AND HARLEM RIVER

New York Side—Battery to Jerome Avenue Bridge, including Harlem River side of Ward's and Randall's Islands.

Brooklyn Side—From Pot Cove, Astoria, to and including Newtown and Dutch Kills Creek and points in Wallabout Canal west of Washington Avenue Bridge, and to Ham-

ilton Avenue Bridge, Gowanus Canal, and to and including Sixty-ninth Street, South Brooklyn (Bay Ridge).

NEW YORK BAY

Points on north and east shore of Staten Island between Bridge Creek (Arlington) and Clifton, both inclusive, and including Shooter Island.

Points on the New Jersey Shore of New York Bay and on the Kill von Kull between Constable Hook and Avenue C, Bayonne City, opposite Port Richmond, S. I.

Deliveries beyond the Hamilton Avenue Bridge for Gowanus Canal and beyond the Washington Avenue Bridge, Wallabout Canal and for points in Mott Haven Canal, shall be subject in every case to extra towing charges.

FEDERAL APPROPRIATIONS FOR RIVER AND HARBOR IMPROVEMENTS IN THE ENTIRE UNITED STATES AND NEW YORK HARBOR

RIVER AND HARBOR IMPROVEMENTS

The policy of improving the rivers and harbors of the United States under Federal direction and with Federal funds was inaugurated by Congress about 1824. The work has been practically continuous since that time and has been executed principally under the direction of the Corps of Engineers.

The program now in force contemplates the improvement of the more important rivers and harbors of continental United States and of the more important harbors of Porto Rico, Alaska and the Hawaiian Islands.

The number of works in hand at the beginning of the fiscal year was as follows:

Number of harbors under improvement	193
Number of rivers under improvement	297
Number of canals and other waterways under improvement	86
The total amount expended on the work for the year was.....	\$47,478,357.03

The commerce reported amounted in the aggregate to 347,834,076 tons, valued at \$16,633,868,204, and the transportation of 318,920,907 passengers.

Appropriations—The funds with which the works for the improvement of rivers and harbors were prosecuted during the past fiscal year were derived from the appropriations made by river and harbor acts, and from such appropriations as have been provided by other general acts and by special acts of Congress.

The following works are provided for by permanent appropriations: Removing sunken vessels; operating snag and dredge boats on upper Mississippi River and tributaries; removing obstructions in Mississippi River; gauging waters of the Mississippi River and its tributaries; examinations and surveys at South Pass, Mississippi River; maintenance of South Pass Channel, Mississippi River; operating snag boats on Ohio River; operating and care of canals, etc.; support and maintenance of the Permanent International Association of the Congresses of Navigation.

Appropriations for rivers and harbors during fiscal year 1923:

War Department appropriation act of March 2, 1923:		
Flood control, Mississippi River	\$5,986,600.00	
Flood control, Sacramento River, Calif.	499,900.00	
Maintenance and improvement of existing river and harbor works	56,589,910.00	
Examinations, surveys and contingencies of rivers and harbors	456,850.00	
		\$63,533,260.00
Deficiency act, July 1, 1922	\$364,288.60	
Deficiency act, September 22, 1922	1,323.07	
Deficiency act, January 2, 1923	1,608.04	
Deficiency act, March 4, 1923	460.00	
		367,679.71
Permanent annual appropriations		297,600.00
		\$64,198,539.71

Indefinite appropriations (warrants issued during fiscal year, 1923):

Operating and care of canals, etc.	\$4,354,087.00	
Removing sunken vessels, etc.	127,377.41	
		4,681,464.44
Increase of compensation, War Department, act March 4, 1923 (appropriations to rivers and harbors)		1,874,810.11
Special fund (credits to account from licenses under Federal water power act June 10, 1920, sec. 17):		
Maintenance and operation of dams and other improvements to navigable waters		12,386.94
Related works:		
Expenses of California Debris Commission	\$14,059.00	
Prevention of deposits, New York harbor	175,000.00	
		189,950.00
Total		\$70,957,151.20
Total appropriations for rivers and harbors from report for 1922.....		1,130,609,694.75
		\$1,201,566,845.95

The foregoing statement does not include appropriations for Dam No. 2, Muscle Shoals, Ala., as follows:

Total appropriations to June 30, 1922	\$24,659,610.42
Amount transferred from prior allotment to Ordinance Dept.	600,000.00
War Dept. appropriations act of March 2, 1923	6,998,800.00
	\$32,258,410.42

AMOUNTS APPROPRIATED AND EXPENDED BY THE UNITED STATES UPON IMPROVEMENTS OF CHANNELS, ETC., IN AND ABOUT THE HARBOR OF NEW YORK, AND FOR THE MAINTENANCE OF SAME

MUNICIPAL TROLLEY LINES IN THE CITY OF NEW YORK

(From Report of Department of Plant and Structures)

STATEN ISLAND MIDLAND RAILWAY

Municipal operation of trolley lines was begun by the Department of Plant and Structures December 1, 1920, in accordance with agreement between the Receiver, Staten Island Midland Railway Co. and the City of New York, dated November 5, 1920, to supply service in Richmond Borough which had been abandoned by the private owners.

The system comprises the following lines:

1. Richmond	8.20 miles	4. Manor Road	2.56 miles
2. Silver Lake	6.09 miles	5. Midland Beach	7.39 miles
3. Port Richmond-Concord	7.71 miles	6. Port Richmond-Midland Beach	8.12 miles

PASSENGER TRAFFIC IN 1922

Line	5c Fares	School Tickets	Transfers	Employees	Total
Richmond	2,589,740	103,745	193,069	22,507	2,909,061
Silver Lake	2,413,282	60,043	135,049	10,035	2,618,409
Port Richmond-Concord	780,063	13,471	231,725	7,816	1,033,075

Midland Beach	1,609,883	49,142	154,728	7,105	1,820,858
Port Richmond-Midland Beach	78,270	14,463	93	92,626
Totals	7,797,325	230,516	838,272	48,763	8,915,076

*Summer line.

Average number of cars operated	37
Mileage in 1922	1,561,737

WILLIAMSBURG BRIDGE LOCAL TROLLEY SERVICE

Municipal operation of the local cars on the bridge begun December 1, 1923.

Length of line	3.2 miles
Average number of cars operated	40
Estimated number of passengers carried per year	30,000,000

TRACKLESS TROLLEY SYSTEM

This Department in 1921 developed a Trackless Trolley System to meet conditions in the Borough of Richmond and to develop sections having no transportation facilities.

The Trackless Trolley System comprises:

	Length	Date of Starting
Seaview Hospital Line	1.6 miles	Oct. 8, 1921
Lincolntonville Line	4.5 miles	Oct. 8, 1921
Richmond-Tottenville Line	10.0 miles	Nov. 4, 1922

Number of passengers per year, 1,143,600.

Construction of the City Island Line, 5.5 miles in length, has been held up by an injunction.

DEVELOPMENT OF MUNICIPAL FERRIES

(Report of Department of Plant and Structures)

Municipal operation of ferries began on October 25, 1905, when the city, acting through the Department of Docks and Ferries, took over the line between Manhattan and Staten Island, until then operated by the Staten Island Rapid Transit Railway Company, a subsidiary of the Baltimore & Ohio Railroad Company.

The line between South Street, Manhattan, and 39th Street, South Brooklyn, was taken over November 1, 1906.

On September 27, 1920, this Department, on behalf of the city, restored service on the line between East 92nd Street, Manhattan, and Fulton Avenue, Astoria, which had been abandoned by its private owners.

On August 6, 1921, a municipal ferry was put in operation between Clason Point in the Bronx and College Point, Queens.

On September 24, 1921, the city took over the line between East 23rd Street, Manhattan, and Greenpoint Avenue, Brooklyn, which the private owners had refused to continue.

On October 1, 1921, a municipal ferry was established between Grand Street, Manhattan, and Broadway, Brooklyn, restoring service that had been abandoned under private ownership.

On December 17, 1922, when the private owners quit, this Department took over the operation of the three Union Ferry lines, namely: Whitehall Street, Manhattan, to Hamilton Avenue, Brooklyn; Whitehall Street, Manhattan, to Atlantic Avenue, Brooklyn; Fulton Street, Manhattan, to Fulton Street, Brooklyn.

The statistics of operation for 1922 were:

Line	Round Trips	Mileage	Passengers	Vehicles
Staten Island	28,500	285,888½	22,223,612	751,305
39th Street (South Brooklyn)	11,238½	73,037½	541,471	199,088
East 92nd Street-Astoria	22,493	25,055	1,689,552	153,588
Clason Point-College Point	9,451½	32,107	343,734	96,940
East 23rd Street-Greenpoint	26,824½	48,371	2,717,933	249,165

WATER SUPPLY OF THE CITY OF NEW YORK IN 1923

REVENUES AND COST OF WATER SUPPLY FOR 1922—MUNICIPAL SYSTEM

(Statement compiled by courtesy of the Department of Water Supply, Gas and Electricity of the City of New York.)

Source of Supply—

Manhattan and The Bronx Boroughs	{ Catskill Watershed. Croton Watershed. Catskill Watershed.
Brooklyn Borough	{ Driven wells, infiltration galleries and small streams along the south shore of Long Island.
Queens Borough	{ Catskill Watershed. Richmond Borough {Catskill Watershed Driven Wells. } Driven Wells.

Capacity of Distribution Reservoirs in million gallons—

*Hillview Reservoir—Catskill System, all boroughs	929
Manhattan and The Bronx	2,136
Brooklyn	319
Richmond	441
Total	3,825

*Located north of city line.

Available capacity or Storage Reservoirs in million gallons—

Catskill System—	
Esopus Watershed—Ashokan Reservoir	130,400
Bronx and Byram Watershed—Kensico, Byram and Wampus Reservoirs.....	31,580
Croton Watershed—Twelve storage reservoirs and six controlled lakes.....	104,413
Ridgewood Watershed—Hempstead Reservoir	884
Total	267,307

Consumption—daily average for the year in million gallons—

	1922	1923
Manhattan and The Bronx	220.7	463.8
Brooklyn (219.1 Municipal + 15.7 Private).....	220.1	234.8
Queens (33.6 Municipal + 22.6 Private).....	51.1	56.2
Richmond	18.1	20.0
Total (736.5 Municipal + 38.3 Private).....		774.8

CHARGES AGAINST WATER FUNDS, MUNICIPAL SYSTEM FOR 1922 (BEING APPROXIMATE COST OF SUPPLYING WATER)

GROWTH OF THE TELEPHONE IN NEW YORK CITY

(January 1st Figures)

1895	15,000	1914	526,391	1920	845,890
1900	53,231	1915	558,929	1921	892,198
1905	181,605	1916	612,712	1922	979,534
1911	408,769	1917	682,190	1923	1,072,652
1912	441,128	1918	731,794	1924	1,186,617
1913	483,653	1919	761,941		

It will be seen that the January 1, 1923, figure for Berlin are revised. The old figure was an estimated one; the new figure, on the other hand, is based on information received from official sources since the statistics last year. The revised figure is somewhat lower than the estimated figure previously furnished and is largely due to the rearrangement of the communities near Berlin which are incorporated as part of that city.

BRIDGES OF NEW YORK

There are four bridges over the East River, and 40 bridges in all over other navigable rivers, streams, creeks, etc., making a total of 44 bridges, also 3 viaducts, under the jurisdiction of the Department of Plant and Structures (formerly Department of Bridges). Details of the leading structures are as follows:

Brooklyn—		Williamsburg—	
Main span (feet)	1,595½	Main span (feet)	1,600
2 side spans, 930 feet each.....	1,860	2 side spans, 596½ feet each.....	1,193
2 approaches	2,560½	2 approaches	4,515
Total length	6,016	Total length	7,308
Queensboro (longest span 1,182 feet)		Manhattan—	
Bridge proper (feet)	3,724½	Main span (feet)	1,470
Approaches	3,724½	2 side spans, 725 feet each.....	1,450
Total length	7,449	2 approaches	3,935
		Total length	6,855

NEW YORK AS A RAILWAY PASSENGER CENTER

The following tabulation presents a comparison of traffic upon the trunk line railroads to and from New York in the years 1922 and 1923:

	1922	1923
Baltimore & Ohio	615,426	620,000
Central of New Jersey	15,724,969	15,752,834
Delaware, Lackawanna & Western	21,652,774	22,201,447
Erie	29,958,185	30,889,917
Lehigh Valley	783,420	743,502
Long Island	63,795,553	69,766,867
New Haven	16,861,347	17,666,194
New York Central	28,534,933	30,025,529
New York, Ontario & Western	549,441	551,753
New York, Western & Boston	5,669,250	5,796,093
Pennsylvania	39,749,288	40,853,345
Total	223,894,586	234,867,481

The following table presents the traffic at the principal railroad terminals in New York City in 1923:

CITY RAILROAD TERMINALS

Grand Central:	
New York Central	21,258,595
New York, New Haven & Hartford	17,101,767
Total, Grand Central	38,360,362
Pennsylvania Station:	
Pennsylvania	9,988,430
Long Island	30,892,076
Baltimore & Ohio	620,000
Lehigh Valley	506,394
New York, New Haven & Hartford	456,491
Total, Pennsylvania Station	42,463,391
Hudson & Manhattan:	
Cortlandt Street	65,310,277
Uptown stations	37,096,262
Long Island Railroad:	
Flatbush Avenue Station	37,472,563
Long Island City	1,402,228
Woodside	2,289,540
Jamaica	3,202,870
East New York	1,650,000
Staten Island:	
St. George Terminal	11,130,755

PETROLEUM

In the following table is given the production (in barrels) of petroleum in various countries as compared with the previous year, according to estimates of the American Petroleum Institute:

	1922	1923
United States	735,000,000	557,531,000
Mexico	149,472,000	182,278,000
Russia	38,167,000	32,966,000
Persia	25,000,000	21,909,000
Dutch East Indies	15,000,000	16,720,000
Rumania	10,850,000	9,843,000
India	7,575,000	7,700,000
Peru	6,375,000	5,314,000
Poland (Galicia)	5,000,000	5,227,000
Sarawak	3,887,000	2,849,000
Venezuela	3,800,000	2,201,000
Argentina	3,250,000	3,018,000
Trinidad	3,087,000	2,445,000
Japan and Formosa	1,695,000	2,042,000
Egypt	1,037,000	1,188,000
France	503,000	496,000
Colombia	426,000	323,000
Germany	354,000	319,000
Canada	175,000	179,000
Czechoslovakia	100,000	120,000
Italy	32,000	31,000
Algeria	9,000	9,000
England	1,000	1,000
Others	200,000	100,000
Total	1,010,995,000	854,809,000

**STATEMENT OF EXPECTED GENERAL OPERATIONS AND SURPLUS UNDER THE REVISED NEW YORK STATE
BUDGET ESTIMATES FOR THE FISCAL YEAR ENDING JUNE 30, 1924, COMPARED WITH THE FOUR FISCAL
YEARS ENDED JUNE 30, 1923**

(From Annual Report of State Comptroller)

*Periods between Federal Census and State Enumerations estimated.

†Excess sinking funds over funded debt.

‡Change in ending fiscal year from September 30 to June 30.

§Temporary debt not included.

FUNDED DEBT OF THE STATE OF NEW YORK

FISCAL YEARS

The following statement exhibits the Public Debt of the State of New York at the close of the fiscal years ending June 30, 1921, 1922 and 1923, compared with the previous six years, ending September 30, prior to 1916, as compiled from the Annual Reports of the Comptroller of the State.

	June 30, 1921	June 30, 1922	June 30, 1923
Canal	\$154,800,000	\$154,664,000	\$152,528,000
Highway	100,000,000	99,600,000	99,200,000
Palisades Inter-State Park	5,000,000	5,000,000	5,000,000
Saratoga Springs State Reservation	429,000	331,000	216,500
State Forest Reserve	7,500,000	7,400,000	7,300,000
Total debt	\$267,729,000	\$266,998,000	\$264,244,500
June 30, 1920			\$236,021,000
June 30, 1919			236,119,660
June 30, 1918			236,214,660
June 30, 1917			236,309,660
June 30, 1916			211,404,660
September 30, 1915			186,400,660
September 30, 1914			159,260,660
September 30, 1913			135,478,192
September 30, 1912			109,702,660
September 30, 1911			79,730,660
September 30, 1910			57,230,660

REAL AND PERSONAL ESTATE OF THE STATE OF NEW YORK

The following statement exhibits the assessed valuation of the real and personal estate of the State of New York taxable for State purposes for the years indicated:

	Real Estate	Personal Estate	Aggregate Equalized Valuation
1902	\$5,169,308,070	\$585,092,312	\$5,754,400,382
1903	5,297,763,882	556,736,239	5,854,500,121
1904	6,749,509,958	696,966,169	7,446,476,127
1905	7,051,455,025	686,710,615	7,738,165,640
1906	7,312,621,452	702,469,270	8,015,090,722
1907	7,933,057,917	632,321,477	8,565,379,394
1908	8,553,298,187	620,268,058	9,173,566,245
1909	9,117,352,888	548,765,813	9,666,118,681
1910	9,266,628,484	554,992,070	9,821,620,554
1911	9,639,001,865	482,275,593	10,121,277,458
1912	10,361,501,373	461,484,541	11,022,985,914
1913	10,684,290,188	414,207,867	11,128,498,055
1914	10,960,260,892	424,876,235	11,385,137,127
1915	11,116,271,012	924,149,875	12,070,420,887
1916	11,335,638,806	454,989,997	11,790,628,803
1917	11,605,694,898	485,742,745	12,091,437,643
1918	12,006,966,764	513,853,047	12,520,819,811
1919	12,322,150,324	435,871,630	12,758,021,954
1920	12,625,190,013	364,243,720	12,989,433,733

CHARTER OF THE CORPORATION
OF THE
Chamber of Commerce in the City of New York
WITH ACT OF RE-INCORPORATION.

GEORGE THE THIRD, by the Grace of God, of Great Britain, France and Ireland, King, Defender of the Faith, and so forth—To all to whom these presents shall come, Greeting:

Recites that the Chamber had petitioned Lieut. Govern- or Colden,

WHEREAS, a great number of merchants in our City of New York, in America, have, by voluntary agreement, associated themselves for the laudable purpose of promoting the trade and commerce of our said province; and whereas, JOHN CRUGER, Esq., the present President of the said Society, by his humble petition presented in behalf of the said Society, to our trusty and well-beloved CADWALLADER COLDEN, Esq., our Lieutenant-Governor and Commander-in-Chief of our said Province of New York, and the territories depending thereon in America, and read in our Council for our said Province, on the twenty-eighth day of February, last past, hath represented to our said Lieutenant-Governor, that the said Society (sensible that numberless inestimable benefits have accrued to mankind from commerce; that they are, in proportion to their greater or lesser application to it, more or less opulent and potent in all countries; and that the enlargement of trade will vastly increase the value of real estates, as well as the general opulence of our said colony) have associated together for some time past, in order to carry into execution among themselves, and by their example to promote in others, such measures as were beneficial to those salutary purposes; and that the said Society having, with great pleasure and satis-

the 28th Feb-
ruary.

to incorporate
them.

by the name of
"The Corpora-
tion of the
Chamber of
Commerce in
the City of
New York,
America."

faction, experienced the good effects which the few regulations already adopted had produced, were very desirous of rendering them more extensively useful and permanent and more adequate to the purposes of so benevolent an institution; and therefore the petitioner, in behalf of the said Society, most humbly prayed our said Lieutenant-Governor to incorporate them a body politic, and to invest them with such powers and authorities as might be thought most conducive to answer and promote the commercial and, consequently, the landed interests of our said growing colony; which petition being read as aforesaid, was then and there referred to a Committee of our said Council, and afterwards, on the same day, our said Council, in pursuance of the report of the said Committee, did humbly advise and consent, that our said Lieutenant-Governor, by our letters patent, should constitute and appoint the petitioner, and the present members of the said Society, a body corporate and politic, by the name of "THE CORPORATION OF THE CHAMBER OF COMMERCE IN THE CITY OF NEW YORK, IN AMERICA," agreeable to the prayer of the said petition: Therefore, we being willing to further the laudable designs of our said loving subjects, and to give stability to an institution from whence great advantages may arise, as well as to our kingdom of Great Britain as to our said province.

KNOW YE, That of our special grace, certain knowledge and mere motion, we have willed, ordained, given, granted, constituted and appointed, and by these presents for us, our heirs and successors, do will, ordain, give, grant, constitute and appoint, that the present members of the said Society, associated for the purpose aforesaid, that is to say, JOHN CRUGER, ELIAS DESBROSSES, JAMES JAUNCEY, JACOB WALTON, ROBERT MURRAY, HUGH WALLACE, GEORGE FOLLIOT, WM. WALTON, JOHN ALSOP, HENRY WHITE, PHILIP LIVINGSTON, SAMUEL VERPLANCK, THEOPHYLACT BACHE, THOMAS WHITE, MILES SHERBROOKE, WALTER FRANKLIN, ROBERT ROSS WADDELL, ACHERSON THOMPSON, LAWRENCE CORTWRIGHT, THOMAS RANDAL, WILLIAM M'ADAM, ISAAC LOW, ANTHONY VAN DAM, ROBERT WATTS, JOHN HARRIS CRUGER, GERARD WALTON, ISAAC SEARS, JACOBUS VAN ZANDT, CHARLES M'EVERS, JOHN MOORE, LEWIS PINTARD, LEVINUS CLARKSON, NICHOLAS GOUVERNEUR, RICHARD YATES,

THOMAS MARSTON, PETER HASSENCLEVER, ALEXANDER WALLACE, GABRIEL H. LUDLOW, THOMAS BUCHANAN, WM. NEILSON, SAMPSON SIMPSON, PETER KETTLETAS, GERARD W. BEEKMAN, JACOB WATSON, RICHARD SHARPE, PETER REMSEN, HENRY REMSEN, junior, WILLIAM SETON, EDW. LAIGHT, JOHN READE, ROBERT ALEXANDER, THOMAS W. MOORE, ABRAHAM LYNSON, ISAAC ROOSEVELT, NICHOLAS HOFFMAN, HAMILTON YOUNG, THOMAS WALTON, JOHN THURMAN, JOHN WEATHERHEAD, GARRIT RAPELYE, GERARD DUYCKINCK, WILLIAM STEPPLE, WILLIAM IMLAY, AUGUSTUS VAN HORNE, HENRY C. BOGERT, GEORGE W. LUDLOW, JOSEPH BULL, LEONARD LISPENARD, THOMAS MILLER, JAS. BEEKMAN, SAMUEL KEMBLE, ALEXANDER M'DONALD and SAMUEL BAYARD, jun., all of our City of New York, in our said province of New York, merchants, and their successors, to be elected by virtue of this our present Charter, shall for ever hereafter be one body corporate and politic in deed, fact and name, by the name and style, "THE CORPORATION OF THE CHAMBER OF COMMERCE IN THE CITY OF NEW YORK, IN AMERICA," and them and their successors, by the same name, we do by these presents really and fully make, erect, create, constitute and declare one body politic and corporate, in deed, fact and name for ever; and will give, grant, and ordain, that they and their successors, the Corporation of the Chamber of Commerce in the City of New York, in America, by the same name, shall and may have perpetual succession, and shall and may by the same name, be persons capable in the law to sue and be sued, implead and be impleaded, answer and be answered, defend and be defended, in all courts and elsewhere, in all manner of actions, suits, complaints, pleas, causes, matters and demands whatsoever, as fully and ample as any other of our liege subjects of our said province of New York may or can sue or be sued, implead or be impleaded, defend or be defended, by any lawful ways or means whatsoever; and that they and their successors by the same name, shall be for ever hereafter persons capable and able in the law to purchase, take, receive, hold and enjoy to them and their successors, any messuages, tenements, houses and real estates whatsoever, and all other hereditaments of whatsoever nature, kind and quality, they may be, in fee simple, for term of life or lives, or in any other manner howsoever, and also any goods, chattels or personal estate whatsoever, as well

To have perpetual succession.

To sue and be sued in all manner of actions.

May be capable in law to purchase and enjoy real estate.

for enabling them the better to carry into execution, encourage and promote, by just and lawful ways and means, such measures as will tend to promote and extend just and lawful commerce, as to provide for, aid and assist, at their discretion, such members of our said Corporation as may hereafter be reduced to poverty, and their widows and children; *Provided always*, the clear yearly value of the said real estate doth not at any time exceed the sum of three thousand pounds sterling, lawful money of our Kingdom of Great Britain. And that our said Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, by the same name, shall and may have full power and authority to give, grant, sell, lease, demise and dispose of the same real estate and hereditaments whatsoever, for life, or lives, or years, or for ever; and all goods, chattels and personal estates whatsoever at their will and pleasure, according as they shall judge to be most beneficial and advantageous to the good ends and purposes aforementioned.

Provided their clear yearly income does not exceed £3,000 sterl. per ann.

Power to lease or dispose of real estate, &c.

And have a common seal, which may be altered.

May build any house or houses.

For ever to have one President, one or more Vice-Presidents, one or more Treasurers, and one Secretary.

Appointment of J. Cruger, Esq., President; Hugh Wallace, Vice-President; the present Secretary of our said Corporation hereby

erected, who shall hold, possess and enjoy their said respective offices until the first Tuesday in May now next ensuing; and for keeping up the succession in the said offices, our royal will and pleasure is, and we do hereby for us, our heirs and successors, establish, direct and require, and give and grant to the said Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, that on the said first Tuesday in May now next ensuing, [and for the keeping up the succession in the said office, our royal will and pleasure is, and we do hereby for us, our heirs and successors, establish, direct and require, and give and grant to the said Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, that on the said first Tuesday in May now next ensuing,] and yearly, and every year for ever thereafter, on the first Tuesday in May in every year, they and their successors shall meet at some convenient place in our said City of New York, to be fixed and ascertained by some of the by-laws and regulations of our said Corporation, and there, by the majority of such of them as shall so meet, shall by ballot or in such other manner and form as shall be regulated by the by-laws or regulations of our said Corporation, elect or choose one President, one or more Vice-President or Vice-Presidents, one or more Treasurer or Treasurers, and one Secretary, to serve in the said offices for the ensuing year, who shall immediately enter upon their respective offices, and hold, exercise and enjoy the same respectively from the time of such election, for and during the space of one year, and until other fit persons shall be elected and chosen in their respective places, according to the laws and regulations aforesaid. And in case any of the said persons by these presents nominated and appointed to the respective offices aforesaid, or who shall hereafter be elected and chosen thereto respectively, shall die, or on any account be removed from such offices respectively before the time of their respective appointed services shall be expired, or refuse or neglect to act in and execute the office for which he or they shall be so elected and chosen, or is or are herein nominated or appointed, that then, and in any and every such case, it shall and may be lawful for the members of our said body corporate hereby erected to meet at such time and times, and at such place and places within our said City of New York, and upon such notices

Elias Desbrosses, Treasurer;
Anthony Van Dam, Secretary.

On the first Tuesday in May in every year, to meet and choose officers.

And elect one President, one or more Vice-Presidents, one or more Treasurers, and one Secretary, for one year.

And until other fit persons be chosen.

In case any of the present or future officers shall die or be removed,

others may be elected,

upon notice given,

and summons as shall for that purpose be established and directed by the by-laws or regulations of our said body corporate, and there, by the majority of such of them as shall so meet, elect and choose other or others to the said offices respectively in the place of him or them so dying, removing, neglecting or refusing to act in manner and form, and after the same method to be observed in the annual elections of the like officers respectively, by virtue of these our letters patent, and the said by-laws or regulations of our said Corporation, hereby giving and granting that such person or persons as shall be so elected and chosen by the majority of such of the said members as shall meet in manner aforesaid, shall have, hold, exercise and enjoy such the office or offices to which he or they shall be so elected and chosen, from the time of such election until the first Tuesday in May then next ensuing, and until other or others be legally chosen in his or their place and stead, as fully and amply, to all intents and purposes whatsoever, as the person or persons in whose place he or they shall be chosen might or could have done by virtue of these presents. And our will and pleasure is, and we do hereby for us, our heirs and successors, ordain, direct and require, that every President, Vice-President, Treasurer and Secretary to be elected by virtue of these presents, shall, before they act in their respective offices, take an oath or affirmation to be to them administered by the President, or in his absence, by one of the Vice-Presidents of the preceding year, (who are hereby authorized to administer the same,) for the faithful and due execution of their respective offices during their continuance in the same respectively. And we do further, for us, our heirs and successors, give and grant to the Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, that besides the annual meeting of our said Corporation herein before directed and appointed to be held on the first Tuesday in May in every year, it shall and may be lawful for them, their heirs and successors, for ever hereafter, for promoting and carrying into execution the laudable intents and designs aforesaid, and for the transacting the business and concerns of our said Corporation, to meet together on the first Tuesday in every month, for ever, at such place or places in our said City of New York as shall for that purpose be established, fixed, ascertained and appointed by the by-laws and regula-

by a majority
of votes,

who shall exercise the offices
until the first
of May following.

Officers to
take an oath or
affirmation be-
fore the Presi-
dent or Vice-
President, for
the faithful
discharge of
their duty.

The first Tues-
day in May in
every year.

tions of our said corporation; and that the members of our said Corporation being so met, or so many of them in number at the least as shall by the by-laws or ordinances of our said Corporation be for that purpose from time to time established, directed, ordained or appointed, shall, together with the President or any one of the Vice-Presidents of our said Corporation for the time being, be a legal meeting of our said Corporation; and they or the major part of them so met, shall have full power and authority to adjourn from day to day, or for any other time, as the business of our said Corporation may require, and to do, execute and perform all and every act and acts, thing and things whatsoever which the said Corporation of the Chamber of Commerce in the City of New York, in America, are or shall by these letters patent be authorized to do, act or transact, in as full and ample manner as if all and every of the members of the said Corporation were present. And that at any such legal meeting of the said Corporation, they shall and may in writing, under the common seal, make, frame, constitute, establish and ordain, from time to time, and at all times hereafter, such laws, constitutions, ordinances, regulations and statutes, for the better government of the officers and members of the said Corporation, for fixing and ascertaining the places of meeting of our said Corporation as aforesaid, and for regulating all other their affairs and business as they, or the major part of them so legally met, shall judge best for the general good of the said Corporation, and profitable for the more effectually promoting the beneficial designs of their institutions;—all which laws, constitutions, regulations, ordinances and statutes so to be made, framed, constituted, established and ordained as aforesaid, we will, command and ordain by these presents for us, our heirs and successors, to be from time to time and at all times hereafter, kept, obeyed and performed in all things as the same ought to be, on the penalties and amercements in the same to be imposed and limited, so as the same laws, constitutions, regulations and statutes be reasonable in themselves, and not repugnant or contrary to the laws and statutes of that part of our kingdom of Great Britain called England, nor of our said province of New York. And for the keeping up and preserving forever hereafter a succession of members for the said Corporation, our will and pleasure is, and we do hereby for us, our heirs and successors, ordain and give

The President or any one of the Vice-Presidents, with such a number of the members as the by-laws direct, to be a legal meeting to adjourn from day to day, and transact business,

and be obeyed,

so that they are not repugnant or contrary to the laws of Great Britain and New York.

For the succession of members,

and grant to the said Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, that at any of the stated legal meetings of the said Corporation, to be held on the first Tuesday in every month for ever hereafter, but at no other meeting of our said Corporation, it shall and may be lawful for them and their successors forever, to elect and choose, in such manner and form, and upon such terms and conditions, as shall be directed, ordained and established for that purpose by any of the said by-laws, statutes, constitutions or ordinances of the said Corporation, such and so many persons to be members of the said Corporation as they shall think beneficial to the laudable designs of the said Corporation; which persons, and every of them so from time to time elected and chosen, shall, by virtue of these presents and of such election, be vested with all the powers, authorities and privileges which any member of the said Corporation is hereby invested with. And in case any other extraordinary meeting or meetings of the said Corporation shall at any time or times be judged necessary for the promoting the interest and business of the said Corporation, we do hereby for us, our heirs and successors, will, declare and ordain, that it shall and may be lawful for our said corporation to meet from time to time, at such days and times, and at such places in our said City of New York, and upon such notices or summons as shall for that purpose from time to time be settled, established, directed, ordained and appointed for that purpose, shall, together with the President, or one of the Vice-Presidents of the said Corporation for the time being, be a legal meeting of the said Corporation; and they, or the major part of them so met, shall have full power and authority to act, transact, do and perform all and singular whatsoever may be transacted, done and performed at any of the hereby stated meetings aforesaid of the said Corporation, saving and except the electing members, making laws, ordinances and statutes, and disposing of the real estates of the said Corporation. And our will and pleasure is, that until the same shall be otherwise regulated as aforesaid, that the meetings of the said Corporation shall be held in the great room of the building commonly called the Exchange, situate at the lower end of the street called Broad-street, in the said City of New York; and that until the same shall be also otherwise regulated as afore-

at stated meetings only,

to elect and choose,

who are to have all the privileges that any member is hereby invested with.

Extraordinary meeting.

to meet upon notice.

to be legal,

but not to elect members, make laws, or dispose of real estate.

To be held in the Exchange.

said, that no act done in any meeting of the said Corporation shall be legal, good or valid, unless the President, or one of the Vice-Presidents, and twenty others of the members of the said Corporation at least be present, and the major part of them consenting thereto. And we do further give and grant to the said Corporation of the Chamber of Commerce in the City of New York, in America, that it shall and may be lawful for the President of the said Corporation, at all times hereafter for ever, to appoint a door-keeper, one or more messenger or messengers, and all such other inferior officers as shall by him be thought necessary for the said Corporation, and to displace them, and any or every of them, at his will and pleasure. *Provided, nevertheless,* that no such door-keeper, messenger or other officer shall hold his or their office or offices by virtue of any such appointment longer than until the then next lawful meeting of our said Corporation, unless such person or persons so appointed shall be then approved of by the majority of such of the members of the said Corporation as shall then be met. And we do further, of our special grace, certain knowledge, and mere motion, for us, our heirs and successors, grant and ordain, that when and as often as the President, or any Vice-President, Treasurer or Secretary of the said Corporation shall misdeemean himself in his or their said offices respectively, and thereupon a complaint or charge in writing shall be exhibited against him or them, by any member of the said Corporation, at any legal meeting or meetings of the said Corporation, that it shall and may be lawful for the members of the said Corporation then met, or the major part of them, from time to time, upon examination and due proof, to suspend or discharge such President, Vice-President, Treasurer or Secretary, from their offices respectively, although the yearly or other time for their respective services shall not be expired, any thing before in these presents contained to the contrary thereof in any wise notwithstanding. And further, we do by these presents for us, our heirs and successors, give and grant unto the said Corporation of the Chamber of Commerce in the City of New York, in America, and their successors for ever, that this our present Charter shall be deemed, adjudged and construed in all cases most favorably, and for the best benefit and advantage of our said Corporation, and for promoting the good intentions and designs hereinbefore expressed,

No act done
in any meeting
to be valid
[unless a given
number be
present.]

inducing us graciously to grant the same; and that this our present grant, being entered on record as hereinafter is expressed, or the enrolment thereof, shall be for ever hereafter good and effectual in the law, according to our true intent and meaning hereinbefore declared, without any other license, grant or confirmation from us, our heirs and successors, hereafter by the said Corporation to be had or obtained, notwithstanding the not reciting or misrecital, or not naming or misnaming of the aforesaid offices, franchises, privileges, immunities or other the premises, or any of them, and although no writ of *ad quo damnum*, or other writs, inquisitions or precepts hath been upon this occasion had, made, issued or prosecuted, any statute, act, ordinance or provision, or other matter or thing to the contrary thereof in any wise notwithstanding. In testimony whereof, we have caused these our letters to be made patent, and the great seal of our said province to be hereunto affixed, and the same to be entered on record in our Secretary's office, for our said province, in one of the books of patents there remaining.

Witness our trusty and well-beloved CADWALLADER COLDEN, Esquire, our Lieutenant-Governor and Commander-in-Chief of our said province of New York and the territories depending thereon, in America, by and with the advice and consent of our Council for our said province, at Fort George, in our City of New York, this thirteenth day of March, in the year of our Lord one thousand seven hundred and seventy, and of our reign the tenth.

ACT OF RE-INCORPORATION
OF THE
CHAMBER OF COMMERCE.

AN ACT

TO REMOVE DOUBTS CONCERNING THE CORPORATION OF THE CHAMBER OF COMMERCE, AND TO CONFIRM THE RIGHTS AND PRIVILEGES THEREOF.

Passed the 13th April, 1784.

WHEREAS, GEORGE THE THIRD, King of Great Britain did, on the thirteenth day of March, one thousand seven hundred and seventy, grant certain letters patent to the persons therein named, under the great seal of the then colony of New York, which said letters patent are in the words following, that is to say:

Preamble.

(Here follows a recital of the preceding Charter.)

And whereas, SAMUEL BROOME, JEREMIAH PLATT, JOHN BROOME, BENJAMIN LEDYARD, THOMAS RANDAL, ROBERT BOWNE, DANIEL PHOENIX, JACOB MORRIS, ELIPHALET BRUSH, JAMES JARVIS, JOHN BLAGGE, VINER VAN ZANDT, STEPHEN SAYRE, JACOBUS VAN ZANDT, NATHANIEL HAZARD, THOMAS HAZARD, ABRAHAM P. LOTT, ABRAHAM DURYEE, WILLIAM MALCOLM, JOHN ALSOP, ISAAC SEARS, JAMES BEEKMAN, ABRAHAM LOTT, COMFORT SANDS, JOSEPH BLACKWELL, JOSHUA SANDS, LAWRENCE EMBREE, GEORGE EMBREE, GERARDUS DUYCKINCK, Jun., CORNELIUS RAY, ANTHONY GRIFFITHS, THOMAS TUCKER, JOHN BERRIAN, ISAAC ROOSEVELT, JOHN FRANKLIN, JOHN H. KIP, HENRY H. KIP, ARCHIBALD CURRIE, DAVID CURRIE, and JONATHAN LAWRENCE, all of the said city, merchants, have by their humble petition set forth, that the said letters patent, and the powers and privileges exercised and enjoyed under the same, have greatly promoted the commercial interests of this State, and that great and daily inconveniences and injury are suffered by the suspension thereof, and have prayed that the said letters patent, with all and singular the

Reciting the petitioners for a revival of the Corporation.

powers and franchises therein contained, may be revived, confirmed and established:

1. *Be it therefore enacted by the people of the State of New York, represented in Senate and Assembly, and it is hereby enacted by the authority of the same,* That the said letters patent, and all and singular the powers, rights, privileges, franchises and immunities therein and thereby granted, shall be, and the same are hereby ratified and confirmed; and the said letters patent, and all and every other former rights, privileges, franchises and immunities therein and thereby granted, shall be and remain in full force and efficacy, notwithstanding any non-user or misuser of any of the said powers, rights, privileges, franchises and immunities heretofore had, committed, done or suffered, between the nineteenth day of April, one thousand seven hundred and seventy-five, and the date of the passing of this Act. And the said SAMUEL BROOME, JEREMIAH PLATT, JOHN BROOME, BENJAMIN LEDYARD, THOMAS RANDAL, ROBERT BOWNE, DANIEL PHOENIX, JACOB MORRIS, ELIPHALET BRUSH, JAMES JARVIS, JOHN BLAGGE, VINER VAN ZANDT, STEPHEN SAYRE, JACOBUS VAN ZANDT, NATHANIEL HAZARD, THOMAS HAZARD, ABRAHAM P. LOTT, ABRAHAM DURYEE, WILLIAM MALCOLM, JOHN ALSOP, ISAAC SEARS, JAMES BEEKMAN, ABRAHAM LOTT, COMFORT SANDS, JOSEPH BLACKWELL, JOSHUA SANDS, LAWRENCE EMBREE, GEORGE EMBREE, GERARDUS DUYCKINCK, Jr., CORNELIUS RAY, ANTHONY GRIFFITHS, THOMAS TUCKER, JOHN BERRIAN, ISAAC ROOSEVELT, JOHN FRANKLIN, JOHN H. KIP, HENRY H. KIP, ARCHIBALD CURRIE, DAVID CURRIE, and JONATHAN LAWRENCE, shall and may for ever hereafter remain, continue, and be a body corporate and politic in deed, fact and name, by the name of "THE CORPORATION OF THE CHAMBER OF COMMERCE OF THE STATE OF NEW YORK," and by that name to sue, plead and be impleaded, and to answer and to be answered.

Charter of the Chamber of Commerce confirmed.

notwithstanding any non-user, between the 19th of April, 1775, and the date of this Act.

Members of the present Chamber of Commerce.

Name of the present Chamber of Commerce.

Names of the President, Vice-President, Treasurer and Secretary.

Their continuance in office.

2. *And be it further enacted by the authority aforesaid,* That the said JOHN ALSOP shall be the present President, and the above named ISAAC SEARS the present Vice-President: that the above named JOHN BROOME, the present Treasurer, and the above named JOHN BLAGGE, the present Secretary of the said Corporation, who shall hold, possess and enjoy their said

respective offices, until the first Tuesday in May now next ensuing; and in case any or either of the said persons hereby nominated and appointed to the respective offices aforesaid, shall happen to die, or shall neglect or refuse to act in or execute, or shall be removed from such office or offices respectively, before the said first Tuesday in May next, that then, and in every such case, it shall and may be lawful for the members of the said body corporate to meet at such time and times, and such place and places within the said city as they shall for that purpose appoint, and upon such notices or summons as have heretofore been used and established by the said body corporate, and then and there, by the majority of such as shall so meet, to elect and choose other or others to the said office or offices respectively, in the place of him or them so dying, or neglecting or refusing to act, or being removed, in the manner heretofore used in the annual elections of the like officers, which person or persons so elected and chosen, shall enjoy and exercise the said office or offices, and all and singular the privileges and powers thereto belonging or appertaining, until the said first Tuesday in May next.

When and how other officers shall be elected to the Presidency, &c.

3. *And be it further enacted by the authority aforesaid*, That The Corporation of the Chamber of Commerce of the State of New York, and their successors, shall and may for ever hereafter, peaceably have, hold, use and enjoy all and every the rights, powers, liberties, privileges, franchises, usages, lands, tenements, estates and hereditaments, which have heretofore, by virtue of the above recited Charter, been given or granted unto the said Corporation, by the name of The Corporation of the Chamber of Commerce in the City of New York, in America.

All former rights, &c., to be enjoyed by the present Corporation.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT TO REMOVE DOUBTS CONCERNING THE CORPORATION OF THE CHAMBER OF COMMERCE, AND TO CONFIRM THE RIGHTS AND PRIVILEGES THEREOF," PASSED THE 13TH DAY OF APRIL, 1784.

Passed January 25th, 1854.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Such part of the letters patent under GEORGE THE THIRD, King of Great Britain, bearing date 13th March, 1770, confirmed by act of the Legislature of the State of New York, under date 13th April, 1784, as required the Chamber of Commerce of New York to meet on the first Tuesday of each month, shall be so altered or amended as to permit of the regular monthly meeting being held on the first week in each month, and upon any day of such week as the President or other duly authorized members of said Corporation may designate.

Meetings to be held on such days in the first week in each month, as the President shall designate.

SECTION 2. This act shall take effect immediately.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT TO REMOVE DOUBTS CONCERNING THE CORPORATION OF THE CHAMBER OF COMMERCE, AND TO CONFIRM THE RIGHTS AND PRIVILEGES THEREOF," PASSED APRIL 13TH, 1784.

Passed April 15th, 1861.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Chamber of Commerce of the State of New York shall have the power to elect, by ballot, in conformity with the by-laws adopted by the said Chamber, a committee to be known and styled the "Arbitration Committee of the Chamber of Commerce," and shall have power also to appoint a Com-

Election and appointment of Committees.

mittee of Appeal; and the duly elected members of the said Chamber, and all persons claiming by, through, or under them, may, under the limitations, and subject to the restrictions imposed by the provisions of the statutes of the State of New York relative to arbitration, submit to the decision of the Committees of Arbitration and Appeal, as the same may be constituted by the said Chamber, any controversy existing between them which might be the subject of an action, and may agree that a final judgment, in a court of record, to be by them designated, shall be rendered on any award made pursuant to such submission.

SECTION 2. The Committee of Arbitration and Appeal, elected or appointed as aforesaid, shall possess the same powers, be subject to the same duties and disabilities as appertain to arbitrators by the laws of the State of New York, and awards made by them must be made, and may be enforced, as therein and thereby directed; and all the provisions contained in title fourteen, part third, chapter eight of the Revised Statutes of the State of New York, and all acts amendatory or in substitution thereof, shall apply to the proceedings had before the said Committees of Arbitration and Appeal, as if specially incorporated herein; except that the judgment, to be rendered in the manner therein directed, on any award made by them as aforesaid, that is to say by the Committee of Arbitration, no appeal from its action being taken by either party to the controversy, or by the confirmatory action of the Committee of Appeal, shall not be subject to be removed, reversed, modified or appealed from by the parties interested, in such submission as aforesaid.

Powers and duties.

In regard to reversal of judgment.

SECTION 3. This act shall take effect immediately.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT TO AMEND AN ACT ENTITLED 'AN ACT TO REMOVE DOUBTS CONCERNING THE CORPORATION OF THE CHAMBER OF COMMERCE, AND TO CONFIRM THE RIGHTS AND PRIVILEGES THEREOF,' PASSED APRIL THIRTEENTH, SEVENTEEN HUNDRED AND EIGHTY-FOUR," PASSED APRIL FIFTEENTH, EIGHTEEN HUNDRED AND SIXTY-ONE.

Passed April 22d, 1865.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Controversies submitted to the Committee of Arbitration of the Chamber of Commerce of the State of New York, under the Act entitled "An act to amend an act entitled 'An act to remove doubts concerning the Corporation of the Chamber of Commerce, and to confirm the rights and privileges thereof,' passed April thirteenth, seventeen hundred and eighty-four," passed April fifteenth, eighteen hundred and sixty-one, may be heard and decided by a majority of the members of the said Committee.

Shall take
oath before a
Justice of the
S u p r e m e
Court.

SECTION 2. The members of the said Committee of Arbitration shall not be obliged to be sworn after the manner of Arbitrators, but shall, before assuming the duties of their office, take an oath before a Justice of the Supreme Court, faithfully and fairly to hear and examine all matters in controversy submitted to them under the act aforesaid, and make a just award according to the best of their understanding. Such oath shall be filed with the Secretary of the Chamber of Commerce.

Chairman
shall have
power to ad-
minister oath
to witnesses.

SECTION 3. The Chairman for the time being of said Committee of Arbitration shall have power to administer the oath to all witnesses produced before said Committee in matters of controversy submitted to said Committee.

SECTION 4. This act shall take effect immediately.

AN ACT

TO AMEND THE CHARTER OF THE CORPORATION OF THE CHAMBER
OF COMMERCE OF THE STATE OF NEW YORK.

Passed April 6th, 1878.

*The People of the State of New York, represented in
Senate and Assembly, do enact as follows:*

SECTION 1. The Corporation of the Chamber of Commerce of the State of New York, re-incorporated by an act of the Legislature of the State of New York, passed on the 13th day of April, 1784, is hereby empowered to take and receive from the United States of America, or from any Corporation, or from any person, or persons, any real or personal estate, also to take by devise or purchase any real or personal estate, for the purposes of said Corporation, and to convey, lease or mortgage the same, or any part thereof, the net annual income of which real estate shall not exceed one hundred thousand dollars.

Chamber of Commerce to receive from the United States, or any Corporation or person, real or personal estate, and may convey or lease the same.

Income of which real estate not to exceed \$100,000 per annum.

SECTION 2. It shall be lawful for the said Corporation to elect, from among its members, at its first meeting called for the purpose after the passage of this act, six Trustees, who, with the President of said Corporation, shall constitute a Board, and have the charge and control of the real estate of said Corporation; said Trustees, at said first election, shall be classified so that two of them be elected for one year; two of them for two years; and two of them for three years; and at each annual election after the first, two Trustees shall be elected to fill the class of those whose terms expire; and said Corporation, at any regular meeting of the Chamber, shall have power to fill any vacancy in said Board of Trustees.

Election of a Board of Trustees.

Trustees to have control of real estate, and to be classified.

SECTION 3. All conveyances, mortgages, leases or contracts, of, or affecting, any real estate of said Corporation, shall be authorized by said Board of Trustees, and President of the Chamber, or of a majority thereof; and shall, when so authorized, be executed under the seal of the Corporation, attested by the signatures of the President and Secretary of the Chamber.

Conveyances, Mortgages, Leases and Contracts authorized by Trustees under seal of the Corporation, attested by President and Secretary.

SECTION 4. This act shall take effect immediately.

BY-LAWS OF THE CORPORATION
OF THE
Chamber of Commerce of the State of New York

IN FORCE MAY, 1924

ARTICLE I
Officers and Their Election

THE officers of the Chamber shall be a President, twelve Vice-Presidents, an Executive Vice-President, a Treasurer and a Secretary, all of whom shall be chosen by ballot, a majority of the votes cast at each election being necessary in each instance to elect.

The terms of office of officers now in service shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, and annually thereafter, all officers as defined in this article shall be elected to hold office for one year, except that the twelve Vice-Presidents elected at the Annual Meeting in May, 1924, shall be chosen, three to hold office for one year, three for two years, three for three years, and three for four years, their respective terms of service being designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, three Vice-Presidents shall be chosen to serve for four years to take the place of those whose terms of office then expire. After the expiration of a Vice-President's term of office he shall be ineligible for re-election until one year has intervened. The Executive Vice-President shall not be subject to the limitation of this paragraph, but may be re-elected to office annually without limitation.

No member shall hold the office of President for more than two consecutive years, but a member who has been President

may be elected to serve again, provided another member has served as President in the intervening time, and provided that no member shall serve in all more than four years.

All persons elected to office shall take the oath or affirmation required by the Charter, and shall continue in office as above provided, or until their successors shall have become duly qualified according to the Charter.

Should any elective office become vacant through any cause whatsoever, such vacancy shall be filled by election at the next regular meeting or any subsequent meeting of the Chamber after such vacancy has been reported to the Chamber.

ARTICLE II

Meetings

The regular meetings of the Chamber for the transaction of business shall be held in the Hall of the Chamber on the first Thursday in each month (the summer vacation only excepted) at twelve o'clock noon. When the first Thursday in any month shall fall on a legal holiday, the regular monthly meeting shall be held on the Thursday following, unless otherwise ordered by a vote of the Chamber.

Special meetings may be held at such other places, and at such other times as the President, or, in his absence, one of the twelve Vice-Presidents, according to seniority, may designate, upon the written requisition of ten members; provided, that one day's notice of the time, place and object of the meeting shall have been publicly given; and also provided, that no other business except that designated in such call and notice shall be acted upon.

ARTICLE III

Members and Their Election

No person shall be admitted a member of this Chamber except merchants or others engaged in trade or commerce or in pursuits directly connected therewith.

The membership of the Chamber shall consist of two classes: resident, those who reside in or do business in the City of New York; non-resident, those who neither reside in nor do business in the City of New York.

All nominations for membership of the Chamber must be made in writing, signed by one member, seconded by another member, together with a statement of the occupation and qualification of the candidate and be addressed to the Executive Committee for consideration.

If the Executive Committee approve the nomination, they shall report the same to the Chamber at the first regular meeting thereafter. The candidate shall be then balloted for; and if five or more negative ballots are cast, he shall not be admitted a mem-

ber, nor be again proposed until after the expiration of one year from the time of such rejection.

For dishonorable conduct or dealings the Executive Committee, after a hearing, may recommend to the Chamber that any member charged with such conduct be expelled, suspended or disciplined. The Chamber may by a two-thirds vote at a regular meeting expel, suspend or discipline such member, provided due notice has been given by the Secretary of the Chamber both to the accused and to the membership at large of the day and hour when the recommendation of the Executive Committee shall be acted on, and provided further, that if the accused member does not appear for such hearing in person or by proxy action may be taken by the Chamber in his absence.

When the resident membership shall number 2,000 (exclusive of honorary members), no more members shall be admitted to that class, except to fill vacancies that may thereafter occur; and when the non-resident membership shall have reached 250, no more members shall be admitted to that class, except to fill vacancies that may thereafter occur.

The Secretary of the Chamber shall furnish to each member in good standing who may apply therefor, an engraved certificate of membership, duly signed and authenticated.

ARTICLE IV

Honorary Members

Honorary members may be elected at any regular meeting of the Chamber, or at a special meeting called for that purpose, on the nomination of the Executive Committee, and without ballot, unless called for. They shall be entitled to all the privileges of regular members, and shall pay neither initiation fee nor annual dues.

The Secretary shall furnish each honorary member, thus elected, with a certificate of membership, duly signed and authenticated.

ARTICLE V

Dues

After candidates have been duly elected by the Chamber they shall become members upon payment within thirty days of an initiation fee of fifty dollars. The annual dues of resident members shall be one hundred dollars per year, payable on the first day of January of each year, but the annual dues of any member elected after the January meeting shall be for the unexpired portion of that year, payable in advance at the time of election.

For non-resident members the initiation fee shall be fifty dollars and the annual dues of twenty-five dollars payable in like manner.

The Executive Committee may, in its discretion, for reasons satisfactory to itself, remit the annual dues of any member; and it may accept the resignation of any member, at any time, if the annual dues of such member, to the date of such resignation, shall have been paid or remitted.

If the annual dues of any member remain unpaid for one year his name may, after due notice to the said member, be stricken from the rolls of the Chamber by order of the Executive Committee.

ARTICLE VI

Duties of Officers

Of the President.—The President shall exercise a general supervision of the affairs and interests of the Chamber. He shall preside at all meetings of the Chamber, regular and special, and all motions of business and adjournment shall be addressed to him. He shall appoint all Special Committees, except where the Chamber shall otherwise order. He shall sign all official documents of the Chamber. He shall countersign the annual accounts of the Treasurer when duly audited. He shall call special meetings of the Chamber, on the written requisition of not less than ten members, stating the object thereof, and shall designate the time and place at which such special meeting may be held, and direct the due notification thereof.

Of the Executive Vice-President.—The Executive Vice-President shall devote himself entirely to the affairs of the Chamber. He shall have charge of the administrative work of the Chamber, supervising the duties of the Secretary and of all the salaried staff of the Chamber, and of those employed by the Board of Trustees of the Real Estate. He shall, under the direction of the President and the Executive Committee, conduct the correspondence of the Chamber, especially with reference to its external affairs. He shall be, *ex-officio* without vote, a member of all Committees, regular or special, and shall attend as far as possible all meetings of the Chamber and of its Committees. He shall, under the guidance of the President and the Executive Committee, supervise all publications of the Chamber. He shall be the custodian on behalf of the Chamber of the Great Hall and other rooms of the Chamber, and shall have the care of its Library, portraits, and other property not otherwise provided for, except its real estate. He shall keep such property insured against fire. He shall relieve the President in every way possible of all routine or ordinary details of the work of the organization. He shall assist the Committees of the Chamber so far as is in his power. In the absence of the Executive Vice-President the Secretary shall act in his place.

Of the Vice-Presidents.—The twelve Vice-Presidents, in the order of seniority, shall, in the absence of the President, have the same power and authority as the President.

Of the Treasurer.—The Treasurer shall have the charge of all moneys collected or received for the use of the Chamber, except money arising from or in any way connected with its real estate, or appropriated for, or received to acquire or improve the same. He shall disburse the same whenever not otherwise provided for by these by-laws, only upon the written warrants of the Executive Committee. He shall keep books of account of all receipts and disbursements, and the vouchers therefor, in the usual form, and shall produce a copy of the same, fairly stated, for the inspection of the members, at each Annual Meeting. Such a copy of accounts shall be duly audited by auditors appointed for the purpose by the Chamber, and be signed by them and countersigned by the President, on or before the Tuesday next preceding the Annual Meeting. The Treasurer shall deliver over to his successor the cash remaining in his hands, and also any certificates of stock or other securities, the property of this Chamber, together with the books of account, chest and key, and may require a receipt therefor. In the absence of the Treasurer-elect, the same shall be delivered to the President. In the absence of the Treasurer, the Chairman of the Executive Committee shall perform the duties assigned to the Treasurer.

Of the Secretary.—The Secretary shall, under the supervision of the Executive Vice-President, devote himself entirely to the affairs of the Chamber. He shall have the general care of all documents and correspondence belonging to the Corporation. He shall attend all meetings, and keep a fair and correct register of all proceedings, rules and regulations of the Chamber, which shall be regularly entered in the minute book. He shall also attend upon and keep minutes of the proceedings of the Executive and other Standing Committees, and shall assist the Special Committees as far as is in his power. He shall duly notify members of their election, sign all documents jointly with the President, and have the custody of the seal of the Chamber for their proper authentication. He shall give due notice of all meetings, both regular and special. When neither the President, nor any of the twelve Vice-Presidents is present at any meeting regularly called, the Secretary shall, after reasonable delay, adjourn the meeting *sine die*.

He shall see to the collection of all dues from members, and regularly turn over and pay the same to the Treasurer, and shall render him all required assistance in the clerical part of his duties.

An Assistant Secretary may be appointed by the Executive Committee. He shall assist the Secretary in the performance of his duties, and in the Secretary's absence act in his place. He shall hold office during the pleasure of the Committee.

ARTICLE VII

Board of Trustees of the Real Estate

Membership.—The Board of Trustees of the Real Estate shall consist of the President of the Chamber, *ex-officio*, as Chairman, and six members to be elected as hereinafter provided.

Election.—At each Annual Meeting of the Chamber there shall be elected from among the members two trustees for a term of three years, to fill the vacancies of those whose term of office will then expire. Any vacancies in said Board otherwise occurring shall be filled at the next regular or any subsequent meeting of the Chamber.

Powers and Duties.—The President of the Chamber shall be the Chairman of the Board of Trustees *ex-officio*, and the Secretary of the Chamber shall be Secretary *ex-officio*, without vote, and said Board may elect a Treasurer, and appoint such other assistants as it may require. The Board of Trustees shall have the custody, control and management of all real estate of the Chamber, and of all funds and other property appropriated or received for the purchase, improvement, or any other purpose affecting real estate, and shall have full power in the name of the Chamber to contract for and acquire such real estate as it may deem wise, and to improve the same by demolition, alteration or erection of buildings or otherwise, adopt plans, modify the same from time to time, and make all appropriate contracts therefor and for the management of said real estate. The Board may provide for such compensation to its appointees and assistants as it may deem wise, and pay the same from any funds in its control. No sale or mortgage of the real estate shall be made except by authority of the Chamber by resolution adopted at a regular meeting or special meeting called for that purpose. All conveyances, mortgages, leases or contracts of, or affecting the real estate of the Chamber, shall be authorized by said Board and the President, or a majority thereof, and shall, when so authorized, be executed under the seal of the Chamber, attested by the signatures of the President and Secretary of the Chamber.

The Great Hall of the Chamber shall be used exclusively for meetings of the Chamber, unless consent for other temporary use be given by a two-thirds vote of the Board of Trustees of the Real Estate and the President of the Chamber at a regular meeting or special meeting called for that purpose, or in writing.

The Board shall from time to time as it deems wise, make reports to the Chamber.

The Board is authorized and empowered to receive from the Treasurer of the Chamber all gifts and bequests of money or securities given to the Chamber in trust in the way of endowment

or otherwise, for any object connected with the operations of the Chamber, except the Charity Fund, and to invest, control, manage and disburse the same as provided by the donors thereof.

Duties of Officers.—The President shall preside at the meetings of the Board of Trustees when present, and shall perform the usual duties of that office. The Secretary shall keep true and careful minutes of the meetings, and perform such other duties as shall be assigned to him by the Board. The Treasurer of the Board shall be the custodian of all funds under its control, shall collect and receive all money arising from rents or otherwise, make such disbursements and payments as the Board shall direct, and keep accurate books of account therefor. All cheques against said funds shall be signed by the Treasurer and President (or, in his absence, the senior member of the Board), and appropriate vouchers shall be taken for all disbursements. The Treasurer shall, under the direction of the Board, be the general manager of the real estate.

ARTICLE VIII

Standing Committees

The Standing Committees of the Chamber shall be:

An Executive Committee.

A Committee on Finance and Currency.

A Committee on Foreign Commerce and the Revenue Laws.

A Committee on Internal Trade and Improvements.

A Committee on the Harbor and Shipping.

A Committee on Insurance.

A Committee on Taxation.

A Committee on Arbitration.

A Committee on Commercial Education.

A Committee on Public Service in the Metropolitan District.

The Executive Committee shall consist of a Chairman to be elected by the Chamber at the regular Annual Meeting in May of each year, and, *ex-officio*, the Chairman of the Committee on Finance and Currency, the Chairman of the Committee on Foreign Commerce and the Revenue Laws, the Chairman of the Committee on Internal Trade and Improvements, the Chairman of the Committee on the Harbor and Shipping, the Chairman of the Committee on Insurance, the Chairman of the Committee on Taxation, the Chairman of the Committee on Arbitration, the Chairman of the Committee on Commercial Education, the Chairman of the Committee on Public Service in the Metropolitan District, the President of the Chamber, the Executive Vice-President, the senior Vice-President, the Treasurer, and the ex-Presidents of

the Chamber, with three members of the Chamber at large. The terms of office of the members at large shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen. At the Annual Meeting in May, 1924, three members at large shall be elected, one for one year, one for two years, and one for three years, their terms of service to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a member at large shall be elected to serve for three years to take the place of the one whose term of office then expires.

Each of the Standing Committees, except the Executive Committee, shall consist of a chairman and six members. The terms of office of the chairmen and of all members of standing committees shall terminate at the Annual Meeting in May, 1924, or as soon thereafter as their successors are chosen.

At the Annual Meeting in May, 1924, chairmen of all standing committees shall be elected, and six members constituting each standing committee shall also be elected, two for one year, two for two years, two for three years, the chairman and the terms of office of the other members to be designated on the ballot by the Nominating Committee. At the Annual Meeting in May, 1925, and annually thereafter, a chairman, and two members of each standing committee to serve for three years, shall be elected to take the place of those whose terms of office then expire. The chairmen of the standing committees shall be elected for a period of one year, but they may be re-elected once, and one year after the end of their service they may be elected to serve again, provided, the Chairman of the Arbitration Committee may be re-elected at the will of the Chamber. No member of a standing committee, except the chairman, shall be eligible for re-election to the same committee until one year after the expiration of his term. Vacancies occurring in any committee may be filled at any regular meeting of the Chamber upon nomination of the Executive Committee.

Three members of any committee shall constitute a quorum for the transaction of business.

ARTICLE IX

Duties of Standing Committees

Of the Executive Committee.—The Executive Committee shall, under the direction of the Chamber, have a general control of the property and affairs of the Chamber. It shall supervise the work of the Executive Vice-President, and direct the preparation of the Annual Report of the Chamber.

Excepting bills for salaries and rent which shall be approved by the President and paid upon his order or in his absence upon the order of one of the twelve Vice-Presidents, and except-

ing bills connected with the Real Estate owned by the Chamber and bills affecting the funds under the control of the Board of Trustees of the Real Estate, the Executive Committee shall audit all bills and claims against the Chamber and direct their payment if approved. It shall fix the amount of compensation received by the Executive Vice-President and by the Secretary. It shall have authority to employ such clerical and other help as in its judgment may be necessary. It shall fix the amount of all salaries and compensation for such service. The Executive Committee shall submit at the regular meeting preceding the annual election the names of seven members for appointment by the Chamber to nominate Officers and Standing Committees for election at the Annual Meeting to serve for the ensuing year, or for such periods as these By-Laws prescribe.

Of the Committee on Arbitration.—This Committee shall have complete supervision of all matters of arbitration referred to the Chamber and shall make rules and regulations for the conduct and disposition of all matters submitted in arbitration; it shall provide a form of agreement not inconsistent with existing provisions of law by which, so far as practicable the decision of the arbitrator or arbitrators shall become as effective as a judgment of the Supreme Court.

It shall compile and from time to time revise and keep a list of qualified persons, not less than fifty, willing to act as arbitrators under these rules, who shall be members of the Chamber. This list shall be known as—"THE LIST OF OFFICIAL ARBITRATORS" of the Chamber of Commerce.

Any matter in controversy may be referred by the disputants signing the form of agreement provided by the Committee, together with a stipulation to the effect that they will abide by the decision of the arbitrator or arbitrators, by them selected, and waiving any and all right to withdraw from such submission after the acceptance of their appointment by the arbitrator or arbitrators selected, and designating at their option either

(a) One of the persons named in said "List of Official Arbitrators," who shall act as sole arbitrator; or

(b) Any two persons to act as arbitrators, who in turn shall designate from said "List of Official Arbitrators," a third person to be associated with them as arbitrators; or

(c) The Committee on Arbitration of the Chamber of Commerce or a quorum thereof.

In any case the Committee on Arbitration may, in its discretion, decline to entertain a matter submitted for arbitration, in which event the selection of special Arbitrator or Arbitrators shall be void.

The Committee on Arbitration shall, from time to time, establish a schedule of moderate fees to be paid in all matters submitted, which fees shall be chargeable as decided by the arbitrators.

The Secretary of the Chamber of Commerce shall be the Clerk of the Committee on Arbitration.

The Committee shall from time to time as it deems wise make reports to the Chamber.

Of Other Standing Committees.—Their duties shall be to examine into and make report upon such subjects as may be referred to them by the Chamber, or they may originate and report to the Chamber such views as they may deem proper for its consideration.

They shall, respectively, keep regular minutes of their meetings and proceedings, in which the Secretary shall give them all required assistance, and they shall make reports to the Chamber as provided above, from time to time as they may deem advisable.

ARTICLE X

Special Committees

In addition to the standing committees of the Chamber, the Board of Trustees of the Real Estate, and the Committee on the Charity Fund, Commissioners of Pilots, and the Commissioner for Licensing Sailors' Boarding Houses or Hotels hereinafter provided for, there may be, on authorization of the Chamber, special committees, the members of which, including the chairmen, shall be appointed by the President or by the Chamber. The tenure of office of the membership of all existing special committees shall cease on the day of the Annual Meeting of the Chamber in May, 1924, or as soon thereafter as their successors may be appointed. The President elected at the Annual Meeting of each year shall then, or as soon thereafter as may be convenient, reconstitute these committees and report the membership of all these committees, including their chairmen, to the Chamber for its information. He shall at the same time indicate whether in his judgment any of these committees should thereafter be discontinued.

The Chairmen and members of such reconstituted committees shall serve for one year and until their successors in the discretion of the President are named. Any or all of these committees may be discontinued at any time by vote of the Chamber.

These committees shall keep regular minutes of their meetings and proceedings. They shall make reports upon such subjects as may be referred to them by the Chamber or they may originate and report to the Chamber such views as they may deem proper for its consideration.

ARTICLE XI

The Committee on the Charity Fund

This Committee shall take charge of the moneys and securities known as the JOHN C. GREEN Fund and those received from any other source, for benevolent purposes, and invest and re-invest the same from time to time, and shall have power to make distribution of the income thereof among those intended to be benefited. The Committee shall have power to fill any vacancies that may occur in their number by death, resignation or otherwise.

ARTICLE XII

Of Election of Special Officers Under the Laws of the State

The Chamber shall elect, in conformity with the laws of the State, the following named officers:

Commissioners of Pilots.—There shall be elected by ballot, to serve for two years, at a special meeting called for the purpose, three members of the Chamber to act as Commissioners of Pilots. Whenever any vacancy shall occur by death, resignation or otherwise, of either of such Commissioners so elected, the vacancy shall be filed at a special meeting of the Chamber, and the term of service of the member so elected shall date from the day of such election (*as required by the law of the State of New York, passed June 28, 1853, and amendments*).

Commissioner for Licensing Sailors' Boarding Houses or Hotels.—There shall be elected by ballot, to serve for one year, at the Annual Meeting of the Chamber in May, a member of the Chamber to act as Commissioner for Licensing Sailors' Boarding Houses or Hotels in the City of New York (*as required by the law of the State of New York, passed March 21, 1866*).

Whenever any vacancy shall occur in the above named offices by death, resignation or otherwise, except in that of the Commissioners of Pilots, the same shall be filled at the regular meeting of the Chamber next following.

ARTICLE XIII

Quorum and Adjournment

Twenty-five members of the Chamber, of which number the President or one of the twelve Vice-Presidents must always be one, shall be necessary to form a quorum for the transaction of business, or to ballot for members.

In case a quorum shall not be present at the time fixed for any regular or special meeting of the Chamber, the President, or, in his absence, the senior Vice-President present, may adjourn the meeting to such other day in the same month as he may judge proper.

If there fail to be a quorum from the absence of the prescribed officers, it shall be the duty of the Secretary to declare the meeting adjourned *sine die*.

ARTICLE XIV

Rules of Order

At all regular meetings of the Chamber, the order of business shall be:

1. Reading of the minutes.
2. Report of the Executive Committee on nominations for membership.
3. Ballot for members.
4. Report of the Executive Committee.
5. Reports of Standing Committees, in their order.
6. Report of Trustees of Real Estate.
7. Reports of Special Committees.
8. Unfinished business.
9. New business.

Members having any motion or remarks to make shall rise and address the Chair. All resolutions or propositions, of whatever nature, must be reduced to writing before they can be entertained. The Chairman of any special or standing committee submitting a report shall be permitted five minutes, in addition to the time necessary to read the report, for explanatory remarks in reference thereto. Members participating in the debate shall be heard only once and shall be permitted not exceeding ten minutes each, unless by unanimous consent the time of any member may be extended. The Chairman of the Committee whose report is under discussion, or any member of the Committee who may be designated by the Chairman, shall be permitted ten minutes' argument in conclusion. The usual parliamentary rules as laid down by Robert shall be followed.

At special meetings called by the Chamber no business other than that named in the requisition and call for the special meeting shall be entertained, even though unanimous consent be had.

If any resolution or report (other than reports or resolutions from standing or special committees of the Chamber) which calls for an immediate expression of the Chamber's opinion or for action by the Chamber is proposed and is objected to by any member present, it shall be the duty of the President to state the objection, and to call upon those who sustain the same to rise. If one-fourth of the members voting rise in support of such objection, then such resolution shall be referred to a Standing or Special Committee, who shall report thereon at the next meeting of the Chamber; and upon the presentation of such report, the same, and the original resolution, and the subject referred to, may then be acted upon as provided in this article.

ARTICLE XV

Privileges of Strangers

Members may, by ticket, introduce any person to the Rooms of the Chamber and the use of the Library or other facilities of the building subject to such rules as the Executive Committee may from time to time adopt.

ARTICLE XVI

Interim Reports

Whenever it appears that immediate expression of the Chamber's views on any given subject is sought, or when such expression is deemed advisable, and when by reason of the summer recess or when for any other reason it is deemed impracticable to secure action by the Chamber as a body, any standing or special committee may present to public officials at hearings or otherwise, reports or recommendations of the Committee, provided: that such report is concurred in by a majority of the Committee and by the President of the Chamber or the Chairman of the Executive Committee; that it is made plain in the presentation or publication that the report represents the opinion of the Committee only; that such report be presented to the Chamber at its next meeting with a statement of the action of the Committee; that the action then taken by the Chamber be transmitted to all those previously advised of the Committee's recommendations.

XVII

Powers of Delegations

Delegations or Committees, which may be appointed by this Chamber at any time to represent it at any meeting of Chambers of Commerce or Boards of Trade, or at any other Convention, meeting or Assembly whatever, shall have no authority, by virtue of such appointment, to bind this Chamber to concur in the action of any such body, except that when the Chamber has taken definite action upon the subject or subjects under consideration, such delegate may speak for and represent this Chamber with whatever powers have been delegated to him, but no other; but such Delegations or Committees shall subsequently report their action to the Executive Committee.

ARTICLE XVIII

Amendments to By-Laws

All proposed amendments to the By-Laws shall be submitted in writing, at a regular meeting of the Chamber; but no such amendments shall be acted upon before the next regular meeting.

ROLL OF MEMBERS

OF THE

Chamber of Commerce of the State of New York

CORRECTED TO JULY 15, 1924

HONORARY MEMBERS
